HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

CARSON'S PAINT,

PATRONISED BY THE QUEEN,

Is extensively used for all kinds of

OUT-DOOR WORK.

It is especially applicable to

WOOD, IRON, BRICK, STONE, AND COMPO.

Removed from Cornhill.

JOSEPH GILLOTT'S STEEL PENS.

SOLD BY ALL DEALERS THROUGHOUT THE WORLD.

RUPTURES—BY ROYAL LETTERS PATENT.

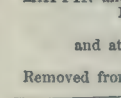
WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT



ELASTIC STOCKINGS, KNEE CAPS, &c.,

for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London

CURES OF BRONCHITIS,

Asthma, Consumption, and Coughs, by Dr Locock's Wafers.—Mr Clifton, 45 Fleet street, Bury, writes:—"I have great pleasure in recommending the wafers, knowing that they are a sure remedy, &c." In asthma, consumption, bronchitis, coughs, colds, gout, rheumatism, and all hysterical and nervous pains, instant relief is given by Dr Locock's wafers, which taste pleasantly. Sold by all druggists at 1s 1½d.

28th September, 1871.

FORTY-SIXTH REPORT OF THE

COMMERCIAL BANKING COMPANY OF SYDNEY.

"Presented to the shareholders at a general meeting, held at the Banking House, George street, on Friday, the 21st day of July, 1871."

	£	s	d
The Directors have to report that, after deducting rebate on current bills, paying note tax, and making provision for bad and doubtful debts, the profits for the half-year amount to	43,949	10	6
The undivided balance from last half-year	4,633	12	0
	48,583	2	6

—which the Directors appropriate thus:—

Dividend for half-year at the rate of 15 per cent. per annum	£30,000	0	0	
Bonus of 5s per share	4,000	0	0	
Reserve fund	10,000	0	0	
Undivided balance	4,583	2	6	
				48,583 2 6

The retiring Director, Edward Knox, Esq., being eligible for re-election, has given the requisite notice.

It devolves on this meeting to elect Auditors for the ensuing year.

The dividend and bonus are now payable.

R. JONES, Chairman.

The Company is formed for the purpose of working a series of valuable blue elvan granite and other road stone quarries, situated close to the river St Germain's, near Saltash and Plymouth. The quality of the stone is equal to Guernsey or any other road stone in the market, and can be produced at such a price as will enable the proprietors to compete successfully with the Guernsey quarries in the London market; and as regards the large local demand, there are no other quarries in the district that can produce stone so good, and at such low cost.

At Weardle Point Quarries an extensive wharf and jetty have been built for loading sea-going vessels, and also a commodious and plant generally for carrying on a large trade. There are two smaller quarries on the opposite side to Weardle, and very extensive road quarries higher up the river, known as Lower Quarries, containing vast beds of fine stone. It will be seen, therefore, that this Company will possess the monopoly of stone in the district, and one in opposition is to be feared. The stone from all the quarries is well and favourably known in the London and local districts for road metal and pitching. The important parishes of Lambeth, Camberwell, Croydon, West Ham, Southwark Iron bridge, and others have used and approved of it, and the important town of Plymouth and neighbourhood have been, and are now being, supplied from these quarries. With a proper application of capital to the development of the properties, and the extension of the business in all parts, a successful result is anticipated, and the public are confidently asked to become subscribers. The steam plant, and stock of the whole quarries will be made over to the Company for the sum of £7,000 in cash and £1,000 in fully paid up shares, and no more cash is to be paid to the vendor upon his shares until the general shareholders have first received 7½ per cent. upon their capital. Agents of good standing and long association in the stone trade, will be appointed in London and elsewhere and with proper energy a flourishing business must ensue to these valuable properties. The contract referred to above (which is the only one made by or on behalf of the Company) is dated the 9th day of September, 1871, and is made between William Hayward Mallett, the vendor, of the one part, and Richard Welding and William Henry Beck, the purchasers on behalf of the Company of the other part, and can be seen at the offices of the Company. Prospectus, plans, &c., can also be had upon application.

THE NEW SOMBRERO PHOSPHATE COMPANY, LIMITED.

Incorporated under the Joint Stock Companies' Acts, 1862 *and* 1867, *by which the Liability of each Shareholder is Limited to the Amount of his Share.*

Capital, £130,000, in 13,000 Shares of £10 each.

With power to increase, of which 10,000 Shares are offered for Subscription.

£1 per Share payable on Application, and £2 on Allotment, the remaining £7 on the 1st November.

Subscribers may anticipate these Payments under Discount at Three per Cent.

TEMPORARY OFFICES—1 Leadenhall street, E.C.

PROSPECTUS.

This Company is formed for the purpose of purchasing the Island of Sombrero, in the West Indies, and working its well-known and important deposit of phosphate of lime.

The Island is held on lease, granted by Her Majesty, for a term of 21 years, from the 16th of March, 1865, at a yearly rental of £1,000, without any royalties. Upon the Island, and to be included in the purchase, are new and improved machinery, buildings, and tramways, specially designed and suited for raising and shipping the phosphate, and the works and buildings necessary for accommodating a staff of 400 men. The working plant and machinery are in the most efficient order.

This property formerly belonged to the Sombrero Company, which is now being wound-up under the Court of Chancery. The sole cause of this liquidation was the insufficiency of capital, and the consequent forcing of the produce at unremunerative prices. This is proved by the following statement, which has been certified as correct by the Official Liquidator, Mr H. Chatteris, under whose able management the island has been worked, and which shows the profits made in the ten months during which the cargoes received have been realised. The subsequent shipments will produce a still higher rate of profit, but as the account sales have not been closed, they are taken from this statement.

The particulars of shipments show that there were raised and shipped by the liquidation in ten months (July, 1870, May, 1871) 36 cargoes of phosphate, producing 16,127 tons 3 cwt 1 qr 5 lbs, at prices varying from 85s to 95s delivered in England, and from 40s to 42s 6d free on board, and which produced net proceeds £38,960 3 6

The cost of realising this was £11,300 in cash, and in stores £4,579 2s 8d, in all.....	15,879	2	8
Leaving in hand a net profit of 28s 7½d per ton for ten months.....	23,081	0	10
Or, per annum.....	27,697	5	0
The present price, and which has been obtained by the liquidation, is however £5 per ton, which would have produced, in addition, on the above returns.....	14,502	14	3
Equal to an *annual clear profit* (subject to £1,000 per annum for rent) of.....	£42,199	19	3

In the above result the basis of the present ratio of production under liquidation in Chancery is taken, but with a sufficient capital and the prudent management of experienced commercial men, this produce may be easily increased by 5,000 tons per annum, which would yield *an annual profit of* £50,000 *after payment of rent and expenses of management.* The result and figures of the ten months' liquidation have been carefully checked, and may be absolutely relied on.

A report, made after careful survey, estimates the deposit at 700,000 tons at the least, and for ten years there has been a steady and continuous supply, proportionate to the labour and capital employed.

The capital of this Company has been fixed at £130,000, represented by 13,000 shares at £10 each, which will include for working capital the sum of £20,000.

To each share will be attached a bonus warrant of £10. Each year £9,000 of the net profits will be set aside and bonus warrants redeemed to that amount. The bonus warrants for redemption will be drawn by ballot. In this manner, the capital subscribed will be redeemed to all the shareholders during the 14¼ years of the concession, and yet the shareholder will continue to receive his dividends on each share, and will participate in the distribution of the residue of the capital in the hands of the Company if the lease be not renewed. It is however, confidently expected that the Crown will renew the lease, and that the Company will continue to earn dividends as heretofore.

The capital, on the above calculations of ascertained profit, leaving out the increased production, would produce a profit of about 40,000*l*, which would be applied as follows:—

	£	s	d
Profit on the minimum yield (say)	40,000	0	0
Annual sum to be set aside to form a sinking fund to provide for return of capital to the bonus warrants as above stated	9,000	0	0
Leaving for dividends per annum	31,000	0	0

—equivalent to about 24 per cent. net, in addition to the yearly redemption of part of the capital, while, with the estimated increased production, a dividend of 38 per cent. would be realised, besides the annual sinking fund.

The existing contracts of the late company leave to be delivered one fourth part, not exceeding 3,000 tons, of all the phosphate made ready, for shipment between 1st January, 1871, and the 29th September, 1871 at 42s 6d, free on board, 1,500 tons at 95s, 1,100 tons at 90s, 350 tons of brown fine at 80s, and of this about 2,000 tons are raised and ready for shipment, and to this the Company will be entitled at a rate of 40s per ton, leaving a profit proportionate to the above calculation on these particular contracts.

The phosphate of this Island is of the highest quality and commands a ready and preferential sale at £5 per ton, at which price the present proprietors are refusing contracts on account of the upward tendency of the markets.

There is every reason to believe that this tendency will continue. Phosphate of lime is an article of the highest importance, both as a fertiliser and for the utilisation of sewage, and contracts for it are eagerly sought, not only in the United Kingdom but throughout the continent.

The Directors have entered into a provisional contract to purchase the property, including the lease of the Island as from 29th September, 1871, together with all buildings, plant, fixed and rolling-stock, machinery, steam engines, lighters, &c., now at the Island, complete, and in full working order, for the sum of £110,000.

Copy of this contract, which is dated the 20th September, 1871, and made between John Marsh Evans of the one part, and Francis Pavy, on behalf of the Company, of the other part, may be seen at the Office of the Company's Solicitors.

In cases where no allotment is made, the deposit will be returned without deduction, and where an allotment is made of an amount smaller than that applied for, the surplus of deposit will be applied towards the amount payable on allotment.

In default of payment of the respective instalments at their due dates, all previous payments will be liable to forfeiture.

The following is a copy of the Memorandum of Association:—

1st. The name of the Company is the New Sombrero Phosphate Company, Limited.

2nd. The registered Office of the Company is to be situate in England.

3rd. The objects for which the Company is established are:—

1. The purchasing or leasing and working of mines or quarries of phosphate of lime, and other minerals or products of a like or similar nature, in the Island of Sombrero, in the West Indies. The rendering marketable, manufacturing, transportation, and sale of phosphate of lime and other minerals or products of whatever kind obtained by such working. The acquiring, making, providing, maintaining, and using of buildings, roads, railways, tramways, canals, stock, plant, and other works and conveniences for the purposes aforesaid, and otherwise in connection with the property, operations, or business of the Company. The acquiring, providing, chartering, and using of sea-going and other vessels for the conveyance of the aforesaid minerals or products. The carrying on the several branches of business of a trading company in the minerals or products aforesaid, and the doing all things incidental or conducive to the foregoing objects.

4th. The liability of the members is limited.

5th. The capital of the Company is one hundred and thirty thousand pounds, divided into thirteen thousand shares of ten pounds each.

FORM OF APPLICATION FOR SHARES.

To the Directors of the New Sombrero Phosphate Company, Limited.

GENTLEMEN—Having paid to Messrs Glyn, Mills, and Co. the sum of pounds, being a deposit of £1 per share on shares in the above Company, I request you to allot me that number of shares; and I hereby agree to accept such shares or any less number you may allot to me, according to the terms of your prospectus, and I authorise you to insert my name on the register of the members for the number of shares allotted to me.

Name (in full) .....
Address .....
Profession (if any).....
Date..... 1871.
Signature .....

(Addition to be filled up if the applicant wishes to pay up in full on allotment.)

I desire to pay up my allotment in full under discount at 3 per cent.
Signature .....

THE INVESTOR'S MONTHLY MANUAL.

THE INVESTOR'S MONTHLY MANUAL for September gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. Further contains a Financial Review of the Month; New Capital Issued and Called; Table of Railway Traffic Receipts; Numerical Reports of Stocks, Railways, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to September 27.

Advertisements for the next Number to be published on October 28, must be sent to insure insertion, on or before October 23.

OFFICE—349 Strand.

REASONS WHY THE BANK OF ENGLAND SHOULD IMMEDIATELY RAISE ITS RATE OF DISCOUNT.

Upon the state of the accounts shown by last week's return, we think it much to be regretted that the Bank of England did not immediately raise its rate of discount. The diminution in its resources has been very great and very rapid.

	£
This time last month the bullion in the Bank was	24,817,000
It now is	20,214,000
Decrease	4,603,000
At the same date—	
The reserve of coin and notes in the banking department was	14,727,000
It now is	8,920,000
Decrease	5,807,000

And though part of these great diminutions is due to the usual changes at the close of the quarter, by very much the greater part is due to the demand for gold for Germany, where it goes to pay the French indemnity, and whence it does not return. The most material fact in our present situation is that we are poorer than we were a month since, and that the reduction of the reserve in the Banking Department by anything like another 5,807,000*l* would be very alarming and very dangerous.

Has the cause then that has produced these great changes ceased to operate? or if it has not ceased to be at work, have we taken sufficient steps to counteract its effect?

Upon the first question, to say the least of it, no one can be certain that the cause has ceased to operate. A very considerable part of the indemnity was paid in bills on England, and as those bills fall due the Berlin Government has the *power* if it chooses to take the gold from this country, and to keep it, as it has kept the former gold. A large sum—the produce of such bills—is now in London waiting for orders, and farther sums must day by day become the property of the Berlin Government as the bills they hold mature and are paid. The exact amount of these bills is not known, but the French indemnity of 200,000,000*l* is a sum so vast that even a small part of it gives the receiver of it great monetary power. 5,000,000*l* or 10,000,000*l* is but a small part of so large a sum, but it is an immense deal for the Bank to have to pay. And the amount of bills on England still held by the Berlin Government is according to many much larger than that.

Nor—to put it at the lowest—can we be sure that the Berlin Government will not take the proceeds of their bills away. The natural disposition of every creditor is to be paid. The German Government may naturally say—"When we get our "money we will consider what we will do with it. We may "lend or we may not lend it. But before we inquire into "that at least we should like to have it." And there are two reasons—one rational and the other irrational—why in this case especially the German Government is likely so to say. The rational reason is that the Government is about to propose to the Imperial Parliament a change in the whole German currency. That currency is now a most inconvenient and miscellaneous one of silver; the Government want to turn it into a uniform and convenient one of gold. The exact propositions they will make for this object—the precise coins they may think best—do not concern our present purpose, nor need we inquire what the Parliament will say to the detail of those proposals. The essential point is clear that the Berlin Government contemplates the immediate coinage of a

very large amount of gold (a new currency for Germany is an immense operation), and for that object it is essential that it should have the entire possession of that gold, or at least have the certain and instant command of it. And most certainly this is the view the Berlin Government takes of its position. It is too matter of fact and cautious to propose to coin gold unless it is sure of having that gold. Secondly, what is far less rational, it is alleged that the Berlin Government would like to hold a large sum in actual cash. This is the traditional policy of Prussia from Frederick the Great downwards, and it is said that the present Emperor would like to extend and develop it. No doubt this is barbarous. If the German rulers wish to have a fund against future emergencies, and it is only reasonable that they should wish it, having the sudden command of such a sum as this indemnity, they ought to invest that fund in convertible securities, in foreign and other stocks, which they can sell on the instant and get the money. The fund would then yield a revenue, and lessen the burden of taxation; it would not be uselessly locked up in mere coin. But though this seems sound political economy, we are not sure that the Prussian Government will agree to that economy. It is above all things a military Government; and all great soldiers have a liking for coin, and a dislike to paper and credit. The great Napoleon had that feeling in almost morbid intensity, and most great military authorities in some degree partake of it. And very naturally, for the operations of war require specie if they require anything; they, too, may come at times when, if you have not that specie itself in store, it may not be very easy for you to obtain possession of it. We can well imagine a rigid, a cautious, and a military Government like that at Berlin now saying—"We can get bullion now without any "difficulty. Almost all the inconvenience in the money market "falls on foreigners. As a rule, Germans do not feel it. If "we do not take the money now, if we wait till a time of "war, the money market may be troubled: we may not be "able to get it, or we may have to inflict great sufferings on "Germans in order to get it." The tradition of soldiers is to like money they can see, and the present Government at Berlin is for many purposes, though not altogether, a Government of soldiers.

At any rate therefore we cannot be sure that the cause which has been so powerful and which has taken so much treasure from the Bank before has now stopped. It may have, but at least we cannot be sure it has. On the contrary, there is (as we can testify) an important feeling in Germany that the Government will add to their hoard of specie, and not diminish it. But as men of business, we ought not to rely too much on passing reports of foreign intentions. Our course is plain. We have a great liability; we are under a great engagement to pay money; we must not discuss whether our creditor will or will not ask for payment; we must have the means of paying him whether he asks or not.

What steps are we then taking to meet the demand on us? It cannot be said that we are taking sufficient steps. We have indeed raised our rate of discount, but we have not raised it enough. Money is still cheaper than in most countries on the continent; it ought to be dearer. We being under this large liability ought to take instant steps to attract the means of paying it. We have found by experience that if our rate is considerably dearer than that of foreign nations we shall immediately receive what we require, but it must be considerably dearer before we do receive it.

Probably indeed a less amount of difference of rate, or a shorter continuance of that difference, will suffice now than at some former times. The natural tendency of the exchanges is likely to be in favour of this country. This is the effect of the purchase of bills on England by the French Government, and of the payment of those bills to Germany. Those bills are consequently taken out of the general bill market. Now, supposing that before there was a position of equilibrium,—supposing that the bills due *from* England were exactly equal to those due *to* England, so that there would be no passage of bullion,—then it is plain that if a very large amount of bills on England is withdrawn from the market, the bills due to England will greatly preponderate, and the trade exchange, the commercial balance of payments, will be favourable to this country, and we shall in consequence receive payment in bullion.

Supposing that the bills purchased by the French Government were finance drafts and bills manufactured for the purpose, this reasoning would be strengthened. In that case the drawers would certainly have to provide for their payment in this country, and must remit accordingly.

But for immediate banking purposes it would be dangerous to speculate too much on the instant effect of this cause. So many causes act on the foreign exchanges and on the balance of payments, that it is impossible to predict them with confidence. Especially is it difficult to predict them when time is not given, and money is wanted to discharge incurred liabilities. In such a case we are not justified in delaying to use the only certain and the always efficacious remedy. We earnestly hope therefore that the Bank will at once abandon its dilatory and erroneous policy, and raise the rate of discount rapidly to 5, 6, or whatever rate per cent. is necessary to bring in large supplies of foreign bullion.

THE PROSPECTS OF THE REVENUE.

THE condition of the Revenue is now superficially as well as really satisfactory. There is an increase in the last quarter over the corresponding quarter of last year of 811,787*l*, and as very little of it is due to the changing item of "miscellaneous," or to the additional twopence of the income tax—the only Budget change actually made last Session—it is easy to see that there is an augmentation of the permanent sources of revenue, which can only be referred to the steady growth of the country. When the return for the first quarter of the financial year was published, we pointed out that the falling off there shown in some of the principal heads of revenue was only apparent, and was caused by Budget changes, there being a real improvement under the apparent falling off; and the account just published confirms the view we took. As the figures for the half-year still only show a slight apparent improvement, apart from the item of miscellaneous, it may be useful to analyse them somewhat closely, and see how much more abundantly the revenue is coming in than the Government estimated in the spring.

The net increase in the half-year ending 30th September is 1,338,976*l*, but deducting the increase on the income tax and miscellaneous—viz., 137,000*l* and 966,976*l*—it is only 235,000*l*, which certainly does not seem very much. As the expenditure this year is to be 3,000,000*l* more than in last year, so slight an augmentation of revenue could not have prevented new taxes to make up for the additional expenditure. The point to be remembered however is that the important comparison to be made is not with the actual revenue of last year, but with the Budget estimate of this year. In the previous year, or a part of it, certain sources of revenue may have existed which do not exist at all in the current year, and this we know to have been the case as regards the Sugar Duties, Taxes, and Stamps—the changes in the latter two heads having besides been very complicated. Any alteration of this kind ought to have been allowed for in the Budget estimate, and we cannot but think the revenue satisfactory when it compares well with that estimate. Looked at in this way then the improvement is very striking. From tables which we subjoin it will be seen that while the actual yield of revenue in 1870-71 under every head excepting income tax and miscellaneous—

	£
Amounted to	60,366,000
The estimate for 1871-72 was	59,395,000
Decrease	971,000

In the half-year which has just passed however—

	£
The actual yield is	27,765,000
Yield in 1st half-year 1870-71	27,530,000
Increase	235,000

Adding these two items together—the deficiency on the previous year's return reckoned on in the estimate, and the actual increase on that return already accrued—we get a total of 1,206,000*l*, by which we are already better off than the Government expected we should be. If the remaining half of the year should only turn out as well, there will manifestly be a large surplus, and the additional twopence to the income tax will be proved to have been wholly unnecessary.

This inference is confirmed if we look more minutely at the items. The decrease in no case promises to be so great as was expected; in other branches where a deficiency was anticipated the increase is already enormous; and in one or two branches where improvement was allowed for, the actual improvement

has been at a much greater rate than the estimate. To take five of those branches of revenue where instead of a decrease we get a larger increase, we find that in excise—

	£	£
The anticipated deficiency was	365,000	
The actual improvement is	244,000	
Total		612,000
And in stamps—		
The anticipated deficiency was	257,000	
The actual improvement is	412,000	
Total		669,000
Aggregate improvement		1,281,000

—showing an improvement of 1,281,000*l* on these two heads alone. Even if the yield in the remaining half of the year should exceed that of the previous year no more than the yield in the first half of the year has done—viz., 244,000*l* and 412,000*l*—the actual improvement on the estimate under these two heads alone would be close upon 2,000,000*l*. With regard (2) to the branches where a deficiency was anticipated and has accrued, it appears that in the Post Office the deficiency reckoned on was 100,000*l*, but in the first half-year it is only 38,000*l*, or less than the rate of decrease reckoned, and in Crown Lands the deficiency reckoned on was 10,000*l*, but there is actually accrued in half-a-year only 1,000*l*. The case appears to be different with respect to Customs and taxes, the deficiency reckoned on in the one case being 91,000*l*, and the amount accrued 166,000*l*, and the corresponding figures in the other case being 325,000*l* and 401,000*l*. In these departments, however, the estimated deficiency necessarily falls exclusively on the first part of the year, and the figures show that it is being made good. The deficiency in Customs at the end of the June quarter was 302,000*l*, and it is now only 166,000*l*, so that the remaining quarters of the year will easily extinguish it. In taxes again the deficiency at the end of the June quarter was 415,000*l*, and it is now only 401,000*l*, which is only after all 6,000*l* more than the estimate. We may expect then that on these heads too the result will be better than the estimate, so that there will be nothing to set against the gains elsewhere. There remains (3) one branch of revenue where improvement was reckoned on—viz., the telegraph service, and we find that while 250,000*l* more was expected to come in than had come in the previous year, the actual improvement so far as the year has gone is 185,000*l*, which would give 370,000*l* for the whole year, or 120,000*l* more than the estimate. Looked at in detail therefore every branch of revenue promises well for the country. If the national prosperity only continues it would not be at all surprising to find the estimates of revenue exceeded by two-and-a-half millions sterling, and an accrued surplus for the year of that amount.

But will the country continue prosperous? Barring accidents, we think there is no sign of any check during the currency of the present financial year. The harvest has been deficient, and corn is getting dearer, but a curse like this does not operate quite immediately; it takes months of dear corn to diminish profits and wages generally, just as it takes months of cheap corn to diffuse universal prosperity. Probably the deficient harvest will have some effect this year, but we should dread its effects more the year after, especially if the next harvest should only be moderate or bad. Of course it is quite possible that the Government may spend the surplus, and it appears to be spending quite up to the estimate; but it will none the less remain true that the ways and means coming in are considerably in excess of the amount that was considered necessary last spring.

I.—Estimate of Revenue for 1871-2 compared with Actual Yield of 1870-71 (excluding Income Tax and Miscellaneous).

	Actual Yield 1870-71.	Estimate 1871-72.	Decrease.	Increase.

MR FORSTER AND EDUCATIONAL COMPULSION.

The ultra-Liberals of the education movement are preparing a very great difficulty for themselves. It is their great creed—and they have not been slow to inveigh against Mr Forster for not joining heartily enough with them in this creed—that compulsion must be applied at once and universally to bring children to school; that the educational pressure to be made all over the country will be a mere dead letter unless the Government go on to make it penal for the children not to attend. Well, we can understand that position, and to a certain extent sympathise with the motive, though we have steadily maintained, and still maintain, that there is real danger of provoking a reactionary feeling in the ruder country districts towards education, and that no calamity could be greater for the country than the rise of any feeling that the parents were being persecuted under the pretence of educating the children. But at least if we are to have compulsion, let us in common prudence have it in the form least likely to cause resistance and resentment. Let us leave every opening for the parents to persuade themselves that they are sending their children to school by their own wish, and not at the command of the State. Let us leave them as much as possible of the reality of freedom in the matter—as much, that is, as is in any way consistent with the real advantage of their children; and at least let us not study to deprive them of any sign or token of freedom on which they may pride themselves. Let us not ostentatiously rattle the fetters into which we intend to put them before their eyes. Let us not deliberately provoke them to wrath by depriving them of any privilege or authority of which it is not absolutely requisite, for their children's sake, to deprive them.

Yet this is precisely what the ultra-Liberals are now trying to do. The Birmingham League, as is well known, is pressing eagerly on the Government the repeal of the right accorded to School Boards to pay for the schooling of the children of the poorest class in any qualified elementary school their parents may prefer. The League regard this as a violation of "the rights of conscience," because it enables the

School Board to pay away some of the money of a Wesleyan ratepayer (suppose) to a Roman Catholic elementary school for the schooling of some poor little Irish Pat, or to pay away in like manner the money of a Catholic ratepayer to the managers of a Wesleyan school for the schooling of some destitute little Welsh Owen. And the Nonconformists are taking up the cry and attacking the Government on the subject with a perfect enthusiasm of unanimity. Thus, at a meeting held last Thursday at the Cannon Street Hotel, Mr Charles Gilpin, M.P., assured Mr Forster that he had betrayed the confidence placed in him by the Nonconformist bodies in this matter. He declared it to be a matter of religious principle that "the money of the "ratepayers should remain under the control of the "ratepayers;" "that that which was taken from the pockets "of men of all kinds of religious denominations should not be "applied for the furtherance of the views of any particular "sect." Now as to "the money of the ratepayers remaining "under the control of the ratepayers," Mr Gilpin, if he had understood the state of the law, which apparently he did not, would have had nothing to complain of. The School Boards are elected by the ratepayers, and the School Boards are not compelled to pay the fees for a poor child at any qualified school selected by its parents unless they like. They are *empowered* to pay the fees for a destitute child at any school selected by themselves or by the parents as they choose. They are even *recommended* to have some regard to the parents' wishes in this matter. But they have their funds at their own disposal, and can at any time decline to permit destitute Roman Catholic or Wesleyan parents to have their child paid for at a Roman Catholic or Wesleyan school if they please, and compel them to send such children to the Board School.

Of course if Mr Gilpin thinks it wicked even to permit a penny paid by a Wesleyan to go to help a school for poor Roman Catholics, or a penny paid by a Roman Catholic go to help a school for poor Wesleyans, then he must of course agitate for the repeal of the permissive clause in question. But let him consider the effect on the compulsory education for which his associates in agitation are crying out. What they appear to wish is that the School Board in every town, and soon, as they hope, to be established also in the country districts, should be empowered to press all children into school, whether the parents can pay for their education or not,—either into free schools where there are free schools, or into Board schools, the Board remitting the fees. Now of course either the free elementary schools or the Board schools will be schools where, if religion is taught at all, it is taught after some very unsectarian fashion, which the poor will be told by some of their religious teachers is "not gospel "teaching," or by others not "the Church's teaching," and the parents will either imbibe, or sometimes perhaps find it convenient to affect to imbibe, the greatest horror of such schools. For remember that in the genuine rural districts there is often no parental enthusiasm at all for education, and a good deal of enthusiasm for the pence which children get by frightening away birds or running on errands. The real effort will be to find excuses against sending their children to school, and nothing will suit them better than a religious objection. Conceive a parent brought up before the magistrates for refusing to send his child to a Board School, and professing that it went against his conscience so to do; that he was quite prepared to send him to a school conducted by certain religious people, but that the Board declined to pay for his child there, and would only pay for him at a school where the father believed, or professed to believe, that his son's soul would be imperilled. Conceive such a case as this, and let us ask what would be the feeling of the country if such a parent was to be imprisoned for resisting compulsion? We should have an outbreak against the compulsory law in no time. It is perfectly clear that if we are really to apply compulsion honestly, we must give the parents every possible freedom of choice compatible with their compliance. With parents who are rich enough to pay their children's school pence at any qualified elementary school they themselves prefer, the difficulty will not of course occur. But in the country we shall have multitudes of parents who are not rich enough, and whose children, if they are to be taught at all, must be taught at the expense of the rates. Will it be possible for a moment to compel all these parents to send their children to any school of which they choose to express a deep religious distrust? Why, it might bring about a rebellion, and it *would* bring about the deepest discontent.

The ultra-Liberal educationists, in their eagerness to attack Mr Forster, are simply countermining themselves. If they succeed they will put off the extension of the compulsory principle for generations. We cannot but warn these too headlong reformers that the weapon with which they are now attacking the Government will speedily be turned against their own darling scheme, and that for their own sakes it would be well for them if it should at once drop from their hands.

THE STRIKES.

We cannot but lament the mania for strikes which seems to have seized English workmen in the midst of their present prosperity. The Newcastle engineers, whose case has been prominently before the public, have now been "out" for eighteen weeks, the latest attempt at conciliation having failed; and what is taking place at Newcastle is only a specimen of what are now regular occurrences in the labour market throughout the United Kingdom. A strike of the South Wales colliers, which lasted many weeks, only came to an end the other day; the Staffordshire potters, the Sheffield cutlers, and various trades in Birmingham, have all been striking or threatening to strike; the silk weavers, of whose distress we heard so much not very long ago, took advantage of the first glimpse of any permanent work at all to strike for higher pay; and now the Clyde shipwrights, who have to thank so much the strikes of the Thames workmen for the extension of their own industry, have been seized by the common mania. We hear of these affairs with much the same feelings that we would receive the news of a bad harvest, or the destruction caused by an earthquake, or the check given by war to the operations of industry. The strikes in their immediate effects are a pure calamity, implying as they do a great stoppage of production, and as the result a great diminution of profits, and still more of wages, extending far beyond the trades which are directly affected. The South Wales strike, for instance, is calculated to have caused a loss of at least a quarter per cent. on their capital last half-year to the shareholders of the Great Western Railway, and this is only one of many indirect losses which such strikes cause, and which, if they were only a little more general and long-continued, would speedily culminate in one of those periods of distress and slack work which any serious failure of profits infallibly produces. As strikes are so mischievous and are nevertheless the occasion of a great amount of misplaced sympathy for the workmen who strike, we may take the present opportunity to point out some of the mistakes which are frequently made regarding them, especially among a certain class of politicians and literary men.

In the *first* place, it is a very common mistake to suppose that some defect in manner on the part of employers is a justification for workmen striking. In regard to the Newcastle strike, for instance, we have heard a great deal of the unconciliatory conduct of the masters when the workmen's demands were first presented to them. The masters, it is said, replied by a curt lawyer's letter, at which the men took offence. The notion seems to be that these mistakes of form which employers are alleged to commit, and which it is likely enough they are sometimes guilty of, in some way excuse a refusal to work which would not otherwise be expedient, although the result may be wide-spread distress among the workmen and their families, frequent appeals to the charitable, and a serious addition to the pauperism of the community. We must take leave to deny that the manners of employers, however much they may account for strikes in the present temper of English workmen, form any excuse for the latter's refusal to work. The refusal is too serious a matter to be affected by such considerations. Employers and their ways may be sometimes hard to bear, but the evils are nothing to the loss and starvation which workmen bring on themselves by idleness. It is only a choice of evils, and we cannot but wonder at the temper which makes people prefer the humiliation of pauperism or quasi-pauperism to the so very much lighter grievance of employers with disagreeable manners. In the Newcastle instance the offence of manner, if any, was of the most trivial sort, which individual workmen could only take umbrage at by a most far-fetched and sentimental construction—not a thing to be set in the balance for the moment with the actual hardships and loss which the strike has

entailed. However much the masters may be to blame therefore, the thing to blame, so far as the public interest is concerned, is the folly of men who risk their living and the welfare of their families on such trifles as they allege in their defence. We cannot but despair of our workmen so long as arguments like those put forward are believed to have any relevancy.

It is not inappropriate to observe that the particular offence alleged in the Newcastle case appears to have been directly occasioned by the action of the Unions themselves. The gist of the accusation against the employers is their replying through an agent instead of directly. The workmen are annoyed at the interposition of third parties in the transaction of business which could be more easily settled by direct negotiation. But the men themselves have set the example of employing agents, the leaders of a Union being as much third parties as the lawyer of the employers. If anything has been lost by the refusal to negotiate directly, it was lost from the moment that masses of workmen, instead of dealing with employers themselves, preferred the agency of Unions who represent discordant interests, whose leaders are almost necessarily less competent agents than the men who select them, and who have a clear interest in rendering settlements difficult so as to "make business."

Secondly,—there is a good deal more sympathy with the workmen, because their demand is for shorter hours of labour, and not for more wages. They want to have the regular hours for labour fixed at nine hours per day instead of ten, and so much importance is now attached to the short-time movement that the demand meets with no small popular favour. It is assumed that shortened hours of labour will mean the diffusion of increased culture among the workmen, and that as the workmen are willing to buy the diminution in their hours of labour, there is something noble in their aspirations. We cannot share this view. Every such demand is likely to be in reality a demand for more wages, and this is certainly the case with the demand of the Newcastle engineers. Everyone would see this if the demand was for the same wages as before for the reduced hours of work, and the nature of the demand is not altered because the workmen are willing to take less wages than before in absolute amount, but more in proportion to the number of the hours of labour. Even if they take the same wages in proportion to the hours of labour as before, thereby diminishing the absolute amount they receive, they would still be striking for more pay, because it is admitted that employers sustain a loss of more than the amount of the wages when the hours of labour are shortened. The gross product is diminished, but the expenses of plant and capital remain the same. The workmen in fact, by getting the hours of labour shortened, introduce a new condition into the trade, which makes the hourly wages they formerly received greater than before relatively to the net product of the manufacture. The demand for shorter hours therefore in the case of engineering and similar works where the plant is large is emphatically a demand for higher pay, unless the workmen should absolutely propose to reduce their hourly wages, so as to recoup the employer for the loss on his capital and plant by the diminution in the hours of industry—a proposal which we need not say the workmen never think of making. In itself then a demand for shorter hours should attract the public sympathy no more than a demand for more money. The one is in fact the means of obtaining the other. When the workmen have money to spare, they can easily buy shorter hours of labour as well as any other luxury.

In saying that the one demand deserves no more sympathy than the other we do not wish to be misunderstood. We have no objection whatever to the aspiration of the workmen for more wages. We believe and are glad that the tendency of the conditions of industry at the present moment, with the constant extension of machinery and accumulation of capital which we witness, is towards a most material elevation of skilled labourers in the scale of living—an elevation far surpassing what has actually been accomplished during the last thirty years. What we object to is the inappropriateness of the methods selected to accelerate the inevitable end, methods so inappropriate as in reality to retard it while inflicting serious damage on the whole community, and we certainly do not think these methods are excused because the demand for more pay is itself disguised as a demand for shorter hours of labour. That he wishes to improve himself and get more leisure for culture is certainly no excuse for a man whose method of reaching the end is to impoverish himself and family for an indefinite period, with the imminent risk of having to choose between absolute starvation and pauperism.

Having thus shown that there is no special reason for sympathy with the Newcastle engineers, we are free to judge their acts as we would those of any other class whose follies are injurious to the community. The one test to apply is that of complete success in their object. It is never the interest of employers to stand out against a mere reduction of their profits—where they do stand out we may be sure that the question is one of a total loss, or almost total loss, of profit, or perhaps the loss of the business altogether through the charges for the articles produced being made so high that the demand will cease. And the Newcastle employers have already held out far beyond the point at which the workmen could gain. It will take years for the workmen to make up the loss of these eighteen weeks' wages, and what is more, they have already got to the stage of quasi-pauperism at which the refusal to work is a public offence. They are exhausting not only their own funds and those of their Union, which they can count upon as their own, but they are supported by voluntary contributions from outsiders. People who are to be dependent on such contributions in their idleness have too plainly no business to be "striking." Their conduct is not unlike that of the idle tramp who strikes for unlimited leisure, and supports himself on voluntary contributions.

There are one or two lessons of some importance which these strikes should teach. One is the inutility of conciliation when a real dispute arises. There can be no conciliation when employers are convinced that stopping their business will be preferable to yielding the demands made, and the workmen are so stupid as not to perceive at once the strength of this conviction. At best, arbitration and conciliation are only modes of negotiating, and Mr Mundella's well-meant attempts were sure to fail when there was nothing to negotiate about. Another lesson is the enormous power of the employers in combination. A most able pamphlet was produced some time ago by Mr Stirling, in which he maintained that the union of workmen would lead to the union of employers, and that the latter in combination could dictate their own terms. The employers, he said, were naturally competitors; but the combinations of workmen forced them to unite so as to make it possible to carry on their own business. The event appears to correspond to his prediction. Possibly the reason is that the masters even now would not resort to extreme measures unless a ruinous alternative was before them, so that all the essential conditions of success are in their favour in the present case; still the combination *is* successful, and it would not be surprising if the employers in turn pushed their power too far. The workmen in any case have lost immensely by abandoning for their artificial Unions the only right method of improving their position—viz., individual thrift, which would have given them greater real power than they now have of holding out for higher wages, and a much more cautious temper in using it, the reluctance of people who have saved to live on the capital of their savings being infinitely stronger than the reluctance of people who have not saved to subsist on voluntary contributions. As it is, workmen have obtained by their Unions great apparent power, which they are perfectly reckless in using, and hence the frequency and the evil results of strikes.

BUSINESS NOTES.

The Franco-German Indemnity.—As there is a good deal of interest at the present moment attaching to the payments by France to Germany, it may be useful to note what payments have actually been made. The indemnity itself, it will be remembered, amounts altogether to 200,000,000*l*, of which 60,000,000*l* have actually been paid, partly in cash and partly in bills, or otherwise accounted for. Of the remainder there is a sum of 20,000,000*l* actually due next spring, but which forms the subject of a negotiation for immediate payment by non-negotiable bills in consideration of certain concessions by France in respect of the admission of Alsace and Lorraine manufactures into French territory. This leaves 120,000,000*l* unprovided for, which France is not bound to pay until the end of three years. We have thus some means of estimating the actual money which has been, and is now, in transit from France to Germany. The whole of the three instalments just

due must have gone in cash, or in bills which are now being cashed, with the exception of 13,000,000*l* to be deducted on account of the Alsace and Lorraine railways—the net payments thus being 47,000,000*l*. In addition, France paid to Germany last January 8,000,000*l* on account of the Paris indemnity, and has had to pay since March about 2,000,000*l* per month for the cost of maintaining the German troops in France—say 12,000,000*l*. These two sums together make up 20,000,000*l*, so that Germany altogether may have received 67,000,000*l*, in cash and bills from France between January and the present date. Of course a good deal of the money must have been spent in France itself, but making every deduction, the Prussian Government will have an enormous sum in hand, in spite of the assertion made some time ago in a Berlin correspondence which we quoted, that it was muddling away the money. The sum it will have to get next spring moreover is not merely the fourth half-milliard of the indemnity, or 20,000,000*l*, but 26,500,000*l*, being the amount of that instalment, plus interest at 5 per cent. on the remaining 120,000,000*l*, which France by the treaty is bound to pay until the principal is redeemed. By next spring therefore Germany will have drawn from France, in about a twelvemonth, over 90,000,000*l* sterling. As they are taking payment in coin, and locking up what they get, there is no wonder at the present disturbance in the European money markets.

THE BANKERS' CLEARING-HOUSE RETURNS.—About six weeks ago we called attention to the great addition to the volume of transactions in the Bankers' Clearing-house since the commencement of the second half of the year. We have now the returns for three months since that date, and till the present time there is yet no sign of diminution in the rate of increase. From the figures we formerly gave it appeared that the increase as compared with last year was 20 per cent.,—including the Stock Exchange settling days (23 per cent. exclusive of them),—and a comparison for the entire three months shows the following results :—

Week ending—	1871. £	1870. £	Increase. £
July 5	120,650,000	106,586,000	14,064,000
12	86,871,000	71,916,000	14,955,000
19	122,823,000	100,930,000	21,893,000
26	83,256,000	65,473,000	17,783,000
Aug. 2	116,642,000	89,535,000	27,107,000
9	79,675,000	69,063,000	10,612,000
16	105,630,000	78,521,000	26,509,000
23	90,069,000	60,345,000	29,724,000
30	71,194,000	69,307,000	1,887,000
Sept. 6	115,536,000	65,332,000	50,204,000
13	84,468,000	63,887,000	20,581,000
20	111,374,000	70,689,000	40,685,000
27	79,059,000	54,251,000	24,808,000
Oct. 4	133,304,000	82,880,000	50,424,000
	1,399,951,000	1,048,715,000	351,236,000

These figures are even more astonishing than those which we gave for the first six weeks of the half-year. The increase, instead of being 20 or 23 per cent., amounts to 351,236,000*l* upon an aggregate of 1,048,715,000*l* in 1870, which is an augmentation of no less than 33½ per cent. Nor is the improvement any more than was formerly the case due to the additional business on the Stock Exchange settling days. In the three months the Stock Exchange settlements have been :—

	1871. £	1870. £	Increase. £	Decrease. £
June 29	28,564,000	30,366,000	...	1,802,000
July 14	36,712,000	32,461,000	4,251,000	...
28	39,353,000	30,300,000	9,056,000	...
Aug. 16	36,130,000	22,500,000	13,630,000	...
31	32,969,000	20,512,000	12,457,000	...
Sept. 16	34,412,000	18,741,000	15,671,000	...
30	39,907,000	22,992,000	16,915,000	...
	248,050,000	177,872,000	71,980,000	1,802,000
Decrease			1,802,000	
			70,178,000	

Showing an increase of 70,178,000*l* upon an aggregate of 177,872,000*l*, which is an augmentation of 39½ per cent., rather a higher rate of increase than the average, but the amounts being too small to disturb the totals. Altogether, excluding the Stock Exchange settling days, the clearing since the commencement of the half-year has amounted to 1,151,901,000*l*, as compared with 870,843,000*l* during the same period of last year; and the increase is 281,058,000*l*, or 32 per cent., showing that the rate of increase is much the same whether we include or exclude the Stock Exchange settling days. Comment is unnecessary on the magnitude of the increase thus shown. There could be no better evidence of the growth of business and profits in the country. One reason no doubt is the increased value of several main articles of commerce—corn, cotton, and wool,—but if the country were not prosperous the increase of price would have checked business, and the aggregate clearing would not have increased.

THE GERMAN COINAGE.—The *Elber Zeitung*, whose statements have been adopted by leading German newspapers, and have just been confirmed by the *Provinzial Correspondenz*, intimates that the project of a measure for introducing a uniform coinage into the Germanic Confederation has been prepared by the Berlin Government, and approved of by the Imperial Council, and will be submitted to Parliament at its approaching meeting. It will be proposed to substitute for the various gulden and thalers a "mark," worth about the third of the present German thaler, or (say) an English shilling, or in French money, 1 franc 25 centimes. This will be the standard, and the mark will be divided into ten pennies, each of which will thus be rather more than the English penny. As regards larger coins, it is proposed to have pieces worth 15, 20, 25, and 30 marks—the piece of 20 being the same, or nearly the same, as the English sovereign or the proposed 25-franc piece, which it has been suggested that the French should coin. Details are wanting as to the composition, fineness, and exact fractional value of the proposed money; but if the account be true, as is probably the case, the arrangement will apparently assimilate in some important particulars the currencies of England and Germany. Our shillings and sovereigns will be the same, though confusion is certain to arise if the German standard is to be the shilling, a silver coin, while the English standard is gold, or if the Germans are to have a double standard, which appears to be the idea of the authors of the measure, the official value of gold being 15·55 times that of silver. We hope the German Government, besides adopting the English sovereign into their coinage, will go farther, and make it the standard. The confusion of differing standards will destroy half the advantage to be expected from basing the new German currency on coins of the value of English shillings and sovereigns.

RAILWAY CAPITAL.—A Parliamentary Return just issued by the Board of Trade shows that the amount of capital proposed to be raised by the railway and other bills brought before Parliament last Session was 29,719,190*l*, of which 18,827,365*l* was to be raised by shares, and 10,891,825*l* by loans. The number of Bills was 280. The following are the figures for the last seven years :—

	No. of Bills.	Proposed Capital. By Shares. £	By Loans. £	Total. £
Amount for 1871	... ...	18,827,365	10,891,825	29,719,190
— 1870	244	14,202,271	9,474,228	23,676,499
— 1869	212	17,756,335	11,465,371	29,221,706
— 1868	228	15,269,990	9,937,366	25,207,356
— 1867	321	24,947,447	17,691,328	42,638,775
— 1866	634	125,638,785	49,851,861	175,490,646
— 1865	595	92,422,988	34,018,770	126,441,708

The return for last year is the largest since 1867, but the differences since then between one year and another have been quite unimportant. The falling off since 1865 and 1866 is significant.

SUSPICIOUS WORKMEN.—A striking illustration of the ignorant jealousy among working-men, which is too often the cause of strikes, is furnished by the observations made this week at a meeting of the Chelsea Committee organised to assist the men on strike at Newcastle. The workmen have bad leaders because they are suspicious and distrustful in the highest degree, and we commend the remarks made to those gentlemen who put themselves forward as exponents of the working-men's ideas. When they are talked of in this manner how are we to know whom to trust?

Mr Burns said that the working-men ought to consider the London and Manchester employers, who have to compete in the same markets with the employers of Newcastle, and it was therefore very unfair for working-men to work more hours and receive less wages from the employers of Newcastle than they would from employers at any other place. He believed that Mr Burnett, the president of the Nine Hours League, had taken a very wrong step in making the propositions which appeared in the *Times* relative to a compromise, without having first consulted the whole of the men who turned out on strike. Mr Pike thought

that Mr Burnett, who had hitherto been the champion of the cause, and who ought to have maintained it, was now betraying it. He considered that public confidence in him was now entirely destroyed: men who, like him, came out as leaders ought to be above being influenced, and ought to know better than be made the tools of other parties. Mr Cantelo quite agreed with the remarks of the last speaker. He also considered they ought to deprecate the conduct of Mr George Potter, who was one of the first to intermeddle and seek popularity with a certain class at the cost of the cause of the people. It was a sign that some of those much a general election approaching. He knew how utterly rotten at heart and unworthy of the confidence of the working classes many of the London working class political agitators were. The cause of the working classes was no doubt suffering everywhere for want of good, honest representatives. *He hoped that the men at Newcastle and the working classes everywhere would make up their minds not to be done out of the nine hours movement by Mr Macdonald, Mr Thomas Hughes or the men at Cannon street either, who were nothing more but tools in the political tents for the Reform Club.*

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending Sept. 30 :—

	Receipts of Week Ending Sept. 30.
	£
Customs	385,000
Excise	178,000
Stamps	207,000
Taxes	15,000
Income tax	108,000
Post Office	180,000
Telegraphs	295,000
Crown lands	14,000
Miscellaneous	290,983
Total	1,632,983

The total receipts of the previous week were 1,118,216*l.*

The Exchequer issues of the week on account of expenditure were 1,554,821*l*, viz. :—

	£
Interest of debt	14,388
Other charges on Consolidated fund	78,236
Supply services	1,462,197
Telegraph services	nil.
	1,554,821

During the week the cash balances have increased in the Bank of England and decreased in the Bank of Ireland as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Sept. 23	1,650,889	1,490,725	3,141,614
— Sept. 30	2,009,335	1,476,711	3,486,046
Increase	358,446	...	344,432
Decrease	...	14,014	...

THE REVENUE.

I.—An Abstract of the Gross Produce of the Revenue of the United Kingdom in the undermentioned periods, ended Sept. 30, 1871, compared with the corresponding periods of the preceding year :—

	Quarters Ended—				Year Ended Sept. 30, 1871.	Quarters Ended—				Year Ended Sept. 30, 1870.
	Dec. 31, 1870.	March 31, 1871.	June 30, 1871.	Sept. 30, 1871.		Dec. 31, 1869.	March 31, 1870.	June 30, 1870.	Sept. 30 1870.	
	£	£	£	£	£	£	£	£	£	£
Customs	5,801,000	4,927,000	4,771,000	4,964,000	20,463,000	5,779,000	4,944,000	5,075,000	4,853,000	20,512,000
Excise	8,036,000	7,501,000	5,807,000	4,967,000	26,311,000	8,152,000	7,014,000	5,527,000	4,838,000	25,531,000
Stamps	2,254,000	2,141,000	2,727,000	2,207,000	9,329,000	2,178,000	2,132,000	2,602,000	2,125,000	9,037,000

Sundries	10,898,437	2	17.920.573	51	16,596,546	57
Total	3,117.958,772	14	3,113,987,543	48	2,694,757,406	92

A comparison of this week with last, in the principal items, shows :—

		francs.
DEBTOR.		
Notes	Increase	73,610,000
Treasury balance	—	7,290,000
Deposits at Paris and branches	Decrease	92,500,000
CREDITOR.		
Coin and bullion	Increase	11,050,000
Bills discounted at branches	—	51,744,000
— — Paris	Decrease	22,535,000
Treasury bonds	—	150,000
Prolonged bills	—	32,205,000

The new decline in the prolonged bills will be specially noticed. It has proceeded so rapidly that the item will probably by the end of the year disappear from the return, or at least cease to be of any importance. This result is very different to what was expected, and occasions not a little surprise. It is, however, owing in some degree to renewals. The decline in discounts at Paris is natural after the extraordinary rise of last week for the Paris loan, but it is more than compensated by the increase in the branches. The withdrawal of deposits explains the large augmentation in the circulation of notes.

In a Bill adopted by the National Assembly and just promulgated, the Budgets of 1871 (there are, as in Imperial days, not fewer than five) have been promulgated. They give the figures settled by the Assembly, which differ both from those presented by the Government, and from those of the Budget Committee. They are as follow :—

	f	c
ORDINARY BUDGET.		
Expenses	2,023,215,954	0
Receipts	1,867,281,452	0
Deficit	155,934,502	0
EXTRAORDINARY BUDGET.	f	c
Receipts	1,279,354,375	0
Expenses	1,178,476,749	38
Surplus	100,877,625	62

If the surplus of the Extraordinary Budget be deducted from the deficit of the Ordinary it will be found that the year 1871 is destined to close with a balance on the wrong side of 55,056,876f 38c—in our money 2,202,275*l*. But as always in France these two Budgets, which are in reality one, will undergo changes more or less important before the year is ended, and those changes are certain to be more expenses and fewer receipts than are written down.

The other three Budgets are :—

BUDGET OF SPECIAL RESOURCES.	francs.
Expenses	7,624,666
Receipts	7,624,666

In this certain expenses of the Ministries of the Interior, Finance, Public Instruction, and Agriculture and Commerce, are compensated by receipts from communes and departments.

BUDGET OF THE CAISSE D'AMORTISSEMENT.	francs.
Expenses	8,713,103
Receipts	70,630,000

The expenses at the charge of the sinking fund (henceforth to be counted in the General Budget) are annuities payable for canals and for bridge tolls bought up; also the interest and redemption of the 30 years' railway bonds. The receipts consist of revenue from forests, tax on passengers and goods of railways, the interest of *rente* redeemed, the profits of the Caisse des Depots et Consignations, and the payments made by railway companies for the interest guaranteed on the new lines. The difference between the outgoings and incomings is to be employed in the reduction of the national debt.

BUDGET OF SPECIAL SERVICES.	francs.
Legion of Honour—Expenses	2,172,000
— Receipts	2,172.000
National Printing Office—Expenses	13,000
— Receipts	13,000

The Legion of Honour has fixed revenues that cover its expenses, which are chiefly pensions, and the national printing office effects certain sales which are equivalent to part of its outlay. These items are made to constitute what is called a "Special Budget connected *pour ordre* (regularity in account keeping) to the general one."

The division of the Budget into five parts was an invention of the late M. Fould, the object of which was to make the public believe that the enormous expenditure of the Empire was less than it seemed. It is surprising to see M. Thiers follow that invention, he having always under the Empire denounced it.

In addition to the augmented stamp duties and postage, and to the new or increased taxes on coffee, sugar, chocolate, spices, tea, paper, playing-cards, assurances, house rent, &c., &c., already recorded in your columns, we have from the 1st of this month a tax, varying from 6f to 60f, on billiard tables, private as well as public, and one of 20 per cent. on the subscriptions of members of clubs. Schist oil also is taxed; and, from the 15th, 50c per 100f on the sale of "nominatif" (bearing the name of the owner) shares, bonds, and other securities, and 15c on those "to bearer," are to be paid. Also, from the 15th, the existing tax on passengers by railways, steamers, and in public vehicles, and on goods carried by express, is to be increased 10 per cent. And there is "looming in the future"—in spite of the opposition of M. Thiers—an income tax.

It is still the custom, as in Imperial days, to misrepresent the truth, or, what comes to the same thing, not to represent it fully and frankly. Thus the Committee of the National Assembly on the Budget made one of its members, M. de la Bouillerie, report that the interest on the consolidated debt, which the Empire found at 231 millions and left at 360, would, with that of the 1870, the Morgan, and the two *milliard* loans, also with that of the 3 milliards remaining to be paid to the Germans, with that due to the Eastern Railway Company for lines taken by them in place of capital, be not less for the present year than 723. The augmentation is startling, and yet it does not present the reality of "the situation." M. Michel Chevalier tears away the veil which the Government, the Committee, and the Assembly wanted to keep up. He shows that 500,000,000f have to be furnished for the relief of the departments that were invaded, and that they will have to be borrowed, at the cost of about 34,700,000f per annum, which is proportional to that to be given for the 2 *milliards*; and that at least a like cost will have to be incurred for the capital necessary for reconstituting the *materiel* of the army, constructing and repairing fortifications, repairing bridges, roads, public buildings, &c. He thinks, too, that it would be prudent to calculate that from the difficulty of borrowing there will for the three milliards due have to be paid annually 58,235,000f more than the sum set down for 1871. Lastly, for the debt due to the Bank, which will have to be provided for by borrowing, there will be a further sum of 106,200,000f required. On the whole then the annual charge will be not 723 millions of francs, but 956 (38,240,000*l*). These figures apply only to the public debt, strictly so called; but in addition 45 millions for the

charges on the floating debt and caution money, and for various debts which are payable in annuities, have to be counted. Thus M. Michel Chevalier concludes a milliard 40,000,000f for interest alone will have to be raised.

The Prefect of Paris has not yet officially announced the precise result of the subscription to the Paris loan, but it is known that the demands amounted to 19,027,157, though the number of obligations to be issued was only 1,296,300. Of the total subscription 11,131,344 were in Paris, 2,895,509 in the provinces, 4,806,373 in foreign countries (chiefly Belgium and Italy), and 193,891 were in exchange for debts due from the city. The latter are admitted in full, so that there are 18,833,266 demands to be divided by 1,102,409—result, rather more than one obligation for 17 demands. In order to satisfy everybody it is intended to cut a certain number of the obligations, which are nominally of 400f, into four parts, and the rest into sixteen. This is departing from the conditions laid down, and it will set afloat a terrible quantity of paper: but under the circumstances it is perhaps the fairest thing to do. The French exult exceedingly at what they call the prodigious result of the loan, and the greater of them seriously believe that subscribing is the same thing as paying. The difference between the two is great however. Still the fact that a deposit of not less than 5% in cash had to be made, and was made, for each of the 19,027,157 demands is certainly remarkable. The premium on the loan is to-day only 4f 50c for cash, 4f 25c for time.

The vexed Alsace-Lorraine question is not yet settled. A few days back the French Government consented to interpret the condition imposed by the Assembly for the admission of "manufactured products" into the ceded territory, as meaning only a very limited quantity thereof, and the Germans accepted. In so doing M. Thiers certainly did not act up to the wishes and intentions of the Parliament, but he trusted to his power over it to make it ratify a *fait accompli*. A new difficulty however has arisen. Prince Bismarck, who is not at all generous, required, in return for the concession he made, that the bills for the *demi-milliard* (20,000,000f) bearing the signatures of London and other bankers should be negotiable, instead of not negotiable. To that M. Thiers, after some hesitation, agreed. But then the signers of the bills said that with the power of discounting them Bismarck could, if he pleased, plunge all the money markets of Europe into confusion, and they protested. M. Thiers thereupon withdrew his consent. In this position the matter stands, but new negotiations are going on, and it is expected that an arrangement will be come to. Perhaps however one of the French Ministers, most likely M. Pouyer-Quertier, will have to go to see the German Minister before it can be concluded.

The Bourse has improved. Its last settlement was facilitated by the prompt restoration of the excess of deposits made on the Paris loan. It has lately begun speculating in Bank of France shares, and has, it will be seen, sent up prices [illegible] considerably. Formerly there was no speculation in this security. It is now even quoted for time—an unexampled thing. Subjoined are the quotations of the week:—

	September 28.		October 5	
	f	c	f	c
Threes	56	45	56	75
Fives	91	90	92	75

Suez Canal	187	50	183	75

The quotation of fine gold is to-day as high as 14 to 15 the 1000; of silver, 24 to 25. English sovereigns are from 25f 62½ to 25f 75; banknotes, 25f 62½ to 25f 75; bills on London, long, 25f 72½ to 25f 87½; short, 25f 72½ to 25f 87½.

The rate of discount of the Bank de Belgique has, since Monday, been raised to 6%.

The complaint that through the subscribers to the last Spanish loan only got 12·27 of their demands, all the deposits they made were kept in payment of coils to become due, and that such a proceeding was contrary to all usage, has produced no effect; the Spanish Government showing that in the conditions laid down it stipulated for the power of so employing the excess of deposits. The subscribers neglected to read the conditions with due care.

As is known, the threat was made at Marseilles to publish the names of the German and other foreign houses who have made the delay in protesting bills which the siege of Paris and the war in France necessitated a pretext for refusing to pay the bills bearing their signature. In execution of the measure, the Society for the Defence of Commerce of the town prints in the local newspapers the names of firms and of banks at Crefeld, Leipsic, Berlin, Frankfort, and Bremen, that have refused payment; and it announces that it has received information that the Bank of France will in future not admit to discount paper bearing the names of the delinquents.

It will not be forgotten that during the war the Chamber of Commerce of Bordeaux, in imitation of what was done at Havre and in other places, issued small notes of 10f as a substitute for the want of coin. Money having reappeared, the Chamber has decided that this paper shall be withdrawn, and it has already reimbursed an amount of 700,000f. The *modus operandi* of the Chamber was to give the small notes in exchange for those of the Bank of France, which it retained. What it did was illegal, the Bank having the monopoly of paper issue, but it rendered a great service to the public.

Messrs de Rothschild notify that the holders of inscriptions of 5 and 3 per cent. Italian stock, of which the coupons are exhausted, may present them at their bank from 9th October, to be, "after being controlled in Italy," exchanged for new ones. The new titles will have to pay 60c for the Italian stamp, but those bearing the French stamp are to cost nothing.

The Italian Government makes known that the certificates of subscriptions to the Pontifical loan of 1860-64 must be exchanged within six months from 29th June, 1871, under pain of non-payment of coupons. The operation is to be effected at Rome or Florence. Holders in France, who are numerous, complain that it is not to be at Paris.

A meeting of the shareholders of the Credit Mobilier is called for the 11th November, to discuss a proposition presented by the directors for dissolving the company, and for forming a new one with reduced capital, the assets being transferred to it.

The Credit Rural has held its meeting. The profits of 1870 were stated to be 202,527f, but 90,750f are not yet realised. The expenses of management, rent, &c., exceeded 120,000f. The mortgages concluded at the end of the year were 872,000f, and the deposits held 138,844f. No dividend was of course declared, but a "remunerating return" on the capital was promised for 1871.

The Credit Foncier Suisse announces for 16th October the payment of the overdue coupons of 1st November and 1st January of the 5 and 3 per cent. obligations.

The coupons of the 6 per cent. Ottoman loan of 1854, due 10th October, is to be paid by Messrs Bischoffsheim, Goldschmidt, and Co.

The Société Financière pays from the 1st October 6f 25c as interest on shares for the first six months of the year.

The Suez Canal Company announces that from the 25th it will pay the coupons and the lots due 1st October, 1870. Its last loan was a failure, only about 6,000,000f being subscribed in cash.

The coupons of bonds due 1st October of the Victor Emanuel Railway is being paid by the Italian Government at the Credit Industriel Bank with a reduction of 13·20 per cent., and the bonds drawn in August are being paid off.

The Company of the Domains of Italy is paying at Paris and Lyons the interest on bonds due 1st October.

The following are the quotations of the last three days of the produce markets; they are per 50 kilogrammes, duty paid:—

Cotton.—At *Havre*, where sales have been extremely active, New Orleans very ordinary, 114f to 113f; Commercial good ordinary, 88f to 90f; ordinary, 86f [illegible] 94f 50c.

Coffee.—At *Havre*, Haiti, 133f to 142f; Cape, 135f 50c to 142f; La Guayra, garbled and not garbled [illegible]; Cartagena, 138f; Santos, 126f to 140f; and Rio [illegible] 74f to 76f; Ceylon, 142f 50c. At *Marseilles*, Porto Rico [in bond], 80f; Rio (Minas), 77f. At *Bordeaux*, Santiago [in bond], 92f; Carmody, 105f; La Guayra garbled, 126f; Cape Rico, 147f 50c; Mysore, 120.

Hides.—At *Havre*, Monte Video salted saladeros on, 81f 50c; ox, 77f 50c.

Wool.—At *Havre*, Entre Rios unwashed, 205f the 100 kilogs; Spain lambs unwashed, 205f 50c; Monte Video, 160f to 200f; Buenos Ayres, 175f to 205f.

Tallow.—At *Havre*, La Plata stuff, 93f 25c and 93f 50c; saladeros on, 87f; New York, 92f 50c.

Rice.—At *Marseilles*, Montevideo, 30f less. At *Havre*, French West India white, an escogio, 40f and 41f.

Pepper.—At *Havre*, Singapore, 90f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Right Honorable the Lords of the Committee of Privy Council for Trade have received from the Secretary of State for Foreign

Affairs a despatch from Her Majesty's Ambassador at St Petersburg, enclosing a copy of the declaration exchanged with the Russian Government, relative to the more effectual protection of trade marks.

The factory inspectors report 696 silk factories in Great Britain—viz., 692 in England and four in Scotland; none are reported in Ireland. The inquiry made at the close of last year showed in these factories 718,282 spinning spindles running, and 221,861 standing; 138,451 doubling spindles running, and 51,847 standing; 9,589 powerlooms running and 2,789 standing, and 6,334 powerloom weavers. The number of spindles and powerlooms not running is very large. The returns show as the amount of moving power 7,604 steam and 985 water. The males employed are 528 under 11 years of age, 1,744 between 11 and 13, 2,662 between 13 and 18, 9,053 above 18. The females—755 under 11, 3,901 between 11 and 13, 29,481 above 18. The whole number of persons employed is 48,124—13,987 males and 34,137 females; 47,311 in England, 813 in Scotland; 13,329 in Cheshire, 7,548 in Lancashire, 3,874 in Warwickshire.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap 32, for the week ending on Wednesday, the 4th day of October, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	34,667,725	Government debt	11,015,100
		Other securities	3,984,900
		Gold coin and bullion	19,667,725
		Silver bullion	...
	34,667,725		34,667,725

BANKING DEPARTMENT.

	£		£
Proprietors' capital	14,553,000	Government securities	14,012,299
Rest	3,671,927	Other securities	23,536,968
Public deposits, including Exchequer, Savings' Banks, Commissioners of National Debt, and dividend accounts	5,002,862	Notes	8,373,050
		Gold and silver coin	546,799
Other deposits	22,653,001		
Seven-day and other bills	586,326		
	46,467,116		46,467,116

GEORGE FORBES, Chief Cashier.

Dated the 5th October, 1871.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result :—

LIABILITIES.	£	ASSETS.	£
Circulation (including Bank post bills)	26,881,001	Securities	37,994,267
Public deposits	5,002,862	Coin and bullion	20,214,524
Private deposits	22,653,001		
	54,536,864		58,208,791

The balance of Assets above Liabilities being 3,671,927*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts compared with those of last week exhibit—

	Increase.		Decrease.
	£		£
Circulation	1,324,354		...

Other securities	697,782		...
Bullion	...		875,564
Rest	...		5,996
Reserve	..		2,157,264

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house :—

	Week ending Oct. 4, 1871.	Week ending Sept. 27, 1871.	Week ending Oct. 5, 1870.
	£	£	£
Thursday	13,830,000	12,420,000	9,583,000
Friday	39,907,000	14,133,000	22,992,000
Saturday	21,381,000	14,811,000	14,445,000
Monday	17,329,000	10,103,000	11,417,000
Tuesday	18,605,000	15,181,000	15,010,000
Wednesday	22,252,000	12,411,000	9,433,000
Total	133,304,000	79,059,000	82,880,000

JOHN C. POCOCK, Deputy Inspector.

Bankers' Clearing-house, October 5th, 1871.

The total since the 4th of January, 1871, is 3,498,419,000*l*, compared with 2,959,680,000*l* for the corresponding period last year, showing an increase of 538,739,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding dates with the present week.	Oct. 9, 1861.	Oct. 7, 1868.	Oct. 6, 1869.	Oct. 5, 1870.	Oct. 4, 1871.
Circulation, including bank post bills	£ 21,674,563	£ 25,297,000	£ 24,834,293	£ 25,272,858	£ 26,881,001
Public deposits	4,893,914	5,306,624	3,971,069	6,580,492	5,002,862
Other deposits	12,028,835	18,022,446	19,642,125	18,168,298	22,653,001
Government securities	10,733,123	15,039,716	15,211,963	12,983,352	14,012,299
Other securities	17,440,363	16,054,128	16,377,534	17,254,654	23,536,968
Reserve of notes & coin	7,859,634	11,060,030	10,212,458	13,112,685	8,919,849
Coin and bullion	14,141,519	20,707,945	19,477,928	22,388,185	20,214,524

Price of Consols	92¾	94¼	93¼	92½	92½
Average price of wheat	57s 0d	54s 4d	49s 8d	46s 1d	57s 3d
Exchange on Paris (shrt)	25 30 37½	25 20 27½	25 12½ 22½	...	25 70 80
— Amsterdam ditto	11 19 19½	11 19 19½	11 19½ 12 0½	11 18 18½	11 19 19½
— Hamburg (3months)	13 10 10½	13 10½ 11	13 11 11½	13 10½ 10¾	13 10½ 11½
Clearing-house returns	...	65,894,000	83,872,000	82,880,000	133,304,000

In 1861, there was a moderate demand for discount, but rates in the open market were approaching the Bank's terms. The Bank of France had just concluded an arrangement to draw on Messrs Rothschilds and Barings for 2,000,000*l*, by which it was hoped the export of specie from Paris to London would be checked. Lancashire was beginning to be greatly distressed by the cotton blockade.

In 1868, money was still easy at 2 per cent., the recent foreign loans having produced no great effect. The Italian Government had just raised a loan of about 8,000,000*l* effective on its tobacco monopoly, which it had agreed to farm out.

In 1869, money was rather easier for the time in the open market, in consequence of the distribution of the dividends, but the foreign rates were advancing. Gold had become easier in New York in consequence of Mr Boutwell breaking the Ring by his sales of gold.

In 1870, there had been some expectation of a reduction of the Bank rate, but the state of the Bank account was held to justify the Bank directors in making no change. The policy of the French Provisional Government in resolving to defend Paris was severely reprobated. The Revenue Returns, which had just been published, were considered exceedingly satisfactory.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 5,411,528*l*; in 1868, an excess of 1,138,603*l*; in 1869, an excess of 3,264,591*l*; and in 1870, an excess of 913,644*l*. In 1871, there is a deficiency of 883,947*l*.

DISCOUNT AND MONEY MARKET.—Until to-day the money market has been comparatively easy this week, the rates for the best short-dated paper tending below the Bank minimum, and transactions taking place on Wednesday and Thursday as low as 3⅝. There was also a good deal of money offering and some hopes were entertained that the pressure from Germany had been eased. But the feeling was quite changed on Thursday afternoon by the announcement of the withdrawal of half-a million of sovereigns for Germany, and the reports, which were subsequently confirmed by the publication of the account, of a great diminution in the Bank's reserve. The rate for short-dated paper has at once gone up to the Bank minimum, hardly any business being done under 4 per cent., although the quoted rate is nominally 3⅞ to 4. The feeling to-day was general that the Bank directors ought to have put up the rate to at least 5 per cent. yesterday, and in some cases transactions were only entered into conditionally on a movement upwards not being made to-day. There has been a strong demand to-day, both in the open market and at the Bank, and a movement upwards to 5 per cent. is immediately expected. At the same time the demand appears to be mainly precautionary, and there is a good deal of money about, short loans on Consols being effected at 2 per cent.

The changes in the Bank return are certainly such as to make it a matter of surprise that the Bank directors, knowing as they must have done of the approaching withdrawal of 500,000*l*, and of the farther large amounts which are being taken for Germany in the open market, did not take some step to replenish their sinking reserve. During the week the public deposits have diminished 1,190,000*l*, and the private deposits 337,000*l*, while the private securities have increased 698,000*l*, and the circulation 1,324,000*l*. As a consequence, the

reserve, which had been reduced a week since to 11,000,000*l.*, was reduced upwards of 2,000,000*l.*, standing now at the low figure of 8,920,000*l.* The bullion in both departments is 575,000*l.* less, and is now only 20,214,000*l.* These are most serious changes in the Bank account for one week, especially when a drain of gold abroad is in progress, which does not seem likely to stop very soon. The demand, as we notice below, appears to come very capriciously, the withdrawal on Thursday being comparatively unexpected, and gold not being in demand to-day, but the capriciousness of the demand when those who make it have so much power is all the more reason for providing against it. Even if the drain were of a less formidable character, the demands on the Bank at this period of the year always command caution, and help to aggravate the danger of letting the reserve run low. There is a strong feeling out of doors that the Bank by postponing the advance of the rate will have to make a sharper advance a day or two later.

The principal change in the Bank of France account for the week is an increase of 440,000*l.* in the bullion, but bullion, as will be seen from our notes on the exchanges, is greatly in demand in Paris, the German as well as the London exchanges being steadily against it.

We subjoin our usual quotations for mercantile paper having various periods to run, subject to the remark which we have made for a fortnight past as to the unsettled state of the market. The tendency is likewise to refuse business, and to exact rather more than the quoted rates.

Bank bills—3 months			3½ 4	per cent.
Do	4	—	4¼ ½	per cent.
Do	6	—	4½	per cent.
Trade bills—3 months			4 ¼	per cent.
Do	4	—	4¼	per cent.
Do	6	—	4½ 5	per cent.

The allowances for money at the Joint Stock Banks and discount houses are as follow:—

Joint Stock Banks at call	3	per cent.
Discount houses at call	3	per cent.
Do with seven days' notice	3¼	per cent.
Do fourteen days'	3½	per cent.

The discount quotations current in the chief continental cities are as follows:—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	6	5	6	5
Vienna	6	7	5	6½
Berlin	5	4	4	4
Frankfort	5	4	3½	3½ ¾
Amsterdam	4½	3	4	3
Brussels	4½	5½	4	5
Hamburg	—	—	2½	3½
St Petersburg	8	6	6	6

The Stock Markets.—The course of business this week has been one of extreme fluctuation. Until Thursday, under the influence of easy rates for money in the open market, and the almost entire cessation of any apprehensions of more withdrawals of bullion for Germany, the general course was upwards—English and foreign Government securities all steadily improving, and English railways almost wholly recovering the rise which had been lost in the previous week's panic. Early on Thursday however a decline in Spanish in the foreign market commenced on the news of a Cabinet crisis in Madrid, and in the afternoon all the markets became dull on the reports that half-a-million in gold had been withdrawn that day for Germany, and that the Bank account made up to Wednesday evening would show very great weakness. The fall was especially severe in the railway market, in which there had been rather an important advance only a few hours before on its being ascertained that the Bank had made no advance on the rate, and on the very favourable nature of the traffic returns being understood. To-day the dull feeling has continued and the impression has now become general that, in the present state of the money market, a crisis may at any moment occur, which would cause a very formidable panic in those markets. The last panic, when the rate was raised to 9 per cent., though it cleared off a great many weak bad accounts, was not so efficacious as it threatened at one time to be, in consequence of the temporary stoppage of the gold drain causing the bears to turn round rather sharply. Since the panic a rather large account for the rise has of course been opened, and though advantage has been taken by some former holders to realise at better prices, the market cannot be considered very strong. A rise in the Bank rate in a few days to 5 or 6 per cent., especially if occurring just at the settlement, could hardly fail to have the effect of depreciating stocks to a lower point than what was touched during the late panic.

English Government Securities.—As we have stated, English Government securities participated in the upward movement, which continued nearly all through the week. Consols, which closed last week at 92¼ ⅜, were on Wednesday and Thursday at 92⅞ 93. On Thursday afternoon however there was a decline to 92¼, and the flatness extended to all descriptions of Government securities. To-day the market was very weak in the forenoon, on the Bank account being published, Consols at one time being 92⅜ ½; but in the afternoon there was a reaction, and the closing price for the account is 92¼ ⅜.

Subjoined is a list of the highest and lowest prices of Consols every day:—

CONSOLS.

	Money.		Account.		Exchequer Bills.
	Lowest.	Highest.	Lowest.	Highest.	March and June.
Saturday	92¼	92⅜	92⅜	92⅜	4s to 8s pm
Monday	92¼	93	92¼	92⅜	4s to 8s pm
Tuesday	92⅜	93⅛	92⅜	93⅛	3s to 8s pm
Wednesday	92⅞	93	92⅞	93	2s to 7s pm
Thursday	93⅛	93	92⅞	93⅛	1s to 6s pm
Friday	92⅛	92⅜	92⅛	92⅜	1s to 6s pm

The following are the changes for the week, taking the latest unofficial prices for quotation:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Consols for money	92⅜ ¼	92⅜ ⅜	− ⅛
Do November	...	92⅜ ⅛	... ...

Victoria 6 p c	114 16	114 12 xd	... ...
Ditto New 5 p c	103½ ¾	103 6	+ ¼

The following notice appeared in Tuesday's *Gazette*:—The Lords Commissioners of Her Majesty's Treasury having certified to the Commissioners for the Reduction of the National Debt that there was no surplus of actual revenue over the actual expenditure of the United Kingdom of Great Britain and Ireland for the year ended the 30th of June, 1871, the Commissioners for the Reduction of the National Debt hereby give notice, that no sum will be applied by them on account of the Sinking Fund under the provisions of the Act 29 and 30 Victoria, cap. 39, sec. 16, during the quarter ending the 31st of December, 1871.—A. Y. Spearman, Controller-General.—National Debt Office, Oct. 2, 1871.

Foreign Government Securities.—As was the case last week, the fluctuations here have been inconsiderable, but the buoyant feeling which characterised the market last Friday continued till Wednesday, and in almost all stocks except Spanish till Thursday. Spanish, which were last Friday 33⅜ ⅜, were on Wednesday at 34 ⅛ ⅜—a rise of ⅛; French scrip, which were last Friday 8⅞ ¾, were on Wednesday 8⅞ 9; Egypt, 1868, which were last Friday 79 ½, were on Wednesday 79½ 80; and other foreign stocks had risen in proportion—the strong upward tendency, except in Spanish, continuing until Thursday forenoon. In Spanish there was some weakness even on Wednesday, owing to large bear sales in anticipation of a crisis at Madrid and actual rumours to that effect, and on Thursday morning, when the rumours were confirmed, the stock at once went to 33¾ 34, recovering slightly immediately afterwards, but closing finally on the news allowing the money market coming out at the worst point of the day. Other stocks also declined on Thursday afternoon. To-day the weakness of Thursday afternoon was increased, Spanish being dealt in at 33⅛ ¼; Turks, 45 ½; Egypt, 1868, 79¼ ½; and the fall being very general. Late in the day there was a reaction, owing to realisations and the absence of any extensive pressure of sales, and prices close at about the best point of the day, the variations, as compared with last week, being mostly unimportant.

The following are the changes for the week, taking the latest unofficial prices for quotation:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

ENGLISH RAILWAYS.—The rise in this department up to Thursday was a very strong one, amounting to between 3 and 4 per cent. all round. There was some check to the movement on Monday, owing to the unfavourable traffic return on the Brighton line, but as the money market continued easy, and the subsequent traffics were generally good, there was a general rapid advance, quite equal to the leaps upward which characterised the movement of prices before the panic. Caledonian, which were 107 108 last Friday, were on Thursday 111 ½; Great Western in the same time rose from 104 ½ to 106 ½; London and Brighton, from 68⅞ 69⅛ to 70 ½; Sheffield, from 65½ 6 to 67⅞ 68⅛; Great Northern A, from 153 4 to 155½ 6½; Chatham and Dover, from 24¾ 5 to 25½; London and North-Western, from 145⅛ ⅜ to 145½ ¾; with similar advances on other stocks. The news on Thursday afternoon at once caused a general fall, amounting to 2 per cent. in Caledonian and Sheffield, and generally carrying prices back to the closing point of last week, in spite of a rather sharp recovery from the first panic price. To-day the markets opened dull, and there was a still farther fall from the prices which we have quoted—Great Western at one time being at 101¾ 2; Caledonian at 106½ 7; North-Western, 143 ½; Great Northern A, 151 3; and other stocks at a similar decline. As was the case in the panic a fortnight since, dealers were unwilling to buy, and it was difficult to make a price. In the afternoon there was a reaction, a great part of to-day's fall being recovered, but prices are weaker compared with the opening, and very much lower compared with the best price of the week. The recent weakness in this department has so far been fortunate, because enabling investors to acquire stocks which they mean to hold at a more remunerative price than the recent speculation would have permitted.

It is announced that special general meetings of the London and North-Western and the Lancashire and Yorkshire Railway Companies are called for the 20th inst.—the former at Euston Station and the latter at Manchester—for the purpose of considering the proposed amalgamation of the two companies, so that, according to the official notice "the undertakings of the two companies, and all their railways, canals, rights, privileges, properties, businesses, and effects, whether joint or separate, may be vested in one company, and form one united undertaking, upon the terms and conditions to be submitted to the said meeting, and of authorising the directors to apply to Parliament for all such powers and authorities as may be necessary for the purpose of carrying into effect the amalgamation when and as the directors may see fit. And also, pending the application to Parliament, for the purpose of authorising the directors, if they deem it expedient, to enter into any agreement or arrangement with respect to the working and management of the undertakings, and for the division of the receipts arising from traffic, using both lines, or lines in which the two companies are jointly interested." The two notices of meeting are identical in tenor. It is understood that at the meetings in question very full explanations will be given by the chairmen of the two companies in justification of the policy of amalgamation, and of the particular arrangements which have been agreed upon in the present case.

The East and West Junction Railway Company has again made its appearance in the market as a borrower upon debentures. Messrs Field, Wood, and Haynes now invite applications for 210,000*l* perpetual Five per Cent. First Debenture Stock at an issue price of 90. The payment of the interest during the construction of the line, and for one subsequent year, has been provided for by the investment in Consols of a sum equal to three years' interest in the names of trustees. The line will run from Towcester to Stratford-on-Avon, and will form a junction between the London and North-Western and Great Western railways.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	107 8xd	106¼ ¾	— 1½

Metropolitan District 6 %	118 20	119 21	+ 1

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Sept. 30 to 854,305*l*, being an increase of 46,596*l* on the corresponding week of last year. The aggregate receipts of the half-year to date are now 10,269,125*l*, being an increase of 711,835*l* on the corresponding period of last year. The principal increases for the week are — North-Eastern, 9,008*l*; London and North-Western, 6,137*l*; Midland, 5,538*l*; Great Western, 4,914*l*; Caledonian, 4,047*l*; and London, Chatham, and Dover, 2,779*l*. Brighton shows a decrease of 1,177*l*, the passenger traffic having been greatly affected by the previous week; and the aggregate increase on all the lines is rather less than it has been in previous weeks. The following are the details of the increase or decrease in each case for the week, and for the whole period:—

RAILWAY TRAFFIC RETURNS.

	Week's Receipts.		Aggregate Receipts of Half year to date.	
	Amount.	Inc. or Dec. on Corresponding week in '70.	Amount.	Inc. or Dec. on Corresndg. per. in '70.

Advices from Minnesota, United States, state that the St Paul and Pacific Railroad will be completed to Breckenridge by the close of this month.

AMERICAN SECURITIES.—Messrs Jay Cooke, McCulloch and Co. have issued a circular, drawing attention to the American Funded loan, which stands at a quotation not altogether favourable to the Syndicate which undertook the issue in Europe. The circular contains a copy of the United States' Treasury notice of Sept. 1st, calling in 100,000,000 dollars Five-Twenty bonds of 1862, on 1st Dec., a copy of which we subjoin. **The called registered bonds have ceased to be transferable upon the books of the Treasury, and holders are** invited to exchange into the New Five per Cent. loan. It may be observed that the bonds are payable in Washington, and their value therefore depends upon the price of gold and sterling exchange at the date of redemption. Annexed is the notification referred to :—

Treasury Department, Sept. 1, 1871.

By virtue of the authority given by an Act of Congress, approved July 14, 1870, entitled "An Act to authorise the refunding of the national debt," I hereby give notice that the principal and accrued interest of the bonds herein-below designated, known as Five-Twenty bonds, will be paid at the Treasury of the United States, in the City of Washington, on or after the first day of December next, and that the interest on said bonds will cease on that day. That is to say, coupon bonds known as the first series, Act of February 25, 1862, dated May 1, 1862, numbered as follows :—

1 to 29829, inclusive, of		$50	each.
1 to 48572	—	100	—
1 to 40011	—	500	—
1 to 74204	—	1,000	—

And registered bonds of the same Act—

1 to 595, inclusive, of		$50	each.
1 to 4103	—	100	—
1 to 1829	—	500	—
1 to 8995	—	1,000	—
1 to 2005	—	5,000	—
1 to 2995	—	10,000	—

The amount outstanding (embraced in the numbers as above) is one hundred millions ($100,000,000) dollars.

Coupon bonds of the Act of February 25, 1862, were issued in four distinct series. Bonds of the first series (embracing those described above) do not bear the series designation upon them, while those of the second, third, and fourth series are distinctly marked on the face of the bonds.

J. F. HARTLEY, Acting Secretary.

Five-Twenty bonds have maintained their price this week, notwithstanding the dulness in other foreign bonds, but the changes have not been important. Erie shares are rather better, but Atlantic and Great Western bonds have given way 2½. The scrip of the Funded loan closed at 2½ to 1¾ discount. The following is our usual comparison of prices :—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.	
Consol 6s or 4 % 20D Bonds sterling 6s	92½	3	92½	3	...	...

Pennsylvania 6 % Bonds, West 6 % Bonds, 1910	96½	¼	96½	¼	−	¼
Virginia 6 % Bonds	95½	¼	95½	¼	−	¼

JOINT STOCK BANKS.—There has been considerable firmness in this department, the advance in the value of money having led, rightly or wrongly, to the expectation of improved dividends. The movements however have been in no case important, and though purchases have preponderated, the transactions have not been very numerous. We note an advance of ½ in Anglo-Egyptian, New Zealand, English, Scottish, and Australian Chartered, London and Westminster, and Union of London, and of ¼ in Alliance; but Anglo-American, and London of Mexico, have declined ½, and Consolidated ¼.

TELEGRAPH SHARES have ruled flat, and a general decline has taken place. The most prominent movement is a fall of 5 in Anglo-Mediterranean; but British Australian and China Submarine have given way ⅝; French Cables, Reuter, and Marseilles ¼; Falmouth, British-India Extension, British-India Submarine, ⅛. We note, however, a rise of ¼ in West India and in Cuba. In construction shares there is a decline of 1½ in Telegraph Construction, but Silver's and Hooper's have risen ½ and ⅝ respectively.

MINES.—The mining share market has been adversely affected by the movements in money; nevertheless, prices for the week leave off rather better on the average. West Bassett have advanced 3, South Wheal Frances 2½, East Bassett 2, East Lovell 1½, Van 1, East Wheal Grenville and Wheal Buller ½; but West Chiverton and Great Laxey have declined 1, Assheton and Marke Valley ½. In the foreign market Eberhardts have again been pressed for sale, and have given way 3; Colorado are 1 lower; while St John del Rey have risen 1, United Mexican ½, Sierra Buttes Gold and Alamillos ¼.

MISCELLANEOUS.—The dealings in this department have not been on an extensive scale, but the results of the week's operations have on the whole been satisfactory. Credit shares have been flat, General Credit and International Financial closing at a decline of ½, but Credit Foncier show a rise to a similar extent. Australian Agricultural shares have advanced 5; Bolckow Vaughan, 3; Land Securities and Madras Irrigation, 1; Royal Mail Steam, 2; Peninsular and Oriental Steam, 4; Hudson's Bay and Berlin Waterworks, ½. On the other hand, London and Glasgow Engineering have given way 1; Ebbw Vale and City Offices, ½.

The prospectus of the British Indian and Colonial Agency and Co-operative Society, Limited, an extended notice of which appears in our advertising columns, has appeared. The capital proposed is 100,000*l*, in 1*l* shares, of which 10,000 are now offered to its public as a first issue. The institution will combine the business of a monetary agency and supply association, and will, as the name implies, extend the co-operative principle, hitherto found successful in this country, to India and the colonies. The directorate comprises the name of Miss Emily Faithful, of the Victoria Press.

In the new undertakings, Val de Travers Asphalte are quoted 24 to 26 ex all, Neuchatel Bitumen 45 to 47, Limmer Asphalte 5½ to 5¾, United Limmer ¼ to ½ pm, Yorkshire Limmer ¼ to 1¼ pm, Native Guano 27 to 29, Phosphate Sewage 7 to 9 pm, Sombrero Phosphate ¼ dis to ¼ pm, and Patent Gas 5½ to 6½.

The Committee of the Stock Exchange have appointed Tuesday, the 10th instant, to be a special settling day for East Argentine Railway Company shares, Limited, Russian Copper Company share, Limited, new shares for 100,000*l* of the Falmouth, Gibraltar, and Malta Telegraph Company, Limited, and both classes of shares of the Crenver and Wheal Abraham United Mines Company, Limited, all to be officially marked.

BULLION AND EXCHANGES.—Until Tuesday the continental exchanges generally continued to rise, tending to be more favourable to this country, but to-day bills on Berlin, Amsterdam, Belgium, Vienna, and other continental centres, were more in demand, and the rates have again declined. The probability of more gold being taken for Germany is thus increased, and we understand, in fact, that the sale in Germany of bills upon London has been resumed. From the note of the Paris Exchanges which we subjoin, it will be seen that bills upon Germany are still in demand there.

The shipments of bullion to arrive from Australia next week are understood to have been sold for Germany. To-day there has been no demand for bullion in the market, the requirements on German account being very capricious.

The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

GOLD.—The demand for gold, which at the beginning of the week had a marked check, has experienced a revival, and 500,000*l* has been withdrawn from the Bank to-day, making a total of 570,000*l* during the past few days. The amounts to hand during the week have also been sent away, together with a considerable sum in gold coin received from Paris. On the other hand, 62,000*l* in sovereigns have been returned to the Bank. The Scotsman has brought 90,000*l* from the West Indies, and the Patagonia 20,000*l* from Africa. The Persian has taken 60,000*l* to Alexandria.

Silver.—Owing to large supplies the price has declined, and may now be quoted as 60½d to 60⅝d per oz standard. The demand is chiefly for Holland, and there is not yet any inquiry for the East. The West India steamer has brought about 100,000*l*, and we have also received about 50,000*l* from New York. The Poonah has taken 1£,300*l* to China.

Mexican Dollars.—There are about 250,000*l* in value of this coin now on the market. There is a good demand for the old coinage for China, but the new can only be sold at its relative value, compared to bar silver, and will therefore now be lower in price.

Exchange on India for Bank bills at 60 days' sight is 1s 11⅛d per rupee. The Council bills allotted yesterday were as follows—66 per cent. to Calcutta and Madras, at 1s 11⅛d per rupee, and to Bombay in full at the same rate. The minimum, as before, was 1s 10⅞d.

Quotations for Bullion.—Gold—Bar gold, 77s 9d to 77s 9½d per oz std; ditto refinable, 77s 11½d per oz std, last price. Silver—Bar silver, fine, 5s 0⅛d to 5s 0⅜d per oz std, last price; ditto containing 5 grains gold, 5s 0⅜d to 5s 0⅞d per oz std, last price; Mexican dollars, 4s 10¾d to 5s 0¼d per oz, last price.

In an addition to the above circular, Messrs Pixley state that Mexican dollars, ex West India packet, have been sold to-day—Old coinage at 60¼d per oz; new, 58¾d per oz.

The sum of 6,000*l* was sent into the Bank to-day, while 45,000*l* was withdrawn for Alexandria.

According to the *Gazette* return the imports of the precious metals into the United Kingdom during the week ended October 4 were:—Gold, 67,096*l*; silver, 467,706*l*. The exports were:—Gold, 1,702,075*l*; silver, 277,177*l*.

We are indebted to Messrs J. Allard and Co., of Paris and London, for the following telegram, giving to-day's exchange and bullion quotations in Paris, which will be especially interesting at the present moment:—

NOTICES AND REPORTS

STOCKS.

Chilian 7 per Cent., 1866.—Bonds representing 15,300*l* have been drawn for redemption on the 1st January.

Danish 5 per Cent., 1864.—Bonds to the amount of 8,500*l* have been published for re-payment on the 1st January next.

Honduras 10 per Cent., 1870.—The numbers of 500 bonds, representing 50,000*l*, have been drawn for redemption at par on the 1st January.

RAILWAY COMPANIES.

Atlantic, Mississippi, and Ohio Railroad—7 per Cent. Consolidated Mortgage Bonds.—The Union Bank of London have been authorised by Mr John Collinson, the company's agent in London, to issue $6,000,000 in 7 per cent. first mortgage bonds, forming part of a total issue of $15,000,000. The line runs from Norfolk, Virginia, West to Bristol, 468 miles, and it is being extended a further 100 miles to Cumberland Gap, where it will be brought into communication with Cincinnati, Louisville, St Louis, Nashville, Memphis, &c. The bonds, of $1,000 each, will be issued at 166*l* 10s, and the half-yearly coupons, payable in April and October in London at the rate of 7*l* 5s 10d per coupon, will yield over 8¾ per cent. interest to the investor. The redemption will be provided for by a sinking fund, to be applied at par between 1875 and 1891. Upon the present opened line $15,648,657 has been expended, and the gross revenue last year was $1,925,606. The present issue is required to finish the Cumberland Gap line, and to put the whole undertaking in thorough repair.

Great North of Scotland.—Capital expended, 3,066,989*l*, half-year's revenue amounted to 99,690*l*, and the expenditure to 49,536*l*, leaving 50,154*l* net revenue; to which was added 1,627*l* from the preceding half-year, and 398*l* general interest, making 52,179*l*. After providing for the dividends on the guaranteed stocks there remained sufficient for a dividend at the rate of 4*l* 10s per cent. per annum on the 5 per cent. preference stock, and of 4*l* 1s per cent. per annum on the 4½ per cent (A) preference stock, with a balance of 428*l*; as compared with dividends at the rate of 2*l* 10s and 2*l* 5s per cent. per annum respectively, and a balance of 324*l* in the corresponding half of 1870.

Greenock and Wemyss Bay.—The merchandise traffic showed an increase of 516*l*, and the passenger traffic an increase of 1,144*l*. The directors regretted the necessity for litigation with the Caledonian.

Portpatrick.—At the meeting a dividend at the rate of 2½ per cent. per annum was declared.

Tournay to Jurbise and Landen to Hasselt.—The dividend for the half-year ending June was fixed at 7s 8½d on the dividend shares, and 6s on the preferential shares.

Varna.—At the meeting it was announced that the gross revenue during the half-year, as compared with the corresponding period of 1870, increased from 18,420*l* to 27,833*l*, or about 50 per cent., while the traffic expenditure increased from 23,910*l* to 27,598*l*, or 15 per cent. The claims of the company on the Turkish Government were still being pressed.

Great Luxembourg.—A dividend at the rate of 3½ per cent. per annum (as compared with 2½ per cent.) is announced.

Lancashire and Yorkshire—London and North-Western.—A special meeting of the London and North-Western Railway shareholders is called for the 20th inst., to approve the amalgamation of the undertaking with the Lancashire and Yorkshire. Pending the application to Parliament for the necessary authority, it is proposed to enter into an agreement "with respect to the working and management of the said undertakings, and for the division of the receipts arising from traffic, using both lines, or lines in which the two companies are jointly interested." A special meeting of the Lancashire and Yorkshire shareholders will also be held on the same day, for the same purposes.

[Continued from Page 1218.]

Pebbles.—A dividend at the rate of 7½ per cent. per annum has been declared.

BANKS.

Bank of Victoria.—Half-year's net profit, 30,915*l*; available, 56,638*l*. A dividend at the rate of 10 per cent. per annum was declared at the meeting, 25,000*l* was added to reserve thus raised to 150,000*l*, 2,500*l* was placed to the previous account, and 4,135*l* was carried forward.

Chartered Mercantile of India, London, and China.—A dividend of 3 per cent. for the half-year is notified.

India and London.—It was stated at the meeting that the profit for the half-year was 7,242*l*., making, with the sum brought forward, a total of 9,211*l*. After writing off losses, there remained 6,011*l* for division, out of which a dividend was declared for the six months at the rate of 3½ per cent. per annum, free of income tax, leaving 102*l*.

London and Brazilian.—With reference to the reconstruction, it is proposed that a new company should pay 480,000*l* by instalments for the purchase from the bank of its business and assets, **subject to all its commitments, except the liability to shareholders** for paid-up capital. This would give 30*l* to the holders of each 100*l* share in the present bank (45*l* paid), and 3*l* to the holder of each 200 shares (75 10s paid). It is also suggested that the reconstituted capital of the concern shall consist of 1,000,000*l*, in 50,000 shares of 20*l* each, and that the existing shares shall be exchanged as follows, viz.:—Three reconstituted 20*l* shares, with 10*l* per share paid, for each existing 100*l* share with 45*l* paid, and one reconstituted 20*l* share, with 10*l* paid, for each two existing 20*l* shares, with 7*l* 10s per share paid.

MISCELLANEOUS COMPANIES.

Pollock's Patent Printing and Ticket Registering, Limited.—Capital, 75,000*l*, in 5*l* shares, of which the vendor receives 4,000 shares, and 6,000 shares are offered for subscription. The inventions acquired enable the company, at a greatly reduced cost, to **print simultaneously in various colours, as well as to perforate or cut tickets, labels, &c., and to number the same in "one** unbroken and continuous strip, web, or coil." Engineers of **repute are stated to speak well of the invention, for which** patents are taken out in various countries, and the tramway companies amongst others have agreed to adopt the system.

Bentheim Bituminous Asphalte Paving, Limited.—Capital, 120,000*l*, in 30,000 shares of 4*l* each. The "Bentheim Bituminous Asphalte" is obtained from mines covering [illegible] acres, conceded from the Hanoverian Government in perpetuity, **without royalty; and it is stated to be peculiar in** being able to resist a great amount of heat. The purchase price is 30,000*l* in cash, and 30,000*l* in shares, which includes all machinery, engines, and plant on the property. The mines **are reported as favourably situated for the shipment of the** material.

Buenos Ayres National Tramway.—Disposable balance, 2,508*l*; six months' interim dividend, 3s per share, free of income tax. The yellow fever caused a decrease in the traffic.

Victoria Engineering.—A dividend at the rate of 5 per cent. per annum has been declared.

Gas Light and Coke.—The profits of the half-year enabled the directors, after providing for the payment of interest on the several classes of preference shares, to declare a dividend **at the rate of 10 per cent. per annum on the ordinary shares,** and the directors congratulated the proprietors on so satisfactory a state of affairs. The capital account showed that 2,014,067*l* had been expended, including 653,206*l* at Beckton Works, leaving a balance of 134,620. The revenue account for the half-year ending the 30th of June last showed that 281,686*l* had been received and 275,714*l* expended, leaving 5,971*l*.

New Swansea Property, Limited.—Capital, 130,000*l*, in 10*l* shares; [illegible] shares allotted for subscription. The purchase of the lease, 14½ years unexpired, of the Island of Somborero, with all necessary machinery for working the extensive deposits of phosphate of lime thereon, will be made for 115,000*l*. The profits realised by the liquidator of the old company during the past 20 months has amounted to 23,000*l*, and the new undertaking anticipates a profit of 40,000*l* a year.

Prince's Patent Candle.—At the meeting the preference dividend was declared, carrying forward a balance of 19,501*l*.

Special Settling Days.—The Stock Exchange Committee have appointed Tuesday, the 10th instant, a special settling day in the scrip of the Imperial Ottoman 6*l* per Cent. Egyptian Tribute Loan of 1871, which is to be so marked. The Committee have also ordered the shares of the Navigazione Italiana Sovrana, Limited, to be officially quoted as "preferred."

Swansea and Carmarthen Dinas Anthracite Iron, Limited.—Capital, [illegible], in 5*l* shares—four-fifths, [illegible] shares. This company have obtained an exclusive concession from the Llanelly Anthracite Company for supplying this material in the counties of Yorkshire and Staffordshire. The price of the concession is 25,000*l*, and Messrs. A. Speight and Sons, of Leeds, have contracted for the execution of the works in Yorkshire.

MINING COMPANIES.

Mineral Hill Silver, Limited.—The directors announce the receipt, per steamer Germany, from New York, of 14 bars of silver, value $18,414.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The grain trade at Mark lane to-day was less active than on Monday last, owing to the increased supplies on offer. English wheat with difficulty maintained late rates, while foreign was 6d to 1s per quarter lower to sell. Flour was held firmly, but the transactions were on a very limited scale. Maize and oats were rather dearer, but beans and peas ruled steady in value. Fine barley was not plentiful, though the arrivals of inferior descriptions were liberal. Linseed and rapeseed sold on former terms. This week's imports of foreign and colonial produce into London have amounted to 28,670 qrs of wheat, 7,200 barley, 33,820 oats, 3,560 maize, 8,290 beans, 800 sacks and 6,790 barrels of flour.

The Liverpool cotton market opened on Friday last with a good demand, at firm rates; the business has increased day by day at gradually advancing prices. The sales for the week have been exceedingly large, amounting to 183,200 bales, of which the trade have taken 118,260 bales; speculators and exporters 64,940 bales. The imports for the week are 196,627 bales; the actual exports 3,360 bales; and to-day's stock is estimated at 499,000 bales. Quotations for American descriptions have advanced ⅛d to ¼d per lb; East Indian, ¼d to ⅜d per lb; and Bengals, ⅛d per lb since this day se'nnight. To-day the market closes strong. Sales, 20,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended October 5, 1871:—

	Imported.		Exported.
American bales	26,616	.....	1,375
Brazilian	18,318	.....	1,100
East Indian	160,277	.....	8,362
Egyptian	1,034	.....	331
Miscellaneous	13,677	.....	90
Total	219,922	.....	11,258

At New York on October 5 middling Upland cotton was quoted at 20½ cents per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, September 5:—There has been an active inquiry for nearly all descriptions of cotton throughout the week, and although the purchases of ready cotton have necessarily been very limited, owing to the meagre supply, considerable contracts have been entered into for delivery after the monsoon. The total transactions aggregate 3,600 candies, of which 2,000 candies are sawginned Dharwar for delivery up to the end of November, at prices ranging from 220 rs in the early part of the week to 225 rs at the close. The remaining 1,600 candies are made up chiefly of Sholapore, which has latterly comprised the bulk of our receipts, and a few parcels of Verungaum and Ahmedabad sorts. A reference to the figures given below will show that the clearances of cotton to all ports are about 70,000 bales in excess of clearances for the same period last year, and the following statement, showing the quantity of cotton that will probably be available for shipment during the next three months, say to 30th November, may be of interest to our readers:—

	Bales.
Estimated stock to-day of all sorts	35,000
Probable receipts from Dhollerah and Kattyawar ports	35,000
Probable receipts from Compta and Carwar	15,000
Probable receipts from the Berars, Sholapore, Khandeish, &c.	20,000
	105,000
Deduct for local consumption	20,000
	85,000
Allow for stock in Bombay 30th November	40,000
Available for shipment	45,000

We give these figures for what they are worth, as although we think the estimates will be found pretty correct, it is impossible to insure perfect accuracy. We have allowed for receipts from Dhollerah, &c., 35,000 bales, against 17,000 bales during the same period last year, and from above Ghaut 20,000 bales, against 13,000 bales. On the other hand we have made no allowance for Guzerat, our correspondents informing us that there is little or nothing to come forward from that quarter after the rains. The weather since we last wrote has been very much more seasonable, about 8 inches of rain having been registered in Bombay during the week, and so far as we have yet heard the fall has been very general. It is still too soon to speak definitively about the prospects of the crops, but all immediate apprehensions may be dismissed; and although the season is backward no serious damage has been sustained. We are favoured with the following communications from our correspondents in the districts:—Broach—"Timely showers have put the crops beyond immediate danger; about 19 inches are still required to make up the average rainfall." Khangaum —"We have had a slight fall of rain, and the sky is still much clouded. Though the crops will no doubt have suffered to some extent from the long drought, no great falling off need be anticipated." Sheagaum —"Sufficient rain has fallen to dispel any fears regarding the crops in this neighbourhood." From Oomrawuttee and Hingunghat equally encouraging reports have been received. Khandeish—The crops were reported backward for want of rain, but the late fall has doubtless extended to this district also. Dharwar—We have a telegram, dated 2nd instant, reporting heavy rain, and crop prospects improving. Dhollerah—No reliable accounts have yet reached us. Tinnevelly—We have telegraphic news to yesterday, quoting 7⅛d, c. and f.

Export of Cotton from Bombay to September 4.

	1871.		1870.
London bales	21,505	.....	1,570
Liverpool	664,196½	.....	778,256
Total, Great Britain	685,701½	.....	779,826
Channel for orders	37,333	.....	10,379
Continent	265,232½	.....	130,664
China	47,128½	.....	44,459½
Grand total	1,035,395½	.....	965,328½

Actual exports since last mail left, 11,475 bales.

The Imperial Ottoman Bank have forwarded the following report, dated Alexandria, Sept. 22:—The transactions in the old crop have been very limited, owing to reduced stocks and scanty arrivals. The total stock is not estimated at more than 15,000 cantars, of which 1,000 are in the hands of one large dealer who is not offering. In the new crop the arrivals till this morning were scanty, and realised the fancy prices of 10⅞d to 11⅛d for small sample lots. To-day, with arrivals of about 800 cantars, prices have given way, and 500 cantars were sold at 9⅞d per lb for a poor quality of good fair. The tendency of our market is downwards, owing to dull Liverpool advices, and news of large daily receipts in the interior. Contracts were at 10⅛d to 10⅛d for fair November delivery, in the early part of the week. To-day a transaction has been effected at 9⅞d, and for second-class signatures ⅛d lower would be probably accepted. The following quotations are nominal:—Fair, 9d to 9⅛d per lb, f.o.b.; fully fair, 9⅛d to 9⅛d, ditto; good fair with staple, 9⅞d to 10d, ditto. Shipments from September 8 to September 21—England, 2,071 bales; France, 124; Italy, 102; Austria, 242—total, 2,539 bales.

The colonial produce markets have ruled steady this week. Sugar has been in good demand, and an advance of 6d per cwt has taken place. The estimated stock in London is 149,760 tons, against 209,465 in 1870, and the quantity afloat for the United Kingdom and the continent, not including Government exports from Java, is 34,600 tons, against 32,200. Native Ceylon coffee has ruled the turn dearer, and plantation sorts have commanded extreme prices. The quantity on passage for the United Kingdom and the continent, not including Government exports from Java, is 15,800, against 18,600 tons in 1870. Rice has been in request both on the spot and on passage, and higher rates have prevailed. Common tons are also dearer. Spices have realised very full rates.

The following report, dated Sept. 2, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—We have had

a rather quiet fortnight in exports, and the clearances outwards with cargoes have been few. The total to date shows a deficiency of 5,288 tons as compared with last year. The distribution is shown below —

PLANTATION COFFEE.

	1871. cwts.		1870. cwts.

	1871. cwts.		1870. cwts.
To Great Britain	92,446	.....	94,756
Foreign ports...	27,345	.....	28,928
Australia and India ...	2,521	.....	2,366
	122,482	.....	126,050

We have had an active market for parchment coffee since our last issue, and considerable purchases have again changed hands. For high-grown descriptions prices remain strong, 18s having been paid, and the value of ordinary and low plantation has advanced fully 4s per cwt. We quote native coffee picked and fresh for shipment nominally at 80s, but scarcely any has changed hands except amongst dealers.

Annexed is Messrs Dupont and Co.'s circular —We have to report a month of moderately current business in silk, improving rather towards the close and without any quotable change in prices although a slight firmness may be traced in good medium silk and about a similar weakness in lower grades. 41 to 43 would however be the extreme in either case; best silk on the other hand remains unchanged. The arrivals have been very large. The latest are generally at a cost above our present quotations so that sellers are less eager, but while any profits were visible the pressure was rather great. The deliveries are very good, but we shall need a full continuance of present speed if contemplated importations come forward. In Japan silk we have had some little business, the extremely low prices attracting attention. In Canton silk consumption continues to follow as a natural consequence upon relative cheapness but the arrivals have been too heavy to allow a full support of prices. In Bengal silk we can report nothing favourable. It may be that as the supply of European silk diminishes Bengal silk may meet with more inquiry, but at present all is dark and heavy. Stocks increase and deliveries reveal the smallness. The periodical public sales are fixed to commence on the 25th instant.

According to Messrs Arlès Dufour and Co. of Lyons, the silk market of that city during the past two weeks ended the 23rd instant is characterised [illegible] for nearly all [illegible] of manufacture, which gives hope and a good inquiry for almost complete [illegible] the passing settlement of political questions on [illegible] has been [illegible] active. The [illegible] purchases for European ports have continued to open a marked preference for them, and a further increase of 10 to 15 per [illegible] has been established. The first portions of new silk from China although unloaded on a late market, were not taken up eagerly as might have been expected, and prices have slightly declined.

Messrs Lindsay, Dallas and Co. report —The condition of the home market seems to substantial variation as compared with that noted [illegible] the first week of the series. Trade still in progress and [illegible] some fluctuations in particular lines. Cotton showing a slight tendency to [illegible] prices, especially for [illegible] qualities. Yarns in most cases [illegible] weeks of [illegible] the amount of stock from the first hands [illegible] a tendency towards [illegible] the tendency to advance has been met in more [illegible] market than in any other [illegible] trade as regards clothing [illegible] the improvement in [illegible] has been [illegible] indeed in [illegible] clothing, and especially [illegible] coloured goods, which constitute a large [illegible] of the present [illegible], the extreme rates of the first week of the series have not been uniformly maintained. In all quarters their appears to be considerable indisposition to purchase in excess of the requirements which may arise during the interval to elapse before the arrival of the new clip, and a tolerably general opinion prevails among consumers that, in the absence of the exceptional demand which existed last season for military purposes, the natural check to consumption consequent upon so sudden and extreme an advancement in the price of the raw material must, with the advent of the new season's wools in quantity, necessitate the return to a somewhat more moderate range of quotations. We quote, as compared with the closing rates of July, an advance in scoured wools of all kinds of bulky character and suitable for combing purposes of 2d to 3d per lb; of clothing descriptions, 1½d to 2d per lb; ditto, faulty and inferior, 1d. In fleece wools, combing, 2d to 2½d; ditto, clothing, 1½d to 2d. In grease wools an average of 1d. The competition for Capes has been well maintained at an improvement in snow-whites of 2d to 2½d per lb; fleeces, 1d to 2d per lb; grease wool, 1d per lb.

Messrs T. J. and T. Powell report :—The month of September is usually a time of activity in the leather trade; this year the amount of business transacted has been good, but curtailed by short supplies of nearly every description of leather. The large advance in prices on many goods that took place in August has been followed by a brisk demand through the past month; the extreme rates then current have been well supported, and on some goods, especially heavy butts, both English and foreign, a further advance in prices has been realised. The stocks of leather in factors' hands are usually small, and as the general trade of the country is unquestionably very good, there is every prospect to believe that the demand will continue to absorb any supplies of fresh leather that may come forward to market for some time to come. In raw goods the transactions have been chiefly confined to the two public sales held in September; at these sales the attendance of both home and export buyers was good and the tendency of prices was upwards.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, September 1 :—There is but little of interest to add to our last advices about the crop. There has been an inundation over most of the districts in Lower Bengal, the highest known for many years; it is too late to do any material damage to this season's indigo, and will leave the lands in fine order for next year's cultivation. In Tirhoot and Chumparun, the weather has been generally favourable for the growth of the Khoontias, although the fall of rain has been rather more than was wanted in some parts. From Chuprah the accounts are not quite so good owing to continued rain. In the Benares Provinces things have gone from bad to worse: the yield from the Khoontias has been miserably poor, and the Assaroo plant is generally looking weak, sickly, and blighted, and planters expect little or nothing from it. From the Doab, our advices continue unfavourable, and it will require fine weather to the end of the season to bring the out-turn up to the estimate given in our last issue. The demand for marks of indigo "to arrive" has continued active, and the following transactions are reported :—A C T Tatenah, Tirhoot, about 450 mds at 305 rs per fy. md.; H A S J Jeetwarpore, Tirhoot, about 600 mds, at 305 rs per fy. md.; H R S Seerpore, Chuprah, about 800 mds at 302 8 rs per fy. md.; G I Co. Colgong, Bhagulpore, about 200 mds at 285 rs per fy. md.; J & R W—all Messrs Watson's marks, about 3,700 mds, at 320 rs per fy. md., on the usual terms, with 5 per cent. rejections. The quantity now disposed of is about 26,000 factory maunds.

The annexed is dated New York, Sept. 23 — General trade continues to progress favorably, and there is every assurance that the result of the season's business will be equal to the early anticipations. The prospect of a continued good export trade in all the great staples of the country is encouraging. Our avenues of inland transportation are fully occupied in bringing forward the fruits of the soil, and carrying back merchandise for which the various crops are exchanged. This process gives a more active circulation to money, with the consequence of a quick, easier appearance in the rates for loans, and a more healthy condition of the market generally. On this side of the Atlantic, we have caught the spirit of animation, and with no unfavorable circumstances the year will close with a far brighter commercial record than the country has made in a long period. It is fortunate that we have so liberal a surplus of food staples with which to make good the deficiencies of Europe. The shipments of grain for some weeks past have been something enormous, as if unprecedentedly good and weakening prices present a strong inducement for the West to avail themselves to meet the demand upon this country, which is likely to be increased with the closing of the Baltic ports a few weeks hence. The outlook, in connection with the movement of the autumn crop, now about commencing, must fail to furnish employment, at reasonably good rates, for almost all the tonnage that is likely to seek our ports. The money market show increased activity, partly through stock and gold clique manipulations. The rates on call have ruled

at 5 to 7 per cent., and discount rates for prime paper 6½ to 8 per cent. for first class short acceptances. The Treasury Department having awakened to a just sense of the dangers to which the commercial interests of the country are exposed by the machinations of speculators (aided, it is said, by a Montreal bank), sold six millions of gold on Thursday in place of the two millions advertised. This had the effect to send the price below 114, and strengthen foreign exchange. But since then, with a brisk demand and light supply, part of the decline has been recovered.

Mr W. van Houten thus reviews the Dutch tin trade during the month of September:—The tin market has been without animation throughout the month, but closes with a very strong feeling. On the 28th inst. the 85,268 slabs offered in public sale by the Dutch Trading Company were sold as follows:—83,217 slabs Banca at 77¾ fl to 79 fl, average 78.80 fl, with a curtailment of 56 per cent. on the orders; 2,051 slabs Billiton at 78½ fl to 78¾ fl. Banca has been in limited demand at 79½ fl to 79¾ fl. Ex the autumn sale a good business was done at 78 fl to 79 fl. Since the sale some transactions at 79½ fl to 80 fl were reported. Billiton has been in general request at 78 fl, while landing parcels changed hands at 77½ fl. Several lots of Billiton to arrive found buyers at 78 fl. The following statement shows the position of Banca tin in Holland on the 30th September, from the official returns published by the Dutch Trading Company:—

	1871.	1870.	1869.
Import in September ....slabs	4,246	9,139	20,844
Previously this year	95,874	129,851	45,036
Total 9 months....	100,120	138,990	65,880
Deliveries in September	9,000	6,226	10,399
Previously this year	107,191	84,939	64,173

Total stock	132,857	171,478	132,581
Stock of Billiton	3,051	4,000	10,714
Import in September	...	4,000	8,075
Delivered and shipped in September....	3,550	1,698	3,475
Quotation Sept. 30... Banca	80⅞ fl	74½ fl	78¼ fl
Quotation Sept. 30... Billiton	79½ fl	73⅝ fl	77½ fl

The quantity of Banca tin now afloat for the Dutch Trading Company is 7,450 peculs, equal to 466 tons, against 18,100 peculs, equal to 1,131 tons, last year. We estimate the quantity of Billiton tin now afloat at 5,971 peculs, equal to 373 tons, against 10,271 peculs, equal to 642 tons, last year.

THE COTTON TRADE.

LIVERPOOL.—October 5.

Cotton was in good demand, with gradually hardening prices, in the early part of the week, and yesterday the market was greatly excited, and has since continued very active, at decidedly advancing rates. For Sea Island there has been only a moderate demand without change in prices. American has been in great request by the trade, and the selection being much reduced, prices have risen fully ⅜d per lb. New York advices to the 5th instant quote middling Upland 20½ cents, costing to sell in Liverpool 10¼d per lb, by steamer. In Brazil the transactions have been unusually large, at ¼d to ⅜d per lb advance on last week's currency. Egyptian, from its comparative cheapness, attracted attention, and with an increased demand and considerably reduced stock, prices of the current qualities are ¼d per lb dearer. East Indian has been in largely increased demand on the spot, and extensive transactions have taken place, particularly in landing cotton, out of the recent heavy import, and prices of the medium and better descriptions have advanced ¼d to ⅜d per lb. Bengal and Scinde are only partially ¼d dearer.

In cotton to arrive and for future delivery the business has been considerable, and yesterday was particularly large, at higher prices. The latest quotations are—American, basis of middling (from any port), not below good ordinary, October below good ordinary, 9⅞d; New Orleans, November delivery, not delivery, 9¾d; bales, October-November shipment, new crop, not below good ordinary, 10 3/32d; Charleston, not below low middling, new crop, September-October shipment, steamer 9⅞d; Maceio, fair, mutual allowances, ship named 9⅞d to 9 5/16d; Santos, fair mutual allowances, ship named 9⅝d; Broach, good fair new merchants, machine ginned, sailing June 8⅝d; Dhollerah, fair new merchants, sailing May 7½d; June 7 5/16d; July 7⅜d; Aug. 7⅛d; October delivery 7⅛d; Oct-November shipment, canal 7⅛d; Oomrawuttee, fair new merchants, due 7⅛d; October-November delivery 7½d; Comptah, fully fair, July sailing 7⅛d per lb.

The sales of the week, including forwarded, amount to 183,200 bales, of which 49,490 are on speculation, and 15,450 declared for export, leaving 118,260 bales to the trade.

October 6.—The market opens strong, and the sales will probably amount to about 20,000 bales.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	694,520
An increase of quantity taken for consumption of	547,020
An increase of actual exports of	266,689
A decrease of stock of	38,160

In speculation there is an increase of 323,310 bales. The imports this week have amounted to 196,627 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to September 29) is 36,000 bales, against 23,000 bales at the corresponding period last year. The actual exports have been 3,361 bales this week.

LONDON.—October 5.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

During the week the market has been excited, and a large business has been transacted, prices closing at an advance of ⅛d to ¼d on the spot, and ¼ to ⅜d per lb for arrival.

NEW YORK.—Sept. 22.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Sept. 22. From the figures thus obtained it appears that the total receipts for the seven days have reached [illegible] bales, against 12,561 bales last week, 9,137 bales the previous week, and 7,579 bales three weeks since, making the total receipts since Sept. 1, 1871, 42,464 bales, against 68,464 bales for the same period of 1870, showing a decrease since Sept. 1, this year, of 26,000 bales. The exports for the week ending this evening reach a total of 4,283 bales, of which 4,283 were to Great Britain, none to France, and none to rest of the continent, while the stocks to-night, as made up this evening are now 87,384 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending Sept. 22	Exported to		Total this week.	Same week 1870.	Stock.	
	Great Britain.	Continent.			1871.	1870.

Other ports	0	...	0	266	10261	8264
Total	4283	...	4283	7766	86456	72426
Total since Sept. 1	37777	91	37868	68464	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 3,472 bales, while the stocks to-night are 13,956 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Sept. 15, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph:—

Ports	Receipts since Sept. 1		Exported since September 1 to				Shipments to Sept. 15 from Ports	Stock
	1871.	1870.	Great Britain.	France.	Other Foreign.	Total.

Total last year	...	68464	30777	1967	...	1.7776	39967	53953

The market the past week has been greatly depressed, not from any causes originating on this side, but by the very unfavourable European accounts. Liverpool just now appears to be unwilling to give much over 9¾d for middling Uplands, while our price is equivalent to about 10d. The weak points in cotton at present are the large stocks held by English and continental spinners, and the near approach of the time when our receipts must be large. The latter fact makes holders here a little timid, while the former fact gives to the European buyer no little independence. At the same time there is in our market an undertone of considerable strength based upon the anticipated falling off in our crop, and the large consumption all over the world the past year. For immediate delivery the total sales foot up this week 8,348 bales including 4,354 for export, 3,311 for consumption, 162 for speculation, and 521 in transit. Of the above, 1,266 bales were to arrive. The following are the closing quotations:—

	Uplands and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary per lb	16¼ @ ...	17 @ ...	17¼ @ ...	17¼ @ ...
Good ordinary	18¼ ...	18¼ ...	18¾ ...	18¾ ...
Low middling	19¼ ...	19¼ ...	19¾ ...	19¾ ...
Middling	19¾ ...	20 ...	20¼ ...	20¼ ...
Good middling	21¼ ...	21¼ ...	22¼ ...	22¼ ...

For forward delivery the sales (including 100 free on board) have reached during the week 80,500 bales (all low middling or on basis of low middling).

Movements of Cotton at the Interior Ports.—Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:—

	Week ending Sept. 22, 1871.			Week ending Sept. 22, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	1353	1265	3186	3069	1728	3277
Columbus	473	304	1301	1893	1229	2244
Macon	407	228	1970	3442	1992	3049
Montgomery	1083	446	2253	2153	1396	2244
Selma	1050	714	1078	1481	1001	2300
Memphis	1756	1066	2048	1085	2543	1362
Nashville	191	277	178	198	266	1867
	6313	4300	12304	13859	10145	16884

The above totals show that the interior stocks have decreased during the week 1,013 bales, and are to-night 4,383 bales *less* than at the same period last year. The receipts have also been 7,546 bales less than the same week last year.

The exports of cotton this week from New York show a decrease since last week, the total reaching 3,644 bales, against 7,924 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1871; and in the last column the total for the same period of the previous year:—

Exports of Cotton (bales) from New York since Sept. 1, 1871.

—*New York Commercial and Financial Chronicle.*

NEW YORK, Sept. 29.—According to Messrs Moffatt, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 34,000 bales, and since the 1st of September, 79,000 bales. Shipments to England, 9,000 bales; ditto, to France, 4,000 bales. Total shipments since the 1st of September, 46,000 bales. Stock at all ports, 100,000 bales. Middling Upland, 9½d, cost and freight, per steamer.

NEW YORK, Oct. 3.—The receipts of cotton at all United States' ports for the last four days have been 21,000 bales. Shipments to England, 10,000 bales. Middling Upland, 9¼d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Oct. 5.—The actual business done during the past week has been small and much below the production; here and there business has been done where producers did not insist upon full rates, which was the case frequently up to Friday last. The excitement which has since taken place in the cotton market at Liverpool, with the very large daily sales reported at advancing rates, have compelled spinners and manufacturers to advance their quotations and adhere firmly to these—the consequence is, as buyers see no inducement to follow the upward course of prices, they have made few offers lately. To-day producers here hardly know what prices to ask as they are quite in the dark as to how high cotton may advance during the present excitement. Many have withdrawn their productions from the market, whilst most others ask so great an advance as to stop business. Yarns were sold to a fair extent up to last Saturday. Since then they have been very dull, especially shipping qualities. Cloth is very quiet, as our large buyers keep quite aloof from the market except for miscellaneous lots for assortment. The market closes very strong, but little doing owing to the advance in prices.

Messrs Alex. Collie and Co. received the following telegram from Manchester yesterday:—Market very firm, and quotations are higher by ¼d per lb on yarns, and 1½d to 3d per piece for shirtings; buyers adopt this advance reluctantly, and the day's business has been limited.

BRADFORD.—Some staplers report that there is rather more inquiry for wool, and that the better classes of wool are in more active request, though the amount of business doing is only meagre and does not afford any actual test of prices generally, which may be quoted as nominally firm. In the lower descriptions of short wool there is a restricted business doing, and prices are easier. In the best English and Botany there is a good demand, and prices are firm. In the yarn market there is a little more inquiry both in twofolds and some descriptions of single yarns. There is a restricted business doing in the piece market.

ROCHDALE.—Manufacturers continue to experience the utter impracticability of obtaining prices at all commensurate with the enhanced value of wool, and in some mills recourse to short time has been adopted in the expectation that by lessening production higher prices for goods may be obtained. Stocks of goods are unusually low in manufacturers' hands. Business in wool during the past month has been of a retail character: the extreme prices ruling in the country, at the present London sales and elsewhere, have deterred consumers from operating, yet there is little prospect of any reduction on existing rates.

LEEDS.—The cloth-halls have not presented any feature calling for particular notice, and few parcels of more than ordinary size have changed hands. Low and medium priced mixture tweeds are in pretty good request, but purchases are made with caution. Hairlists have had a regular though not extensive sale, and the generality of purchases betokens the close of the season.

NOTTINGHAM.—There has not been much doing in the factories and lace warehouses this week. The demand for cotton trimmings, crochet edgings, and Valenciennes continues good, and plain nets for export are in fair request, while the inquiry for curtains is increasing. On the whole, the lace trade is in a satisfactory condition.

BIRMINGHAM.—The iron market continued very firm. Little business was done, but the representers of makers reported a steady influx of business at the works. The wages difficulty continues, and the iron-work have not yet agree to accept the liberal concessions of the masters, but a strike is not apprehended. Heavy ironwork makers of the district are exceedingly busy, and the demand for plates, angles, tee bars, &c., is great. Bars may be quoted at £8 10s to £9. All best brands are at the latter price. Several heavy contracts for pig were reported, and the rates generally accepted have been £3 12s 6d to £4 for Staffordshire pig. The average prices are £3 15s and £3 17s 6d. Cinder pig brings £3 to £3 17s 6d. Iron ore is in great request, but very high prices check a disposition to buy in large parcels. Coals sell well at the recent advance of 1s per ton.

BELFAST.—Flax—Comparing supplies at present in the markets with those presented at the corresponding period last year, the deficiency seems astounding. Under such circumstances of course prices rule very high. Yarns—High prices ruling retard extent of sales. Stocks have slightly increased; prices remain firm as previously. Powerloom linens, brown—Heavy makes in good request. A fair business in almost all descriptions. Handloom linens, brown—Production being small, demand is fully equal to its absorption. Late prices have been steadily maintained and fully realised.

DUNDEE.—During the past week considerable business has been done in flax goods on the spot, chiefly in better sorts, and prices have in some cases had an upward tendency. The transactions have been mostly with distant buyers, our local consumers being generally supplied for the present by their recent importations. Tows of all kinds are held very firmly, and there continues to be a fair demand for medium sorts, at steady prices. Jute is without much change. There has been a moderate business doing in flax and tow yarns, and prices are steady. Jute yarns have also been in good demand, at fully former rates. In linens there continues to be a good business doing, and jute fabrics are also in extensive demand; so that there is still full employment to all who are engaged in the various branches of our trade.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, SEPT. 22.

The market opened this week quite flat, but favoured latterly by a decline in ocean freights, with very moderate offerings, there has been some improvement in prices of leading stuffs for export; the close, however, is irregular and unsettled. The receipts of flour have continued barely equal to the wants of the market, and when ocean freights declined and brought buyers for shipment into the market on Wednesday, prices of the low and medium grades of State and Western flour recovered the decline which had been caused in the first half of this week by the general dulness which prevailed. The better demand, however, was freely met, and some reduction effected in stocks on hand, preparatory to the reception of more liberal supplies early in the season. The Liverpool quotation has been reduced a shilling. The Western millers do not appear to be increasing their productions. To-day, with less confidence in an early advance in gold, and more steadiness in freights, with a check to the advance in wheat, the flour market closed dull, with common shipping extras selling as low as $6.10 from the wharf, and good at $6.25. Wheat has advanced in the face of a considerable decline abroad; but sellers have been favoured by a decline of twopence in ocean freights, with receipts so small that some difficulty has been experienced in filling freight engagements already made. Among the features of the market has been an increased demand for spring wheat of the new crop, shippers having bought freely "to arrive." There has also been more demand for fine white wheats to ship to the continent, but red and amber winter wheats have been comparatively dull, with scarcely a quotable improvement, as the demand for them for export has been much less urgent. The receipts of wheat at the Western markets are now large in the aggregate, but are made up of less than the usual proportion of spring growth, the receipts at Toledo, Detroit, and St Louis, being mainly winter growths. To-day the market closed flat at $1.45 to $1.46 for No. 2 spring; $1.56 for No. 1 red winter, and $1.60 for amber Michigan. In corn there has been considerable speculation and a good local trade, with the export demand stimulated by the decline in ocean freights. The speculative demand has, however, been the controlling influence, and prices have consequently been very unsettled. To-day Western mixed sold at 72c to 72¼c in store, and 73c to 73½c afloat, closing in both cases at the lower figures, under a firmer freight market, and yellow sold at 74½c. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The grain trade has been less animated this week, and Monday's market was of a disappointing character. The advance realised on the previous Friday, however, was then maintained, but the business transacted this week has been restricted, and the tone of the market has been weak. To-day increased supplies of English were on offer, the fine weather having facilitated threshing, while there was a good show of foreign wheat on the stands. To effect sales of the latter factors must have submitted to a reduction of 1s per quarter as compared with the prices current on this day se'nnight, but English wheat maintained late rates for all dry samples. Imports have been on a full average scale, and the exports have been reduced to a minimum, though some purchases of seed wheat have again been made on French account. The number of wheat-laden vessels reported at sea for Great Britain is 280 against 340 a month since, and 286 at the time last year. Large shipments are reported from America, but New York advices report a decline of 1s to 2s per quarter. Flour has been held on former terms, but business has been much restricted. Speculation in the market generally has been checked by the uncertain position of the money markets.

Barley has come to hand freely, but good malting qualities were ruled firm to value. Malze and oats have closed at a slight advance on the week, while beans and peas have ruled steady and scarce. Linseed and rapeseed have sold on former terms.

Mr. George Duncbusch thus reports the state of the floating grain and seed trade:—During the last eight days 60 grain and seed laden vessels have arrived at ports of call, viz.: 30 wheat, 14 maize, 5 barley, 4 rye, 1 beans, 1 linseed, 1 rapeseed, 1 wheat and maize, 1 maize &c., 1 canary seed, 1 palm-nut kernels. The floating grain trade has been steady in tone. Wheat—Fine cargoes 6d to 1s dearer; secondary cargoes dull sale. Maize—Good cargoes 6d to 1s dearer. Barley—Nil fine cargoes offering. Rye also irregular in price. The reported sales are as follows:—Wheat—22 arrived cargoes: Marianopoli, 55s 6d to 56s; Rostoff Ghirka, 52s and 54s; New Coast ports, from Taganrog, 54s to 55s; Cavassian, 52s; hard from Taganrog, 56s; and Ghirka, from Taganrog, 54s; Ghirka, from Odessa, 54s to 55s; ditto, from Nicolaieff, 53s 6d; Yenik, 53s 9d to 54s per 492 lbs. Dantzbian, 40s; No 1 spring from Montreal 57s; white Barletta, 62s; Salsh, from Alexandria 42s 6d per 480 lbs. On passage, 7 cargoes: New Ghirka Odessa, 54s 6d to 55s per 492 lbs; No 1 spring, from New York, 56s to 58s; and winter from New York, 58s white winter from Philadelphia, 61s; American winter from New York, 55s 9d per 480 lbs. To be shipped, 1 cargo No 1 spring, from Philadelphia, 58s per 480 lbs. Maize—12 arrived cargoes Odessa, 36s; Galatz, 32s 6d to 33s; Moldavian, 32s; Rostoff, 35s per 492 lbs; Wallachian, 28s 9d to 31s 6d; Danubian, 28s 6d to 31s; mixed American, 33s 6d per 480 lbs. Shipped or to be shipped, 200 sacks lentil lately from Calcutta, 42s 6d to 43s 9d per 480 lbs, A.T. Imported from The sales are—One cargo rejected Azov, from Taganrog, 28s per 424 lbs, A.T.; sanded in London, 200 tons oil brown, from Calcutta, 47s 6d per 480 lbs, A.T. Offered steady. The sales are—Shipping, two tons Egyptian, from Alexandria, 9 10s per ton; reloaded, 250 tons Egyptian from Alexandria at 7 5s per ton. Cork Arrivals—On passage 1 cargo Wallachian, 31s 6d per 480 lbs. Shipped or to be shipped, 4 cargoes Mixed from New York, Quoted 30s per 480 lbs; and Barley, 40s per 400 lbs. Barley, Turkish cargoes: Azov, from Taganrog, 34s to 34s 6d; Wallachian from Sulina, 27s 6d; and Danubian and Black Sea, 28s per 400 lbs. To be shipped, 1 cargo 29s per 400 lbs. Rye, 2 arrived cargoes: Azov, from Taganrog, 32s to 33s 6d per 400 lbs. Linseed quiet after late week's excitement, but prices steady. The sales are, 2 arrived cargoes: Odessa at 53s 6d and Azov, from Taganrog, 53s 9d per 496 lbs, A.T. On passage, 2 for Azov, from Taganrog, 53s; 2,750 qrs Odessa, at 53s per 424 lbs, A.T. For sales Last Week, from Calcutta, 53s per 424 lbs, A.T., 75 tons Bombay at 48s per 416 lbs, A.T.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market exhibits increased firmness, with a steady demand, especially for the lower descriptions, which may be quoted 6d per cwt dearer. Refiners have taken full supplies of West India, viz., 3,176 casks to yesterday, at the above recovery for brown sorts. Jamaica by auction realised 26s 6d to 30s per cwt for low brown to grey. The Barbadoes was chiefly bought in. Crystallised West India sugar is getting rather scarce. A few lots grocery Porto Rico obtained full prices. The chief feature of the week is the speculative demand for analyzed Manila at 6d to 1s per cwt above the lowest rates current last month. With a continuance of good deliveries the stock has suffered a further decrease, and is now almost 30,000 tons less than at the same date last year, while the falling off as regards the United Kingdom amounts to about 50,000 tons.

Mauritius.—There have not been any public sales.

Penang.—3,511 bags two Siamese sold at 34s 6d to 34s for soft yellow, mixing to fine. Privately, 540 baskets low brown at 29s 9d.

Jaggery.—50 bags sold by auction at 21s.

Manilla.—Sales on the spot have not exceeded 9,000 to 10,000 bags: clayed, 29s to 29s 6d; Leaf, 31s 6d; Zebu, 22s 9d. About 1,450 tons Bo Ea afloat have sold at 27s 3d to 28s 6d.

Cuba Foreign.—450 casks Havanna by auction sold as 28s to 30s 6d for brown and low yellow, and 32s 6d to 37s for low browns. 246 casks Porto Rico part sold at 30s to 33s for middling to fine yellow, and 29s 6d to 30s for refining sorts.

Refined Sugar.—Two of British West India at 37s 3d, one of Porto Rico at 37s per cwt.

Molasses.—The market is firm, and dry goods have slightly advanced for export to meet the requirements of the grocery trade, but the continued value of brewery goods in stations tend to check any material improvement here. Nothing new has to be reported in the 32s 6d per cwt.

Molasses.—Mauritius have sold at 11s 6d per cwt.

Rum.—A good business has been done in Jamaica at 1s 3d to 4s per gallon. Common Rhum from 1s 6d to 2s 6d per gallon. Leewards at 1s 3d; Demerara, 1s 9d to 2s 10d; Penang, 1s 6d per proof gallon.

Coffee.—Ceylon has been in steady demand and 1,400 bags have been steadily sold at and after the sales on about former terms. Low to

fair 46s to 51s, good and superior, 52s to 58s 6d. 493 bags Trinidad part sold at 70s to 85s, this description being quiet. 296 bags Guayaquil, of old import, sold at 48s per cwt for ordinary.

COFFEE.—There has been a good deal of business in common kinds at rather higher rates, including native Ceylon at 59s to 61s, and native East India at 60s to 61s 6d. Several hundred tons of both have been sold afloat, of which particulars are not given. The relatively small quantity of plantation Ceylon by auction, viz., 682 casks 79 barrels 351 bags, obtained full rates: colory, middling dull to bold, 72s 6d to 83s; pale and grey, 66s to 75s, according to size. Business also reported privately. 641 cases East India, chiefly Naidoobatum sold from 65s 6d to 70s 6d. Privately sales of Manila at 59s 6d to 62s. The public sales of foreign have been too small to report, and include good Rio at 59s 6d to 60s. Yesterday a floating cargo of Rio was sold at 58s per cwt for a near port. The exports of coffee from Colombo to the 2nd of September show 4,700 tons decrease compared with the previous year, all upon plantation sorts, and the stock in London is 4,300 tons less.

TEA.—The market is firm, with a continuance of large deliveries for consumption. New season's red leaf teas have commanded full prices, the recent extended operations by the trade leaving the supply of desirable qualities moderate. At the public sales on Tuesday and Wednesday 12,895 packages, which all sold, prices being favourable to the buyers, especially for old season's congou of the low to medium grades, offered without reserve. The deliveries in London have been more than 6,000,000 lbs above the previous season's.

RICE.—There has been a very good demand, with rather higher prices in most instances. Sales have included Madras at 10s 4½d to 10s 6d; white Bengal, 10s 6d to 12s 6d; ditto ex quay, 10s 1½d to 10s 6d; Askoolie, 10s 1½d; Madras, ex quay, 10s 4½d. Floating cargoes are dearer and held for some further advance. Two of Necrancie sold at 10s to 10s 3d; one Rangoon, at 10s 7½d; also one Moulmein at 10s 5d, all for the continent. One Necrancie at 10s per cwt, ex ship, for London.

IMPORTS and DELIVERIES of RICE to Sept. 30, with STOCKS on hand.

SAGO.—There have not been any public sales.

TAPIOCA.—657 bags Singapore part sold at 2d to 2½d per lb for common to fine quality.

BLACK PEPPER.—The latest transactions show an advance of ⅛d to ¼d per lb, and there has been a steady business. By auction yesterday 1,878 bags Penang part sold at 6¾d to 6⅞d. 189 bags Singapore were chiefly taken in. A few lots sold at 7⅛d. Business has been done privately at 7d to 7⅛d, and in Penang at the public sale prices. The latter has sold afloat at 6¾d to 6⅞d per lb.

WHITE PEPPER.—During the week business has been done at rather higher rates, including Singapore at 11⅛d to 11⅜d. 279 bags by auction sold at 11⅜d. A sale has been made for arrival, at 11d per lb.

OTHER SPICES.—At auction 8 cases Penang nutmegs and mace sold at late high prices; the former at 3s 4d to 3s 5d for 80 to 74, and 3s 2d for 9; the latter at 4s 6d for good reddish. 19 packages West India, 3s 8d to 4s 9d. 55 packages West India nutmegs, 2s 10d to 3s 4d. 8 cases fine bold Amboyna cloves, 10½d to 10¾d. 88 bales spurious qualities of cinnamon from Ceylon, 1⅞d. 278 bags chips, 3¼d; bark, 1⅝d to 2d. Several parcels of pimento have changed hands privately, at rather higher rates. At yesterday's sales 789 bags sold at 2¼d to 2⅜d for common to middling, and one lot 2½d per lb. 407 cases Cochin ginger were only partly sold at about last week's rates: rough, 46s to 55s; badly wormy, 39s; part scraped, 56s. 135 bags African were withdrawn, at 35s per cwt.

SALTPETRE.—The market is firm, the advance last quoted being maintained. 1,900 bags Bengal refraction, 6 to 5 at 31s, and about 500 tons afloat at 31s per cwt.

IMPORTS and DELIVERIES of SALTPETRE to Sept. 30, with STOCKS on hand.

	1871.	1870.	1869.	1868.

Total delivered	8680 ...	10930 ...	7980 ...	7860
Stock	2380 ...	2020 ...	4550 ...	6030

Deliveries last week, 206 tons.

COCHINEAL.—The sales on Wednesday went off without animation at prices in some instances showing ½d to 1d decline for the fortnight. 1,386 bags Teneriffe silvers 2s 5s to 2s 8d; blacks, 2s 5d to 2s 11d; good to very fine, 3s to 4s 6d. 216 Honduras: silvers, 2s 5d to 2s 9d; blacks, 2s 6d to 3s 6d per lb. Of the 1,600 serons offered about half sold.

OTHER DRYSALTERY GOODS.—Gambier is firm: block last sold at 17s. Cutch meets with rather more inquiry. Fine quality has sold at 22s per cwt. Supplies afloat from Rangoon are now very small. Business has been done in safflower to arrive. Turmeric is quiet.

INDIGO.—There will be 10,800 chests in the catalogues of the sales, but part has recently sold by private contract. Deducting this about half the above quantity will consist of new goods.

SHELLAC is quiet. 610 chests by auction were chiefly taken in. A few lots sold at 6*l* 17s 6d for second orange, and 5*l* 12s 6d per cwt for garnet.

METALS.—There has been a good demand for many descriptions, and at some further improvement in prices. The chief feature of the week is the advance upon tin to 135*l* to 136*l* for Straits upon the spot and to arrive. English is dearer, and tin plates in active demand, so that the market remains on a firm position. The business in Scotch pig iron has been of considerable extent at higher rates, 61s 11d paid for cash, but subsequently the sales were at 60s 6d cash. Copper steady. Chili bars, 67*l* to 69*l*; other kinds as last quoted. Lead remains steady. A few sales of Silesian spelter have been effected at 18*l* 5s to 18*l* 10s per ton. Stock in London 3,530 tons, against 3,110 tons last year, and 1,490 tons in 1869 at the same time.

JUTE.—A few sales have been effected by private contract upon former terms, chiefly for arrival. At the sales of 10,398 bales on Wednesday about one-third part sold. New jute went at high prices, ranging from 22*l* to 28*l* per ton The heavy landings of last month caused a very important increase in the stock. Trade in Dundee is without change, the consumers buying for immediate wants.

HEMP.—Manila firm. Good roping quality has sold at 50*l*. Privately 561 bales by auction were chiefly bought in. 31 tons Russian withdrawn for the sound portion.

HIDES.—At the sales of East India held yesterday and containing 222,984 hides 180,000 sold. Kips were occasionally rather in favour of buyers. Buffalo were partly bought in. The remainder sold at steady rates.

LINSEED.—A good business has been done, but the market is now less active. Black Sea cargoes, near at hand or off the coast, have sold at 61s, and subsequently at 60s 9d; Calcutta, afloat, quoted at 62s to 63s; Bombay, 64s per quarter.

OILS.—Sperm, seal, and most other fish oils are neglected, and prices partly nominal. Linseed is quiet with sellers at 34*l*; quotation for the last three months of the year, 33*l*. English brown rape is dearer. On the spot, 45*l* to 45*l* 5s; January to April, 45*l* 10s; refined, 47*l*. A heavy decline in cocoa-nut oil through forced sales. At one time 37*l* 10s accepted on the spot, 10s less for arrival; but the fall brought in buyers, and yesterday's prices were 38*l* to 38*l* 5s spot; 37*l* 15s per ton for arrival. Cochin scarce. Palm firm owing to the better tone of the Liverpool market.

PETROLEUM has further declined. American refined 1s 6d to 1s 6½d per gallon.

TALLOW.—Since last Friday the prices of Russian advanced about 6d, but the market subsequently became quiet and the improvement partly lost. There are 2,900 casks, chiefly Australian, declared for public sale to-day. This morning's quotations are as follows:—Petersburg, on the spot and to the end of the year, 46s 6d to 46s 9d; January to March, 46s 6d to 46s 9d; March, 47s to 47s 3d per cwt.

PARTICULARS OF TALLOW—Monday, Oct. 2 1871.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is firm. 440 casks West India sold, including various parcels by auction. 2,820 bags Mauritius sold: soft brown, 26s to 27s 6d; grainy and crystallised, 31s 6d to 37s. 2,399 bags Penang part sold: low yellow, 29s 6d; low brown, 21s 6d to 22s 6d. 1,200 tons Madras jaggery sold to arrive at 20s 9d. 150 tons unclayed Manila afloat at 22s 6d per cwt.

COFFEE.—288 bags good native Ceylon sold at 61s. 266 casks 99 barrels and bags plantation obtained former prices. 408 bags Manila 61s to 62s.

RICE.—6,181 bags Bengal sold at 11s to 11s 6d for middling white. 6,355 bags Rangoon were bought in. Numerous floating cargoes sold at 10s 4½d to 10s 9d per cwt.

SALTPETRE.—50 tons to arrive at 31s per cwt.

GAMBIER.—1,104 bales by auction, part sold at 17s to 17s 6d per block.

TIN firm at the advance quoted. Scotch pig iron further declined to 60s 4½d to 60s 6d per ton cash.

OILS.—807 casks cocoa-nut by auction part sold: Ceylon, 38s to 38s 6d; Sydney, 35s to 36s 6d per cwt.

TALLOW.—Y.C. firmer. New, 46s 6d to 46s 9d. At auction 2,500 casks Australian, about two-thirds sold at former rates to a slight decline. Good to fine mutton, 45s 6d to 46s 3d; beef, 43s to 44s 3d; mixed melting, 44s to 45s; and inferior, 37s to 40s. Of 369 casks South American part sold at 40s 3d to 45s 9d per cwt.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that a small parcel of autumn St Michael oranges realised a high figure. The first arrival of Almeria grapes had a ready sale. New black Spanish and Barcelona nuts, both of the new crop, hourly expected, and from the scarcity of home-grown fruits, are likely to be in demand. More inquiry for Bengal. French walnuts and West India cocoa-nuts in request. Malaga lemons without alteration.

DRY FRUIT.—All currants have advanced in value during the week, and a large trade has been done at better prices, and with better spirit than has been evinced since the season began. The deliveries are immense, and the country dealers going heavily into stock, the article being cheap and quality excellent. Valencia raisins are selling freely, and going largely into consumption, the country having been quite bare of stock for some time. The prospects of this article, in spite of an advance in Spain, is good. Sultanas have enjoyed the improvement in value of Valencias and currants, and owing to short supplies are likely to go higher than they are. Muscatels attract but little attention at present, but the time is hardly come for dessert fruits to be in demand.

ENGLISH WOOL.—The active demand for English wool has rather subsided, and prices (more particularly for skin wools) are lower.

COLONIAL WOOL.—The public sales will close on Wednesday, the 11th instant. They continue to be well attended. Prices firm. East India and low foreign wool will be offered on Thursday, the 12th instant.

FLAX.—Market steady.

HEMP.—Market firm, and a fair business doing.

TOBACCO.—There has been rather more animation in the market for North American tobacco, but the actual business done has been but on a limited scale. Unfavourable reports of the growing crop throughout the States have tended to make holders firmer in their asking prices. Sales have been effected of colory descriptions at an advance on previous rates. In substitutes and segar tobacco there has been but little done.

SEEDS.—The seed trade is firm, but the demand continues very limited.

METALS.—The market for copper remains quiet, especially for manufactured descriptions for export, but the home trade continues good. The very firm: buyers of stouts at £85s; sellers very shy. Lead in fair demand. Tinplates continue in good request.

METROPOLITAN CATTLE MARKET.

MONDAY, Oct. 2.—The total imports of foreign stock into London last week amounted to 12,308 head. In the corresponding week in 1870 we received 1,245; in 1869, 13,210; in 1868, 8,617; and in 1867, 10,446 head.

An unfavourable tone has pervaded the cattle trade to-day. The market has again been heavily supplied with beasts; but, as on Monday last, foreign breeds have proved neglected. A want of animation has pervaded the inquiry, and transactions have been restricted. The very best breeds have occasionally made 5s 10d, but 5s 8d has been the general top figure, whilst many good breeds have been disposed of at 5s 6d per 8 lbs. There has been a moderate supply of sheep in the pens. Sales have progressed slowly, and the tendency of prices have been in favour of buyers. The best Downs and half-breds have sold at 6s 8d to 6s 10d per 8 lbs. Calves, the show of which has been moderate, have been in limited request on former terms. Pigs have changed hands quietly, at the rates previously current.

SUPPLIES OF SALE.

	Oct. 3, 1870.	Oct. 2, 1871.
Beasts	1,475	5,120
Sheep	19,150	20,540
Calves	345	902
Pigs	200	170

METROPOLITAN MEAT MARKET.

Per 8 lbs by the carcase.

	s	d		s	d
Inferior beef	3	6 to 4	0	Inferior mutton	4	0 to 4	8
Middling ditto	4	0	4	6	Middling ditto	5	0	5	4
Prime large ditto	4	8	5	0	Prime ditto	5	6	5	8
Prime small ditto	4	10	5	0	Large pork	3	8	4	4
Veal	5	0	5	6	Small pork	4	8	5	4

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Oct. 6.—The supply of potatoes are very moderate. The trade has been steady, at late rates. Regents, 70s to 80s; reds, 55s to 65s; flukes, 95s to 110s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 6.—Although immediately after the close of public sales the market is generally very quiet, a fair amount of business has been done here this week, at prices fully on a par with those realised at the recent auctions.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 6.—This market was thinly attended to-day, and the tone ruled very quiet. Wheat was 3d and flour 6d down. Maize declined 1s 6d, mixed corn 3s 6d; mixed, 3s 6d; peas, 44s. Oats and oatmeal were unchanged; mixed corn, 34s 3d.

WAKEFIELD, Friday, Oct. 6.—Old wheat and fine dry parcels of new sold 2s an advance of 1s per qr., with checked sales. Damp qualities were difficult to get rid of. Fine barley was rather dearer. Oats and beans were fully as dear.

The Gazette.

TUESDAY, Oct. 3.

BANKRUPTS.

Anna Julia Mills, Beaumont street, Devonshire place, late lodging-house keeper.

Herbert Mundy, Gracechurch street, gentleman.

George Bassett, Stone Ridgway, near Gravesend, late butcher.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"... for public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children are returning from the country to newly-painted houses have suffered in health. The reason is evident—the mouth extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

CARSON'S PAINT,

PATRONISED BY THE QUEEN.

RUPTURES—BY ROYAL LETTERS PATENT.
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.
Mr WHITE, 228 Piccadilly, London.
Price of a single Truss, 16s 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Piccadilly.

NEW PATENT
ELASTIC STOCKINGS, KNEE CAPS, &c. for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 12s each; postage, 1d.
WHITE, MANUFACTURER, 228 Piccadilly, London.

PROSPECTUS.

Owing to the superiority of Asphalte for paving, and its general adoption in this country for roads, pavements, platforms, &c., the demand for this very valuable material has risen to such an extent that the supply is found wholly inadequate.

This Company is consequently formed for the purpose of acquiring two concessions granted by the Government of Hanover, of the property containing the celebrated deposit of Asphalte, known as the "Bentheim Bituminous Asphalte." It lies near the town of Bentheim, in Prussia, and near a navigable river, where it may be readily shipped; it is also near a direct line of railway communicating with Amsterdam, Rotterdam, Antwerp, and the French ports.

The concessions are in perpetuity, and are not subject to the payment of any Royalty.

The mines conceded extend over an area of about 600 English acres. The concession further secures mining rights over an area of equal extent.

The Asphalte has been submitted to very rigorously-conducted research, and was analysed with the most satisfactory results by the following eminent scientific gentlemen, viz.:—Professor Dr. J. Mulder, of Utrecht; the late Dr Bleekrode, of Delft; Dr Vohl, of Bonn; Dr Werther, of Koningsburg; Dr Noellner, of Hannover; Dr Dumas, of Paris; Dr P. W. Hofman, of Leipsic, and also by Henry Bassett, Esq., F.C.S., London from whose report the following is extracted:—"The Asphalte presents some important differences in character from the usual kinds, especially in its behaviour under heat. As a material for paving purposes it possesses great advantages from its heat-resisting powers, which would make it contrast very favourably with the ordinary Asphalte."

Substantial buildings have been erected on the property with machinery, engine, retorts, soils, &c., now in good working order; these will be handed over to the Company on the payment of the purchase money, in which they are included, so that the operations of the Company will commence forthwith.

In consequence of the ascertained value of the Asphalte found in these mines; the convenience for shipping; the moderate cost of transit, the material can be delivered in this country at a price which places the prospects of the Company in favourable comparison with those of established successes.

The Company will acquire possession of the property, with all machinery, plant, &c., on the spot, upon payment of £30,000 in cash, and £30,000 in fully paid shares.

The Directors are prepared to make contracts for all kinds of paving immediately, and intend granting concessions or the exclusive use of their Asphalte throughout the continent, as well as in this country.

Applications for shares may be made in the accompanying form to the Bankers, Brokers, or at the Offices of the Company. In the event of no allotment being made, the deposit will be returned in full.

A Contract has been entered into between Edward Sedgfield of the one part, and Edwin Norton, Trustee of the Company, of the other part, dated 3rd October, 1871.

Copies of the contract and the memorandum and articles of association can be seen at the Offices of the Solicitor to the Company.

FORM OF APPLICATION FOR SHARES.

To the Directors of the Bentheim Bituminous Asphalte Paving Company (Limited).

Gentlemen,—Having paid to your Bankers the sum of £ , being a deposit of £1 per share on shares in the above Company, I hereby request that you will allot me that number, and I agree to accept such shares, or any less number you may allot me, subject to the provisions of the memorandum and articles of association; and I hereby authorise you to place my name on the register of members of the Company in respect of such shares.

THE ATLANTIC, MISSISSIPPI, AND OHIO RAILROAD COMPANY.

ISSUE of 6 000,000 dollars of CONSOLIDATED MORTGAGE LOAN, forming part of a total of 15,000,000 dollars.

Authorised by a special Act of the General Assembly of Virginia, approved June 17, 1870. Secured by a first mortgage upon all the Property, real and personal, Land, Roadway, Buildings, Machinery, Equipment, and Franchises of the Company; in bonds to bearer of 1,000 dollars each, bearing interest at the rate of Seven per cent. per annum. Principal and interest payable in gold in New York and London free of all United States taxes. Principal repayable at par within 30 years from date by Annual Drawings, commencing 30th September, 1875, and extending to October 1, 1901, by means of a sinking fund of One per cent. per annum retained from net earnings. Interest will be paid from 1st April and 1st October in each year, in New York, by Messrs Duncan, Sherman, and Co., at the rate of 35 dollars gold; or in London, by the Union Bank of London, at the rate of £7 5s 10d sterling per coupon. The bonds are offered at the price of £166 10s per bond of 1,000 dollars, making the interest equal to over 8¼ per cent. per annum on the actual investment.

The UNION BANK OF LONDON, No. 2 Princes street, Mansion House, E.C., is authorised by Mr John Collinson, the Agent in London of the Atlantic, Mississippi, and Ohio Railroad Company, to receive subscriptions for the above issue of 6,000,000 dollars of their Consolidated Mortgage Bonds.

The price of issue will be £166 10s per 1,000 dollar bond, payable as follows:—

£10 on application.
£40 on allotment.
£116 10s on November 1st, 1871.

Total, £166 10s.

The Atlantic, Mississippi, and Ohio Railroad Company was incorporated by a special Act of the General Assembly of Virginia, approved June 17th, 1870, authorising its formation by the amalgamation of the following important lines, viz.:—The Norfolk and Petersburg, 81 miles; the South Side (including branch to City Point, 10 miles), 133 miles; the Virginia and Tennessee (including Saltville Branch, 10 miles), 214 miles; making, with 29 miles of side tracks, 457 miles, all in full operation since the year 1858; and in process of construction, the Virginia and Kentucky Railroad, 100 miles in length.

In conformity with the above, the formation of the Atlantic, Mississippi, and Ohio Railroad Company was duly accomplished on the 12th November, 1870.

By virtue of the said special Act, the Atlantic, Mississippi, and Ohio Railroad Company has been empowered to issue a first mortgage on the entire property of the Company for fifteen million dollars (subject only to such outstanding liens as then existed against the respective companies), and W. Butler Duncan (Duncan, Sherman, and Co., New York), S. L. M. Barlow (Barlow, Larocque, and MacFarland, New York), and Francis Skiddy (New York), have been appointed Trustees for the same.

At the present time the outstanding bonded debt is 5,482,000 dollars, to meet which the Atlantic, Mississippi and Ohio Railroad Company has deposited with the Farmers' and Trust Company of New York 5,500,000 dollars of the consolidated bonds, to be applied under the supervision of the aforesaid Trustees, to the acquisition, exchange, or redemption, as they fall due, of the said bonds.

The cost of the Atlantic, Mississippi, and Ohio Railroad built at the low rates ruling prior to the late Civil War, amounted to 15,648,656.56 dollars, and the traffic receipts thereon have been, prior to and after the war, as follows, showing a most satisfactory and increasing revenue:—

NORFOLK TO BRISTOL (Terminus of Virginia and Tennessee Railroad).

	dollars
Gross revenue, 1860-61 (prior to Civil War)	1,241,862.01
— 1869-70	1,925,606.51
Increase (equal to 55 per cent.) ...	683,744.50
Gross revenue, 1865-66 (1st year after Civil War)	1,054,258.10
— 1869-70	1,925,606.51
Increase (equal to 83 per cent.) ...	871,348.41

The following tables still further show the improvement which has taken place:—

NORFOLK AND PETERSBURG RAILROAD.

Excess Gross Revenue 1869-70 over 1868-69.	Excess Net Revenue 1867-70 over 1868-69.	Excess Gross Revenue 1869-70 over 1860-61.
14½ per cent.	23 per cent.	262 per cent.

SOUTH SIDE RAILROAD.

Excess in Passenger Traffic 1869-70 over 1868-69.	Excess in Freight Traffic 1869-70 over 1868-69.
22½ per cent.	13 per cent.

VIRGINIA AND TENNESSEE RAILROAD.

Excess Gross Revenue 1869-70 over 1868-69.	Excess Gross Revenue 1869-70 over 1866-67.
14½ per cent.	39 per cent.

These returns require no comment, as they show by themselves the rapid development which has taken place in the business of the line, even in spite of the disastrous effects of the Civil War, and the destruction to the rolling-stock and bridges of the road caused thereby.

	dollars.
The gross revenue for the year 1869-70, as appears above, was	1,925,606·51
Net revenue for the same	863,479·36

The purposes of the present loan are:—

1. To increase the rolling-stock, improve the bridges and relay new rails where required on the line from Norfolk to Bristol; and 2, to complete the additional line from Bristol to Cumberland Gap.

It is computed by General Mahone, President of the Consolidated Roads, that the line from Norfolk to Bristol alone, when properly equipped and in good running order, will easily earn the first year thereafter a gross revenue of 2 500,000 dollars; the third year not less than 3,000,000 dollars, and immediately on completion of the Virginia and Kentucky road, that it cannot fall short of 5,000,000 dollars. He further states that the old roads can be put in the improved condition contemplated within eighteen months, and the extension to Cumberland Gap completed within three years from the present date.

The line now connects by rail the cities of Petersburg Lynchburg, Richmond, and the port of Norfolk, in Virginia, with the cities of Knoxville, Memphis, and Nashville, in Tennessee; Atlanta, Rome, and Macon, Georgia; Mobile, Montgomery, and Selma, Alabama; Vicksburg, Canton, and Jackson, Mississippi; and New Orleans, Louisiana; while the completion of the extension to Cumberland Gap will form a like connection with Louisville, St Louis, Cincinnati, and Omaha.

The connection with Louisville, as proposed, via Cumberland Gap, will open a shorter route between that important trade centre and the city of New York by over 200 miles than is to be had by any line now extant or projected.

Numerous lines of steamers connect Norfolk with the principal Atlantic ports, among which the "Old Dominion" line, running daily to New York, and of which Mr N. L. M'Cready is president, holds without exception the first place in the American coasting trade, as regards speed, passenger, and freight accommodation.

Copies of the Act of Incorporation, Trust Deed, and Bond can be obtained from any of the undermentioned.

Applications will also be received by Messrs Holjé and Boissevain, Amsterdam; Mr C. Van Wambeke, Brussels; Messrs A. J. and M. Milders, Rotterdam; and in the subjoined form by Messrs Huggins and Rowsell, Stock and Sharebrokers, 1 Threadneedle street, E.C.; and Mr John Collinson, 50 Old Broad street, E.C.

October, 1871.

THE ATLANTIC, MISSISSIPPI, AND OHIO RAILROAD COMPANY'S CONSOLIDATED MORTGAGE GOLD BONDS.

FORM OF APPLICATION.

(To be retained by the Bankers.)

To the London Agent of the Atlantic, Mississippi, and Ohio Railroad Company.

Sir,—Having paid to the Union Bank of London the sum of £ hereby request that you will allot to bonds of 1,000 dollars each of the above loan, and hereby engage to accept the same, or any smaller number that may be allotted to , and to pay the instalment thereon on allotment and the balance on the 1st of November, 1871, in accordance with the terms and conditions specified in your prospectus.

A Supplement, *containing the Reports of the Joint Stock Banks of the United Kingdom, similar to that published on the 20th May, 1871, will be published by the* Economist *on Saturday, October 21.*

To Advertisers.—*To secure insertion for this important number, advertisements should be sent not later than midday, Friday, the 20th inst.*

On Sept 30 was Published, No. IX., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for September gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to September 27.

Advertisements for the next Number, to be published on October 28, must be sent, to insure insertion, on or before October 26.

OFFICE—340 Strand.

THE BANK RATE OF DISCOUNT.

Last Saturday the Bank of England took the wise and prudent step of raising their rate of discount to 5 per cent. And everybody now admits that they were right in doing so. The only question now is whether they ought not to have since taken another step further, and have raised the rate to 6 per cent. at their last meeting, or before. We do not at all profess to speak with the same certainty and decision as we spoke last week, still the strong inclination of our judgment is that they should have done so.

We at once admit that too much stress ought not to be laid on the unfavourable figures of the last Bank return. They are always unfavourable at this time of the year. The quarterly payments and the dividends almost always take a large sum from the reserve. Undoubtedly this money will soon return, though for the present it is gone, and is not to be relied on. But the main questions are two. First,—are the market and the Bank exposed to any foreign drain? and second,—if they are exposed to one, have proper and the best steps been taken to meet it?

The amount of the foreign drain is difficult to estimate. It is certain that the Berlin Government has in its possession a large number of English acceptances, but the exact date of the maturity of those acceptances it is most difficult to find out. Certainly there is very considerable difference of opinion about it, even in the best-informed quarters. The prevailing, and we believe the sound, opinion is, that the majority of these bills do not become due till November and the beginning of December. But we can feel no reliance that all, or even almost all, of these bills do not become due till then. 5,000,000*l* one way or another is a minor matter in reckoning the French indemnity, but it is a great matter in reference to our market, and to the reserve of the Bank of England. We know that the English market is under a great liability to Germany; we are not sure when that liability accrues. It is at any rate most difficult to be sure that we know all the contents of the Berlin bill case; for aught we know or can be certain of, some important amounts may be becoming due sooner than we guess at. We think we ought to "reckon with the worst," and prepare at least for a part of that liability at once, as it rests on intricate transactions, partly known to many, because many are engaged in them, but in their aggregate known to exceedingly few, and those few, almost all, if not all, pledged to secrecy. We do not like to speculate even on the best information; we prefer in a great matter of this kind to be safe, even if that information should prove imperfect.

Therefore we must take it that we are under a liability. Are we taking the best steps to meet that liability? As yet we scarcely think that we are. Unquestionably the rise to 5 per cent. has much improved the exchanges. it tends to bring us money. But we much doubt if the exchanges are sufficiently affected, or if it will bring us much money. We cannot but feel that we are working upon a fine calculation; that within reasonable likelihood we may want much money; that we cannot be sure that we shall get that money; that as yet we are in the unsatisfactory position of having done much, and having disturbed the money market, but of being nevertheless not unlikely to fail in our efforts, and have done what we have in vain, only because we stopped too soon, and should have done a little more.

THE POPULAR ERROR AS TO THE INCREASE IN THE BANK CIRCULATION, AND AS TO ITS EFFECT UPON THE MONEY MARKET.

An impression prevails that the Bank circulation has within the last few weeks increased unusually rapidly; that it is now much higher than usual; and that this sudden augmentation has caused much if not all the present increase in the value of money.

But the real facts as to the Bank circulation are shown in the following table:—

Bank Circulation at the Dates most nearly Corresponding to Sept. 13 and Oct. 11 of this Year, exclusive of Bank Post Bills.

	Sept. 13.	Oct. 11.	Increase in October over September.
	£	£	£
1871	24,735,000	26,107,000	1,372,000
1870	23,064,000	24,337,000	1,273,000
1869	23,267,000	24,210,000	943,000
1868	23,645,000	24,516,000	871,000
1867	23,720,000	24,527,000	807,000
1866	23,472,000	23,973,000	501,000
1865	21,395,000	22,312,000	917,000

This table shows, first, that there has not been a sudden increase in the Bank circulation materially greater than there was last year; and this, of itself, disposes of the idea that the quick rise in the Bank rate was caused by that sudden increase. Last year there was an equal increase, and there was no similar effect.

Secondly,—the table shows that the account of the Bank circulation has been steadily increasing for many years, and that the amount of the *variation* at the autumn quarter has augmented with it likewise. As our older readers will remember, it used to be a puzzle that with all the increase in the trade of the country the Bank of England note circulation did not augment. For many years it was almost stationary. But after the panic of 1866 there was, for some reason or other, a singular change, and the Bank of England note circulation began to increase, and has kept increasing steadily up to the present time. It now keeps pace with the trade of the country, whereas before 1866 it was stationary, and did not keep pace.

Thirdly,—the table shows that, just as we know by the Clearing-house returns that there has been an immense increase in cheques and bills in this year when compared with previous years, so there has also been a larger increase than usual this year as compared with last in the banknote circulation.

It is altogether a mistake to suppose that the peculiar excess of the Bank of England circulation over last year has been sudden; it has been gradually growing for some months past, as the following table will show:—

Bank of England Circulation at the Undermentioned Dates, exclusive of Bank Post Bills.

	1871.		1870.	Increase in 1871 over 1870.
	£		£	£
Oct. 11	26,107,000	Oct. 12	24,337,000	 1,770,000
Sept. 13	24,735,000	Sept. 14	23,064,000	 1,671,000
Aug. 2	25,724,000	Aug. 3	24,430,000	 1,294,000
July 5	24,966,000	July 6	23,906,000	 1,060,000
June 7	24,145,000	June 8	22,854,000	 1,291,000

No part therefore of the present increase in the value of money is due to any sudden augmentation, or alleged hoarding, of banknotes. The banknote circulation is simply varying according to what are now its usual laws, and as it has not varied now more than it did last year, when its increase produced no effect, we cannot now ascribe to that increase the production of a great effect.

MR LOWE'S WARNING.

When Mr Lowe's first Budget was under discussion we showed that the plan of collecting all the direct taxes in January would make the Government poor in the autumn—that it would be obliged to borrow of the Bank at that time—that as October and November, for some reason or other, are the special seasons of tight money markets and panics, the consequence would be that the Chancellor of the Exchequer would be competing with the mercantile community for the loanable capital of the country just when that capital was most scarce, and when the mercantile community were most anxious for it. We argued that it was absurd to devise a mode of collecting taxes which created these evils. And the same objection was taken in Parliament. But all argument was at that time vain. The present Government was then omnipotent, and this part of the Budget passed, not because anyone thought it right, for only a few concerned themselves with the matter, but because the Government said it should be so.

But we have before us a striking example of what has happened, and a still more striking warning of what might happen. As it turns out, a tight money market has come this autumn, though not from the usual causes peculiar to the season. It comes at a very favourable time, for the Government started this year with an ample balance, and has collected a revenue unusually large and exceeding the estimate; yet, as we see by its own account of last Wednesday, the Government has been compelled to borrow 2,300,000*l*, and this at the very time when money was most scarce, and when ordinary borrowers—borrowers for productive purposes, whose operations it is hurtful to impede—were most in want of it.

On this occasion the evil is not indeed very great. The Bank of England chanced to be exceedingly rich, and to be able to meet the compound demand of the Government and the country particularly well. The Government itself was rich, as we have seen, without precedent. The monetary pressure as yet has been, and we believe and hope will continue to be, altogether trifling in comparison with many. But if the Bank of England had begun the drain with 8,000,000*l* reserve (a large amount, as we used to think) instead of 14,000,000*l*; if the Exchequer had started on a deficit, not a surplus; if the revenue had been declining and not growing.—Mr Lowe would have had to ask a far poorer market than the present for a much larger sum than 2,300,000*l*. And in so doing he must have exceedingly aggravated a scarcity, and might have created a panic.

The proposed gain of Mr Lowe's plan is only that the collection of all the direct taxes once a-year is somewhat cheaper than collecting them twice a-year. But against this cheapness is to be set the interest paid by the Government on these large loans, and the loss to the nation by the monetary derangement these loans cause. If the account could be moved for, we are sure it would appear that the slight saving would be much out-measured by the larger loss.

Mr Lowe said, in answer to all argument, that he did not care, and "the money market must take care of itself;" but those who say that the money market should take care of itself should not want loans of it, and especially a Finance Minister should not say so, for if he wants a loan he must have it. In a Chancellor of the Exchequer's mouth the maxim that the money market must take care of itself just comes to this—"I," the finance Minister, "will take what I want when I "want it, and I do not care whom I hurt when I do take it." If the income tax were at a large percentage, 16d or 2s, (it is universally agreed) the present plan could not be continued; and it is much to be wished that after this plain warning it should be altered at once. Mr Lowe may depend upon it that if he does not alter it, his successor will be only too glad to gain a deserved popularity by doing so.

THE HOUSE OF PEERS.

Birmingham is about to discuss the reconstruction of the House of Peers, and Professor Fawcett has given his vote rather for its destruction—at least *as* a House of Peers, for he wishes to see the hereditary principle clean abolished. After that we might still have, no doubt, a Second Chamber, but of course no House of Peers. In the meantime the House of Peers itself, or rather a modicum of it, anxious no doubt to vindicate the legislative beneficence of the Upper House, has, if we may believe a contemporary, launched into a very vague and speculative alliance with the working-class for the purpose of certain rather big social reforms. Whether, however, either the deliberations of Birmingham, or the counsels of Professor Fawcett, or the spontaneous beneficence of the Peers who have signed a treaty with some leading London artisans, will bear any great fruits on the fate of the House of Lords, we may perhaps presume to doubt. We believe that the country, though slightly annoyed at the impediments so often placed in the way of legislation by the Peers, has as yet not even conceived the idea of any radical reform of the Second Chamber, but still clings to the constitutional form of "King, Lords, and Commons," with the tenacity of a deep-rooted intellectual habit. On the other hand, we have no expectation at all that the House of Lords, as at present constituted, will ever manage to win back any

popular enthusiasm, or to persuade the people that the aristocracy are their heaven-sent guides and protectors. That notion is utterly dead, and nothing which the *elite* of that dully Conservative assembly can do will be at all likely to revive it. In the meantime the Government and thinking people in both Houses are evidently aware of the extreme inconvenience, and sometimes even danger, of the present system. The House of Lords may delay a popular measure once too often; and even if that should not happen, there can be no question but that the chronic irritation caused by the delays its action interposes is by far the most powerful stimulus in the hands of the party of discontent and agitation. It is a serious evil, even if it never goes any further, that this party should be able to point constantly to one branch of the Legislature as the only obstacle in the way of sober, popular measures, on which the representatives of the people have long made up their minds.

Mr Gladstone has lately given us a hint of the only practicable measure of real reform by raising Sir Frederick Rogers,—a very able civil servant, for a long time the "permanent" head of the Colonial Office,—to the Peerage. What is practicable, and is very much needed, is the infusion of more men of this calibre—men who have studied politics seriously, though from a somewhat different point of view from Members of the House of Commons,—men who know the *practical* working of an administrative system,—men who are the best judges we could have, not of the popularity of a measure, but of its workability, and of the modifications needed to ensure such workability,—into the House of Lords. No doubt there would be no harm in adding a few men of distinction from other walks of life, but this is certain—that the great chasm between the legislative bodies and the men who apply the laws after they are made, is becoming every day more and more mischievously wide, and that by far the most natural remedy—a remedy which would answer two purposes in one—is to weld them together again by giving the best civil servants we have, after they have gained a certain standing in the service, seats in the House of Peers. Of course it cannot be done unless the House of Lords will consent to the principle of life-peerages, but in this it has virtually, to a very limited extent, acquiesced; and there can be no doubt that the effect of its own boldness and of the popular annoyance which that boldness has elicited, will be to make it much more willing to give way on points of this kind than it was even when Lord Russell last pressed the subject on the attention of the Lords. Once let there be tolerable freedom in the making of life-peers, and we need no longer have that semi-hostility between the Civil Service and the Legislature which we so often now see. It is due in great measure to the inconsiderateness of the Legislature, which is apt to assume that the practical drift of legislation is the only important point, and its machinery comparatively insignificant, whereas if a law works very clumsily, it is likely enough to work badly too, and at all events will never have the hearty concurrence of those who have to work it. In great measure, too, the misunderstandings between the Civil Service and the Legislature are due to the real ignorance of the latter, which passes laws almost impossible to interpret or to carry out for want of some one to tell them exactly where the ambiguity will at once be felt and where machinery for carrying its meaning into effect will probably break down. If once a considerable group of men qualified, as is Sir Frederick Rogers, by full and detailed knowledge of the machinery of administration were enabled to sit in the House of Lords, the Civil Service would no longer be dumb, and the Legislature would no longer be supercilious. There would be almost at once a tie of mutual respect and consideration established between them.

And the same process which added so much to the practical weight of the criticism passed in the House of Lords, would also answer in great measure the still more important purpose of liberalising it and diminishing its obstructiveness. Civil servants of course, like other people, are both Liberal and Conservative; but the most eminent of them, by acting under both parties, lose something of the bitterness of party bias, and are usually inclined to put the coherence, the dignity, the unity, and the reputation of the law above all party considerations. They hear the reasons of statesmen on both sides, and know that there is something in those reasons, till they get the habit of treating questions not so much from their own point of view as from the point of view of their interlocutors. No habit is more valuable for members of a Second Chamber not popularly constituted. It is precisely such a habit of mind as this which would teach men to see when the decision of the Lower House ought to be adopted as the fixed point of departure, and the energy of the Upper House limited to improving the form of the measure, and striking off needlessly-offensive elements. And it is just such a habit of mind as this which would in its turn tell in the House of Lords, and prevent it from becoming superfluously obstructive to no purpose. The House of Lords is not really audacious. It has plenty of genuine timidity, and never really thwarts the settled opinion of the country without a species of alarm. What induces it to brave that opinion is the satire and taunts of men like Lord Salisbury on the one side, and the half-threats which so often come from members of the Ministry on the other side. But to accomplished men like Sir Frederick Rogers, whose whole experience had taught them how to appeal to the sense of statesmen, and to avoid exciting their vanity and their self-love, the most reactionary Peers would listen with respect, and with a feeling that in such arguments as these there really was sufficient excuse for not pushing resistance to an extreme, whatever might be their own conscientious conviction.

We are persuaded that at the present moment there is as little idea in the country of abolishing the House of Lords as there is of abolishing the House of Commons, or introducing plébiscites. But a moderate infusion of life-peers of the same type as the new creation, though it would not of course remove the anomaly of hereditary legislators, might really do a great deal to attenuate the divergence between the two Houses, and to postpone indefinitely the political chances of the (at present) small party which advocates the abolition of the Peers.

THE PROPER POLICY OF GERMANY WITH RESPECT TO THE FRENCH INDEMNITY.

THE true policy of Germany in dealing with the vast sums it is now receiving from France is on many points dubious; there has never been any case like it before, and new circumstances always require much discussion. But one point is clear. The policy now pursued—the policy of cooping up the money, or much of the money, as it is received in State vaults, and not lending out copiously and readily—is quite wrong. It injures many, for it makes all the money markets of the world uncertain,—that uncertainty being one of the greatest impediments to trade,—and it does no one any good, for, as may be easily seen, the German Government can easily make a much better use of the money, and can hardly make a worse.

First, it is said that the German Government keeps or should keep this large sum in gold, because it is about to substitute a gold standard and coinage for the present silver standard and coinage. And, as we have shown before, no economical object can be more vital to Germany. Their present coinage is a monument of the old divided state of the country. It is like the old coinage of Switzerland, when each canton persisted in having a separate mint and different coins. The petty Governments of Germany clung hard to the same privilege. And the consequence is a coinage which is almost everything which a coinage should not be, and almost nothing which it should be. No doubt this coinage, which is mainly silver and copper, should be withdrawn, and a new coinage upon a gold standard be substituted for it. Gold is the wholesale currency of the world—the only kind of standard suitable for large transactions, and Germany, since her unity, being a power of the very first class, ought clearly to possess a currency fit for the very largest dealings.

But it does not follow because a new gold currency is wanted that all the proceeds of the French indemnity should be cooped up till they are coined. Under the most favourable circumstances the coinage of large sums requires a considerable time, and in the intermediate period all the gold waiting to be coined is lying idle. And the circumstances of Germany are not in this matter very favourable to expedition. What the new currency shall be will not be easily settled, at least if all sections of the community are heard on it, and all arguments carefully considered. Besides others, there are three cardinal pieces at present in various parts—

	s	d
The Prussian thaler of	2	11
The Austrian ducat or florin of	2	0
The gulden of Nassau and other States of	1	8

In each of these accounts are kept, and bargains are now settled over large areas, and each of them claims that the new gold unit should be in simple relation with it, and be a multiple of it. But it is not possible to do this with all, and as a coin of account it will be impossible to use more than one of these pieces; their value is too near to admit of it. A selection therefore must be made, and politically the most natural selection is the Prussian thaler. But as ill luck has it, the thaler is an unmanageable coin. 2s 11d does not match easily with any foreign coin; it is not commensurable either with the franc of the French, so diffused upon the continent, or with the English sovereign, so diffused over all the world. It would be a great hardship on non-thaler using Germans to make them adopt a currency which did not match any present one, and which would be for ever an international difficulty to them. The people of Alsace and Lorraine especially will require a currency easily convertible into that of France, and so, in a greater or less degree, will all German provinces which border on France; but a thaler of 2s 11d is not so convertible. The Austrian florin of 2s, with a gold unit answering to the English sovereign and the French 25-franc piece, would seem the simplest and easiest currency. But whether Prussia would like to give up her own coin and take the Austrian coin is very dubious. Even when the gold unit is settled—suppose, for example, the 25-franc piece—difficult questions, as to the charging or not charging a seignorage, such as Mr Lowe brought before us by his proposition to charge 2d seignorage on the sovereign, inevitably arise, and the discussions on Mr Lowe's proposition are proof how difficult it is to get people to agree on these points. If they are to be settled in Germany with German care and German thoroughness, the work will take years.

And though it would be absurd to wait indefinitely, it is also absurd to hurry excessively. A nation can only change its coinage and its money of account on rare occasions and with much difficulty. It is a great inconvenience to change it, and if it incurs the inconvenience, it ought to take care to procure the *maximum* of benefit in compensation. It should not afterwards feel that because it was in a hurry and would not wait a month therefore it lost much lasting good it might have gained, or submitted to a lasting annoyance which will always fret it.

These are reasons to show that though the currency of Germany much needs changing, it ought to take, and probably will take, considerable time to change it. And in the meantime the many millions paid and payable of French indemnity ought not to be uselessly and perniciously hoarded, nor any great part of them. No one in his senses will say that they ought. They ought to be readily lent by the Government on good procurable securities, and without needless check or formality.

Unquestionably these loans will cause the influx into Germany of very many foreign coins—of many Napoleons, many five-franc pieces, and even many sovereigns. This is the disadvantage of *having* an indemnity from a foreign nation, and insisting that it should be paid in coin. The foreign nation *can* only pay in its own coin, and then you have a difficulty in using it. In this case the evil however is not so great as it might be, or rather perhaps the other evils of the German coinage are so great that a slight additional evil may be borne without the inconvenience or the outcry that in happier cases would be caused. These foreign coins in Germany must be "tariffed"—that is, by law made to pass in the present German currencies at fixed rates. And as these coins are both gold and silver, we are thus at once landed—where no one would be of their own accord—at the recognition of a double standard. But though this is pernicious and absurd as a permanent institution, it may, at a particular moment, be the least pernicious and the most useful of available expedients. The evils which a double standard causes are considerable evils, but still they may be outweighed by the greater evils of all other alternatives, or be endured with a view to compensating advantages. In most cases indeed there is a strong bar and objection *in limine*. There is a sort of dishonesty in a double standard, and no nation ought to countenance dishonesty. "People," it is said, "have made contracts to pay in silver, and you give them "the option of paying in gold too. As the debtor has the "choice at each change in the relative values of the metals "the creditor will suffer." He will always be paid in the metal which suits the debtor best, and which suits him worst. Nothing certainly can be more unfair. But yet at a change of standard something of the sort is necessarily done. A has a covenant to pay 100*l* yearly in silver to B; suddenly in the ninth year the law says he shall pay a supposed equivalent in gold instead. And in the eleven years the contract has yet to run this is very likely to be a loss to one side or the other, though you do not know which. The arbitrary equation which you fix between gold and silver is constantly untrue, and the change you make will be sure to injure either debtor or creditor, as the case may be. By the nature of a change of standard you have varied a contract, and that must be apt, sooner or later, to hurt someone. When the standard therefore is being changed, some confusion and even injustice is necessary, and at that moment therefore a double standard will not do so much harm as at other times: you have in changing the standard anticipated some of its effects, you have done half the harm already.

And what is more, since the change from a silver to a gold standard cannot be made in a day there is of necessity some sort of intermediate period in which the old silver and new gold circulate together, and at some sort of fixed rates, which amounts to a double standard, so that there is not with the present bad coinage of Germany the objection to fixing a tariff for French coin which would prohibit it in most countries. You are not spoiling a good coinage, you are only making the somewhat complicated change from an old coinage to a new rather more complicated than it necessarily is.

The proposed change in the German currency therefore by no means requires or justifies the hoarding of the gold paid by France. The other alleged reason for doing it—the forming a war-fund in specie—would justify it, though even then it would be absurd to take the whole fund out of the first instalments of the indemnity. If Prussia wishes a few millions of gold as treasure of war, she ought at least gradually to abstract them from the world out of all the payments accruing to her, and not on a sudden to seize them all out of the first payments. But in truth the bare notion of a lasting specie war-fund is an economical monstrosity. All funds ought to be invested in good securities, and so save taxation. There are many securities quite certain (as we know by experience) to be saleable at the worst crises, and in the greatest wars.

The main argument against the hoarding policy of Prussia remains. She has still large sums to receive from France, and she ought not to throw an artificial difficulty in the way of their payment. If she coops up gold and causes a scarcity in the money market, she does all she can to make that payment impossible.

BOARD OF TRADE RETURNS.

The Board of Trade Returns for September have been published, and they compare very favourably with previous years. The total value of the imports of all articles during the first nine months of the current and two previous years was—

	£
1869	201,076,025
1870	214,138,847
1871	239,893,908

While for September only, the imports were valued at—

	£
1869	26,766,924
1870	25,908,308
1871	25,133,452

The value of the chief articles imported during the first nine months of the current year compares as follows with the corresponding period of 1870:—

Imported.	1870. £	1871. £	Increase. £	Decrease. £
Coffee	3,477,020	4,297,734	820,114	...
Wheat and flour	11,836,971	15,956,011	4,119,040	...
Cotton	40,061,743	40,893,827	832,084	...
Flax	4,449,864	4,270,493	...	179,371
Hemp	1,217,907	1,721,655	503,848	...
Silk, raw	5,534,811	6,576,914	1,042,103	...
Silk manufactures	9,621,021	4,877,563	...	4,743,458
Sugar, unrefined	11,861,726	12,493,055	631,329	...
Tallow	2,024,876	1,912,788	...	112,088
Tobacco	1,088,242	3,008,586	1,920,344	...
Wine	3,724,122	5,102,110	1,377,988	...
Wool	13,043,998	14,894,835	1,851,237	...

The figures relating to the export trade are equally satisfactory. For instance, the declared value of all articles exported during the nine months was:—

	£
1869	142,707,330
1870	148,744,991
1871	163,580,392

And in September only:—

	£
1869	16,365,725
1870	17,060,823
1871	19,913,186

The following statement shows the increase or decrease in the value of the shipments of the leading articles of manufacture during the first nine months of the current, as compared with the previous year :—

Articles.	1870. £		1871. £		Increase. £		Decrease. £
Beer and ale	1,451,496	...	1,386,829	...	...	...	64,667
"	4,230,249	...	4,458,462	...	228,462	...	...
Copper	2,264,265	...	2,140,579	...	...	...	23,686
Cotton twist	13,512,760	...	13,790,503	...	277,743	...	...
" Manufactures	42,744,997	...	43,018,276	...	273,279	...	...
Earthenware	1,252,536		1,254,377		1,841		
Glass	1,161,195		1,170,709		9,514

The bullion and specie account has naturally been affected by the abnormal position of the gold market. The remittances to the country have been on an extensive scale, the total receipts of gold and silver for the nine months being returned at 20,869,858*l*. against 22,075,461*l*. in 1870, and 16,148,896*l*. in 1869. The increase this year is chiefly made up of augmented arrivals from the United States, China, and Australia. The exports of bullion have reached 19,895,193*l*., against 12,576,872*l*. and 13,078,453*l*. in 1870 and 1869 respectively. Germany has taken 6,108,825*l*; Belgium, 3,260,310*l*; France, 2,081,880*l*; and Holland, 1,568,188*l*. this year. The large excess is owing to the movement in connection with the payment of the French indemnity.

BUSINESS NOTES.

The Chicago Disaster.—The losses by the great fire which has nearly destroyed Chicago are probably very much exaggerated, but the most sober reckoning must still yield a very high figure. The telegrams tell us that 100,000 people have been burnt out—that is, about the thirtieth part of the population of London—and this may lead us to some notion of what the loss must be. The rental of London is nearly 30,000,000*l*, and of a thirtieth part, 1,000,000*l*, which we may perhaps safely assume as the minimum rental of the real property destroyed in Chicago, the destruction having been largely in the business part of the city, whereas the above thirty millions for London includes the less valuable suburbs. At from ten to fifteen years' purchase again the million of rental would represent a capital of from 10,000,000*l*. to 15,000,000*l*. This would be the value of the house property destroyed; and the contents of the houses, including stock in trade, would not probably, judging by our own experience of the fire insurance days, come to any more. The total loss, supposing there is no material salvage from the fire, may thus be between 15,000,000*l*. and 20,000,000*l*., the latest estimates from New York we observe giving even smaller figures. Even as thus reduced the loss is very serious, and is quite likely to cause some perturbation. The insurance companies here are arranging to pay at once what they owe—in the case of the North British and Mercantile Assurance Company alone over 400,000*l*.—and the transmission of such large sums at a time when we are likely to pay America a great deal, must contribute to derange the exchanges. The American insurance companies must resort to the sale of securities, which will also tend to draw money from this side, a surplus in the New York market naturally causing an overflow to Europe. Altogether a sudden payment of probably from 10,000,000*l*. to 15,000,000*l*. in New York is likely to affect us here, when we remember especially the engagements which have been entered into in connection with the Funding loan. By itself, even the Chicago disaster would probably have caused little disturbance, but coming at the time it has, it may be more than enough to turn a doubtful balance.

Taxation and Land Ownership in England.—In the able address which Mr Newmarch has just delivered as President of the section of Economic Science and Statistics at the meeting of the Social Science Association, at Leeds, he discussed at some length the programme of the Land Tenure Reform Association, and exposed some of the singular fallacies on which the various parts of the programme are based. One of these is the notion of the severe pressure of taxation in this country, a delusion which we have often noticed in these columns, but which can hardly be too frequently exposed. Mr Newmarch, who is entitled to speak with authority, is justly most trenchant in his language :—

In a country where 70 millions sterling of revenue is raised, the critics of taxation can never lack an audience. But everything is relative, and the effect of a burden depends far less on its own weight than on the strength which supports it. Seventy millions with our present population and wealth exerts far less pressure than did 40 millions 30 years ago. The period of most severe and crushing taxation in this country was the 20 years from 1815 to 1835. We were then slowly recovering from the exhaustion of the great war, and not only were the taxes searching and heavy, but they were adjusted on false and destructive principles. Taxation is not now our chief difficulty; it is almost our least. Remember that the assessments on malt, spirits, wine, and tobacco, bring in 31 millions out of the 70, or nearly half; that tea, sugar, and coffee, contribute at very minute assessments per pound weight, only seven millions; and that property in one form or another supplies the remaining 32 millions. When these are the facts, is it not obvious that the working classes have the remission of taxes wholly in their own power? Their own self-imposed contributions to the Exchequer, in the form of spirits, beer, and tobacco consumed, are many times greater than the duties on tea and sugar. So palpable is this fact that it is hard to resist describing nine-tenths of the talk about excessive and unfair taxation of the poorer classes as quackery and clap-trap.

What Mr Newmarch has so well expressed is the observation of every good authority in the country who looks into these matters. Nothing is really so perplexing to the agitator or the working man who echoes him, as to bring him to look American has no difficulty in counting how much taxation he about the details of the taxation of which he complains. An pays in his clothes, his furniture, his instruments of business, and all the luxuries and conveniences of life; but when an Englishman begins the same process he finds he has hardly anything to go upon. Mr Newmarch's remarks on the numbers of people really interested in the soil of England are equally in place and authoritative :—

One of the statistical wants of the time is a full and impartial history of the land and building societies which, during the last 30 years, have converted into owners of plots and houses tens of thousands of the working classes, who, under the stimulus of those magic words "exclusive possession," dazzled by the rose reformers, have exercised severe self-denial in order to lay by a sufficiency of savings to meet their purchases. There are some four or five of these societies so powerful and wealthy as to be able to buy up estates costing scores of thousands of pounds. I know myself of three large estates so purchased, and now occupied by nearly a thousand separate owners. By no class in the country would this new notion of appropriating the future increment of rent be more thoroughly disliked or more fiercely resisted than by these artisan proprietors. They have toiled and pinched to become entire and absolute owners, for better and worse, for now and for ever, and they will not likely relinquish their possessions. Already, there is no fixed property in this country more actively dealt in than land. It may be bought in almost any quantities, and anywhere, and when the process of landed titles is simplified—as simplified it must and will be, if by no other party than by the landowners themselves, in their own interest—real estate in England will be transferred backwards and forwards as easily as in Hungary. Mr Mill has mentioned 30,000 as representing about the number of persons owning the cultivated surface of England. This figure is a curious instance of the careless reading of the Census tables. Instead of any such figure as 30,000 representing the number of persons who are directly interested in the ownership of lands, houses, mines, and minerals in England, I believe that 20 or 30 times 30,000 would be nearer the truth.

This is a sufficient reason why we should disregard the loose talk often indulged about the landlessness of the English masses constituting a great political and social danger, and why projects like those of Mr Mill for reserving to the State the unearned increment of value of real property, theoretically defensible as they may be, will always come to little. Individual interests in land are too numerous and diffused to permit the application of theories, which would only be practicable if directed against a single isolated class.

The Close of the Newcastle Strike.—The Newcastle strike has come "nearly" to an end by an agreement which it is the fashion to suppose concedes to the men all they wanted. The week is to be 54 hours in future—that is the men have got the 9 hours, and the pay is to be reduced in proportion. The conditions, however, which the employers have secured are most important, and the whole result of the strike can hardly be considered satisfactory to the men after the losses they have incurred. They are not to get the 9 hours at once, but only next year; when they get the 9 hours they are still to work overtime when required, and six months' notice is to be given of any change in the rate of wages. The employers thus get large compensation in the increased stability of their trade operations, and will be much less at the mercy of strikes in future, the power of the Unions being proportionately diminished. These advantages are worth having while as it was admitted from the first that more wages could be given in the present state of the trade, and the men are bound to

work overtime when required, the shortening of the hours of industry which the employers feared is not really conceded. It is true that when trade is slack the workmen will get the 9 hours through overtime not being required, but the question will still be one of wages, and if the men get the 9 hours they will have to pay heavily for it. The Newcastle engineers have thus obtained somewhat unsubstantial results, and of course it will take years for them to get back the nineteen weeks' wages they have lost. For the present the dispute is not quite over, as there is a difficulty about taking back all the old hands—one of the most formidable difficulties in all such contests, when the employers have attempted to import labour.

THE PROPOSED RAILWAYS TO INDIA.—Mr Gladstone has replied to the last grand proposal for a railway to India, viz., by way of Trieste, the Turkish coast of the Adriatic, and after a short sea passage across the Levant, by way of the Euphrates Valley and along the south coast of Persia to Kurrachee, the whole at a cost of about 40,000,000*l*—that he does not consider "the "Government of this country is the proper judge of the im- "portant question whether that object is at present attain- "able. This is the business of capitalists and engineers." The reply will be a damper to this and similar projects, because capitalists are likely to be careful as to the probable return for their money, and 40,000,000*l* is a sum not easily got together. Still the reply is only the common sense of the matter. There is no reason why capital should be diverted to big engineering schemes because they are big, and if capitalists distrust them we may be sure they have good reasons. Meantime they are increasing the wealth of the world in an obscurer fashion, and gradually preparing the means for grand enterprises when they will be no longer premature.

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts into and Payments out of the Exchequer between April 1, 1871, and Oct. 7, 1871 :—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1871-72.	Total Exchequer Receipts To Oct. 7, 1871.		Same time last year.	
	£	£	£	£	£
Balance on 1st April, 1871—					
Bank of England	...	5,678,915		7,633,761	
Bank of Ireland	...	1,344,520		972,887	
			7,023,435		8,606,648
REVENUE.					
Customs	20,100,000	10,093,000		10,229,000	
Excise	22,420,000	10,214,000		9,973,000	
Stamps	8,750,000	4,930,000		4,558,000	
Taxes	2,330,000	394,000		797,000	
Income Tax	8,820,000	1,498,000		1,424,000	
Post Office	4,670,000	2,242,000		2,280,000	
Telegraph Service	750,000	425,000		240,000	
Crown Lands	375,000	149,000		150,000	
Miscellaneous	4,100,000	2,616,535		1,675,175	
Revenue	72,315,000		32,561,535		31,326,175
OTHER RECEIPTS.					
Advances, under various Acts, repaid		1,355,041		1,155,917	
Money raised for fortifications		...		...	
Money raised by Exchequer Bonds		...		...

			3,655,041		1,655,917
Totals			43,240,011		41,588,740

EXPENDITURE AND OTHER PAYMENTS.

	Budget Estimate for 1871-72.	Total Exchequer Issues To Oct. 7, 1871.		Same time last year.	
EXPENDITURE.	£	£	£	£	£
Interest of Debt	26,910,000	16,944,849		17,054,597	
Other charges on Consolidated Fund	1,820,000	885,334		1,243,101	
Supply Services voted by Parliament	43,283,000	21,426,344		19,482,473	
Telegraph Service	420,000	280,000		180,000	
Expenditure	72,433,000		39,536,527		37,960,171
OTHER PAYMENTS.					
Advances under various Acts		856,531		670,361	
Expenses of fortifications		...		...	
Exchequer Bonds and Bills, &c., paid off		142,900		[illegible]	
Surplus income, to reduce Debt		739,179		1,656,121	
			1,738,610		2,351,962
Balances on Oct. 7th, 1871—					
Bank of England		1,423,520		716,133	
Bank of Ireland		541,354		560,454	
			1,964,874		1,276,587
Totals			43,240,011		41,588,740

The following are the Receipts on account of Revenue during the week ending Oct. 7 :—

	Receipts of Week Ending Oct. 7.
	£
Customs	398,000
Excise	145,000
Stamps	136,000
Taxes	3,000
Income tax	23,000
Post Office	nil.
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	6,552
Total	711,552

The total receipts of the previous week were 1,632,983*l*.

The Exchequer issues of the week on account of expenditure were 4,605,449*l*, viz. :—

	£
Interest of debt	3,945,449
Other charges on Consolidated fund	nil.
Supply services	590,000
Telegraph services	70,000
	4,605,449

During the week the cash balances have decreased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Sept. 30	2,009,335	1,476,711	3,486,046
— Oct. 7	1,423,520	541,354	1,964,874
Decrease	585,815	935,357	1,521,172

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Oct. 12.

The returns of the Bank of France for this week, last week, and for the week ending 8th September, 1870, are as follow :—

M. Casimir Perier is appointed Minister of the Interior. His right place would be the Finance Department, he having for many years past made the public finance his special study, and having printed some remarkable *études* thereon; and seeing that he was charged with the responsible duty of "reporting" on the last Budget,—the charge being imposed on him by the Committee of the National Assembly entrusted with the examination of the financial situation. His opinions differ widely from those of M. Thiers, and it will be curious to see if his entrance into the Cabinet signifies that he has converted the aged President to common sense in economic matters, or, from political considerations, has deemed it expedient to embrace, or, to speak more correctly, not to oppose, his antediluvian ideas of 1830.

Of M. Pouyer-Quertier's mission at Berlin, on the Alsace and Lorraine question, we are without precise details. The Government, it is true, sends telegrams to the provinces and to the foreign press, to the effect that it is going on satisfactorily; but precisely the same thing was said of the negotiations at Versailles, and yet they produced nothing. That however the mission will succeed is not doubted; but the expectation is that success will only be obtained by granting Prince Bismarck all he demands,—namely, the setting aside of the conditions imposed by the National Assembly for the admission of "manufactured products," as well as of raw materials from France into Alsace-Lorraine, and the granting to him of power to negotiate, if so minded, the paper for 20,000,000*l* given to him with London signatures—given with the understanding that it was not to be negotiated. The first concession will be dead against an Act of Parliament; but the French Government, like the French people, cares little for written law when there is a momentary advantage in violating it. The second (if it really be made) will be very mortifying to M. Thiers, inasmuch as it will not be in strict accordance with good faith to the bankers who gave credit to him their names; but the mortification will be compensated by the advantage of getting the Prussians out of six departments immediately; and besides the Germans will consent, doubtless, to let the period for the admission of the Alsace-Lorraine products into France at a reduced duty expire on 1st January, 1873, instead of 1st July. If report can be credited the French Government even hopes that by yielding to Prince Bismarck in the Alsace-Lorraine affair it may induce him to consent to permit the payment of the last 3 milliards of the indemnity in instalments spread over ten or twelve years in place of requiring it in a lump at an early date. But if this concession were obtained, it would be hampered by a prolongation of the German occupation of French territory.

The elections for the Councils General of departments have just taken place. Strange to say, economic considerations have had no weight with the constituencies, and yet the manner in which the Government of M. Thiers proposes to deal with the Treaty of Commerce and with taxation interests them greatly. In the department of the Gironde, M. de Fortoul is Republican candidate, a great supporter of the treaty with England, has not been chosen; M. Rouher, who, after M. Michel Chevalier, was the author of it, was not thought of anywhere, and even M. Michel Chevalier himself has failed in the Herault —the department which under his guidance made for years the greatest advance all others by its manifestation in favour of Free trade. The resistance of M. Chevalier was it appears, owing to a scandalous political intrigue, but it is not the less vexatious.

Great attention has been paid here to what has been said and written in London on the subject of the German demand for gold, and on the effect it has had, and is likely to have, on the money market. It has been noted, not without surprise, that no mention has been made of the metallic store of the Bank of France exceeding one milliard. When a strain is put on London it is thought that the Bank might let loose at least part of this huge sum, especially as the suspension of cash payments renders it practically useless. Some persons say indeed that it prevents the notes out from being depreciated, but it is the credit of the Bank which does that. This will be evident comparing the amount of notes in circulation with that of the coin and bullion held.

After the revolution of 1848, the Chamber of Commerce instituted an inquiry into the effect it had had on the Paris trade, and published the result. It is to be presumed that the Chamber will also ascertain to what extent Parisian industry has suffered from the recent war and the Commune. *En attendant* some members of the new Municipal Council have published an elaborate report on the subject. As this document is of a political character, being avowedly written to demonstrate the necessity of an amnesty to the Communist captives, its statements are probably somewhat exaggerated, but they have attracted serious attention. They are to the effect that in cabinet making the number of workmen has declined from 20,000 to 14,000; in shoemaking, from 24,000 to 12,000; tailoring, from 30,000 to 20,000; in the bronze trade there is a decline of 1,500 hands; in plumbing and zinc, of 3,000; whilst in sign-painting, in which there were many, there are none left. It is to "shooting, imprisonment, and flight" that these diminutions are ascribed. Of course all these industries suffer from the want of hands. But there are others which are depressed from the want of orders—that of printing, for example This trade, by a singular chance, out of 3,500 men had only 4 shot and 40 arrested; and yet they fought at barricades like the other workmen. About 500 printers are employed on newspapers, 2,500 are vegetating on a maximum of 3f a day, and 500 are unemployed. All this represents a loss of many millions; and there is besides slackness of business in restaurants, theatres, public amusements, &c., &c. But what the report regards as still graver, is that foreigners have actually begun to rival Paris in some of the industries for which she was famous above all the world—*modes*, artificial flowers, and furniture, for example; and are engaging at high wages the best workmen, even going into prisons and *pontons* to find them; so that, in addition to present suffering, Paris is menaced with permanent injury.

It is extremely desirable and even necessary at this epoch to know how the taxes are being paid up, and what are the movements of commerce. Yet the Government has not resumed the publication, suspended by the war, of the quarterly returns of the direct and indirect taxes, and of the monthly returns of imports and exports. And it has given no explanation of the reasons for which it withholds from the public the information these documents contain.

In the definitive allotment of the Paris loan the project of creating sixteenths of bonds has been abandoned, and that of cutting a number of the bonds into four been maintained. In consequence the allotment has been made in this wise :—For a demand of from 1 to 7 obligations a ¼ of one; from 8 to 12, ½; 13 to 17, ¾; 18 to 28, 1; 29 to 46, 2; 47 to 64, 3; and so on at the rate of 1 for every 17. The bankers and money changers who received subscriptions from their customers are to get 5.60 of their total demands, and are left to divide it among them as they please. They will have considerable trouble in contenting their people. Many subscribers are greatly vexed that their subscriptions have produced so little, and especially at the division of a quantity of the bonds into fragments; but the municipality has endeavoured to oblige everybody as far as possible, and in so doing has, as remarked last week, not hesitated to depart from the conditions originally laid down. The premium on the loan has fallen to 4f 50c.

Under the apprehension of a serious crisis at London, and of difficulties at Berlin, the Bourse was depressed; but it has become reassured on both points, and is displaying firmness—nay, is even talking of renewing "a campaign *de hausse*." The following are the quotations :—

The quotation of bar gold to-day is 20 to 22 the 1,000f; of gold coin (20f-pieces), 20 ditto; silver, 31 to 32; English sovereigns, 25f 75c to 25f 80c; bank notes same price. Bills on London are 25f 95c to 26f 5c.

The Bank of France is authorised to establish a branch at Versailles. As this town is in reality a suburb of Paris, though a few miles distant, some surprise is expressed that such a measure should be considered necessary.

The Omnibus Company is demanding of the City of Paris permission to augment its prices. If it would give up its monopoly the City could not refuse to let it charge what it likes. The new tax on the carrying of passengers in public vehicles does not regard it, being only applicable to fares above 50c.

The project of Baron Haussmann for the reconstitution of the Credit Mobilier is, it is understood, to be the reduction of the capital from 120,000,000f, in 140,000 shares, to 80,000,000f, in 160,000 shares; the transfer to the new company of the assets of the old one, estimated at 48,000,000f, and the raising of 32,000,000f of new capital. Of the latter, the right of subscribing 24,000,000f is to be reserved to the old shareholders, and 8,000,000f are to be offered to bankers and capitalists whose co-operation is desired.

It is thought not unlikely that the Austrian Credit Foncier will remove to London the branch it has in Paris, owing to the war and other events having lessened its field of operation in France.

The contractors for the Peruvian 6 per cent. loan of 1870 state that in March last they notified that if calls due were not proved before 10th April, the scrip would be declared forfeited, and sold at the Bourse; but that circumstances having prevented the execution of that measure, they, in conjunction with the Peruvian Government, now fix the 31st Oct. as the final date for paying up.

The Bank of Depots et Comptes Courants has fixed at 5f the dividend, on account of the first half of 1871, and it is to be distributed from 2nd November. Only 125f are paid up on the shares of this establishment.

The Credit Industrial Bank is to pay from 2nd November 7f 50c as dividend on account of the past six months of 1871. On the shares of 500f 125f only are paid.

The Company de l'Eclairage au Gaz et des Hauts Fourneaux et Fonderes de Marseille is paying 14f as balance of dividend of 1870.

The Tug Company of the Seine from Conflans to the sea is paying a coupon of 6f on the 1865 obligations.

The Company of the Forges et Chantiers de la Mediterranée, is from 1st November to give 30f per share on account of dividend of 1871.

In a meeting of the shareholders of the Sous-Comptoir des Entrepreneurs a report was presented on the situation of the company, from which it appeared that the dividend of 1869-70 must be confined to the 5f 50c already distributed, and that a sum of 6,850,000f due from the Immobilière Company, which had been expected, has not been paid.

The Company of the Anciennes Salines Domaniales de l'Est has limited to 10f the payment on account of dividend of 1871. These salt works are in the territory ceded to Prussia.

The Graissessac Coal-pit Company notifies that the balance of the dividend of 1870, of which the payment was fixed for the 15th December, can be received from 15th October.

M. Cail and Co. (Engine Building of Paris, Lille, Brussels, &c.) are issuing 30,000 bonds of 400f, bearing 24f interest, and to be redeemed in 15 years at 450f.

The Company des Lits Militaires has opened a subscription to 4,000 bonds of 500f, interest 30f, reimbursable at 600f in 19 years. The capital raised being destined to execute orders for the Government, the subscription is reserved to share and bond holders of the company.

The Suez Canal Company announces that its receipts in the month of September last were 926,100f, those of the corresponding month of 1870 being only 477,361f. The number of vessels was 58 against 32.

The quotations of the last three days in the produce markets, per 50 kilogrammes, duty paid, are as follows:—

Cotton.—At *Havre*, New Orleans very ordinary, 116f to 117f; Oomrawuttee fair, 91f 50c to 93f; good ordinary, 91f to 92f.

Coffee—At *Havre* Capitania, 137f 50c and 140f; Port-au-Prince, 73f; Haiti, 140f; Rio, 137f; Guatimala (in bond), 79f; Santos, 137f 50c; ditto (in bond), 76f. At *Bordeaux*, Winard, 149f; Guatimala, 147f 50c; Mysore, 152f 50c; La Guayra garbled, 150f. At *Marseilles*, Rio washed (in bond), 70f; San Domingo (in bond), 70f.

Sugar.—At *Havre*, French West India usine, 64f to 68f; and bonne quatrieme, 57f 50c.

Oleagenous Seeds.—At *Marseilles*, Coromandel, 49f 60c the 100 kilogrammes.

Hides.—At *Havre*, Pernambuco dryasalted, 106f; and salted, 72f 50c.

Wool.—At *Havre*, Monte Video unwashed, 210f to 225f the 100 kilogs; Buenos Ayres unwashed, 192f 50c; Spain, lamb ditto, 215f.

Tallow.—At *Havre*, Monte Video saladeros ox, 57f 50c to 58f; Buenos Ayres ditto, 58f; La Plata sheep, 54f 75c to 57f.

COMMERCIAL AND MISCELLANEOUS NEWS.

Bradshaw's Continental Guide, 2nd edition, for October, states that by a decree of the French Government just passed, a tax on locomotion will come into operation on the 15th of October, 1871. In consequence of this Act the fares on all the French railways will be raised 10 per cent., and the charges for all public conveyance similarly augmented. On and from the 1st November, 1871, the fares on all the State railways of Belgium will be revised, those for short and intermediate distances being lowered, and those for long distances increased. The fares will be on the equal mileage principle; the charges per kilometre for the three classes standing as follows; 7·2c first class, 5·4c second class, and 3·6c third class; equal to a fraction over 1d per mile first class, ¾d second class, ½d third class. The express fares will be 25 per cent. in excess of the ordinary fares, and in consideration of the increased rates for long distances, return tickets at a fare and three-fifths will in future be issued (first, second, and third class) to and from all stations, available for one or two days, according to distance. The main line from Warsaw to Moscow (via Brest and Smolensk) is now open throughout. The new line from Frieburg to Alt Breisach, in the Grand Duchy of Baden, is now open for passenger traffic.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

An Account pursuant to the Act 7th and 8th Victoria, cap 32, for the week ending on Wednesday, the 11th day of October, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued.....	33,394,530	Government debt.....	11,015,100

Bullion	...	1,041,632
Rest.....	...	568,340
Reserve	..	854,880

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house:—

	Week ending Oct. 11, 1871. £	Week ending Oct. 4, 1871. £	Week ending Oct. 12, 1870. £
Thursday	15,317,000	13,830,000	10,536,000
Friday	16,330,000	39,907,000	11,648,000
Saturday	16,476,000	21,381,000	10,820,000
Monday.....	12,911,000	17,329,000	10,765,000
Tuesday	15,631,000	18,605,000	11,230,000
Wednesday	16,190,000	22,252,000	10,104,000
Total.....	92,855,000	133,304,000	65,103,000

GEORGE DERBYSHIRE, Chief Inspector.

Bankers' Clearing-house, October 12th, 1871.

The total since the 4th of January, 1871, is 3,591,274,000*l*, compared with 3,024,783,000*l* for the corresponding period last year, showing an increase of 566,491,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding date with the present week	Oct. 18, 1861.	Oct. 14, 1866.	Oct. 13, 1869.	Oct. 12, 1870.	Oct. 11, 1871.
Circulation, including bank post bills	£ 21,930,657	£ 25,217,812	£ 24,816,119	£ 25,628,510	£ 26,6[illegible],929
Public deposits	3,599,703	3,858,119	2,468,728	4,116,726	4,888,[illegible]06

Clearing-house returns	...	63,[illegible],000	65,[illegible],000	65,[illegible],000	92,[illegible],000

In 1861, money was easy, the restriction of business continuing. The Bank of France had just commenced operations for drawing 2,000,000*l* from London by means of an arrangement with Rothschilds and Barings. It was not supposed, however, that there was room for great alarm.

In 1866, money was still easy at 2 per cent. During the elections, which were now in progress, there was a keen discussion as to the respective merits of the Liberal and Tory Governments in the matter of economical expenditure. France was displaying some jealousy of the changes produced in Spain by the Spanish Revolution.

In 1869, money was still easy in London, but was becoming rather dearer on the continent. The Prussian Government had just obtained authority to convert a large portion of its debt, so as to effect an important annual saving. The petition for liquidation against the European Society had been dismissed.

In 1870, money was easy, and in the open market tending downwards. The most gloomy views were now being taken of the issue of the siege of Paris for France. The Prussian Government had been making rather severe remonstrances against the free export of munitions of war to France.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 2,[illegible],000*l*. in 1866, an excess of 4,109,243*l*; in 1869, an excess of 3,[illegible],529*l*; and in 1870, an excess of 3,151,523*l*. In 1871, there is an excess of 1,740,004*l*.

Discount and Money Market.—The event of the week was the advance in the Bank rate last Saturday from 4 to 5 per cent.—an event which had been generally anticipated as likely to occur on Saturday or Monday, and which the state of the Bank account last week showed to have been necessary at the usual meeting on Thursday. The move on the part of the Bank was of course immediately followed by a corresponding advance in the rates in the open market, and of the allowances for money made by the joint stock banks and discount houses. The advance, however, both at the Bank and in the open market has been attended by no pressure for accommodation; as soon after the dividends, a large part of the Bank's advances on securities is being repaid, and there is now rather an abundance of money in the open market—the rates for loans at call on Consols being about 2½ per cent. But it is only the surplus money at call which is obtainable, all other rates being firmly maintained, and the discount houses showing no anxiety for bills.

The prevailing feeling in the market is still one of uneasiness, and there is a strong impression that the Bank should have taken the precaution of raising the rate another 1 per cent. early in the week. At this period of quarterly settlements there is no likelihood of any improvement in the Bank's position so far as internal movements are concerned for a month to come, and though the continental exchanges are this week still more in our favour, and the gold arriving all goes to the Bank, there is no certainty of any real improvement from this cause so long as the German Government retains that command over our funds which it appears to possess. The Bank again is much weaker for the week—the important changes in a crisis like the present being a decrease of 1,042,000*l* in the bullion in both departments, and a decrease of 1,086,000*l* in the reserve of notes in the banking department. Although the advances to the bill brokers have been repaid to the extent of 3,089,000*l*, and repayments are still being made, still the Bank is not yet much stronger in consequence, as the Government has had to borrow 2,300,000*l* to pay the dividends. The real point however is the low figure of the reserve, which could not now bear the slightest drain without the rate being put up to 6 or 7 per cent. For the moment it is true gold is coming in, but not yet in sufficient quantities to prove that the tide has really turned, or that a renewal of the movement which causes the present scarcity may not begin at any moment. Among other causes which have added to the general feeling of uneasiness is the great fire in Chicago, by which the whole city has been nearly destroyed. The panic which this appears to have created in New York in the shares of certain railway and insurance companies has been reflected here, and it is understood that already several of the leading insurance companies here which have been doing American business, have transmitted orders to their agents to make the necessary drafts for supplying themselves with funds to meet the losses. The fall in the American exchange is attributed to this cause, and in any case the payment to be made to America in consequence of the 5 per cent. Funding loan is looked forward to with some apprehension as a reason for the American exchanges being against us for some time to come.

As so much now depends on the action of the Government, we may notice that the meeting of the German Reichstag takes place on Monday, and that probably the German Goverment in the debate on the new coinage bill, or otherotherwise, may make some explanation of its monetary policy which will throw light on the present crisis.

The Bank of France account shows only a fractional increase for the week in coin and bullion, which still however amount to 25,000,000*l*.

We subjoin our usual quotations for mercantile paper having various periods to run, repeating however the remark which we have had to make recently as to the unsettled state of the market. The minimum rate for the very best short-dated paper is 4½ :—

Bank bills—2 to 3 months	4½ 5	per cent.
Do 4 months	5 ¼	per cent.
Do 6 —	5¼ ½	per cent.
Trade bills—2 to 3 months	5	per cent.
Do 4 months	5½ ½	per cent.
Do 6 —	5¾ 6	per cent.

The allowances for money at the Joint Stock Banks and discount houses are as follow :—

Joint Stock Banks at call	4	per cent.
Discount houses at call	4	per cent.
Do with seven days' notice	4¼	per cent.
Do fourteen days'	4¼	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	6	5	...	5
Vienna	6	7	5	6½
Berlin	5	4	4	4
Frankfort	5	4	3½	3½
Amsterdam	4	3	3½	3¼
Brussels	3½	5½	3¼ ½	5
Hamburg	...	...	3½	4
St Petersburg	8	6	6	6

The Stock Markets.—The movement this week, until the very close this afternoon has been steadily, though rather slowly, in the upward direction. The markets on Saturday, when the Bank rate was raised to 5 per cent., were rather weaker than they had been the previous day, but they were not much weaker, and since then it has appeared that the pressure on the money market had been fully discounted, and as no more bullion has been going away for the present the tone has been generally steadier. This feeling was especially strong after the commencement of the settlement on Wednesday. Although there had been a considerable pressure of sales and there would probably have been more pressure if the outflow of gold had continued and the Bank rate had been raised, yet the settlement rather

showed a scarcity of stock, and there was no difficulty in speculative buyers carrying over, although the contination rates were higher than at previous settlement. Late this afternoon, however, the tone of the market was suddenly changed, sales being pressed in all departments. It was reported that the Chicago disaster had finally produced a semi-panic in New York, and that very much lower exchange quotations had been received to-day. Lower prices were likewise telegraphed from Paris. The markets thus close in nearly the same condition they were in last week, the prevailing feeling, notwithstanding numerous purchases for investment, being one of uncertainty, and a great many holders being ready to come forward and realise on the slightest occasion. Until there is greater certainty as to what Germany will do, it is doubtful whether there can be any real improvement in our stock markets, though in such stocks as English railways there is always the strong influence of increasing traffics to counteract the fluctuations of market value.

The chief incident of the week has been the conflagration at Chicago, which has affected all departments of American securities most unfavourably. Several of the leading American railways dealt in here have suffered heavy losses, and as the insurance companies must realise largely to make good the claims for compensation, all American securities are weaker for the time. Prices have daily come lower from New York since the fire, and the American market here closes at the lowest point of the week.

ENGLISH GOVERNMENT SECURITIES.—This department, like the rest of the markets, shared in the general improvement which set in on Monday, and afterwards continued till nearly the very close to-day. Consols, which closed last week at 92⅜ ½ for money, and were lower on Saturday, were on Monday at 92⅝ ¾, an improvement of ¼. In the afternoon to-day, however, when a feeling of panic set in, the price immediately fell to 92⅛ ¼, or ¼ lower than last Friday's closing price—the closing quotation for the November account being 92 5/16 7/16.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money.		Account.		Exchequer Bills.
	Lowest.	Highest.	Lowest.	Highest.	March and June.
Saturday	92¼	92¼	92⅜	92⅜	par to 5s pm
Monday	92¼	92¼	92⅜	92⅜	par to 5s pm
Tuesday	92⅜	92⅜	92½	92½	par to 5s pm
Wednesday	92⅜	92⅜	92½	92½	par to 5s pm
Thursday	92⅜	92½	92½	92½	par to 5s pm
Friday	92¼	92¼	92½	92¼	par to 5s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Consols for money	92⅛ ¼	92⅛ ¼	— ¼
Ditto November	92 9/16 11/16	92 5/16 7/16	— ¼
Reduced 3 %	90⅜ ½	90⅜ ⅜	— 1/16
New 3 %	90⅜ 5/16 7/16	90⅜ ⅜	— 1/16
Bank Stock, last dividend 4½ %	241 43	241 43	... ...
India Stock, 10½ %, red. at 200 Apl. 30, 1874	207 9	206 8	— 1
Ditto 5 %, red. at par, July 5, 1880	112½ 13	112½ 13	... ...

EXCHEQUER BILLS.—par to 5s prem.

COLONIAL GOVERNMENT SECURITIES.—The following are the changes for the week :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Canada 6 %	107 8	106 7	— 1

FOREIGN GOVERNMENT SECURITIES.—The fluctuations in this department, in consequence of the panic at the end of last week, the favourable tone subsequently lasting till to-day, and the renewed panic this afternoon, have been rather material, though not so great as on the occasion of the previous panic, when the Bank rate was raised to 3 per cent. Spanish, which closed last week at 33⅜, were on Saturday as low as 33⅛, on Thursday they had crept up to 33¾, and they close this afternoon at 33¼ ⅜, rather a lower point than what was touched last Saturday. In Turkish there have been similar fluctuations—the 5 per Cent. 1865 loan, which was at 44⅞ 45 last Friday, having advanced on Thursday to 45⅛ ⅜, and fallen again to-day to 44¾ ⅞. In French securities there have been similar fluctuations, the New loan which was 8⅞ 9 pm. last Friday, having advanced to 9⅛ ⅛ and fallen this afternoon to 9 1/16 1/16; and so with other foreign stocks. The change to-day in French stocks was preceded by the receipt of lower prices from Paris, where the stock market for some time appears to have been in rather a delicate condition. The changes for the week, as will be seen, are chiefly lower :—

ENGLISH RAILWAYS.—The fluctuations in this department have as usual lately been the most severe. On Saturday, after the Bank rate was put up, there was a fall of between 1 and 2 per cent. all round, though the lowest point finally touched was not quite so low as what had been reached in the previous panic. On Monday however there was decidedly a better tone, and prices steadily advanced—Great Western rising from 101⅓ 102 to 104 ⅓; Caledonian from 106 ½ to 109½ ¾; Chatham and Dover from 23 ½ to 24½ ¾; London and North-Western from 142⅛ 143 to 144½ 145; and other stocks in proportion. The highest point touched was not quite so high as in the first rebound after the present panic period began, but it was not far from being so. This afternoon however the improvement was almost wholly lost, the majority of the closing quotations being under the closing figures of last Friday, though a little better than the quotations of Saturday. Great Western have fallen to 102 ⅛; Caledonian to 107 ⅛; Chatham and Dover to 23½ ¾; North-Western to 142 ⅛; North-Eastern to 106⅛ 7; and other stocks in proportion. The traffics of the week have again been good, showing a larger proportion of goods increase, so that with the intrisic value of this property improving so rapidly, *bona fide* investors have now an excellent opportunity.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	106½ ¼	107 ¼	+ ¼
Great Eastern	42⅜ 3	42⅜ ½	— ½
Great Northern	133 34	132 33	— 1

Metropolitan District 6 %	119 21	120 2	+ ⅛

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Oct. 6 to 838,443*l*

being an increase of 54,586*l* on the corresponding week of last year. The aggregate receipts of the half-year to date are now 11,107,569*l*, being an increase of 766,423*l* on the corresponding period of last year. The principal increases for the week are — North-Eastern, 9,698*l*; London and North-Western, 8,337*l*; Midland, 5,303*l*; South-Eastern, 5,208*l*; Lancashire and Yorkshire, 4,877*l*; Caledonian, 4,028*l*; and Great Western, 4,037*l*. The following are the details of the increase or decrease in each case for the week, and for the whole period: —

RAILWAY TRAFFIC RETURNS.

AMERICAN SECURITIES.—This department has been adversely influenced by the disastrous fire at Chicago. The insurance companies will be compelled to realise heavily to meet the heavy losses entailed upon them, and this will probably lead to a large export of securities from the United States. The New York stock market has undergone severe fluctuation in consequence of the large forced sales made, and a general decline has taken place in the quotations, which has sympathetically influenced the market here. Several of the large English insurance offices are liable to a large extent, but prompt measures have been taken to meet the demands. It is stated that the North British and Mercantile Company expect to lose 100,000*l*, and the directors have telegraphed to their agents to meet all claims without delay and to draw for the amounts at sight. The position of this company is particularly strong, there being a reserve fund of 678,000*l* in hand, and the energetic action of the directors must meet with general approval. Other offices are large losers, but there is good reason to believe that so far as the English offices are concerned all claims will be promptly met. Government bonds are all lower, but the most important feature in the market is the heavy decline which has taken place in railroad bonds, more particularly of those lines having connection with the ill-fated city. This will be seen from the list below —

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.	
United States 6 % 5-20 Bonds, exchng. '65	92½	½	92	¼	—	¼

Virginia 6 % Bonds	51	3	.....	50	2	— 1

JOINT STOCK BANKS.—The dealings in this department have not been extensive, but the fluctuations have generally been unfavourable. Australasia shares have given way 2, New South Wales and Union of Australia 1, Anglo-Egyptian and Anglo-Italian ½, Union of London 1. On the other hand, Land Mortgage of India 5 per cent. debentures have risen 1.

The London and Provincial Bank (Limited) has opened branches at Diss and Eye, having made arrangements with the principal creditors of Messrs Fincham and Simpson (who suspended payment on Friday last) to take the goodwill and premises of the private firm, whose estate it is intended to liquidate out of bankruptcy. A numerous meeting of the creditors (Mr Kay, Q.C., in the chair) was held on Tuesday, at which the arrangement was unanimously approved. A large dividend is expected to be paid on the claims, which amount to about 80,000*l*.

TELEGRAPHS.—There has been much want of animation in the demand for telegraph shares, and the tone of the market has been dull throughout, the depression being more particularly apparent at the close to-night. Anglo-American and Anglo-Mediterranean have declined 1; Reuter's, ½; Cuba, and Marseilles and Algiers, ½; West India, ⅛; but Indo-European show a rise of 2; British Australian, ½; Falmouth and Gibraltar of ½. Telegraph Construction shares are ¼, and Hooper's Construction ¼ better on the week.

MINES.—The mining share market has participated in the prevailing depression, all the leading mines having been more or less affected to-day. Wheal Buller show a decline of 5; Van, 3; East Lovell, 2½; Great Wheal Vor, and South Condurrow, ½; Marke Valley, ¼; but Wheal Seton have risen 3, and North Roskear, 1. Eberhardts were heavily pressed for sale to-day, so close at a reduction of 2, while Sierra Butes are ¼ better.

MISCELLANEOUS SECURITIES closed with much flatness to-night, and there is a very general depreciation in prices on the week. North British and Mercantile Insurance have given way 6, for reasons referred to above; London General Omnibus, and Madras Irrigation are 2 lower; Australian Mortgage, Bangparah Tea, Foreign and Colonial Trust 6 per Cent., 1871, bonds, Italian Irrigation 6 per Cent. bonds, Peel River Land, and Peninsular and Oriental Steam have given way 1; London Financial, 1½; and Commercial Union Assurance, ½; Fore Street Warehouse has risen ½; and Native Guano 4.

The prospectus of the Argentine Tramways Company, Limited, has been published, the proposed capital is 250,000*l*, in 10*l* shares. The prospectus states—"This company has been formed for the purchase of the valuable concessions granted for and of the tramways in Buenos Ayres, with all stations, storehouses, stables, horses, and general plant appertaining thereto, for the sum of 150,000*l* in cash, and 100,000*l* in deferred shares in this company, to be handed to the vendor upon completion of the purchase in Buenos Ayres. The tramways are to be delivered over to this company on the 31st of December next, fully equipped and in thorough working order."

BULLION AND EXCHANGES.—The movements in bullion during the week have comprised a considerable influx of gold into the Bank since last Saturday, the arrivals being chiefly from France. The continental exchanges generally are again rather more in our favour, the changes to-day being also favourable as compared with last Tuesday, except in the case of Vienna. The great rise of the Paris exchange is the most noticeable feature, the advance this week as compared with last, when there was an advance on the previous week, being about 15c. There has been, however, a corresponding rise in the premium on gold in Paris, and the large accumulation of specie in the Bank of France, when gold is so much wanted outside, begins to attract notice. According to the latest accounts there is no demand for gold for Germany, and the gold which arrives here is immediately taken to the Bank.

The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week: —

"Gold.—Owing to the cessation of the demand for Germany, the movements of gold during the past week have been very sensible. We have received some very large amounts, but with the exception of the Australian arrival previously purchased for exportation, the whole has been sent into the Bank—that establishment having received 881,000*l* since our circular of the 5th instant. Withdrawals, to the value of 469,000*l*,

have taken place during the same period; these consist chiefly of sovereigns, which have been sent to South America. The Australian mail brought 577,670*l* from Melbourne, and the amounts of French gold to hand during the week cannot be far short of 700,000*l*. The Douro has taken 448,600*l* to the Brazils, and the Cape steamers 45,000*l*.

Silver.—The silver market is decidedly quiet, the demand for the continent having ceased, owing to the rise in the exchanges, caused bp the rate of discount being advanced. A large amount of silver is now on hand, but it cannot be sold at the present market rate, which may be quoted as 60⅜d per oz standard. We have received about 60,000*l* from the West Indies and New York during the week, and 45,000*l* of Sycee from China.

Mexican Dollars of the old coinage are tolerable firm in price, at 60¼d per oz, owing to the demand for China; the new die is flat, a further supply having come to hand by the Fire Queen from New Orleans, after those by the West India steamer had been disposed of.

Exchange for India on Banks' drafts at 60 days' sight is firmer than quoted by us last week, the rates now being 1s 11¼d to 1s 11⅜d per rupee.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto refinable, 77s 11d per oz std, last price. Silver—Bar silver, fine, 5s 0⅜d per oz std, last price; ditto containing 5 grains gold, 5s 0⅜d per oz std, last price; Mexican dollars, 4s 10⅜d to 5s 0¼d per oz, last price.

According to the *Gazette* return the imports of the precious metals into the United Kingdom during the week ended October 11 were:—Gold, 962,365*l*; silver, 499,164*l*. The exports were:—Gold, 1,140,050*l*; silver, 251,536*l*.

The bullion operations at the Bank have comprised a purchase of 189,000*l* in bar gold, and an influx of 35,000*l* in sovereigns received from Paris. The sum of 22,000*l* was withdrawn for India and the Cape.

206,000*l* in gold was taken to the Bank to-day.

We are indebted to Messrs J. Allard and Co., of Paris and London, for the following telegram, giving to-day's exchange and bullion quotations in Paris:—

NOTICES AND REPORTS

STOCKS.

Egyptian 9 per Cent., 1867.— Bonds representing 100,000*l* have been drawn for redemption on the 22nd of November next.

RAILWAY COMPANIES.

Cape.—The traffic showed increase during the first half of the year. Balance for distribution, 15,167*l*. After paying preference dividend, a distribution at the rate of 5 per cent. per annum is announced on the ordinary stock, leaving 1,189*l*.

Crystal Palace and South London Junction Railway — 5½ per Cent. Preference.—The directors are inviting tenders for 75,000*l* in 5½ per cent. preference-stock, guaranteed by the London, Chatham, and Dover Railway Company. No issue will be made at less than par, and one-half will be payable on allotment, and the balance by two instalments on the 1st December and the 1st February next. The money is required to construct the Brixton curve.

East and West Junction Railway 5 per Cent. First Debenture Stock.—The subscription list, which closed on the 13th instant for London applications, was opened by Messrs Field, Wood, and Haynes for 210,000*l* (the balance of 400,000*l*) in 5 per cent. first mortgage stock at the issue price of 90 per cent. The line, 33¼ miles in length, is partly in operation, and when completed next year will connect Blisworth and Towcester with Fenny Compton and Stratford-on-Avon, shortening the distance from the Northamptonshire iron fields to South Wales by 25 miles. Three years interest is secured by an investment in Consols.

Great Western of Canada.—The revenue accounts for the past half-year contrast as follows with those of the first half of 1870:—

	1870. £		1871. £
Gross revenue	408,900		458,891
Working expenses	251,824		268,276
Net revenue	157,076		190,615
Deduct interest charges and loss on American currency	74,201		78,051
	82,875		112,564
Add previous balance, &c	2,615		4,569
Available for dividends	85,490		117,084
—On preference stock, and on the ordinary shares at the rate of 4 per cent. per annum	82,187	(5½ p.c.p.a.)	112,217
Surplus	3,303		4,847

The capital expended to 31st July was 5,701,153*l*, leaving a balance of 703,155*l* in hand. The renewal fund for the ferry

[CONTINUED FROM PAGE 1248.]

steamers amounted to 24,272*l*. The discount and charges on the conversion of American currency for the half-year amounted to 20,731*l*, as compared with 25,282*l*. The policy of adjusting the company's system of 350 miles of railway to the 4 ft 8½ in gauge had been entirely carried out, and the car stock was being altered to that gauge as fast as possible. The estimated cost of altering the broad gauge of 5½ ft and rolling stock to the narrow gauge of 4 ft 8½ in was 91,000*l*, which was to be charged to revenue and spread over five years, 9,100*l* each half-year until liquidated. The partial failure of the grain crop last season in Canada seriously affected the earnings. The gross earnings of the Detroit and Milwaukee Railroad amounted to 138,782*l*, the working expenses to 95,791*l*, and the interest on bonds, &c., to 40,392*l*, leaving a balance of 2,680*l*.

Great Luxembourg.—Trade is again steadily improving. The gross receipts for the first half of 1871 amounted to 218,141*l*, against 206,641*l* in the same half of 1870. The net earnings amounted to 102,000*l* for the past half year, against 100,465*l*. After providing for the payment of the interest and redemption of the obligations and preference shares, and for the repayment of the Namur and Arlon guarantee, there is a balance of 57,930*l*, out of which the directors recommend the shareholders to declare a dividend of 7*s* 6*d* per share, and carry forward 180*l*.

Hudson's Bay Oriental Railway.—The contractors announce that the first section was completed on the 25th ultimo, and that progress is being made with the remaining two sections.

Royal and Sun Insurance.—The report recommends a dividend at the rate of 5 per cent. per annum. Yellow fever and short crops have affected traffic, the receipts from which were only 80,516*l* during the year, as compared with 103,157*l*.

St Katherine.—A dividend at the rate of 7½ per cent. per annum has been declared, free of income tax, after taking 67*l* from the reserve.

BANKS

Chartered Bank of India, Australia, and China.—The half-year's net profits have amounted to 27,012*l*, which have reduced the previous deficiency to 22,910*l*. No further bad debts have been incurred.

Chartered Mercantile Bank of India, London, and China.—The report states that the half-yearly statement of accounts to 30th June last shows a net profit of 43,047*l* 2*s* 7*d*. A dividend of 8 per cent. for the above period, free of income tax, amounting to 32,000*l*, is now declared, leaving a balance of 20,547*l* 2*s* 7*d* carried forward to next account. It is added that—"The continued adverse state of Eastern exchanges during the whole of the half-year has again seriously affected the profitable working of the Bank; but, under these unfavourable circumstances, it is hoped the result may be considered not unsatisfactory."

London and Provincial.—Branches have been opened at Diss and Eye, taking over the connection of Messrs Fincham and Simpson.

FINANCE.

American Mortgage Land and Finance.—The directors have declared an interim dividend at the rate of 10 per cent. per annum.

Credit Foncier of England.—The fourth half-yearly drawing of debentures to the amount of 40,000*l* has taken place, and the numbers have been published for redemption on the 1st November.

Western Reserve, Limited.—A second distribution of 5*l* per share has been announced by the directors.

ASSURANCE COMPANIES.

Scottish National Insurance.—515 new life policies were issued during the year, aggregating 286,145*l*, and producing 9,023*l* as new premiums. Claims paid absorbed 41,921*l*. The usual 10 per cent. dividend (7½ per cent. on the capital originally paid up) was declared, free of income tax, and large balances were carried to reserves.

MISCELLANEOUS COMPANIES.

Argentine Tramways, Limited.—Capital 250,000*l*, of which 100,000*l* in deferred shares belong to the vendors and 150,000*l* in 1*l* shares is offered for subscription in the shape of 12 per cent. preference shares, upon which any arrears of interest will become cumulative. The object is to purchase a complete system of tramways in Buenos Ayres for the sum of 250,000*l* (150,000*l* only in cash), with all stations, stables, horses, cars, and other equipments. The transfer will be made on the last day of this year, and it is stated that the earnings upon two-thirds of the line, which portion is now in operation, are sufficient to cover the 12 per cent. interest.

Army and Navy Co-operative Society, Limited.—Capital 15,000*l*, in 1*l* shares. The supply of articles of consumption and general stores to members of the Army and Navy will be undertaken in the same manner as the Civil Service are already accommodated by their "Supply Association."

Chemical Light, Limited.—Capital 30,000*l*, in 5*l* shares. First issue, 15,000*l*. This company is to acquire a patented invention for the manufacture of lucifer matches, providing for greater safety in their use.

General Asphalte, Limited.—Capital 60,000*l*, in 12,000 shares of 5*l* each, of which the vendors take 3,200 shares, as purchase-money in full. Messrs Armani and Stodart have the exclusive supply of asphalte, from the Garde Bois and Lovagny quarries, in the Basin of Seyssel, Savoy, to the United Kingdom and British Colonies, for a period of thirty years. The business, which has been established 23 years, will be acquired by the new company. The asphalte has been laid at Osborne, Aldershot, Woolwich, Chatham, Tattersall's, &c., is stated to possess "the best qualities for paving material," while conveniently situated for cheap supply to Great Britain.

Georgetown (British Guiana) Gas, Limited.—Capital 40,000*l*, in 5*l* shares. The city of Georgetown, Demerara, will be supplied with gas, and the property of the Demerara Gas Company will be acquired for 4,158*l*.

Neuchatel Bituminous Rock.—At the meeting the resolution recently passed in favour of reconstructing the undertaking was unanimously confirmed. The chairman stated that the concession had been extended thirty years, and that a considerable reduction had been made in the royalty. He also mentioned that the company has many large orders in hand.

North British Australasian.—A dividend at the rate of 7 per cent. per annum is announced.

Queensland Sheep Investment.—The accounts showed a credit balance of 2,571*l*, which was carried forward. It has been decided to offer the Rawbelle station for sale.

Royal Mail Steam Packet.—A distribution of 4*l* 10*s* per share is announced for the half-year.

Surrey Consumers' Gas.—The usual maximum dividends have been notified out of a half-year's net profit of 15,541*l*.

Wood street Warehouse.—After paying a 10 per cent. per annum dividend, a considerable surplus remains.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was a firm tone in the grain market to-day, though the transactions have not been on an extensive scale. The disaster at Chicago, and the cooling weather which has prevailed, have enabled factors to hold firmly, and full prices have been paid for both English and spring corn. French buyers are still in the market, but their purchases have not been extensive. Flax has ruled firm in value, with a fair demand. Maize and oats closed slightly dearer, but barley, beans, and peas are unchanged in value. The imports of foreign and colonial cereal produce into London have this week amounted to 35,470 qrs of wheat, 7,730 barley, 77,170 oats, 950 beans, 300 peas; 1,500 sacks and 2,040 barrels of flour.

At Liverpool and Wakefield this morning the wheat trade ruled steady, and the tendency of the quotations was upwards.

The Liverpool cotton market opened firm on Friday last, but on Saturday the tone became rather easier, owing to the rise in the Bank rate. Since then the previous highest quotations have not been obtainable, but a good business has been done, and at the close prices show a general reduction of about $\frac{1}{16}$d per lb on the week. The total sales are 96,830 bales, of which the trade have taken 61,370 bales; speculators and exporters, 35,460 bales. The imports are 40,934 bales; the actual exports, 9,369 bales, and to-day's stock is 471,410 bales. To-day the market closes strong; sales, 15,000 bales, prices in sellers' favour.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended October 12, 1871:—

	Imported.	Exported.
American.....bales	16,363	968
Brazilian	4,597	30
East Indian	18,235	9,662
Egyptian	1,546	429
Miscellaneous	9,587	125
Total	50,328	11,214

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, Sept. 12:—Transactions in our cotton market during the week reach a total of about 5,000 candies, of which however the bulk is for forward delivery. Dhollerah during October at 225 rs, and sawginned Dharwar, up to 20th December, at 225 rs in the early part of the week to 234 rs at the close. Purchases of ready cotton do not aggregate more than 1,250 candies of all sorts, including about 500 candies taken by some of our local spinning and weaving companies. Receipts are now on the most trifling scale, and small as the business in ready cotton has been, a further considerable inroad has been made on our already reduced stocks. The weather in Bombay continues on the whole seasonable, and accounts from the districts are generally very encouraging. Guzerat—Our correspondent writes, under date Broach, 9th instant:—"The cotton crops both in the Surat and Broach collectorates are in good condition, although for the grain crops more rain is still wanted." Dhollerah—There has been a good fall of rain throughout Kattiawar during the early part of the month, and the crops are everywhere said to be looking well. Hingunghat—Our correspondent writes on the 9th instant:—"The cotton crops throughout our districts are in excellent condition." Oomrawuttee—"We have had abundant rain during the week, and all the crops are flourishing. Many fields are already in flower." Dharwar—Sowing operations had been much retarded for want of rain, but have now been commenced under favourable circumstances. The cotton commissioner reports that owing to the season having gone past for some descriptions of grain, a larger area of land will probably be put under cotton this season as compared with last.

Export of Cotton from Bombay to September 11.

	1871.	1870.
London.....bales	21,505	1,570
Liverpool	670,784½	778,495
Total, Great Britain	692,289½	780,065
Channel for orders	37,333	10,379
Continent	265,744½	130,764
China	47,128½	44,459½
Grand total	1,042,495½	965,667½

Actual exports since last mail left, 7,100 bales.

The colonial produce markets have ruled steady this week, and prices generally have been fair. Common coffees close rather dearer, while most kinds of West India sugar have commanded full rates. The stock of sugar in the United Kingdom is estimated at 148,000 tons, against 198,000 at the corresponding period last year. Cocoa has met a moderate demand on former terms. Rice has ruled firm in value.

Statement of Rice Afloat from all Ports for Europe on 1st Oct., 1871 and 1870.

These quantities include all that has arrived off coast and the different ports, but not yet taken into stock.

The annexed is dated Rangoon, S t 2:—The demand fo Natsain rice, which remained slack during the first half of la

month, has of late considerably increased on account of improving advices from the home markets. Prices have not undergone any change yet, exporters having been operating very cautiously; however, as supplies are but moderate and hardly sufficient for the demand, a rise of prices will probably become unavoidable, should the inquiry for our staple still further increase. We quote to-day 55 rs for 100 baskets Natsam paddy, or 122 rs per 100 baskets, five to six parts rice, equal to 5s 4½d per cwt, free on board. There is at present only one vessel in port loading for Europe, but several under home charter are expected shortly. The exports to that quarter amount to 7,974 tons since our last. Other qualities —Soft kinds of rice are also in good demand for shipment to the Straits and to Bombay, and as supplies are but small, prices are rising, and are to-day firm at 118 rs to 120 rs per 100 baskets, five to six parts rice, ready for shipment. Exports of rice from 1st January up to end of August, compare as follows during the last six years :—

	To Europe.	To the United States.	To Straits, China, and Coast.	Total.
	tons.	tons.	tons.	tons.
1871	164,234	...	28,761	191,995
1870	161,285	...	26,728	188,013
1869	159,315	1,168	24,923	185,406
1868	123,716	1,884	10,375	135,225
1867	113,906	1,178	56,804	171,888
1866	94,198	3,630	99,956	197,784

Our Natsam paddy crop is in a flourishing condition, but the Ngakyouk crop has suffered somewhat from inundations. The damage done is, however, not so large as was at first apprehended, the water having fallen rapidly, and thus greater destruction has been prevented, it is besides quite in time still for replanting some of the destroyed Ngakyouk crop.

Annexed is Messrs Southey, Balme, and Co.'s wool report :— The fourth series of the year, which opened on the 14th ultimo, was brought to a close on Wednesday. The arrivals for the series were :—Sydney, 41,226 bales; Port Phillip, 27,200 bales; Adelaide, 9,565 bales; Swan River, 294 bales; Van Diemen's Land, 943 bales; New Zealand, 38,332 bales; Cape, 21,819 bales—total, 139,547 bales. The demands of an expanding consumption in all the principal woollen centres have become increasingly felt in the wool market during the past few months, and occurring at a period of the year when the supply of the raw material is comparatively moderate, have caused a further material advance in value during the past series. Notwithstanding the large purchases made at the previous auctions on foreign account, the continental buyers have again taken a considerable proportion of the quantity offered—estimated at about 35 per cent. of the total. The representatives of the English trade however, who operated sparingly during the earlier sales of the year, have been by far the principal purchasers, and for the extent of business doing the home trade do are still not more than moderately stocked. The activity in the American demand, which formed a conspicuous feature in the previous series, has considerably subsided, and the purchases on that account have been considerable. The sales established during the first week of the series showed an average advance of 10 to 15 per lb on washed and scoured combing wools, 12½ to 2½ per lb on unwashed and scoured combing wools, and 1d per lb on grease wools. The publications in both hemispheres indicating the upward movement in the English market gave an advance of fully 2d per lb. As the sales progressed, the prices paid for clothing wools especially scoured descriptions, ruled somewhat easier, with the sudden advance of the Bank rate from 2 to 3 per cent. induced a more marked feature in the closing catalogues. For good combing wools however, the supply of which was extremely limited, there has been a steady and active competition throughout, and for such kinds the full advance has been all but realized. There would appear to be some reason for the opinion that the prices recently established have reached as high a point as are likely to obtain for some time to come, for while the supply of wool, which will be available during the interval previous to the arrival of the new season's clip, is of such limited extent as to give promise of fair operations during that period, there are not likely to be any circumstances that can exert any important influence on the rest of the year sufficient to warrant a material advance in the value of the raw material, as the consumption appears to be keeping pace with the supply. The approach for the fifth series, to commence on the 22nd of November, are as follows :—Sydney, 36,000 bales; Port Phillip, 27,000 bales; Cape, 16,000 bales; and 30,000 bales.

Referring to the Cape wool trade, Messrs A. C. Stewart and Co. of Port Elizabeth, writing on August 31 remark :—Our last report this week is almost a repetition of our last, excepting prices are still dearer. There is still a large quantity of wool coming in to the country towns, which has been detained there by the scarcity and high rates of transport. As there is now [illegible] of getting for cattle all over the country, we may reasonably expect large supplies during the course of next month. All arrivals of washed wools, whether of Uitenhage or country scoured, or fleece-washed, have been sold immediately at fully former quotations. Grease wools—The anxiety of American shippers to complete orders has caused a further advance in long-stapled wools. Good lots now sell readily at 7½d per lb, and superior at 8d per lb. Washing descriptions are also somewhat higher, the washers preferring to pay extreme prices rather than let their machinery stop. Grease—Full-grown, superior, 7½d to 8d; fine, light, for scouring, 6½d to 7d; heavy and inferior, 5½d to 6d. Fleece-washed—Superior, clean, 10½d to 11d; good average, 9½d to 10½d; inferior and heavy, 8d to 9d. Snow-white—Prime Uitenhage scoured, 18d to 19d; second quality ditto, 16d to 17d; superior country scoured, machine-washed, 16½d to 17d; superior country scoured, 16d to 16½d; inferior to good country scoured, 13½d to 15½d.

With reference to the leather market Messrs Laurence Brothers report :—The London market has been somewhat better supplied with leather since our last report, no accumulation has however occurred, and most articles still experience an active demand. The stock of shoe butts and middlings appears remarkably short of goods suitable for Government purposes; kip butts of most qualities, especially light and well-selected parcels, may be noted as freely saleable; harness, bridle, and grain leather can also be easily placed. In some departments prices have advanced, but in others those recently current, are only maintained. Australian sides have experienced a brisk inquiry, and present rates will probably induce large consignments; protective duties may however unfavourably influence this branch of trade. From France the import of curried leather, although increasing, has not yet recovered to anything like that usual prior to the war.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, Sept. 8 :—The advices received lately from Tirhoot, Chumparun, and Chuprah are, we regret to say, very unfavourable. There has been heavy rain daily, and the Khoonties, which at first promised very well, have turned yellow and sickly, and have lost leaf; where second Mahai has commenced, the yield is very poor. In our circular of 25th ult. we stated that if the Khoonties yielded well, these districts should make 50,000 maunds; so far the reverse has been the case, and the general opinion of planters is that the second cuttings everywhere will give much less than was at first expected. Fine weather for the future may mend matters somewhat, and in another fortnight we hope to be able to speak more definitely as to the probable out-turn, which at present looks as if it would fall considerably short of our estimate. We cannot report much improvement in the prospects of the Benares and North-West provinces; the weather has been rather more favourable in some districts, but the Khoonties continue to yield very badly, and the Assaroo plant still looks blighted and sickly. At present it appears doubtful whether the total crop will reach 95,000 maunds.

Messrs Churchill and Son have published the following statistics —

Stock of Timber, Deals, &c., at the Public Docks on 1st October.

The weekly circular of Jay Cooke, McCulloch, and Co., with the usual dates, September 26th, and cable prices, October 12th, says :—"We may reasonably hope that the irregularities in the gold market have now passed the climax. The clique manipulating the market in favour of scarcity and a higher premium is neither very strong nor very bold, and its power has arisen mainly from its having such a small amount to control. The sale of $4,000,000 extra by the Government last week is important not only for the additional supply which it furnishes, but also for the expression which it conveys of the purpose of the Secretary of the Treasury to hold these speculative excesses in check. The advance in the price to over 115 is due almost wholly to the peculiar policy of the Treasury in respect to its sales of coin; and when that element ceases to operate, it is to be expected that the premium will steadily return toward former figures. The general trade of the country is unusually active, and thus far the results of the fall season have been more satisfactory than for many years past to nearly every branch of business. The imports at this port for the past week amount to $8,500,000, against $8,500,000 for the same week of 1870. The exports for the week are $4,200,000, against $3,100,000 last year.

THE COTTON TRADE.

LIVERPOOL, October 12.

The cotton market was strong on Friday, with a large busi-

ness. On Saturday the Bank rate was raised to 5 per cent., and the market has since been quiet, with a tendency in favour of buyers. In Sea Island there have been large sales this week, embracing the various qualities. Holders have met the demand freely, but the greatly reduced choice has enabled them to obtain extreme prices. American has been in good request, but freely offered, and prices have given way about ¼d per lb. New York advices to the 12th instant quote middling Upland 20 cents, costing to sell in Liverpool 10⅛d per lb, by steamer. In Brazil the business has been to a fair extent, but quotations are partially ¼d lower, with the exception of Santos, which, owing to the present scarcity, commands an advance of ¼d per lb. Egyptian has been in good demand, and the supply being limited, prices have further advanced fully ¼d per lb. The choice of East Indian has largely increased during the past week, and, as holders have met the demand freely, prices are in most cases slightly easier.

In cotton to arrive and for future delivery the transactions have been comparatively limited at rather lower prices. The latest quotations are—American, basis of middling (from any port), not below good ordinary, steamer named, 9 1/16d; new crop, October-November shipment, 9⅜d; New Orleans, new crop, not below good ordinary, November-December shipment, 9⅞d; Dhollerah, fair new merchants, sailing late June, 7½d; July, 7½d; Oomrawuttee, fair new merchants, sailing late June, 7½d; July, 7 15/16d; Western Madras, fair new merchants, October shipment, 7d; Bengal, fair new merchants, sailing July, 6⅞d; ship named, September, 6⅞d; Rangoon, fully fair, July sailing, 6⅞d per lb.

The sales of the week, including forwarded, amount to 96,830 bales, of which 24,720 are on speculation, and 10,740 declared for export, leaving 61,370 bales to the trade.

October 13.—The sales to-day will probably amount to fully 12,000 bales, with a firm market.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	646,450
An increase of quantity taken for consumption of	550,020
An increase of actual exports of	262,420
A decrease of stock of	93,290

In speculation there is an increase of 342,890 bales. The imports this week have amounted to 40,934 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to October 6) is 33,000 bales, against 30,000 bales at the corresponding period last year. The actual exports have been 9,369 bales this week.

The following is a return showing the number of bales of cotton imported, exported, and forwarded inland for consumption during the month of September, 1871, and also showing the stock on hand on the 30th day of September, 1871, and the total imports and exports of cotton during the first nine months of the year:—

NEW YORK.—SEPT. 29.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Sept. 29. From the figures thus obtained it appears that the total receipts for the seven days have reached 33,073 bales, against 20,636 bales last week, 12,561 bales the previous week, and 9,137 bales three weeks since, making the total receipts since Sept. 1, 1871, 76,343 bales, against 124,649 bales for the same period of 1870, showing a decrease since Sept. 1, this year, of 48,306 bales. The exports for the week ending this evening reach a total of 12,418 bales, of which 8,496 were to Great Britain, 3,472 to France, and none to rest of the continent, while the stocks as made up this evening are now 99,879 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night :—

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 2,255 bales, while the stocks to-night are 6,549 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Sept. 22, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph :—

Ports.	Receipts since Sept. 1		Exported since September 1 to				Shipments to Southern Ports.	Stock.
	1870.	1869.	Great Britain.	France.	Other Foreign	Total.

Total last year	...	80977	17477	1926	7	19403	45866	76766

The market the past week has been quiet. Early in the week the tendency was downward, middling uplands closing on Tuesday at 16½c. and ordinary at 17¼c. This was due to the unfavorable Liverpool accounts, and quite free receipts at our ports. Since then, however, the advices by cable have indicated greater firmness, while the movement at the Southern ports has been more restricted; consequently the market here has exhibited rather more life, better tone, and a slight improvement in prices, though the decline in the quotations during the early part of the week has not been entirely recovered. Buyers, as a rule, refuse to operate, except to supply more pressing wants, believing in lower rates later on, but holders remain apparently confident, being unwilling to make concessions to increase business. The confidence felt in the future of prices is, as before, based upon our diminished crop and the continued large consumption; the small receipts both at the interior ports and the out ports, with a small stock available here, and little offering to arrive, lending considerable strength to the position. For future delivery, the market has been fairly active, and most of the time strong though prices in the main have fluctuated with the quotations for spot cotton. Low middling closed to-day at 15½c. for September, 19½c. for October, 19¾c. for November, 19¾c. for December, 19½c. for January, 19½c. for March, and for April, 20½c. The total sales of this description for the week are 91,900 bales, including 950 free on board. For immediate delivery the total sales foot up this week 12,828 bales, including 5,295 for export, 5,403 for consumption, 730 for speculation, and 1,400 in transit. Of the above, 740 bales were to arrive. The following are the closing quotations :—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary.....per lb.	17¼ @ ...	17¼ @ ...	17¼ @ ...	17¼ @ ...
Good ordinary	18¾ ...	18¾ ...	18¾ ...	19 ...
Low middling	19¼ ...	19¼ ...	19¼ ...	20 ...
Middling	19¾ ...	20 ...	20¼ ...	20½ ...
Good middling	21 ...	21¼ ...	21¼ ...	21¾ ...

For forward delivery the sales (including 950 free on board) have reached during the week ,91900 bales (all low middling or on basis of low middling).

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870 :—

	Week ending Sept. 29, 1871.			Week ending Sept. 29, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	2652	1356	4482	5681	5334	2425
Columbus	650	272	1989	2242	1267	3210
Macon	802	614	2158	3704	3459	3705
Montgomery	1598	1497	2809	2656	3425	1575
Selma	1442	692	1818	1686	1440	2955
Memphis	3995	3267	2778	2896	274	3984
Nashville	644	232	590	183	151	1809
	11768	7470	16632	19127	13059	19733

The above totals show that the interior stocks have increased during the week 4,298 bales, and are to-night 3,151 bales *less* than at the same period last year. The receipts have also been 7,359 bales less than the same week last year.

The exports of cotton this week from New York show an increase since last week, the total reaching 5,009 bales, against 3,644 bales last week . Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also, the total exports and direction since September 1, 1871; and in the last column the total for the same period of the previous year :—

—*New York Commercial and Financial Chronicle.*

NEW YORK, October 6.—According to Messrs Moffatt, Davids and Co's report, the week's receipts of cotton at all United States' ports have been 40,000 bales, and since the 1st of September, 125,000 bales. Shipments to England, 13,000 bales. Total since the 1st of September, 50,000 bales. Stock at all ports, 115,000 bales. Middling Upland, 9½d. cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Oct. 12.—Owing to the high prices ruling in this market both for yarns and goods, very little business has been transacted this week. Our large buyers still keep aloof from purchasing to any extent, as no corresponding advance has taken place in any of the leading foreign markets. In yarns a moderate business has been done for the home trade; also in fine yarns, the latter of which command full rates, and are well engaged. Shipping yarns have been very sparingly dealt in. The cloth market continues very sluggish, and manufacturers find much difficulty in keeping clear of stocks. Owing to the firm state of the cotton market, prices here are very steady, and as yet there is no appreciable reduction in the production of the district. The market closes tame, but prices are firmly adhered to.

Messrs Alexander Collie and Co. received the following telegram from Manchester yesterday:—Sellers very firm at Tuesday's quotations, buyers, however, hold back, and only a limited business is doing.

BRADFORD.—The wool market is inactive to-day, though there is perhaps a rather more cheerful tone. There are no increased transactions in wool, but staplers generally maintain quotations, particularly in good wethers, with unbated firmness, although in the lower descriptions of wool a slight concession may be obtained. Some report rather more inquiry. The yarn market continues quiet, although some report rather more inquiry for both single and twofold yarns, with few transactions at full rates. There is no change in the piece market. Manufacturers are working on old contracts, and, although little new business is doing, prices are very firm.

LEEDS.—There was little business done at the cloth halls. The attendance of buyers was small and thin, their requirements not being extensive. The parcels which left the hall were almost entirely in the execution of orders previously given. In only a few instances have any transactions been effected, excepting in cases of actual necessity. Prices firm.

DUNDEE.—In our flax market there has been a continuance of inquiry for the better descriptions, and prices are very firm, but in the lower and medium sorts there is not much business doing. Consumers in this locality being generally pretty well supplied, do not see inducement to add to their stocks, and they are encouraged in their disposition to hold off the market by the present unsettled position of the money market. Tows continue in moderate request, and prices are well maintained. The market for jute on the spot is without alteration; there is perhaps rather less doing in the article than there was a short time ago, and prices are nominally without change. In the new jute a good deal has lately been done, but consumers operate very reluctantly at the high prices that have hitherto been current. The yarn market has been quiet during the past week, but prices of flax and tow yarns are steady. Jute yarns have been in fair demand at about former rates. In linens and jute manufactures a large business is doing, and manfacturers are fully all employed.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, SEPT. 29.

The market has been active and buoyant during the whole of the past week, and closes with some appearance of excitement in flour and wheat, with a very strong feeling in the coarser stuffs. Flour has come forward rather more freely, but the increase in the demand has been much greater than the increase in the receipts, and prices at the close show an advance of fully 50c to 75c per bbl. The demand has not only been active for Great Britain and the continent, but for the West Indies and South America, and the home trade, and the sales for the week aggregate not far from 150,000 bbls, or an average of 25,000 bbls per day. To-day no desirable extras could be had under $7, while prime brands sold at $7.25, and choice at $7.50. The family brands have been marked up, in deference to the rapid advance in the finer grades of wheat, and the rapid absorption of them for export to the continent. Wheat shows an advance of 10c per bushel, the supply on hand and near by has been small, and the presence of export orders has enabled holders to obtain daily higher prices. The business has been large, partly because the offerings have been very small, and there has not been so much buying for arrival, but shippers have had large orders executed in the Western markets. Receipts at the Western markets have exceeded all precedent for the past two weeks, but there is much embarrassment in getting supplies to the seaboard, owing to the insufficient means and high rates of inland transportation. To-day the rate for wheat from Chicago to Buffalo was 13c, or about double the rate last year. There is, consequently, a rapid accumulation of stocks at the West; and the visible supply of wheat is now larger than one year ago, when the stocks on hand were double those of any corresponding date in previous years. In our market to-day there was a moderate business at $1.55 to $1.57 for No. 2 spring, and $1.68 to $1.70 for amber winter. Corn has been very active for speculation and consumption, with more doing for export, while receipts have been comparatively moderate. Prices consequently show some advance. To-day some 200,000 bushels Western mixed, in store, sold at 74c, besides a large business in cargoes afloat at 75c to 75½c. Yellow quoted at 76c. The movement in breadstuffs at this market has been as follows:—

RECEIPTS AT NEW YORK.

	1871. For the week.	Since Jan. 1.	Same time Jan. 1, 1870.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The corn trade, influenced by the great destruction of grain which has occurred at Chicago and by the colder weather, has ruled firmer this week, though prices are without improvement and business has been restricted. Sales, however, were more readily effected to-day at the full rate of Friday last for both English and foreign produce. Supplies of home-grown wheat on sale have been liberal, farmers having made good progress with thrashing, while other kinds of grain—more particularly barley—have come to hand freely. The quality of the latter is fair, but fine malting parcels have continued scarce—maize and oats closed at a slight advance on the week. It may be observed that, while there is a large quantity of oats on sale, the proportion of really sound corn is limited. Beans and peas are unaltered in value, while linseed and rapeseed have maintained late rates. Flour has been held at full currency, but the high prices demanded have checked business.

The following statement shows the imports and exports of breadstuffs into and from the United Kingdom since harvest August 26, compared with the corresponding periods in the three previous years :—

Mr George Dornbusch thus reports the state of the floating grain and seed trade :—During the last eight days 22 grain and seed-laden vessels have arrived at ports of call, viz :—12 wheat, 6 maize, 2 barley, 1 rapeseed, 1 valonea. The floating grain trade has on the whole been steady in tone, though not active, but closing with improving tendencies. Wheat—Fine cargoes scarce, and held at fully late prices; secondary sorts 6d to 1s lower to sell. Maize—Fine cargoes firm at the late advance, but inferior cargoes neglected. Barley has continued inquired after. Rye has been in increasing demand for the continent, at rising prices. The reported sales are as follows :—Wheat—In arrived cargoes: Ghirka, 48s; Rostoff Ghirka, 51s; old Ghirka 52s 6d to 53s per 492 lbs; Polish, 52s 3d and 53s 3d; Saint Louis, 57s 1½d, and yellow, Polish, 57s 1½d; white, from Montreal, 64s; American spring, 56s 6d, from Montreal; No. 2 spring from New York, 55s 6d per 480 lbs. Wheat shipped or to be shipped, 5 cargoes red winter, 59s 6d; white American from New York or Montreal, 62s per 480 lbs, A.T.; new Ghirka from Odessa, 54s and 54s 6d per 492 lbs. Wheat and maize, 1 cargo from Galatz—wheat, 48s 6d; maize, 34s per 480 lbs. Maize—2 arrived cargoes Odessa, 33s 3d; Galatz, 32s 6d; Walachian, 29s 3d to 29s 6d; American, from New York, 32s 6d to 33s per 480 lbs. Barley—1 arrived cargo Azow, from Taganrog, 27s 6d. On passage, 2 cargoes new Danubian, 26s 3d and 27s 3d. Shipping or shipped, 2 cargoes Danubian, 26s 9d and 27s per 400 lbs. Rye—4 arrived cargoes: Odessa, 35s 6d; Azow, from Taganrog, 24s to 31s per 480 lbs. On passage, 2 cargoes Danubian, 35s 7½d; Odessa, 35s. Shipped or to be shipped, 2 cargoes Odessa, 34s 6d per 480 lbs. Linseed in active demand, and a large business doing at 6d to 1s advance. Shipped or to be shipped about 4 cargoes Azow, from Taganrog, 57s 9d to 62s per 424 lbs., and 300 tons East India, from Calcutta, 63s per 416 lbs. A.T. Rapeseed in brisk demand at 3d to 6d advance. 2 cargoes, arrived in London, ordinary brown Calcutta, 67s to 68s 6d; and 600 to 700 tons ditto, 68s to 68s 6d per 416 lbs. A.T., in various positions. Shipped or to be shipped, 5,000 quarters cultivated Danubian, 74s per 424 lbs; and 200 tons ordinary brown Calcutta, 68s 3d to 68s 6d per 416 lbs. Cotton seed quiet, but steady at late rates. Shipped or to be shipped 4,100 tons Egyptian, from Alexandria, 36s to 36 10s per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There is still an inquiry for low sugars, these being in some instances rather dearer, and other kinds have been very steady. Yesterday the market was not quite so active. On Tuesday the refiners took full supplies of West India, including a large parcel of Barbadoes. The latter by auction part sold at 30s to 32s 6d, with grainy up to 35s. Jamaica brown and grey, 28s 6d to 31s per cwt. On the two following days transactions showed a material diminution, partly through the high rates demanded by importers. The business to yesterday reached 8,840 casks. Grainy kinds are now wanted, and the supply of these is limited. Several parcels of low Manila have changed hands at 6d per cwt advance. **Madras Jaggery is unaltered. Official returns show the** duty payments in the first nine months to be only 4,200 tons larger than the previous season. The home deliveries here have increased up to the present date about 17,400 tons, and the stock in London is deficient by 28,300 tons. Exports of refined during the above period **have increased to the extent of 14,650 tons.**

Mauritius.—7,971 bags chiefly sold at and after the sale, as follows :—mixing grainy, 33s to 33s 6d; low to good brown, at 25s 6d to 29s. Privately a parcel of crystallised sold at 35s.

Bengal.—280 bags were bought in.

Penang.—1,200 bassets soft brown have sold at 22s 6d.

Manilla.—About 30,000 bags have changed hands : **Zebu, 22s 3d to** 22s 9d. Ilo Ilo, 23s; clayed, 25s 6d to 26s 3d.

Java.—15,153 mats low brown syrups sold at 20s 6d to 20s 10½d.

Other Foreign.—800 boxes Havana, No. 12, have sold at 34s 6d.

Floating Cargoes.—One of Porto Rico at 26s 6d; one of brown Bahia, at 21s 6d, both for the United Kingdom.

***Refined*.—The market has been steady both for dry goods and pieces.** Further sales of French loaves reported for delivery here, at 33s to 33s 6d per cwt.

MOLASSES.—80 puncheons Antigua, at 14s; 150 casks Cuba, at 11s per cwt.

RUM.—**Sales of moderate extent have been made at firm prices, in**cluding Demerara at 1s 10d, and 200 casks Mauritius at 1s 8½d proof. Jamaica has been in good demand, at 3s 4d to 3s 8d per gallon.

COFFEE.—**Further enhanced rates have been paid for native kinds by** speculators, including **Ceylon to arrive at 62s to 63s, and a parcel of bold** 66s. On the spot sales at 60s 6d to 61s 6d, and native East India about the same. Plantation Ceylon is quiet, but the relatively small quantity brought forward by auction has prevented any change in prices. 761 casks 300 barrels and bags were about three-fourths sold : low middling to good, 68s 6d to 82s; grey and pale, 63s to 68s; bold, 68s 6d to 72s. 3,045 cases 1,164 bags East India went without alteration. A few parcels were, however, bought in. Coorg and Wynaad sold at 62s 6d to 71s for grey and pale; ordery middling to bold, 70s to 80s. fine Mysore, 95s. 450 bales and half-bales Mocha mixed sort berry sold at 91s 6d to 92s. 66 casks 203 barrels 80 bags Jamaica sold at 60s to 63s for ordinary to good ordinary bold mixed. 242 bags washed Rio, 63s 6d to 72s. 8,552 bags Costa Rica found ready buyers : pale, 62s 6d to 67s; low middling to middling ordery, 58s to 59s. Two floating cargoes of Rio are reported sold at 53s 6d to 57s; one of Santos at 59s 6d, and one of Bahia at 54s per cwt for a near port. The stock here is further reduced to 214,720 tons against 227,580 tons last year, and 238,050 tons in 1869. Exports have been 8,300 tons more than in the previous month.

COCOA.—The market is rather quiet this week, but prices remain without alteration. There have not been any public sales of Trinidad. A few lots of Grenada by auction sold steadily : low and ordinary, 47s to 50s 6d, superior quality, 58s to 63s 6d per cwt. 102 bags Guayaquil were bought in.

TEA.—There have been further arrivals, but none of the teas were brought upon the market yesterday, and the business of the week is so far very moderate in extent. The small public sales have shown still without change in prices for new season's tea. Very ordinary pale black and leaf sold at 9d to 10d per lb. Owing to the late not so demand for Indian, tea there is announced but 2,000 packages on the catalogues on Tuesday, and small portions sold at rather lower rates for unobjectionable qualities. Really strong and fine teas still engage the attention of the trade.

BLACK PEPPER.—Some further slight advance has been paid and the market continues firm. Singapore, which is scarce, may be quoted 5¾d nominal. By private contract sales at 7¼d and a shade over for good. Penang, 6¾d to 6¾d; fine nature about at 6¾d to 6¾d. Singapore at 6¾d to 7¼d. At the public sales yesterday, 700 bags Penang sold at 6¾d to 6¾d. 300 bags Trang bought in. 804 bags Singapore were partly disposed of at 7¼d per lb.

WHITE PEPPER maintains the advance last quoted. Singapore has sold at 11½d to 11¾d on the spot, and at 11d for arrival. 11 cases of fine Tellicherry by auction sold at 1s 6d to 1s 6½d per lb.

OTHER SPICES.—Nutmegs continue in good demand. Full prices to a 1d advance were paid yesterday, when 47 cases sold as follows:—78 to 75's, 3s 5d to 3s 6d; 85 to 80's, 3s 4d to 3s 5d; 104 to 100's, 3s to 3s 2d; wormy and defective, 1s 8d to 2s 1d. 13 cases from Amsterdam—68's, 3s 11d; 80's, 3s 4d; 114's, 3s. 78 packages West India, 2s 8d to 3s per lb. Mace is fully as high as last quoted. 12 cases Singapore and Penang sold at 4s 2d and 4s 6d for ordinary to good. A few packages West India at 3s 10d to 4s 2d. 6 casks 11 cases good Amboyna cloves, 6½d. 608 bags Zanzibar sold steadily at 3⅜d to 3¼d for bright quality. 210 bags cinnamon chips sold at 5½d to 5⅝d. A further advance of ⅛d to ¼d has been paid for pimento, several parcels finding buyers by private contract and 576 bags by auction yesterday, realised 2½d to 2⅝d per lb. 55 boxes cassia buds withdrawn. 283 barrels Jamaica ginger by auction sold at 44s to 65s, and good to fine at 95s to 135s per cwt. 72 cases Cochin withdrawn.

SAGO remains quiet. 662 bags small grain were part sold at 14s for very low quality. 400 boxes bought in, also 181 bags brown Borneo kind.

SAGO FLOUR.—200 tons sold to arrive at about 15s 6d per cwt.

TAPIOCA.—There is more inquiry. 1,418 bags by auction, chiefly Penang, sold at 2d to 2¼d per lb. 439 packages pearl tapioca withdrawn.

RICE.—Business of some extent has been done in white Bengal at firmer prices, from 11s 1½d to 13s for middling to fine. Transactions in other kinds on the spot have been moderate. About 2,000 tons Bengal are reported for arrival, including Ballam, at 10s; Casla at 9s, ex quay. A floating cargo of Rangoon reported at 10s 6d, ex ship, for London.

IMPORTS and DELIVERIES of RICE to Oct. 7, with STOCKS on hand.

	1871.	1870.	1869.	1868.

Total delivered	8930	11070	8180	8190
Stock	2230	2030	5250	5700

Deliveries last week, 240 tons.

INDIGO.—The periodical sales commenced on Monday, and have progressed during the week. The demand has been generally good, and desirable qualities have sold at 3d to 6d, or in some cases at a greater advance upon previous sales' rates. Others at par to 2d and 3d above, excepting dry leaf Madras, which was neglected, and occasionally cheaper. Middling to good Kurpahs were readily saleable, the advance in some cases reaching 9d per lb. The catalogues contained 2,852 chests as against 12,482 chests in October last year.

OTHER DRYSALTERY GOODS.—The chief feature of interest in this market has been the advance upon cutch, which is in speculative demand. Latest sales were at 23s to 24s for good to fine. The stock continues large, but there is not much afloat. Gambier firm: block, 17s to 17s 3d. 400 tons sold to arrive at 16s 7½d per ex ship. Sales in turmeric have been limited.

SHELLAC is steady. The public sales have comprised 452 cases, of which about half sold; also a few parcels by private contract. Fine orange, 7*l* 5s; second orange, 6*l* 17s 6d per cwt.

METALS.—The further rise in the value of money has not checked the improvement in these markets, which remain steady. Scotch pig iron was at one time weaker in price, but after falling to 60s 1½d, since rallied to 60s 9d cash, with a good demand. The makers are well supplied with orders for rails and many other descriptions of manufactured iron. Several contracts have been made in Silesian spelter at 18*l* 10s to 18*l* 12s 6d, and fine at 18*l* 17s 6d. The market for foreign tin is rather irregular. Sales of Straits were last made at 135*l* to 136*l* cash. A large business has been done for arrival up to 136*l* to 136*l* 10s. No change in English. Tin plates are in good demand. Copper is steady. Chili, &c., 67*l* to 69*l*. Walaroo has brought 76*l* to 76*l* 10s per ton. English unsettled. Quicksilver, 10*l* to 10*l* 2s 6d per bottle.

JUTE.—There is not any change in the market, which remains quiet, and the Dundee buyers operate with some reserve at present rates, especially as liberal supplies are coming forward. The parcels sold afloat have been at 22*l* 10s to 25*l* 15s per ton, and few sales reported on the spot.

HEMP.—The sound portion of 657 bales Manila was bought in. 240 bales Sunn part sold at 15*l* 15s to 17*l*; St Petersburg clean, 33*l* 10s to 34*l* per ton.

LINSEED is firm at fully last week's quotations. Calcutta seed has sold afloat at 63s. On the spot, 63s 6d to 64s; Bombay, 64s 6d. Black Sea, in course of shipment, has sold at 62s per quarter; ditto for shipment direct to the continent, 59s 9d to 60s 3d per quarter.

OILS.—The sales in olive have been upon a small scale, and quotations are unchanged. Gallipoli on the spot, 51*l* to 52*l*; other kinds, in proportion. Colonial sperm can be bought at 81*l*. Pale seal quoted 34*l* 10s per tun, with quiet markets. A large business in Ceylon cocoanut for arrival, chiefly speculative, at improving prices, from 37*l* to 38*l* 10s. The latter is the price on the spot. Cochin, 49*l* to 51*l*. There has not been any change in palm oil. The lower qualities range from 32*l* to 34*l*. Fine Lagos held at 37*l*. Linseed oil has been quiet. The nearest value on the spot is 33*l* 10s to 33*l* 15s, and the former price for delivery in the first four months of 1872. English brown rape fell as low as 44*l* 10s, through a pressure to sell, but the market is now better, closing at 44s 15s to 45s. The latter price paid for delivery in the next six months. Refined quoted 47*l*; foreign, 50*l* per ton.

PETROLEUM dull. American refined, 1s 6½d on the spot and to the end of the year. Petroleum spirit, 11d per gallon.

TURPENTINE firm at 47s American; and 45s per cwt for French spirits.

TALLOW.—There has not been any material change in foreign, and the market keeps tolerably firm, although a large quantity of Australian is again declared for sale to-day. Petersburg new, 47s; October to December, 47s; December, 47s; March, 47s 6d to 47s 9d per cwt.

PARTICULARS OF TALLOW—Monday, Oct. 9, 1871.

	1868. casks.	1869. casks.	1870. casks.	1871. casks.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is firm. Sales of West India, 1,673 casks. For the week, 5,013 casks 3,878 bags by auction part sold at 26s 6d to 28s for soft brown. 549 bags low soft brown Penang withdrawn. 546 bags Natal sold at 26s 6d to 28s. 28,000 bags Manila, privately, at 28s for fine dry Ilo Ilo. A floating cargo of brown Maroim at 24s 10½d for the United Kingdom.

COFFEE.—67 casks 25 barrels plantation Ceylon found buyers on former terms. 10 casks 627 cases 268 bags East India sold at the rates previously quoted.

RICE and SPICES without further change.

DRYSALTERY GOODS.—72 bales Bengal safflower by auction were bought in. 970 bags Bengal turmeric sold at 18s 3d to 18s 6d. Myrabolanes part found buyers at 13s 6d to 13s 9d. Fine cutch has sold at 24s. Block gambier by auction bought in at 17s. Cubes in baskets part sold at 21s per cwt.

IRON.—Scotch pig advanced to 61s per ton, mixed numbers.

OILS.—732 casks palm by auction were part sold at 35*l* to 35*l* 10s. 253 casks Sydney cocoa part sold at 34*l* to 38*l* per ton.

TALLOW.—Town advanced to 48s. At auction 2,104 casks Australian were chiefly sold at full prices to 6d advance. Good and fine mutton realised 45s 6d to 46s 9d; beef, 44s to 44s 9d; mixed melted, 44s 6d to 45s 6d; and inferior, 35s 6d to 39s 6d; of South American, 404 casks sold at 41s 6d to 45s 6d.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that the sale of Almeria grapes is brisk, and although out of condition realised high prices. Gijon nuts of the new crop have arrived, and the opening price being moderate, were freely taken by the trade. French walnuts a trifle lower. Malaga lemons firm. West India cocoa nuts in demand. Shipments of French chestnuts will be late, with a moderate supply. Brazil nuts in request.

DRY FRUIT.—Currants are firm, but business has rather slackened during the last few days; still holders are not pressing for sales, and dealers are not expecting to buy on lower terms at present. Valencias are better value, and all lower sorts seem in good request. Large sales have been made, and 800 tons at public sale did not depress the article. Sultanas in active demand. Muscatels are rather easier. Malaga are lower here. Turkey figs in good request, at steady prices.

ENGLISH WOOL.—Market quiet, and lower prices for skin wool.

FLAX.—Market firm.

HEMP.—Market firm both for Russian and Manila.

SILK.—Market firm, and prices well maintained, but the foreign exchanges prevent shipments to France unless at a great disadvantage.

SEEDS.—The trade is very quiet, and prices are without alteration.

TOBACCO.—There has been rather more business doing during the past week in North American tobaccos, some few parcels of the last import have been placed at current rates. A fair business has been done in the Virginia strips, of which there are but few now to be had. In other growths there has been but little doing, in consequence of the limited stock in the market.

LEATHER.—At Leadenhall on Tuesday the supply of fresh leather was limited. There was a good attendance of buyers, and a full average business was done. The articles most wanted were good crop hides, English butts of all weights, light common dressing hides, prime light shaved hides, English shoulders, and strong English bellies. There was a good inquiry for foreign butts. Prices were in all cases well supported, and light crop hides brought ½d advance.

METALS.—We have had a dull week for the most part. Copper has been heavy, and the business reported very small. Iron retains its firmness. Tin has advanced in price upon notice of diminished stocks, but the buying for consumption has not been large. Spelter is quiet. Lead also is quiet. Tinplates steady.

PROVISIONS.

Butter—Quality not good, otherwise there would be an advance in price. Bacon—Dull sale, with prices tending downwards. Hams—Not in demand. Lard—Slow sale. Cheese—American cheese: Stocks reducing, causing higher figures to be expected.

METROPOLITAN CATTLE MARKET.

MONDAY, Oct. 9.—The total imports of foreign stock into London last week amounted to 17,580 head. In the corresponding week in 1870, we received 14,463; in 1869, 10,491; in 1868, 7,924; and in 1867, 12,556 head.

SUPPLIES ON SALE.

	Oct. 10, 1870.	Oct. 9, 1871.

Veal	5	0	5	4	Small pork	4	8	5	4

HOP MARKET.

BOROUGH, Friday, Oct. 13.—This market continues firm. Fine new hops were in good request, at extreme prices; but medium and inferior grades were less inquired after. For yearlings a steady demand prevails at improving prices:—Mid and East Kent, 9*l* to 13*l* 13s; Weald of Kent, 8*l* 10s to 10*l* 10s; Sussex, 7*l* 5s to 9*l* 0s; Farnham and country, 11*l* to 16*l*. Yearlings: Mid and East Kent, 3*l* to 6*l* 10s Weald of Kent, 3*l* to 5*l* 5s; Sussex, 3*l* to 5*l*; Farnham and country, 4*l* 10s to 6*l* 10s; olds 1*l* to 1*l* 10s.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Oct. 13.—A moderate supply of potatoes has been on sale. The trade has been quiet, at about late rates. Regents, 70s to 90s per ton: rocks, 60s to 80s; kidneys, 90s to 110s: and Victorias, 85s to 100s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 13.—There has been rather less business done this week, than during the preceding one; holders, however, continue very firm in their demands, as the general opinion is that the present lull will not be of long duration.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, October 13.—There was a good attendance at this market to-day and wheat was taken to a fair extent at an advance of 2d over Tuesday's rates. Flour was 6d per barrel dearer. Maize was in good demand at 1s more money. Beans were also a turn dearer. Other articles were unchanged. No 1 spring, 11s 8d to 11s 9d; mixed corn, 34s.

WAKEFIELD, Friday, October 13.—The wheat trade was a little better to-day and fine dry lots sold readily at rather improving rates. Other sorts met with little alteration. Fine barley was in request at full prices, and secondary sorts were steady, beans and oats were unchanged.

The Gazette.

TUESDAY, Oct. 10.

BANKRUPTS.

James Nelthorpe, Aldermanbury, refreshment house keeper.

John Frederic Reeves, Victoria street, Westminster, and Hereford road, Bayswater, solicitor's clerk.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For private houses, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850

MAPPIN AND WEBB'S NEW PREMISES,

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is followed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft Bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that Restraint is attended, and may be worn during sleep. A descriptive circular may be had and the Truss (which cannot fail to be forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s 21s, 26s 6d, and 31s 6d; postage 1s. Double ditto, 31s 6d, 42s, and 52s 6d, postage 1s 6d. Umbilical ditto, 42s and 52s 6d; postage 1s 6d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE CAPS, &c. for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 3d to 10s, 16s and 18s each; postage 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

Established 1803.
1 Old Broad street, E.C. and 16 and 17 Pall Mall, S.W
Capital, £1,600,000; Paid-up and Invested, £700,000.

IMPERIAL LIFE INSURANCE

COMPANY.
Chief Office—No. 1 Old Broad street, London.
Branch Office—No. 16 Pall Mall, London.
Instituted 1820.

The liabilities are, in respect of sums assured and bonuses, £2,766,000; and in respect of annuities £1,626 per annum.

The Assets actually invested in first-class securities amount to £987,897.

Of the subscribed capital of £750,000 only £75,000 is paid up.

All kinds of Assurance effected at moderate rates and on very liberal conditions.

The accounts of the Office for the last financial year, returned to the Board of Trade in compliance with "The Life Assurance Companies' Act, 1870," together with prospectuses, may be had on application.

ANDREW BADEN, Actuary and Manager.

NEW RIVER COMPANY'S

PERPETUAL DEBENTURE STOCK.

The Directors of this Company (under the provisions of their Act of 1857) are ISSUING the above Stock at par, for the purpose of extinguishing their Bond debt.

The interest upon this stock, at the fixed rate of 4 per cent., is payable half-yearly, on the 1st of February and the 1st of August, in priority of all dividends upon the shares of the Company.

Any amount of stock not being the fraction of a pound can be subscribed for and transferred.

Applications to be made to New River Office, E.C.
ALEX. INGLIS, Clerk of the Company.

THE BRITISH AND FOREIGN

TRAMWAYS COMPANY (Limited).
Subscribed capital, £300,000.

DIRECTORS.

H. G. Erichsen, Esq.	William Sheldon, Esq.
L. Floersheim, Esq.	Lieut.-Colonel C. Napier Sturt, M.P.
William Morris, Esq.	James M. Walker.
Philip Rose, Esq.	

BANKERS—Messrs Glyn, Mills, Currie, and Co.
SOLICITORS.
Messrs Baxter, Rose, Norton, and Co.
Messrs Ashurst, Morris, and Co.
OFFICES—No. 7 Lothbury, E.C.

This Company is prepared to entertain proposals for Tramways either in the United Kingdom or elsewhere.—Address, with full particulars, to
J. BARBER GLENN, Secretary (pro tem.).

COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decrees of 20th of July, 1854 and 31st of December, 1866.
Recognised by the International Convention of 30th April, 1862.

	francs.		£
Capital fully paid up	80,000,000	...	200,000
	francs.		£

HEAD OFFICE—14 Rue Bergere, Paris.
Agencies at—
Lyons, Marseilles, and Nantes (France), Alexandria (Egypt), Calcutta, Bombay, Shanghai, Hong Kong, Saigon (Cochin-China), Bourbon Reunion), and Yokohama (Japan).
LONDON BANKERS.
The Union Bank of London.
LONDON AGENCY—141 Leadenhall street, E.C.
MANAGER—Theod. Dromel.

The London Agency grants Drafts and Letters of Credit, and purchases or collects Bills payable at the above-named places.

The Agency will conduct banking business of every description with the Continent, India, China, &c., &c., &c. upon terms to be ascertained at the Office.

MARINE ASSURANCE, FIRE

ASSURANCE, or OIL AGENCY, Wanted, for Manchester, by one in first rate position. Ample security. Apply, W. B., 9 Tib lane, Manchester.

NOTICE IS HEREBY GIVEN,

that on and after Monday, the 16th inst., the UNITED LIMMER and VORWHOLE ROCK ASPHALTE COMPANY (Limited) will be prepared to Exchange Share Certificates against the Letters of Allotment and Bankers' Receipts.—By order,
H. W. STEEDMON, Secretary.

YORKSHIRE AND STAFFORDSHIRE LIMMER ASPHALTE PAVING COMPANY (Limited).

Notice is hereby given that the LISTS OF APPLICATIONS for SHARES in this Company will CLOSE for London, FRIDAY, October 13, and for the country, MONDAY, October 16.

GEORGETOWN (BRITISH GUIANA) GAS COMPANY (Limited).

All APPLICATIONS for SHARES in the above Company must be SENT IN on or before TUESDAY, October 17th, 1871. Copies of Ordinances and Photographs of the Town may be seen and Prospectuses obtained at the Offices of the Company, 6 Westminster chambers, Victoria street, S.W., and of the Bankers, Messrs Smith, Payne, and Smiths, 1 Lombard street, E.C.—By order,
GEORGE W. HARRIS, Secretary.
October 13th, 1871.

THE CHEMICAL LIGHT COMPANY

(Limited).
Incorporated under the Joint Stock Companies Acts of 1862 and 1867.
Capital, £30,000, in 15,000 Shares of £2 each.
First issue, £15,000, in 7,500 Shares.

5s per Share to be paid on Application, and 15s on Allotment; the balance as may be required, on one month's notice being given.

DIRECTORS.
William Derry, Esq., Lloyd's, Royal Exchange, E.C.
T. R. Eames, Esq., St Michael's House, Cornhill, E.C.
T. J. Fallon, Esq., Arundel gardens, W.
S. C. Fox, Esq., Cambridge gardens, Bayswater, W.
Arthur A. Speed, Esq., Putney, S.W.
BANKERS—The Imperial Bank, Lothbury, EC.
SOLICITORS.

AUDITORS.
Messrs Smart, Snell, and Co., 85 and 86 Cheapside, E.C.
TEMPORARY OFFICES.
St Michael's House, Cornhill, London, E.C.

ABRIDGED PROSPECTUS.

This Company is formed for the purchase of a valuable invention patented by Mr Hy. Howes or an improved method of preparing lucifer matches and other chemical lights, and for carrying out, on an extended and improved scale, the business of Mr John Hynam, one of the oldest-established manufacturers of matches in the kingdom.

The price to be paid for the patent and business is fixed at £1,500 in cash, extending over six months, and one-third of the issued share capital of the Company, such shares not to participate in a dividend, unless the net profits of the Company are in excess of 6 per cent. per annum.

The lucifer matches now in general use are known to drop, as they burn, a red hot ash, and the charcoal remains at red heat for a considerable time after the flame has been extinguished, thereby causing much danger to any inflammable matter with which it may come in contact.

The principle of the patent to be purchased by the Company is the application to matches and other chemical lights (whether igniting on the box or otherwise) of an inexpensive solution, which prevents the carbon from remaining a fiery mass for a single instant after the flame has been extinguished, thus rendering it so perfectly harmless that it may be thrown upon any matter, however combustible, without the slightest fear of setting it on fire, or of damaging it in any way.

By the adoption of these new matches, one of the principal causes of fire will be entirely removed, and the saving of life and property cannot fail to be very considerable. The Secretary of the Sun Fire Office, in his evidence before a Select Committee of the House of Commons in the year 1867, stated that "his office alone lost £10,000 every year through the careless use of lucifer matches;" and when it is remembered that there are upwards of fifty insurances offices in London, the enormous loss annually sustained from this cause alone will readily be understood.

The consumption of lucifer matches in the United Kingdom is increasing so rapidly that, whereas in 1865 one million boxes were used per day, at the present time the daily consumption is estimated at two millions; it is thus obvious that from this increase alone, there is a large field for the operations of the company, even were it not for the great superiority of the new matches, which only require to be seen to be at once appreciated and generally adopted by the public.

In addition to the great demand which already exists for the Patent Matchless Match (the speciality of this Company), the directors anticipate a large business in the commoner descriptions, and in other goods usually sold by lucifer-match manufacturers.

The profits realised in the match trade are large, ranging from 20 to 75 per cent., and when it is considered that the matches to be manufactured by this Company will be superior to all those at present in use, the Directors feel confident that the return to the shareholders cannot fail to be most satisfactory.

The contract entered into for the purchase of the patent, together with the articles of association, may be inspected at the Company's offices, and at the Offices of the Auditors and Solicitors, at which places the matches may also be seen and tested.

THE CHEMICAL LIGHT COMPANY

(Limited).
The greater portion of the shares of this Company having been subscribed for privately, the LIST of APPLICATIONS will be CLOSED on MONDAY, the 16th instant, for London, and TUESDAY, the 17th, for the country.—By order of the Board,
W. A. BRUUN, Secretary.

MR THOMAS THOMPSON, JUN.,

STOCK and SHARE DEALER, and MINE AGENT, 5 Whitehall, London, S.W.

Some valuable hints as to the purchase of Mining Shares will be found in Mr Thompson's "Investment Circular" for September, now ready. Post free, price 6d.

PARTNER, WITH CAPITAL OF

£10,000 to £20,000, wanted in an East Indian business. None but principals need apply.—Address D., care of Davies and Co., Advertising Agents, Finch lane, Cornhill.

A CLERK (AGE 25) SEEKS A

RE-ENGAGEMENT. Eleven years' experience, six being with last employers. Writes shorthand, and possesses good commercial knowledge. Has travelled. Small salary to begin with.—Address S. Y. D., Deacons, Leadenhall street, E.C.

PARIS BANKING.—AN

Englishman, of respectability and experience, who has acquired in a first-class house a thorough knowledge of Paris banking business, offers his services in the establishment of an English bank with French capital. Highest references.—Address Edwd. Hall, 3 Rue Bonaparte, Paris.

PROFITS OF SHIPOWNING IN

THE NORTH.—"The rates of dividend upon the immense property recently created in iron shipping have ranged from 20 to 40 per cent.....We believe that the statements we have quoted are in no way exaggerated."—ECONOMIST, Sept. 30, 1871. Shares in Steamers now running or building BOUGHT and SOLD by DREWRY and SPENCE, Stock, Share, and Steamship Brokers, Newcastle-on-Tyne.

THE COMMITTEE OF THE

Society, sanctioned by Imperial Ukase, for the Promotion of Russian Industry and Commerce, learning that under the direction of the Department of Customs in St Petersburg, public museums destined to contain specimens or patterns of all kinds of articles imported to or exported from Russia, and thinking that besides acquainting Custom House officials with the different articles of trade and their classification according to the Russian tariff, thereby greatly facilitating the entry and clearance of goods, especially of those imported into Russia for the first time or of such as are not specified in the tariff, they may at the same time serve to promote the commercial intercourse between Russia and foreign countries by acquainting their respective producers and consumers with the different articles produced by each country, begs hereby to draw the attention of manufacturers in general to these public museums, inviting them to send specimens or patterns of their respective products, accompanied by brief descriptions, to the address of Mr Maybaum, Custom House, St Petersburg, who is empowered by the Society to establish the first museum.

N.B.—Costly, bulky, or perishable articles may be substituted by models or drawings and descriptions.

ROYAL ITALIAN OPERA,

COVENT GARDEN.

Mr Mapleson begs respectfully to announce that he has taken the Royal Italian Opera, Covent Garden, and has arranged to give a short series of operatic performances, commencing, Monday, October 30th, 1871. Principal artistes—Madlle Titiens, Madame Trebelli-Bettini, Madlle Colombo, Madlle Fernandez, Madlle Bauermeister, and Madlle Marie Marimon. Signor Fancelli, Signor Vizzani, Signor Tagliafico (his first appearance), Signor Rinaldini, Mr W. Morgan, Signor Prudenza, Signor Agnesi Signor Borella, Signor Medaroz, Signor Caravoglia Signor Zoboli, Signor Casaboni, Signor Stefano (his first appearance), Signor Antonucci, and Signor Foli. Other important engagements are pending. The band and chorus of Her Majesty's Opera. Premiere Danseuse, Madlle Blanche Rivais. Director of the music and conductor, Signor Li Calsi. Maestro al Piano, Mr F. H. Cowen. Organist, Mr Willing. Chorus master, Mr Smythson. The military band of the Coldstream Guards, under the direction of Mr F. Godfrey.

The nights of performance will be Mondays, Tuesdays, Thursdays, and Saturdays. The doors will be opened at Half-past Seven, and the Opera commence at Eight o'clock each evening. Nightly prices of admission:—Boxes on the grand tier, £4 4s; pit tier, £3 3s; first tier, £2 2s; second tier, £1 1s; stalls, 12s 6d; grand tier circle seats, 10s 6d; reserved box seats, 7s; amphitheatre stalls (reserved), 5s; amphitheatre stalls (unreserved), 3s; pit tickets, 5s; amphitheatre, 2s.

FINE FLAVOURED STRONG BEEF

TEA at about 2½d a pint. Ask for LIEBIG COMPANY'S EXTRACT OF MEAT, requiring Baron Liebig the Inventor's Signature on every jar, being the only guarantee of genuineness.

Excellent economical stock for soups, sauces, &c.

TO SHIPPERS AND EXPORTERS.

MILNERS' STRONG HOLDFAST

AND FIRE-RESISTING SAFES, CHESTS STRONG ROOMS AND DOORS, with all their Latest Improvements.—The strongest and (quality considered) the cheapest safe-guards against fire and the modern burglar. Wanted wherever cash and books are used in quantities at wholesale prices. Milners' Phœnix Safe Works, Liverpool, the most extensive and complete in the world. Depots: Liverpool, Manchester, Sheffield, Leeds, Hull; London depot, 47A Moorgate street, City, near the Bank of England. Circulars free by post.

DINNEFORD'S FLUID MAGNESIA.

—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.

DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

Registered at the General Post Office as a Newspaper and for Transmission Abroad.

THE MONEY MARKET.

The rise in the rate of discount to 5 per cent. has proved quite sufficient. It has brought in very considerable sums, and will bring in much more. Last week when we wrote the magnitude of the action on the exchanges was still uncertain, but it was not possible to say that a rise to 6 per cent. might not be required. But now the effect is clear, and for the present we may assume that money will not become dearer.

Some sanguine persons are already beginning to compute the probability of its instantly becoming cheaper. But so long as matters remain as they now are, and while so much money is locked up at Berlin, it will be the duty of the Bank of England (especially looking to the probable demands upon London in November and December on French account) to accumulate an ample reserve, and not to reduce the rate until she is sure that she has accumulated enough, and until there is every reasonable likelihood that the end she has aimed at is attained, and that she will not, in order to meet the impending German demand, have again to raise the rate of discount. When these conditions are satisfied, but not until then, will the Bank be justified in lowering its rate.

But there is one change which would alter everything vitally. There have been rumours at Berlin that it was possible that the accumulated gold, or some of it, might be issued on conditions different from and much easier than the present. It is certain that the contemplation of the new currency is no excuse for locking up so much gold. That scheme, as we show elsewhere, is not so plainly excellent or so obviously the best that it should be adopted in an instant, and without consideration. And when it is adopted, as it is in the nature of an additional currency circulating with the present ones, it will not require or admit of a very hasty coining. If the old silver currency was at once to be taken away, Germany would unquestionably want at once an immense supply of gold currency to take its place. Her banking facilities are so undeveloped that she needs an amount of coin which an Englishman would look at with surprise. But if the old silver currency of Germany is to remain, there is no extreme hurry as to the gold: the new currency can be supplied gradually and easily, and without convulsing the money market. There is therefore no reason for accumulating vast sums of gold at Berlin, and should that gold be permitted, on easy terms, to return to its natural place in the money market, the value of money will immediately fall.

But it must not be imagined that, even in that case, money will return to the point at which it stood before the late rapid rise. There are two causes which forbid it,—first, we had two months ago a large amount of foreign money in London, which has now been taken from us; second, the internal trade of the country, as shown by the returns of the Clearing-house and of the railway traffic, is in a state of most rapid development. A greater demand for money is therefore operating on a less supply, and therefore the days of *very* cheap money are at an end.

THE GRAVE DEMERITS OF THE PROPOSED NEW COINAGE FOR GERMANY.

The coinage proposed by the German Emperor to the Reichsrath accomplishes what we suppose were the main aims of its framers. It introduces a gold standard into Germany where, on account of the growth of the country, that standard—the only one suitable to large payments—was much required, and it extends a system of coinage and account-keeping nearly akin to those of Prussia all over the German Empire. But here its main merits seem to end, for in all other respects it is evidently and greatly defective.

It is proposed to coin the following gold coins :—

	£	s	d
A 30-mark piece, equal to	1	9	4½
20 — —	0	19	7
15 — —	0	14	8¼

And the silver coin is to be a mark of 11¾d, divided into copper pieces, thus—

10 groschen—one mark.
10 pfennigs—one groschen.

Upon which proposal it is natural to make the following remarks.

First,—that it is nothing more nor less than a new international vexation. At present the principal coinages of Europe contain several coins all but equal to the English sovereign, and yet not equal to it. The International Coinage Commissioners gave this list of such coins :—

	grains.
The Spanish doblon, or piece of 10 escudos, contains of fine gold	116·487
The half-eagle	116·100
The sovereign	113·001
And the new coin of the value of 25 francs would contain	112·008

And still fuller and more elaborate information is given in the letter from a very eminent authority which we this day publish.

And much thought and much discussion have been spent on trying to get rid of these little differences, and to have one and the same coin in all countries, instead of so many nearly equal. For most purposes, and especially for those of exchange and account, if one coin differs from another, it hardly matters how much it differs. You never can in important transactions or calculations treat it as the same ; and the sums required to adjust little differences are often as complicated as those required to adjust great ones. For a long time it has seemed a vexation to be kept by such petty differences from the great advantage of a European coin. But this vexation is nothing to what we have now. Germany is now asked to establish a new gold coin—a 19s 7d coin,—not really equal to the sovereign or any of the old approximations to it. It does not correspond with the 25-franc piece, or with anything else. It is simply a new difficulty in international coinage ; an unhappy addition to the semi-equivalents which for years have baffled and beaten us.

Secondly,—it is a singular feature in this proposal that though it introduces gold coins into the currency, it finds no place for them in its system of account. That system is, as it should be, decimal. The mark of 11¾d is divided into 10 groschens, and each of those groschens into 10 pfennigs ; but when we reckon upward from the mark we do not find in the decimal system any of the proposed three coins. Neither a 20-mark piece, nor a 15-mark piece, nor a thirty come into the system of reckoning. It is as if in our system there were no sovereign, but only a 25-shilling piece, or thirty shilling piece. To make the system of gold coin tally with the mode of reckoning there ought to be a 10-mark piece.

Thirdly,—there is no good unit of reckoning in this system. The mark of 11¾d is obviously too small, and even 10 marks or 9·9½ is not large enough. Even the sovereign, though we find it works well, has sometimes been thought to be small for large sums, such as large commerce and large finance deal with, and a half-sovereign is plainly too small. 100 marks, or nearly 5*l*, is as obviously too large. And not to have a gold coin which is a good unit of reckoning for large sums is to lose the characteristic advantage of a gold currency. A silver currency could not provide a coin suitable for a unit of high reckonings : such a coin in silver would be too big and cumbrous for use. But a gold currency can do so ; and when a nation is making a new gold currency, it is stupid not to make one with a single gold piece fit to be an unit of reckoning, and Germany especially will want a large unit, because her transactions are already so very large, and are growing to be so immense.

Fourthly,—for the present at least, this system establishes a double standard of gold and silver. It settles a tariff of rates at which the old silver coins of the German Confederation are to be exchangeable for the new ones.

30 marks is to be equal to 10 thalers
— — 17 florins, 30 kreutzers

—and so on. Nor could this duplicity of standard be easily avoided during a time of transition. But as we showed last week, if you submit to the evil of having this double standard and this *tariff* of currencies, you ought to gain what would now be of great use in Germany—the facility of using French coin. The tariff should be augmented so as to include it. The payment of the indemnity will naturally flood Germany with foreign coin ; and though generally it is a source of confusion to fix the value of foreign coins, yet when the currency is already so confused as that of Germany now, the added complication may well be risked for a great convenience.

For these reasons the scheme for the new German currency is exceedingly disappointing. It may pass, because in Germany now the influence of the Berlin Government is overpowering. But it cannot be popular in the non-Prussian parts of Germany ; it must be unpopular in Alsace and Lorraine and all the provinces bordering on France, as the inhabitants will have constant and intricate calculations between the familiar French money and the new German money ; and it would not pass in a country which was thoroughly habituated to free discussion, and where the preponderance of argument determined the policy of the State.

M. LEON SAY AT GUILDHALL.

THE reception given by the City of London to M. Leon Say, the Prefect of the Seine, was not only courteous but also wise. Nothing just now is more expedient than to strengthen the hands of the few men in France who, under deep discouragement, still maintain the policy of Free-trade, and amidst unparalleled difficulties strive to harmonise liberty and order. The third of an illustrious succession of economists, M. Leon Say, has accepted an office perhaps more difficult than that of the President himself, and very nearly as important. He has become the Prefect of the Seine at the close of a series of calamities which have almost ruined the finances of Paris, have made taxation difficult, and have rendered the maintenance of order dependent on military force. He has to reorganise the administration, to provide for the huge debt, to smooth the chronic and most bitter quarrel between the tenants and landlords, to maintain order, to keep down crime, to invigorate the police, and to moderate the action of the very Red Council elected to share his labours. By the consent of all Parisians he succeeds, but the task is exceedingly heavy, and is not made the lighter by the violent anger with which Paris regards the absence of the Assembly, an absence which, as M. Leon Say recently told the Municipal Council, he himself deeply regrets, and which M. Thiers, it is stated, intends speedily to terminate.

M. Leon Say did not, and could not, make an exhaustive speech at the banquet of Wednesday. It is not pleasant to speak long in a language not understood by the majority of your hearers, or for a staunch Free-trader to make apologies for Protection ; but he contrived to hint, with great skill, at the best excuses for the French Government. M. Thiers, himself a Protectionist, finds himself compelled to rely very much upon the Conservative party, and the Conservative party in France, as in most countries, is very doubtful of the advantages of Free-trade. Their alliance is for the moment indispensable, and they are not, as in England, resisted by any very strong current of opinion, the peculiarity of France, says M. Say, being that the interest of the consumer is very seldom studied, each man thinking even of himself chiefly in his producing capacity. The electors, that is, as a body, approve of high tariffs, and as M. Thiers wants their support for the maintenance of order, even Free-traders like M. Leon Say think it needful to give him their best assistance, and to abstain from subordinating politics to finance. Order being the first necessity, this argument is sound enough, but we cannot quite follow M. Leon Say in the little word of consolation he offers to British manufacturers. He says an increase in the duties on their goods will not overweight them in the competition, because the cost of production will be increased for the French manufacturer through the loss of capital occasioned by the war. With all respect for M. Say's authority, we do not think that this argument is a sound one. Capital is of no country, and if it gets a very little dearer in France it will get dearer in England too, so that the relative position of the English and French manufacturers will remain unchanged. Besides, to make out his case, M. Say would have to show that the increased cost of production to the French manufacturer was equal to the increased duty put upon the manufactured articles imported, and practically it would be quite impossible to make a calculation of this sort. However, M. Say's real point was not that, but this—that the Free-traders of France are making as good a fight as opinion and M. Thiers will allow, and are mitigating evils which they cannot wholly avoid ; and this we heartily believe. The

present circumstances must be temporary, and in the firmness as well as the moderation of M. Say and his friends we have a guarantee that the cause of Free-trade will not remain long in its momentary prostration. There will be no surrender of the principle, even if Free-traders submit for an instant to see it departed from in practice.

THE AUTUMN TRAFFICS OF ENGLISH RAILWAYS.

THE middle of October marks the close of perhaps the most important season for railway business. The second half of the year is more profitable than the first, and in the second half it is the first fourteen weeks, ending about the middle of October—we might almost say the ten weeks counting from the beginning of August—which are the most important. In this period the weekly business done is on the average at its maximum for the year; but about the middle of October there is a distinct drop, and the weekly traffics then go on diminishing in total amount to the end of the year. We may consider therefore that the character of the present half-year has now been determined, and that a statement of the accrued increase or decrease of traffic to date will indicate whether it has been prosperous or not.

There can be no doubt, we think, that the present period is the most profitable for railway shareholders which has been witnessed for a long period, and from an examination of the traffics we conclude that the present half-year will show an increase of profit even more remarkable than those which recent half-years have shown. As we showed lately, the gross increase of business in the first half-year of 1871, as compared with the corresponding period of the previous year, and the consequent increase of net profit, were larger than the gross and net increase in the second half of 1870, compared with its corresponding half-year. Our inference was that the profit of railways was increasing at an accelerating rate, and we gather from the traffics now under examination that the acceleration of the rate of increase continues. In the first place, the percentage of gross increase is rather increasing than otherwise. From the first table we subjoin it will be seen that the gross increase of traffic in the fifteen companies there enumerated is as follows:—

	£
Traffic to 14th October, 1871	11,103,199
Do. do. 1870	10,296,963
Increase	806,236

This is at the rate of 7·8 per cent., whereas the increase in the preceding half-year was only about 6 per cent., and in the half-year preceding that only about 5 per cent. In the case of particular companies, the acceleration of the rate of improvement is very striking indeed, as the following comparison shows:—

RATE PER CENT. OF INCREASE OF GROSS TRAFFIC OVER CORRESPONDING PERIODS OF THE PREVIOUS YEAR.

	In 1st Half-Year of 1871.		In 2nd Half-Year of 1871 to 14th Oct.
Great Eastern	5·4	.....	4·4
North Eastern	5·1	.....	9·0
Midland	8·5	.....	9·3
Lancashire and Yorkshire	9·3	.....	11·1
Chatham and Dover	1·9	.....	13·9
Brighton	6·4	.....	7·9
Sheffield	5·7	.....	5·6

In the case of the London and North-Western there is a diminution of the rate of increase from 7 to 6 per cent., but on the average there is the acceleration we have seen, and it is so great in some instances as to justify the expectation of the most important results.

But second, the character of the increase of traffic is so changing as to make the acceleration of the increase of net profit go far beyond the mere acceleration in the rate of increase of the business done. The feature of the present half-year is the wonderful share which the increase of passenger business has in the total increase, viz.:—

	Amount. £	Per Cent.
Share of passengers	440,995	53·2
Share of goods	388,439	46·7
Total	827,434	100·0

Those who have been watching carefully the progress of railway traffic recently will understand the novelty of this distribution. To take only the preceding half-year, we find that the distribution of the smaller gross increase was on the average—passengers, 25 per cent.; goods, 75 per cent.; and even this proportion was an unusually high one for passengers compared with the half-years just previous. The reasons why this novelty is an important matter in the prospects of a dividend may be very briefly stated. An increase of passenger traffic is earned without any material increase of working expenses. The same trains are simply better filled with passengers and cost no more to run, or, if it is necessary from the increased business to add to the average number of carriages in the trains, yet the additional wear of rolling-stock thus caused is very trifling. The expense of working the trains is in the locomotive powers, and that is not changed by adding within certain limits to the average number of carriages in a train. If any are doubtful about the effect of an increase of passenger traffic on railway profits, it will be sufficient to recall the fact that, as we showed lately, even a share of 25 per cent. belonging to passengers in the gross increase of traffic was one reason for the exceedingly large increase to the net dividends in the first half of the present year. Anyone can see that when the aggregate increase is materially larger, and the contribution of passengers to it is in the proportion of 53 instead of 25 per cent., the improvement in the dividends will be still more striking.

How important a part this distribution of the gross traffic will play in working out the dividends, will be still more clearly seen from the returns of particular companies. In some cases, the increase is nearly all in passengers. We subjoin for comparison a note of the share belonging to passengers in the increase of the first half of the year:—

SHARE OF PASSENGER TRAFFIC IN INCREASE OF GROSS TRAFFIC.

	In 1st Half-Year of 1871. Per Cent.		In 2nd Half-Year of 1871, to 14th Oct. Per Cent.
London and North-Western	15·7	.....	53·8
North Eastern	16·7	.....	27·0
Midland	25·0	.....	43·0
Lancashire and Yorkshire	19·0	.....	43·2
Great Northern	57·0	.....	121·5
Great Eastern	18·2	.....	71·4
Sheffield	9·1	.....	27·0
Brighton	67·6	.....	85·7
Chatham and Dover	100·0	.....	83·7

It is easy to see from this how very much more important the nature of the increase of traffic is now than it was even in the preceding half-year. Of course the proportions may be changed before the year closes, as the travelling season is now over; but the totals are so large, that even if the increase should now be in goods to the end of the half-year, the proportion of passenger increase would still be much larger than it was in the first half of the present year.

There is one important inference from these figures. The class of lines which are now becoming the most profitable of all is what is known as the passenger lines. They are doing a great deal more business, and it is almost all pure gain. We should probably be under the mark in saying that 80 per cent. of the above increase in passenger traffic will go into the pockets of the shareholders. Nothing more is necessary to show that the shareholders of passenger lines may congratulate themselves on their prospects. At the same time, it may be interesting at the present moment to point out that such lines, where they compete, have the greatest interest in amalgamation. If they were goods lines, amalgamation would produce little advantage, because the cost of carrying goods is always in proportion to the work done. In passenger lines, however, the cost is not in proportion to the passengers carried, but in proportion to the mileage run, which is increased to an extravagant extent by duplicate trains. The shareholders of passenger lines could increase their dividends quite as much by amalgamation as they are now doing by conveying more passengers.

	440,935	53·3	386,455	46·7

* In these cases the details of the passenger and goods increase do not correspond with the aggregate. The figures of last year's traffic, published at the time, differ from the corrected figures now published with the present year's traffics, and an exact comparison in detail cannot be made. For this reason too the total increase shown in this second table sums up to rather more than the total in the first.

BUSINESS NOTES.

THE REPAYMENT OF THE GERMAN DEBT.—The German Emperor, in his speech at the opening of the Reichstag, stated that a material portion of the first four half-milliards of the indemnity, to be fully paid by the new Convention before the 1st of May next year, would be applied to the reimbursement of the loans contracted for the war expenditure. To accomplish this, it has been necessary to introduce a Bill sanctioning the repayment of a part of the new loans which had been funded, and the preamble to this Bill explains how much is to be repaid altogether, and as regards a large part of it, at what dates. The following sums in Treasury bills (including the loans contracted in England last year) have already been repaid, or notice given for repayment at the dates specified :—

£		
750,000	paid on	1st July, 1871.
1,500,000	—	1st Aug., —
637,125	noticed for	1st Feb., 1872.
7,650,000	—	1st Jan., —
7,650,000	—	1st Feb., —
18 187,125		

The first three items in the above list are ordinary Treasury bills of the North German Government, and the remainder are the bills with five years to run, and redeemable on six months' notice, by the issue of which the Germans contracted their second war loan simultaneously in London and Germany. The new law authorises the redemption, at three months' notice, of 17,865,995*l*, being the nominal amount of the first war loan contracted in Germany exclusively, and in the form, not of Treasury bills, but of permanent obligations. The time of giving the notice is left to the Imperial Chancellor, but allowing for a short interval to pass the law, there would be room to give three months' notice terminating next spring, shortly after the Treasury bills have been redeemed, and while the instalments of the last half-milliard, according to the new Convention, are being paid. The total amount already repaid, or fixed for redemption, is thus 35,253,120*l*, and it will probably all be repaid before the 1st of May next, when the last fourth half-milliard will have been received. Nothing however is absolutely due till next January, but according to a Berlin letter in the *Frankfort Gazette*, the German Government is discussing proposals for paying off the Treasury bills by anticipation, or otherwise relieving the pressure in the money market.

THE AMERICAN FUNDING LOAN.—Allusion has often been made to the anticipated effect of the recent American Funding loan on the English and German money markets. The state of the facts regarding it appears to be this :—The loan was for 15,000,000*l*, and the conditions were unusual in regard to time of payment—only 5 per cent. being required on deposit, and the remaining 95 per cent. in one sum on the 1st of December next. That money will really be required, as Mr Boutwell has given notice, to pay off 20,000,000*l* 5-20's at the date mentioned. It is supposed, therefore, that about the 1st of December some little perturbation may be caused here by the transfer of such large sums. The transaction is certainly of a kind to be kept in view by those who have much to do with the money market, or whose transactions are regulated by it, as the transfer of any large sum, no matter under what circumstances, always tends to cause some pressure. At the same time it may be proper to point out that there is one compensating circumstance, viz.,—that some of the 5-20's called in, we believe a considerable quantity, are held in Europe, and from the way Mr Boutwell's arrangements are made, this large holding of 5-20's in Europe, for the present at least, tends rather to bring money to this side. These 5-20's are due in America on the 1st of December, and the consequence is that for all practical purposes they are at this moment as good for remittance to America as the coupons of the debt when the term of payment approaches. America is in fact in the position of having a large new sum to pay *to* Europe, as well as to receive from Europe. It remains to be seen whether the drawn bonds here are in sufficient quantity to balance the remittances which may have to be made on account of the loan, while the balance of trade, and the extent to which investments have lately been made in Europe in other American securities, will also affect the result.

TAXATION IN ENGLAND.—It is a curious proof of the want of real knowledge which obtains among Parliamentary men that within a few days after Mr Newmarch made the remarks on the lightness of English taxation, which we quoted last week, we find Mr Rylands speaking in support of a resolution declaring that the taxation of England "is excessive in "amount, and this national evil can only be remedied by the "substitution of direct for indirect taxation, and that the "Customs and Excise duties, and all other restraints on "industry, ought to be abolished." In support of this extraordinary resolution, the honourable gentleman proceeded to indulge in the traditionary language about the resources of the country being wasted, and he also drew a parallel between the burden of the present day and what it was in the time of the Wellington-Peel administration. We invite Mr Rylands, and those who share his views, once for all to examine into the facts before they talk as they do. As economists we should be as anxious as he is to cut down any waste, quite as much for social and moral as for economical reasons, but "facts are facts," and it is mischievous to support a cry for economy on the ground of the pressure of taxes, which do *not* press hardly. As Mr Newmarch observed, the masses of Englishmen principally pay taxes in the shape of duties upon exciseable liquors, which would hardly be felt by a family of moderate drinkers. Anything else they pay is in the shape of duties upon tea and sugar, which are so light that their abolition would probably be all but unfelt directly in the price of the articles consumed, although indirect advantages would undoubtedly result. Whatever Mr Rylands and others of his school may say, a system of taxation like this can never be talked of in the language with which people may talk of their taxes in France or the United States, or in any other country which really has got burdens to bear. As regards the parallel with the times of the Wellington-Peel administration, it may be quite true that the expenditure of the United Kingdom is larger than it was then, though much of the increase which is shown on the surface of the figures is only apparent; but how can Mr Rylands get over the fact that one way or the other, the people of England, far richer and more numerous than they were in the days of the Wellington-Peel administration, have no more money to pay than they paid then? To talk of the *burden* as having increased, when it has really been enormously lightened, is either a proof of inexcusable ignorance, or of a disposition among political adventurers to trade upon the ignorance and prejudices of their most ignorant constituents.

MR HUGHES'S SLIDING SCALE.—Mr Hughes's address at the meeting of the North of England Board of Conciliation at Middlesborough on Monday is exceedingly interesting, as a revelation of the difficulties which beset the intervention of

third parties in the settlement of bargains between two classes of dealers. If the self-interest of the buyers and sellers is not strong enough to produce a bargain of some sort, the difficulty of an "arbitrator" in arriving at terms which both sides will assent to must be overwhelming. He has got to ascertain in some rough way what both will agree to rather than not deal at all, and this may be sometimes impossible, if the parties previously could not find out for themselves. Accordingly Mr Hughes, after one or two successes, appears at length to have miscarried, and that to such an extent that the working men repudiate his decision, and the employers in the end are fain to pay more than he had fixed they should give. What has happened at Middlesborough therefore is the failure of "arbitration," and the success of the more primitive method of the higgling of the market. We doubt very much whether the method now put forward by the employers—viz., to establish a scheme for a self-adjusting system of regulating wages by the fluctuations in realised selling prices of iron—will answer any better than arbitration. The selling price of the manufactured article is only one element out of many in settling wages, the prices of the raw material being just as essential, while nothing would prevent employers on the one side and workmen on the other taking advantage of a sudden change in the conditions of business which would give them more money without a change in price. There is nothing for it in the end but "higgling." The one satisfactory feature in the North of England dispute is that though Courts of Conciliation fail to arbitrate, they appear to promote the amicableness of the higgling.

COPYRIGHT. — There has been a good deal of correspondence recently in the papers on what is surely a most unprofitable question—whether American or English publishers are the worst pirates. The neglect of the American Government in agreeing to an international copyright treaty with England is quite unfairly, we think, converted into an attack upon American publishers who republish without payment, or with only little payment, to the English author. Naturally American publishers and authors retaliate by pointing to the depredations of English publishers upon American authors in the smaller number of cases where an opportunity has been offered them. All this writing is very much beside the question. Clearly as long as there is no copyright, an English author has nothing to sell to an American publisher, nor an American author to an English publisher; and it is like crying over spilt milk to complain that authors suffer by the piracy which is permitted. The American Government is the great culprit, but the complaints of American authors should open our eyes to the very illogical course which we pursue in making the rights of foreign authors in this country depend upon the action of the Government of which they are subjects in conceding copyright privileges to English authors. The two things we submit have no connection with each other. If copyright, as we believe it to be, is very similar in its nature to other rights of property, we should concede it to all alike, foreigners as well as Englishmen, no matter what foreign Governments may do. Because they will not do justice to English authors, we do not mend matters by doing injustice to foreign authors. If copyright, on the other hand, is only created for the sake of expediency, and is of a minor degree of sanctity compared with property in visible and corporeal things, still expediency obviously requires that we should encourage foreign authorship as much as English. What we want is good books, and whether they are of foreign or English production is indifferent—if copyright will encourage them, we should give it as far as we can, irrespective of nationality and place of publication. We should like therefore to see in place of these attacks upon American pirates a readjustment of our copyright law, so as to make it distinctly recognise copyright in books published abroad, by foreign as well as English authors. We believe that this course will not only be the most advantageous for ourselves, but will be the best way to influence the American Government and people in favour of doing justice to English authors. We should earn the gratitude of every American who writes a successful book.

THE FRAUDS OF HENRY TULEY.—The misfortunes of a broker on the Stock Exchange who failed last Saturday in consequence of the frauds of a client have excited a good deal of sympathy, but the wonder is that in the way Stock Exchange business is conducted there are not more frauds of the kind. It is the custom to pass the most valuable property from hand to hand in exchange for cheques, for which the only security is the good faith of those who sign them. That there is hardly ever a case of fraud—only one for many years, we believe, by a member of the Stock Exchange, the fraud in the present case being committed by an outsider—is a striking proof of the extent and solidity of the credit which has grown up, and without which not a tithe of the business actually done could be transacted. At the same time the moral of the present case would appear to be the necessity of the utmost watchfulness on the part of brokers in regard to the people who come to them. Even when the client is a person with whom the broker had before done business, he ought to have some knowledge whether the particular transaction is a reasonable one, and he would be justified in not parting with securities for a ruinous amount unless for actual money, or not until the cheque had been "cleared."

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending Oct. 14 :—

	Receipts of Week Ending Oct. 14.
	£
Customs	339,000
Excise	331,000
Stamps	215,000
Taxes	nil.
Income tax	117,000
Post Office	nil.
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	105,827
Total	1,107,827

The total receipts of the previous week were 711,552*l.*

The Exchequer issues of the week on account of expenditure were 1,794,143*l.*, viz. :—

	£
Interest of debt	951,994
Other charges on Consolidated fund	282,149
Supply services	560,000
Telegraph services	nil.
	1,794,143

During the week the cash balances have decreased as follows :—

	Bank of England.		Bank of Ireland.		Total.
	£		£		£
Balances on Oct. 7	1,423,520	...	547,354	...	1,964,874
— Oct. 14	784,305	...	213,426	...	997,731
Decrease	639,215	...	327,928	...	967,143

NEW GERMAN GOLD CURRENCY AND INTERNATIONAL COINAGE.

TO THE EDITOR OF THE ECONOMIST.

SIR,—A few memoranda on the present position of this question in North Germany may not perhaps be deemed out of place in the pages of your journal.

It appears that, on the 13th June last, a committee of 23 deputies of the Reichstag presented to Prince Bismarck, as Chancellor of the Empire, a series of propositions, with the view of guiding the deliberations of the Parliamentary Session now assembled. They recommended—

1. A single monetary system for the German Empire, upon the basis of a single gold standard.

2. To attain this end, a transition period to be fixed, during which the gold coin, to be coined upon the basis of the plan finally adopted, shall be issued in sufficient quantity, and admitted as a means of discharging debts in a legal manner, in a fixed proportion to silver coins.

3. It is anticipated that the admission of the gold coins referred to, upon a rate of exchange, comparatively with the silver coins, to be fixed by the Federal Council of the Empire, and which shall not be reduced thereafter for the payments to be made to the Empire or to particular States, may, having special regard to the existing economical condition to which such a monetary legislation will be applicable, prove very useful in shortening the *temporary rule* of the double standard, or even in dispensing with it altogether.

4. The definitively adopted new gold coins *to be divided decimally*.

The [illegible] which it has finally been decided to submit to the

Reichstag, provides for a gold standard and for a decimal subdivision—two highly important steps in the promotion of international coinage. Besides this, the proposed gold coins for Germany bear an easily calculable ratio of weight in the metrical code. The 30-mark piece, as proposed, is to contain $\frac{1}{9\cdot5}$rd of a kilogram of pure gold, the 20-mark piece $\frac{1}{139\cdot5}$, and the 15-mark piece $\frac{1}{186}$th part of a kilogram, so that the exact intrinsic value of any amount of such coins, as expressed in their weight of pure gold, can be easily ascertained by simple recollection of the ratio to the kilogram.

The relations in which the intrinsic values of the proposed new coins will stand to the coins of the leading commercial nations, can only be understood by placing together a complete set of calculations, which shall embrace the whole facts. The annexed table has been arranged with the view of accomplishing that object :—

COMPARATIVE TABLE of the Weights, and of the Intrinsic Values in *Pure Gold*, of the English, French, American, and German Gold Coins.

Denomination of Coin.	*Pure* Gold Contents of each Coin.	Standard Fineness.	Gross, or Standard, Weight of each Coin.	Value of *Pure* Gold Contents of each Coin. In Pounds Sterling.	In Gold Francs.	In Half-eagles.	In American Gold Dollars.	In German Silver Thalers and Groschen, taking the Proportion of Silver to Gold, 15½ to 1.
	Grams.		Grams.	£	f		$	Thlr. Gros.
PROPOSED 30-MARK PIECE OF GERMAN EMPIRE	10·7527	.900	11·9474	1·4685	37·0374	1·4293	7·1465	10 0
German Gold Crown	10·0000	.900	11·1111	1·3657	34·4444	1·3292	6·6460	9 9
Half-eagle or 5-dollar piece	7·5232	.900	8·3590	1·0274	25·9628	1·0000	5·0000	6 29⅚
SOVEREIGN	7·3224	.916⅔	7·9882	1·0000	25·2313	0·9733	4·8665	6 24⅓
25-franc piece (proposed)	7·2581	.900	8·0645	0·9912	25·0000	0·9648	4·8240	6 22⅔
PROPOSED 20-MARK PIECE	7·1685	.900	7·9650	0·9790	24·6917	0·9528	4·7640	6 20
20-franc piece	5·8065	.900	6·4516	0·7930	20·0000	0·7718	3·8590	5 12
PROPOSED 15-MARK PIECE	5·3763	.900	5·9737	0·7342	18·5187	0·7146	3·5730	5 0
Half German gold crown	5·0000	.900	5·5556	0·6828	17·2222	0·6646	3·3230	4 19½
HALF-SOVEREIGN	3·6612	.916⅔	3·9941	0·5000	12·6106	0·4867	2·4335	3 12½
10-franc piece	2·9032	.900	3·2258	0·3965	10·0000	0·3859	1·9295	2 21
Gold dollar	1·5047	.900	1·6718	0·2055	5·1926	0·2000	1·0000	1 12
5-franc piece	1·4516	.900	1·6129	0·1982	5·0000	0·1929	0·9645	1 10⅓

The table shows that the true value of the proposed German gold coins are as follows, in English and French money respectively :—

	£	£	s	d		f	c
30-mark piece	1·4685, say about	1	9	4½	or	37	4
20 —	0·9790 —		19	7	—	24	69
15 —	0·7342 —		14	8¼	—	18	52

The existence of such fractional differences between the proposed coins and the coins of England, France, &c., is a most unfortunate feature in the scheme. The 20-mark piece, as a coin of convenient size, will, in all likelihood, be the leading coin of circulation. It cannot yet be known if, in the common usage of the future, sums in German coin will continue to be expressed in thalers, of which 6⅔rds will go to the 20-mark piece, or whether they will be expressed in marks. If expressed in thalers, divisions by 6⅔rds will be necessarily employed, and these will present difficulty in calculating the equivalent gold coin of the country. If expressed in marks, there will not be the same difficulty. But there the ease and convenience stop, for without the aid of some such table as is above given, the conversion of new German currency into corresponding English, French, or American coinage will be found tedious and confusing in any international comparisons or exchanges.

Taken as a whole, the new German measure may be pronounced a movement in some respects in advance, but in others retrograde. This is the more to be regretted, as it will entail, with certainty, the necessity of an adjustment to a more international and simple relation of the coins of the German Empire to those of other continental nations, at some future date, when the change will be attended with more inconvenience than were it accomplished boldly and at once. Far better would it be for the Reichstag to adopt the principles of the Paris Monetary Convention of Dec., 1865, as have been attempted by Austria and Hungary. The powerful influence of Prince Bismarck might well have been exerted in that direction. The 20-mark assimilated with the 10 Austrian florin piece, the 25 peseta of Spain, the proposed 25-franc piece of France, Italy, Belgium, Switzerland, and Greece, would give one common homogeneous current coin from Calais to Brindisi, and would ultimately lead both England and the United States to enter such a monetary union. It would realise at least a part of the aspirations of a generous German Prince of the olden Empire. The "Edinburgh Review," in an admirable article on international coinage, in October, 1866, thus translated his words :—

> Had all not but a single creed,
> Faithful to God and just in deed,
> *One weight, one measure, coin, and gold,*
> 'Twere better for all an hundred fold.

Let us hope that some of our German friends are not rejecting this lesson, and contemplating what has been referred to in certain English newspapers as probable to happen, and, in their anti-international-phobia, even desirable—namely, to look upon the 20-mark piece and the English sovereign as capable of mutual interchange without compensation or tariff. True, we Britons are simple enough to allow our poor sovereign to be treated as 25 francs, only, in numberless transactions. But then the difference here is only $22\frac{13}{100}$ centimes per pound sterling against us. *That* we can, and do, swallow as a trifle only; but it would trouble our deglutition if we found in hotel bills, railway fares, &c., in Germany, to say nothing of in loans, and in railway and other commercial and State obligations, our sovereign estimated as equal to 20 marks only, worth as it would be in intrinsic value 5 pence, or 53 centimes, more than that German coin.—I am, &c.,

19th October, 1871. FREDK. HENDRIKS.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Oct. 19.

The returns of the Bank of France for this week, last week, and for the week ending 8th September, 1870, are as follow :—

	Oct. 19, 1871. f	c	Oct. 12, 1871. f	c	Sept. 8, 1870. f	c

Privileged bills	Decrease	16,273,436
Treasury bills	—	25,000

Since the note in the *Journal Officiel* of Sunday last no further communication has been made by the Government relative to the state of the negotiations with Prussia. Advices from Versailles, however, mention that the treaty was signed yesterday by the President of the Republic, but the official journals of this morning is silent on the subject. Count d'Arnim has however arrived at Versailles, and the ratification is expected to take place to-morrow. The Havas Agency has published to-day the text of the treaty, from which it appears that Prussia has not consented to the reduction of the period for the admission into France of manufactures from her ceded provinces at a low rate of duty, without the equivalent of a reduction in the conditions of reciprocity to be enjoyed by France and to which the Assembly had attached great importance. The country is, however, too anxious for the completion of the six departments to raise any objections against the terms on which it has been obtained.

The monetary panic continues unabated, and is causing immense inconvenience in ordinary business transactions. The premium on gold is now 18f per thousand, and at one moment yesterday was as high as 20f. Gold and silver have almost disappeared from the circulation, and it is now impossible to obtain change for a twenty franc note to make ordinary purchases in the shops. The Bank continues buying on terms of 3d and 4d month which are called for on all sides, for fear of interrupting the paper circulation, and the Government is said to be about to issue small bills to the amount of 25 millions. It is however doubtful whether such a measure would remedy the state of things, as the coin would be bought up by speculators before it got into circulation. The situation is, however, easier than various others, as the Bank still holds in its cellars over 25 millions sterling of gold and silver, and everything for sums of less than 20f in notes are received without objection at their nominal value.

Some further particulars have transpired relative to the plans of Baron Haussmann for the reorganization of the Credit Mobilier Company. The old proprietors are to receive for every five shares they at present hold ten in the new company, which will entitle them to a subscription of one other new share in the pair of lots. The old shares have been estimated at 240f, but as they are not worth 200f on the Bourse, the new shares must rise to a premium of 125f for the holders who accept the combination to obtain the same advantages as those who realise their shares immediately. The meeting to which this project is to be submitted is fixed for the 11th November. Of the 120,000,000f representing the original capital of the company more than 40,000,000f are represented by shares on the Immobiliere Company as follows:—Loans 24,000,000f, interests previously to loan 3,600,000f; interests since loan, 3,000,000f; sundries bills, 10,000,000f; bonds, 14,000,000f; total, as above.

The Director of the Post Office has issued a circular relative to the issue of the new postage stamps of 2c and 5c centimes, to replace those of 10 and 20, now rendered useless in consequence of the new rates. The new stamps are being sold at the offices, and the public have been invited to exchange the old ones they may have in hand. The patterns at present issued are, however, only to be employed until the new dies can be executed, when the colours of the stamps will also be changed. The head of a female figure representing the Republic will then be abandoned for a new design, in which a figure indicating the value of the stamp will occupy a prominent place.

The orderly manner in which the elections for the Councils-General have passed over, and the success of M. Pouyer-Quertier's mission to Prussia, have produced a steady rise throughout the week on the Bourse, with the exception of a slight reaction yesterday, which has, however, recovered to-day. The following are the quotations :—

The scrip of the last municipal loan has now fallen to 1¼ premium.

The exchange on London is to-day somewhat easier, and is quoted at 25f 5c.

The Budget for the City of Paris for 1872 is about to be laid before the Municipal Council. It will show an increase of 20 millions corresponding to the interests and amortisation of the new loan. To cover this expense several new taxes are contemplated, among others an additional fifth on the four direct taxes, an augmentation in the tax on the auctions at the central markets, and an increase of from 5 to 6 per cent. in the octroi duties.

Drawings have taken place this week of bonds of two of the City of Paris loans. For that of 1865, of which two series were drawn, Nos. 80,651 and 267,293 each won 150 francs, Nos. 377,320 and 27,425 each 500 francs, Nos. 130,219, 187,284, 325,313, 13,774, 8,005, 277,221, 489,243, and 256,048, each 1,000 f., and 115,201, 228,248, 521,661, 112,401, 345,676, 70,303, 272,814, 471,661, 62,062, and 468,735, each 5,000f. For the loan of 1869, No. 130,512 gained 200,000f., Nos. 74,162, 189,420, 415,201, and 271,064, each 10,000f., Nos. 253,038, 423,254, 571,007, 650,025, 393,456, 50,205, 467,382, 501,648, 28,813, and 132,067, each 1,000f.

The project is again revived of a new suburban railway, from the Place de la Concorde, in Paris, to Pontoise and Jersey. It would run along the quays in an open cutting, spanned by numerous bridges, to La Maroie, where freight changes are frequently held, and then branch off in one direction to Versailles and Pontoise, and in the other to join the Orleans at Juvisy.

An application has also been made to the Council-General of the Seine-Inferieure for powers to construct the following lines of railway :—1. From Barre to Candebec-lès-Elbeuf, with a branch communicating with the Rouen dock and the landing warehouses, and passing along the banks of the Seine by Hautot-sur-Seine, Port-Jerome, and Villequier, with a branch from Port-Jerome to Bolbec by Lillebonne (7½ miles), and a junction from Candebec with the line of the Northern company (25 miles). The object is to connect from Marseille to Boulogne. 2. From Rouen to Honfleur, through the valley of Deville, and with an extension to Candebec, together about 25 miles. 3. From Motteville to St. Valery-en-Caux, by Cany (25 miles), with a branch from St. Denis-d'Hiericourt to Fecamp (17 miles). Another proposal is for a line from Eu to Dieppe.

The Directors of the Lyons and Mediterranean Railway, in a letter to the Marseilles Chamber of Commerce relating the charges of neglect in the conveyance of merchandise, says that 2,000 goods waggons or trucks belonging to the company still remain in Germany, and are at present retained notwithstanding the frequent applications made to have them returned. He adds that before the war 5,000 new waggons had been ordered, and have not yet been delivered, and that orders for 3,000 others have since been given. When they shall have been received the rolling stock of the goods traffic will be increased by nearly 4,000 waggons, representing about 50,000 tons of merchandise. A total of 42,000 tons of goods

are still awaiting removal at Marseilles. The Chamber of Commerce at Elbeuf has made an application to the Minister of Commerce on the same subject, and proposes that the railway companies should be authorised to establish temporarily an intermediate service for the accelerated conveyance of goods which would be prejudiced by delay. At present the goods service is divided into two classes,—*grande vitesse* and *petite vitesse*. The rates of the former are so high as to exclude all but the most valuable merchandise, while the latter is too slow, and the limit of time which exists in ordinary periods is now suspended.

The Minister of Public Works, who exercises a certain control over the railway companies, has issued a decree ordering them to give a preference to the conveyance of seed corn over all other merchandise.

A convention for the construction of the St Gothard Railway across the Alps has just been signed between a group of German bankers, headed by a financial establishment of Berlin, and the Swiss Committee. In October, 1869, the Governments of Switzerland, Italy, and several German States entered into an arrangement to furnish together a subsidy of 85 millions of francs towards the cost of executing this work; the total sum required was 187 millions, and the remainder of 102 millions was to be provided by a company, to be formed for making and working the line. Efforts were made at the commencement of 1870 to form such an association, but the breaking out of the war caused the project to be deferred. Since the peace the subject has been again taken up, and there is now every prospect of its being brought to a successful termination. Offers were made by two associations of capitalists, one consisting of Italian and German bankers, headed by an important house at Florence, and the other, above mentioned, composed of Germans alone. The Swiss committee accepted the terms of the latter, and ordered its president, M. Escher, to treat with them. The result has been the present convention, which now only requires the ratification of the Swiss Union of St Gothard. The conditions are still secret, but it is known that a proportional share of the subscription to the capital of 102 millions is reserved for Switzerland and Italy.

The group of German bankers consists of the Discount Company of Berlin; M. Bleichroder, banker, of the same city; MM. A. de Rothschild and Son, of Frankfort; the Bank of Commerce and Industry at Darmstadt; the Union of Banks, and Oppenheim, jun., and Co., both of Cologne.

A sale of 4,800 bags of coffee and a quantity of cedar wood, forming the cargo of the Prussian vessel the Neptune, a prize to the frigate Sybille during the war, has taken place at Toulon. The coffee sold for from 75f to 90f the cwt, in bond, and the cedar for 102f the stere or cubic metre. The sale produced about a million of francs.

The Mulhausen Gas Company has held its annual meeting. The report read showed that the profits, which had amounted in 1869-1870 to 193,083f, fell in 1870-1871 to 7,006f only.

The Orleans to Chalons Railway Company announce the opening of the new line from Evreux to Louviers at the commencement of November, that from Acquigny to Pacy at the end of the same month, and that from Pacy to St George's at the close of the year.

The following securities have been admitted to the official quotations on the Bourse:—A new series of 5 per cent. bonds of the Compagnie des Eaux, issued at 480f and worth 460f; shares of the Navarro-Aragonaise Compagnie des Cinq Villes, nominally 500f, worth 325f; bonds of the same, 6 per cent., issued at 285f and worth 205f; and shares of the Credit Communal of France, 500f, worth 407f 50c.

The following are the latest quotations of the produce markets at Havre, per 50 kilos, duty paid:—

COTTON.—New Orleans very ordinary, 119f; Oomrawuttee good ordinary, 91f to 92f; fair, 93f.

COFFEE.—Hayti, 140f to 142f 50; Gonaives, 144f; Cape, 142f 40c; in bond, 74f 50c; Rio, 136f 50c to 140f; in bond, 77f.

HIDES.—Monte Video ox, 142f 50c; cow, 140f; saladeros ox, in bond, 82f 50c; Rio green salted, 74f, in bond.

WOOD.—Monte Video, 215f; Buenos Ayres, 200f; Spanish, 190f.

TALLOW.—Buenos Ayres sheep, 56f; Monte Video ox, 59f.

SUGAR.—French West India usine, 1st jet, 67f 25c; 2nd, 64f 25c; 4th, 58f.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap 32, for the week ending on Wednesday, the 18th day of October, 1871.

In 1861, there was very little business doing, the stagnation in trade in consequence of the American war becoming every week more marked. The blockade of the Southern ports was beginning to be stringently enforced.

In 1868, money was still easy at 2 per cent. a decline of ½ the previous week in the open market rates not having been recovered. Trade was believed to be better, and the continental

exchanges were becoming less favourable. Remarkable revelations had just been made as to the management of the Royal Bank of Liverpool by a shareholders' committee of investigation.

In 1869, the reserve of the Bank had become weaker, but money had not yet much risen in value. Many competing proposals for dealing with the tenant-right question in Ireland were now under discussion. The political situation in France was becoming more and more dangerous, in consequence of the Emperor's hesitation about the political changes shown to be necessary by the elections the previous summer.

In 1870, money was rather dearer for the week, but the large supply of foreign money prevented any material change. The capitulation of Metz was now imminent, while the pressure of the Paris siege and proposals for peace were being unofficially brought forward by neutral powers.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 2,058,153*l*; in 1868, an excess of 4,524,206*l*; in 1869, an excess of 3,321,196*l*; and in 1870, an excess of 2,677,295*l*. In 1871, there is an excess of 3,357,807*l*.

Discount and Money Market.—The aspect of the market has quite changed during the week. Although there was no pressure for discounts when we wrote last, the rates in the open market were very firmly maintained, the minimum being 4½, or just under the Bank rate; but in the course of the week the abundant supply of money has caused a competition for bills, and the rates are very much lower. The minimum, which we quote below, is 4½ for two and three months' best Bank bills, but the same rate is charged for four and even for six months' bills, and the market is so unsettled that it is not possible to give very close quotations. There are many special dealings, and the minimum rate might even be quoted under 4½. To-day the abundance of money has been greater than at any time during the week, and the demand both at the Bank and in the open market has been moderate.

The Bank return for the week indicates that the advance of the rate to 5 per cent. has acted very quickly. The bullion in both departments has increased 1,180,000*l*, and the reserve in the banking department 1,494,000*l*. The strength of the Bank arises from the large influx of gold during the week and the repayment of securities, and in spite of the continuous withdrawal of coin for the country circulation, which is on an unusual scale this autumn. Since the return was made up, the influx of gold has continued, large amounts having gone into the Bank both yesterday and to-day. As the reserve amounts in the return to 9,500,000*l*, it will now be over 10,000,000*l*, at which point a continuation of the gold imports will have a great effect.

From the Bank of France return for the week it appears that there has only been a fractional addition to the stock of bullion, but the deposits have largely diminished, while the circulation has largely increased.

We subjoin our usual quotations for mercantile paper having various periods to run, repeating, however, the remark which we have had to make recently as to the unsettled state of the market:—

Bank Bills—2 to 3 months	4½	per cent.
Do 4 months	4½	per cent.
Do 6 —	4¾	per cent.
Trade Bills—2 to 3 months	4¾	per cent.
Do 4 months	5	per cent.
Do 6 —	5⅛	per cent.

The allowances for money at the Joint Stock Banks and Discount Houses are as follows:—

Joint Stock Banks at call	4	per cent.
Discount Houses at call	4	per cent.
Do short notice	4½	per cent.
Do fourteen days' notice	4½	per cent.

The discount quotations current in the chief continental cities are as follows:—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	6	5	...	5
Vienna	6	7	5	6½
Berlin	5	4	4	5½
Frankfort	5	4	4½	5
Amsterdam	4	3	3½	2½ @ 3
Brussels	4½	4½	3½ @ 4	4
Hamburg	...	...	2½	4½
St Petersburg	6	6	6	6

The Stock Markets.—When we wrote last week we had to notice that after a steadily improving tone since the panic of the previous week, when the Bank rate was raised to 5 per cent., there was all at once, at the very close last Friday afternoon, a sudden renewal of panic. This was due to the report of a much lower exchange quotation from New York, and an increase of apprehensions as to the effect of the Chicago disaster. The panic feeling to which we referred continued the following Saturday, though prices recovered a little; but with Monday there was a steady reaction, which has been maintained all through the week. The report as to the American exchanges turned out not to be true, and subsequently the quotation rose from 108 to 108¾. The continued influx of bullion into the Bank, falling rates for money in the open market, and favourable continental exchanges, have also improved the tone of the stock markets, though as yet they have been rather sensitive, owing to the small amount of business transacted. Investors and speculators have not yet fully recovered their confidence, and appear to be waiting for more evidence as to German operations, and as to the possible effect of the Chicago disaster and the subscriptions for the Funding loan on our monetary relations with America. We are inclined to think that a good deal of confidence may justly be felt, at least as regards Germany, on account of the cheapness of money there, and the extreme probability of the indemnity money soon coming out either in the shape of new coinage, or by being lent, or by the German debt being repaid. As regards America, there is more doubt; but it is far from certain at least that the events referred to will tend to cause much strain, while the ease that may fairly be expected from the German arrangements about the indemnity money will give us increased means of fulfilling our engagements with America.

A feature of the week is the renewal of the applications of money for new undertakings. Costa Rica and Uruguay are applying for new loans, and there are not a few new companies, principally for mining purposes. We understand that the number of new ventures kept back by the monetary crisis was very large, and if money gets rapidly cheaper, a great many new issues may be expected.

English Government Securities.—The cheapness of money in the open market, and the large sums available for being lent at call on English Government securities, had a good effect in this department, and Consols rose quickly from 92 ⅞ ¹⁵⁄₁₆, which was the closing price last Saturday, to 93 ⅛ in the middle of the week. This price, however, was not maintained on Thursday, when it was ⅛ weaker. To-day the market opened strongly on the publication of the Bank return and the reports of farther arrivals of gold, but in the absence of any large amount of operations the best price of the day was not maintained. The closing prices are—Consols for money 92 ¹⅛ ¼, account 92 ⅞.

Subjoined is a list of the highest and lowest prices of Consols every day:—

CONSOLS.

	Money.		Account.		Exchequer Bills.
	Lowest.	Highest.	Lowest.	Highest.	March. — June.
Saturday	92¼	92⅜	92⅛	92⅜	par to ... pm
Monday	92⅛	92⅜	92⅛	92⅜	par to ... pm
Tuesday	92⅛	92⅜	92⅛	92⅜	par to ... pm
Wednesday	92⅛	92⅜	92⅛	92⅜	par to ... pm
Thursday	92⅛	92⅜	92⅛	92⅜	par to ... pm
Friday	92⅛	92⅜	92⅛	92⅜	par to ... pm

The following are the changes for the week, taking the latest unofficial prices for quotation:—

The Government of India have given formal notice of the intended discharge of the Five per Cent. Loan of 1858-'59 on January 16, 1872, and the notification will be published in this country immediately on its receipt.

Foreign Government Securities.—The improvement from the panic point of last Friday has been very marked—especially in French securities, which have been very buoyant in Paris on the strength of the new conventions concluded

between Prussia and France for the immediate evacuation of six departments, the direct payment of the fourth half-milliard of the indemnity by eight fortnightly instalments commencing on the 15th of next January, and for the settlement of the Alsace and Lorraine Customs' question. The terms, it is believed, will strengthen very much the present Government in France, and at least postpone the political crisis which seems to be inevitable. Turks have also been largely bought this week, the recent panics having only interrupted the operation of a large account which has been opened for the rise. Spanish also advanced about ⅛ per cent., from 33¼ to 33⅜, but the Cabinet crisis at Madrid still has an unfavourable effect, and checks the strong current of investment which, as we have often had occasion to notice lately, has set in towards Spanish stocks. South American stocks have likewise been purchased to a considerable extent, holders of the drawn 5-20's of the United States especially turning their attention to the securities of other American Governments, which will yield them at or about the 6 per cent. they have hitherto received. Of these, Argentine appear to be most in favour, the return to the investor being about 6⅝ per cent., and those who are accustomed to the foreign department being inclined to make a favourable estimate of the stability of the Argentine Government as well as of its material resources. We are not much inclined generally to recommend foreign investments, the best class of English industrial securities—the ordinary stocks and shares of the leading railways and banks—being decidedly preferable, as they are more secure, and yield a better return; but the disposition of investors who have a predilection for foreign securities towards South American Governments is now very noticeable. To-day the tone of the market has been good and prices are very steadily maintained, though there is not much business doing. It will be seen that there is a considerable advance upon the closing panic prices of last Friday.

The event of the week in the foreign market is the issue of the new Costa Rica loan, of which we subjoin the particulars. The peculiarities of the issue appears to be the reservation of it for the holders of the previous issue—a common practice with English railways when they raise new capital, and which seems to be as well adapted for foreign loans. The quotation of the new loan to-day is 2¼ ½ pm.

Messrs Thomson, Bonar, and Co. have this afternoon issued the prospectus of a new 6 per cent. loan for the Republic of Uruguay. The amount of the loan is 3,500,000*l* in bonds of 1,000*l*, 500*l*, and 100*l* each, with interest from 1st August last, and is redeemable at par by means of a cumulative sinking fund of 2½ per cent. per annum in half-yearly drawings, of which the first will take place on 1st May, 1872. The price of issue is 72 per cent., and the instalments, in amounts of about 10*l* each, are payable monthly, making the real price of issue 69*l* 15s, at which the yield to subscribers will be about 10 per cent.

Messrs B. Tubini and Co. have given notice that holders of Imperial Ottoman Treasury bonds and coupons falling due on Oct. 31, must deposit a list of the same at their offices before the 25th inst., failing which they will be payable in Constantinople only. The notice will be found in our advertising columns.

Annexed are our usual quotations showing the changes for the week:—

English Railways.—In this department a substantial recovery from the closing panic prices of last Friday was established the following day, and during the present week the improvement has so increased that the prices now ruling very nearly approach the high level which they had attained just before the Bank rate was raised to 3 per cent. To-day the markets opened rather strongly in consequence of the favourable Bank return and the continued influx of gold into the Bank; but the best prices of the day were not quite maintained, though there is a rise as compared with the morning. The markets, on the whole, rule steady, and are in such a condition that the slightest addition to the buying would cause a material advance in values.

Among the stocks which have been most favoured this week are Caledonian, which have now advanced to 113; South-Eastern, which have been as high as 73, and are now 72½; Great Western, which are 105 to ½, and have been a shade higher; London and North-Western, which have been at 145¼ to ½; Midland at 137½; and Chatham and Dover Preference, which have been at 65 to ⅝. The present prices are a fraction lower than the highest touched, but the prices stated show the condition of the market, and how nearly things are at the best point before the recent panic. They are not in reality so good by comparison, as a month's traffics have intervened of so favourable a character that but for the monetary disturbance there would have been undoubtedly a farther advance in prices ere this. The traffics of the present week are especially good.

Two of the companies are this week applicants for new capital. The Caledonian increases its ordinary share capital by offering to the present shareholders at par 5*l* new stock for every 80*l* of their present holding. As Caledonian stock is at a premium of 13, a great advantage is thus offered to the present shareholders. The other applicant is the Chatham and Dover Company, which offers to its present preference shareholders a farther issue of the B debenture stock, amounting to 300,000*l*, thus completing the whole 500,000*l* authorised. The stock is offered at 92, the B stock already issued being at 94, with a certainty of going to par along with the arbitration debenture stock as soon as it is perceived that, besides meeting the interest on the debentures, the company will have a large surplus for the preference shareholders even in the current year.

Meetings of the shareholders of the London and North-Western and Lancashire and Yorkshire shareholders were held to-day to consider the proposals for amalgamation, and the resolutions of the directors were carried by overwhelming majorities. The chairman of the London and North-Western Company stated that the directors held proxies for 24,000,000*l*, and when the resolution was put it was unanimously agreed to. The chairman of the Lancashire and Yorkshire Company announced that the proxies for the scheme were 3,517, representing a capital of nearly 8,000,000*l*, and the proxies against were only three, representing 260*l*. When the resolution was put only four hands were held up against it. The shareholders of both companies have thus decisively ratified a proposal which is so clearly for their interest, and which is also we believe for the interest of the public. The statements of the chairman of the London and North-Western Company demonstrate the advantages which the amalgamated company will be able to offer the public in the multiplication of trains at different hours, and the alternative use, at the pleasure of passengers, of what are now competing stations. The question of most interest in the stock markets however is the prospect of increased gain to the ordinary shareholders from

amalgamation, and we anticipate that the step now being taken will give an impetus to similar schemes. It is so clear that expense will be saved by abandoning competing trains which hardly pay working expenses, and by running all trains the shortest possible distance on the amalgamated system instead of a longer distance on one line only, and that expense will also be saved by unity of management, that it is simply astonishing shareholders have not been more eager for amalgamation than they are. The matter is one for them to take up, as the interests of the governing boards are naturally antagonistic. The southern lines out of London, for instance, would clearly benefit their shareholders much more by unity of management than the present amalgamation benefits those affected. The competition is there more diffused, while amalgamation would furnish a far better field for the alternative use of stations at the pleasure of passengers. The companies if united would have half-a-dozen metropolitan stations, besides other facilities. If the present scheme is carried out, we shall expect to hear a great deal more of amalgamation.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.

The directors of the Demerara Railway Company recommend a dividend on the ordinary shares at the rate of 7 per cent. per annum. The net profits during the half-year were 9,529*l*.

American Securities.—In this department great firmness has prevailed, and not only has the recent decline been recovered, but a further advance has taken place. Purchases have been made freely, the only adverse change being in Atlantic and Great Western bonds, as shown in the table below. The first series of redeemed Five-Twenty bonds closed to-night at 90¼ to 90¾.

Mr James McHenry has issued a circular to the bond, debenture, and share holders of the Atlantic and Great Western Railway, in which he states that his official connection with the company has now temporarily ceased. General McClellan will assume the presidency of the Consolidated Company. The new securities are being prepared for issue in December, and the resumption of payment is fixed for July, 1872.

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.

Joint Stock Banks.—The dealings in Joint Stock Bank shares have not been extensive, and a decline has taken place in the shares of several leading institutions. London and Westminster, Union of Australia, and Central of London have given way 1; London Chartered of Australia, London and County, English, Scottish and Australian Chartered, and Chartered of India, ½; but Anglo-Egyptian have risen ½; Alliance, Chartered Mercantile of India, and Imperial ¼, and Agra ½.

Telegraphs.—The principal changes in this department comprise a decline of 10 in Submarine; 2 in Indo-European; ½ in British Australian; and ½ in British Indian Extension. On the other hand, we note an advance of 3 in Anglo-Mediterranean; 1 in Anglo-American; ½ in Reuter's and French Cables; ¼ in West Indian. Telegraph Construction shares are ½ lower on the week.

Mines.—The mining share market has ruled somewhat flat, the leading feature being the forced sales of Eberhardts, which have declined 8, while amongst other foreign mines Caylops and Colorado have given way ½ and ¼ respectively. Portgual silver, on the other hand, have risen 3, and Peaths ¼. In the market for British mines we note a rise of 2½ in South Wheal Frances, 1 in Van, North Roskear, East Lovell, and East Bassett; but Wheal Roller have given way 2½, Great Lovey 1½, Herod's Foot 2, Tankerville and Wheal Granville ½.

The prospectus of the Camp Floyd Silver Mining Company (Limited) has been issued. The capital required is 120,000*l*, shares being 10*l* each. The prospectus states that the company has been formed for the purchase and working of certain mining claims situated on the Mormon Chief Lode in Camp Floyd district, Utah Territory, United States of America. The purchase money is 30,000*l*, of which the vendor takes 20,000*l* in fully paid shares, leaving the company with a working capital of 90,000*l*. The shares were dealt in to-day at 2 to 2½ pm.

The shares of the Excelsior Hydraulic Gold Washing Company closed at 1¾ to 2¼ pm.

MISCELLANEOUS.—A steady tone has prevailed in this department, though the transactions have not been extensive. North British Australasia shares have risen 7; Foreign and Colonial Government Trust, 3; Rio City Improvements, and Royal Mail Steam, 1; Anglo-Mexican Mint, ½; Fore Street Warehouse and City of London Real Property, ¼. On the other hand, Native Guano shares have given way 6; City of Milan Improvements, ½; while Crystal Palace stock is 1 lower. In the new undertakings, Limmer Asphalte shares are quoted 5 to 5¼; United Limmer, ¾ to 1 prem.; Barnett's Asphalte, par to 1 prem.; Auvergne Asphalte, 1¼ to 1⅝ prem.; Native Guano, 28 to 30; Phosphate Sewage, 14 to 16 prem.; Sombrero Phosphate, ¼ dis to par; Patent Gas, 8½ to 9½; and Argentine Tramway, 1 to 1½ prem.

Messrs Shorter and King invite subscriptions for 1,500 shares of 100*l* each (part of 2,500 shares ordinary share capital) of the Nantyglo and Blaina Ironworks Company, Limited. The prospectus, which appears in our advertising columns, states that "these shares are entitled to rank for dividend up to 8 per cent. per annum, after a similar dividend has been paid on the preference shares, and are further entitled to participate rateably with the preference shares in all surplus profits. The price of the shares now offered for subscription is 80*l* per 100*l* share, payable at the dates above-mentioned, or, at the option of subscribers, the whole amount may be paid up on allotment, under discount at the rate of 8 per cent. per annum on such prepayments."

EXCHANGES AND BULLION.—The exchanges to-day have once more become less favourable to England than they were a week ago, or the middle of the present week, when the highest point was touched. This is especially the case with the Paris exchanges the quotation to-day for the short exchange being 26 to 26·5, against 26·10 to 26·35 on Tuesday. The exchanges on Amrsterdam, Rotterdam, Hamburg, and Belgium are, however, all lower, and there is also a slight fall as compared with Tuesday in the exchanges on Berlin and Frankfort. The arrivals of gold have, however, been very large during the week, and still continue, as will be seen from the subjoined details.

The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—There is not the slightest demand for gold, and during the week the large amount of 1,753,000*l*, consisting chiefly of French gold coin, has been sent into the Bank, and further amounts will follow, as the exchanges keep at such a point as to attract gold hither. Sovereigns to the value of 52,000*l* have been withdrawn for Buenos Ayres. The Simla has taken 68,000*l* to India.

Silver has slightly increased in value. There has been a fair demand for India owing to a rise in the exchange, and the Simla has taken 124,000*l*. We have received during the week about 40,000*l* from New York.

Mexican dollars are without change in price, and the Simla has taken 51,790*l* to China. We have received about 20,000*l* from New York during the week.

Exchange on India for Banks' drafts at 60 days' sight is 1s 11½d per rupee. The Council bills were allotted yesterday: to Calcutta 300,000*l*, 41 per cent. at 1s 11¼d, and to Bombay 100,000*l* in full, at the same rate. The minimum, as before, was 1s 10½d per rupee.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto refinable, 77s 11d per oz std, last price. Silver—Bar silver, fine, 5s 0⅜d to 5s 0½d per oz std, last price; ditto containing 5 grains gold, 5s 0⅜d to 5s 0⅝d per oz std, last price; Mexican dollars, 4s 10¾d to 5s 0¼d per oz, last price.

According to the *Gazette* return the imports of the precious metals into the United Kingdom during the week ended October 18 were:—Gold, 1,362,077*l*; silver, 510,789*l*. The exports were:—Gold, 1,981,408*l*; silver, 354,454*l*.

The sum of 231,000*l*, chiefly in foreign coin, was sent into the Bank to-day, while 5,000*l* in sovereigns was withdrawn for transmission to Buenos Ayres.

We are indebted to Messrs J. Allard and Co., of Paris and London, for the following telegram, giving to-day's exchange and bullion quotations in Paris:—

NOTICES AND REPORTS

STOCKS.

Confederate Cotton Loan.—The committee invite attention of the holders to the necessity of sending in the numbers and amounts of their bonds to Messrs Spain and Andrewes, of 1 Gresham buildings, Basinghall street, as the memorial evidence in course of preparation will be closed on 1st November. Holders of the Confederate Dollar bonds are also requested to send in the numbers and amounts of their bonds to the same firm, in order to the due preparation of the arrangements being made for presentation of their claims before the Commissioners appointed under the Treaty of Washington.

Costa Rica 6 per Cent. Loan, Second Issue.—Messrs Bischoffsheim and Goldschmidt are inviting subscriptions for a second issue of 500,000*l* nominal, to enable the Government to construct the railway now in progress and other works of utility "with the utmost vigour." The guarantee and conditions of the loan are the same as for the May issue, both having interest payable in London in May and November, and being redeemable by a 2 per cent. per annum cumulative sinking fund, applied half-yearly. The issue price is 74*l* per cent., reduced to about 73*l* per cent. by the discount on the prepayment of instalments; and holders of the first issue have a priority in the allotment of the second.

Peru 3 per Cent., 1825.—Bonds representing 83,000*l* have been purchased and cancelled.

RAILWAY COMPANIES.

Dundee.—The receipts during the year amounted to 19,226*l*, and on the Dundee Extension line to 7,374*l*, making together 26,600*l*. From this was deducted 14,623*l* for debenture and other interest, and the guaranteed dividends for the year, leaving a surplus for rent, taxes, and working expenses to the Great North of Scotland Railway Company of 12,017*l*, as compared with 10,940*l* last year, showing an increase of 1,077*l*.

Dunstable.—The revenue account for the half-year showed that 18,024*l* has been received and 8,253*l* expended, leaving 9,770*l*. The divisible balance was 9,278*l*, out of which the directors recommend a dividend on the original stock at the same rate as on the preference stock—viz., 7 per cent. per annum, amounting on the whole capital to 8,750*l*; leaving 1,220*l*.

Hull and Barnsley.—The traffic receipts for the half-year ended the 31st of August amounted to 119,456*l*, less 2,500*l* tollage, leaving 116,956*l*. To this was added rents, &c., and 117*l* from the preceding half-year, making together 118,790*l*. The expenditure for working amounted to 48,795*l*, leaving the net revenue 70,000*l*. This is sufficient for the declaration of an ordinary dividend at the rate of 5 per cent. per annum, and a surplus of 963*l*. Capital expended, 2,950,654*l*.

Midland.—10,000*l* in Class A Mortgage Bonds have been drawn for redemption.

National Penn Pen.—The National Pisco to Yea Railway Company being now complete and open for traffic, the first semi-annual drawing at the rate of 2 per cent. per annum of the loan for 250,000*l* will take place at the offices of Messrs J. Thomson, T. Bonar, and Co. on the 1st proximo.

Grand Trunk of Canada.—The revenue accounts for the half-year ended June 30, compare as follows with those for the corresponding period of 1870:—

	1870.		1871.
	£		£
Gross receipts	794,587	.....	777,502
Working expenses	366,702	.....	348,417
Net	144,885	.....	179,085
Add previous balance	1,057	.....	1,118
	165,943	.....	180,203
Less—Fixed and ordinary revenue	£49,723	£51,672	
Terminal accommodation	7,367	7,367	
Interests, rents	108,851	121,570	
	137,943	.....	172,771
Surplus	8,652	.....	7,432

The item "interests, rents" in both half-years, includes all rent charges and 1st and 2nd Equipment bonds' interest also during the past half year 20,994*l* for interest on hired cars. The [illegible] harvest last year caused a decrease in local freight receipts, which however was counterbalanced by the through traffic. The working expenditure during the half-year included 68,781*l* for renewals, making the ten years' renewals 1,248,597*l*. The loss on currency conversions during that period was 144,832*l*. The addition of 1,220,000*l* to the capital account has been caused by the absorption of the Buffalo and Lake Huron. The International Bridge is being rapidly proceeded with. With regard to the intercolonial railway the section from Riviere du Loup to Metis will be completed early next year, as well as the St John's (New Brunswick) and Halifax section. The intermediate portion will, it is expected, be opened in 1873.

New Zealand.—The revenue accounts showed a net profit on the half year's working of 81,852*l*, equal to 6¼ per cent. on the whole guaranteed capital of 2,600,000*l*. This sum with the small balance of 10,000*l* received from the Imperial Provincial Government, enables the directors to propose the payment of a dividend at the rate of 6½ per cent. per annum, carrying a balance of 2,721*l* to the reserve. The works of the Campinas extension and the Itu branch are being vigorously proceeded with.

South Austrian, Lombardo-Venetian.—The November dividend will be 7½ francs per share.

BANKS.

Bank of Queensland (in liquidation).—At the meeting the total debts were estimated at 3,434*l*, and the cash assets at 1,244*l*. The remaining assets, it is anticipated, will realise fully 74,500*l*. The debentures to be divided amongst the proprietors, on completion of the bridge at Brisbane, will, it is thought, yield from 8*l* to 9*l* per share.

Chartered Mercantile Bank of India, London, and China.—A dividend of 3 per cent. for the half-year has been declared. Balance carried forward, 20,547*l*.

Oriental Bank Corporation.—Dividend declared at the rate of 12 per cent. per annum.

Standard Bank of British South Africa.—The profit for the half-year, including 291*l* brought forward, amounted to 23,318*l*, which the directors recommend should be disposed of as follows, viz.:—To rebate, 8,282*l*; to reserve fund, 4,000*l*; to dividend of 12s 6d per share on the shares with 25*l* paid, and of 5s on those with 10*l* paid, 10,208*l*; and to balance, 827*l*. The favourable results now shown are due to the improvement of business.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Australian Mortgage Land and Finance.—Interim dividend declared at the rate of 10 per cent. per annum; surplus, 8,625*l*.

MISCELLANEOUS COMPANIES.

Auvergne Bituminous Rock and Paving, Limited.—Capital, 150,000*l*, in 10*l* shares. For the sum of 120,000*l*, of which 70,000*l* will be in the shape of fully paid shares, six bituminous rock mines will be sold to this company, together with the business and premises of Messrs Jaloureau at Clichy. The mines, situate in the Auvergne district of France, within a short distance of a navigable branch of the Loire, and the asphaltes, which are stated to be of all degrees of impregnation, can be delivered in London for 27s per ton. The properties are held in perpetuity without royalty, and the supply is stated to be inexhaustible. 8,000 shares are offered for subscription.

Barnett's Patent Asphalte Paving, Limited.—Capital 100,000*l*, in 5*l* shares. Mr Frederick Barnett, who has just manufactured and laid the asphalte for the roadway at the City end of Moorgate street, sells to this new company, for the sum of 50,000*l* (40,000*l* in shares), his patents and temporary works, and his services are reserved in the management of the undertaking. The prospectus states—

The following are some of the special advantages which this system possesses:—1st. The materials of which Barnett's asphalte is composed are readily obtainable in this country, to an extent practically illimitable. 2nd. This company is not dependent upon foreign countries (as many companies are) for a supply of rock asphalte, under monopolies for which large royalties have to be paid. 3rd. The freedom from interruption of supply of materials which other companies may have to contend against in the event of any continental disturbances. 4th. The constituents used in this asphalte render it more durable in character than any other yet employed. 5th. The objection raised to asphalte pavings on the ground of their slippery condition in certain states of the weather is obviated. 6th. The cost of the materials employed in the manufacture of this asphalte admits of its being laid down at a reduction of about 20 per cent. below the charges of other companies. 7th. It is not affected by temperature, and occasions no annoyance during the process of laying down.

Briton Ferry Collieries, Limited.—Capital, 60,000*l*, in 5*l* shares. Messrs F. Everett and Co. are offering 20,000*l* in 8 per cent. debentures, having seven years to run, at the issue price of par. The colliery will then, it is stated, be able to make an out-put of 100,000 tons per annum. The vendor has accepted his remuneration in shares.

Gloucester and Berkeley Canal.—A dividend at the rate of 4*l* per cent. per annum has been announced.

North British Australasian.—The report recommends a dividend of 7 per cent., carrying forward 3,367*l*.

Rhondda Merthyr Steam Coal, Limited.—Capital, 60,000*l*, in 5*l* shares. The purchase of the Ty Newydd Colliery (South Wales) will be effected by this new undertaking.

Swansea Bituminous Colliery and Firebrick, Limited.—Capital, 25,000*l*, in 500 ordinary and 4,500 preference shares of 5*l* each. 19,000*l* of the preference shares are now being offered, the object being to purchase this property, situated close to Swansea.

MINING COMPANIES.

Camp Floyd Silver Mining, Limited.—Capital, 120,000*l*, in 10*l* shares. Three mines, the "Marion," "Sparrow Hawk," and "Last Chance," extending nearly 3,000 feet on the "Mormon Chief" lode, will be purchased and worked by this company. The purchase price is 80,000*l*, of which one-third will be in fully paid shares.

Cardiac Hydraulic Gold Washing Company of California, Limited.—Capital, 250,000*l*, in 14,000 ordinary shares (taken by the vendor), and 20,000 fifteen per cent. cumulative preference shares (11,500 shares taken by the vendor) of 10*l* each.

To complete the purchase, 60,000*l* in cash will also be paid. Messrs Chadwicks, Adamson, and Collier, now invite applications for 13,500 of the preference shares. It is proposed to acquire and work by hydraulic power the Coon Hill auriferous gravel deposits near Placerville, California; to work a well-known auriferous vein of quartz; to purchase the canals, tributaries, water franchises, &c., already existing in that locality; and to construct a canal about 30 miles long, to bring water from a higher level, for washing out gold deposits.

Malaga Lead, Limited.—Capital, 40,000*l*, in 10*l* shares. Issue of 15 per cent. first mortgage debentures to the extent of 20,000*l*. These debentures entitle the holder to a similar amount of paid-up shares. The object is to purchase for 30,000*l* (two-thirds in shares) the silver-lead mines of Paquito.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was no feature to notice in the grain trade to-day. The demand for English wheat ruled quiet, but values were unaltered for both white and red descriptions. Foreign wheat sold slowly on former terms. Flour was held at late rates, but there was little inquiry for either town or country marks. Maize and oats commanded late rates, while barley, beans, and peas were unaltered in value. The week's imports of foreign and colonial produce into London have amounted to 8,920 qrs of wheat, 17,110 barley, 32,020 oats, 3,470 beans, 420 maize, 580 barrels of flour.

The Liverpool cotton market opened with an active demand on Friday last, and on Saturday an advance of about $\frac{1}{16}$d per lb was obtained. On Monday there was a quieter tone, and since then the market has been dull, and the above advance has been quite lost, quotations showing a decline of $\frac{1}{16}$d per lb. since last Friday. The total sales for the week are 84,550 bales; of which the trade have taken 56,540 bales; speculators and exporters, 28,010 bales. The imports are 68,383 bales, the actual exports 11,358 bales, and to-day's stock is 473,640 bales. To-day the market closes dull; sales, 10,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended October 19, 1871:—

	Imported.	Exported.
American.....bales	12,041	691
Brazilian	9,876	1,156
East Indian	52,360	13,530
Egyptian	2,329	365
Miscellaneous	1,448	358
Total	78,054	16,100

At New York, on the 19th instant, middling Upland cotton was quoted at 19½ cents per lb. Bombay advices, dated October 16, report cotton quiet at 229 rupees for fair Dhollerah. The shipments of the week had amounted to 13,125 bales.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, Sept. 19:—For some days after the last mail left, English telegrams were received reporting the Liverpool market quieter, although without any material change in prices, quotations on the 11th being 7¼d for Dhollerah and 9$\frac{11}{16}$d per lb for middling Orleans. From this point a steady improvement set in, and on the 12th Orleans stood at 9¾d, on the 14th Dhollerah had advanced to 7$\frac{5}{8}$d, and on the 16th, the latest date to which we have news, quotations are 7⅞d and 9$\frac{13}{16}$d per lb respectively, with a firm market, and sales amounting to 23,000 bales. The same telegram reports that the Washington Agricultural Department now estimates the cotton crop at 3 to 3½ million bales, according to the favourableness or otherwise of the remainder of the season. This shows some reduction, previous estimates having pointed to a probable out-turn of 3½ million bales, and no doubt the recent advance in Liverpool is thus accounted for. We have again to report a very small week's business, only about 2,000 candies in all having changed hands, of which the bulk is for delivery in 1½ to 3 months. Arrivals continue very small, and our stock of ready cotton now offers very little selection to buyers, while for forward delivery dealers can only be tempted by very extreme prices, say 227 rs for Dhollerah in 4 to 6 weeks, and 235 rs for sawginned Dharwar in 3 months. Quotations for ready cotton are to a great extent nominal. We have had very little rain in Bombay during the past week, but accounts from the districts continue on the whole encouraging. Nothing of special import has transpired however. From Tinnevelly we have a telegram of yesterday's date, quoting 7¼d c. and f., with a very firm market.

EXPORT of COTTON from BOMBAY to September 18.

	1871.	1870.
London.....bales	21,705	1,570
Liverpool	672,182½	792,077
Total, Great Britain	693,887½	793,647
Channel for orders	37,333	10,379
Continent	265,770½	130,877
China	47,879½	44,883½
Grand total	1,044,870½	979,786½

Actual exports since last mail left, 2,375 bales.

The Imperial Ottoman Bank have furnished the following report, dated Alexandria, October 6:—There has been a strong demand for cotton throughout the week, almost entirely on account of speculation, and the recent exciting news received from Liverpool has greatly increased the animation in our markets. The receipts being insufficient to meet the requirements of purchases, prices have advanced about 1d per lb since last mail (Saturday), and at the Daira auction yesterday, extravagant figures were paid, viz., 11¼d to 11¾d per lb, f.o.b., for good fair to fully good fair, and 12¼d to 12¾d ditto, for fully good fair to good. For trade produce we quote:—Good fair, with staple, 11d per lb, f.o.b.; fully good fair, 11¼d to 11⅝d, ditto. There is scarcely any of last season's cotton left in stock here. Contracts for November delivery—fair, 10¾d to 11d per lb, f.o.b., and ¼d less may be quoted for January. Shipments from September 23 to October 6—England, 1,983 bales; France, 111; Italy, 16; Austria, 122—total, 2,232 bales.

The colonial produce markets have ruled steady this week. Sugar, though less active, has commanded full rates for both raw and refined goods. The stock in the United Kingdom is estimated at 142,380 tons, against 189,640 tons last year, while the quantity of East India sugar afloat is 34,600 tons, against 32,200 tons in 1870. Common and pale descriptions of coffee have been in active request, and close at an advance of 1s to 2s per cwt on the week, but the finer qualities have been somewhat neglected. Rum has ruled steady in value and demand. In cocoa there has been little doing, but prices are unchanged. Spices have continued firm, white pepper being considerably dearer. Oils and metals have ruled steady.

The following report, dated Sept. 16, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—There has again been a moderate business in exports, our clearances outwards still showing a heavy decline on shipments of coffee, the whole of which difference is in plantation kinds. The distribution of our exports may be seen below:—

PLANTATION COFFEE.

	1871.	1870.
	cwts.	cwts.
To Great Britain	719,616	815,112
Foreign ports	40,981	48,948
Australia and India	14,563	15,391
	775,154	879,451

NATIVE COFFEE.

	1871.		1870.
	cwts.		cwts.
To Great Britain	93,711	.....	65,297
Foreign ports.....	31,675	.....	59,473
Australia and India ...	4,021	.....	2,366
	129,407	.....	127,136

The transactions in parchment coffee have scarcely been equal in extent to those previously advised, and though we have no lower quotation, we must call the market less buoyant than at the date of our last circular. A few parcels of native ordinary picked and dried have been on offer at 50s, without meeting with purchasers.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, Sept. 15.—The advices from Tirhoot, Champarun, and Chuprah received during the past week lead us to fear that the yield from the Khoontees will be almost as great a failure as was the case last year; in some parts the **weather appears to have cleared up somewhat lately, but we** are afraid it is too late for the plant to recover; by next mail we hope to have received sufficient revised estimates to enable us to give you a pretty correct idea of the probable out-turn, which at present, we regret to say, looks more likely to be about 42,000 than 50,000 maunds. There is no improvement to report in the Benares or North-West provinces, where the Khoontees have been nearly all worked off with very poor results, **and there does not appear any chance of the yield from the Assaroo plant doing any thing to compensate for the** wretched returns of the former. At the opening of the season this part of the country had very brilliant prospects, and it looked as if we might expect an out-turn of 40,000 maunds, whereas it is now an open question whether there will be half of this quantity. The following transactions for arrival are reported:—M M and Co., Bogwanpore, Monghyr, about 500 maunds, at 290 rs per fy. maund; M. S S., Munshye, Purneah, about 320 maunds, at 285 rs per fy. maund; the former on the usual terms, the latter without the allowance of 5 per cent rebate.

The annexed is dated New York, Oct. 6.—There is very little change in the commercial situation. The volume of trade holds on remarkably well, considering the erratic course of the gold exchange and money markets. Stocks of leading commodities, **as a rule are moderate, and prices firm. The decline** in gold to 113¾ gave colour to rumours that the gold clique, **having realised largely from the high price lately current, had** abandoned its scheme for forcing the premium to a higher point. The foreign exchange market being freed from this incubus, became active at advanced rates, and thus restored motion to the wheels of commerce, which had been seriously **clogged by the dead lock, the importer having been unwilling** to buy, and the exporter unable to sell his bills, nor therefore to ship his produce. But this improved aspect of the financial situation was short-lived. The bids for the Treasury gold **were rising seven millions on Thursday, at 114 and a fraction** over, and when it was found that the awards figured but two millions, the speculative clique took renewed courage, and carried the price in the open market to 114¾, the less favourable news of the European financial advices per cable assisting the upward tendency. Yesterday the market was again higher and unsettled, and with a scarcity of cash gold exchange has again settled into the old rut of depression, thus restricting the export trade.

THE COTTON TRADE.

LIVERPOOL.—OCTOBER 19.

The cotton market was active on Friday and Saturday, with an advance in prices. Since then there has been a quieter feeling and during the past three days the business has been in favour of buyers. For Sea Island there continues an active demand, chiefly for the medium and better grades of Florida. Prices of all descriptions except very common have risen about 2d per lb during the past fortnight. Americans also advancing, sales on Thursday, 7000 bales, Friday, 6000, and yesterday 10,000 bales. New York advices 1/16th higher, quiet, quite nothing. Inland 10th costs, trading to sell in Liverpool 16½ per lb, by steamer. Brazil rice is active demand at 1d per lb cheaper, but with less inquiry; prices about last week's currency. Egyptian continues a matter of the utmost quietness. East Indian may be quoted nominally in the beginning of the week at rather higher rates, but during the past few days prices have become weaker and irregular, and close in a few instances rather lower.

In cotton "to arrive" and for future delivery the transactions continue limited. The latest quotations are as follows, viz.:—Surats (from any port), new crop, and below good ordinary, November-December shipment, 5⅞d; Dhollerah, new crop, ship. month, 7⅛d; New Orleans, new crop, and below good ordinary, November-December shipment, 9 1/16d; ship. month, 9⅛d per lb.

The sales of the week, including forwarded, amount to 84,550 bales, of which 17,740 are on speculation, and 10,270 **declared for export, leaving 56,540 bales to the trade.**

OCTOBER 20.—The sales to-day will probably amount to **about 10,000 bales; the market without change.**

An increase of quantity taken for consumption of	472,780
An increase of actual exports of	252,570
A decrease of stock of	64,940

In speculation there is an increase of 351,180 bales. The imports this week have amounted to 68,383 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to October 13) is 43,000 bales, against 47,800 bales at the corresponding period last year. The actual exports have been 11,358 bales this week.

NEW YORK.—Oct. 6.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Oct. 6. From the figures thus obtained it appears that the total receipts for the seven days have reached 46,044 bales, against 34,073 bales last week, 20,606 bales the previous week, and 12,561 bales three weeks since, making the total receipts since Sept. 1, 1871, 122,596 bales, against 192,266 bales for the same period of 1870, showing a decrease since Sept. 1, this year, of 69,670 bales. The exports for the week ending this evening reach a total of 13,198 bales, of which 13,048 were to Great Britain, none to France, and 150 to rest of the continent, while the stocks as made up this evening are now 116,385 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending Oct. 6.	Exported to		Total this week.	Same week 1870.	Stock.	
	Great Britain.	Continent.			1871.	1870.
New Orleans	3228	...	3228	1692	22949	38634

Total since Sept. 1	52318	3706	56024	45188	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 2,685 bales, while the stocks to-night are 28,102 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Sept. 29, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph:—

Ports.	Receipts since Sept. 1.		Exported since September 1 to				Coast-wise.	Stock.
	1871.	1870.	Great Britain.	France.	Other Foreign.	Total.	Ports.

Total this year	76552	...	39270	3472	84	42826	37438	97242
Total last year	...	123317	28104	1694	7	29805	79007	107420

The feeling among holders in the market the past week has been (until the close to-day, when the report of monetary derangement at London was construed unfavourably) one of growing confidence. Liverpool has shown considerable activity with prices tending upwards, and to this favourable turn our own market has responded by an improvement in prices, without however inducing extensive inquiry, closing to-night at 20¼c for middling Uplands, against 19¾c last Friday. The continued small receipts at the Southern ports, as compared with the same period of last season, and the consequent small stock here, has strengthened the position of holders, enabling them to control the present stock and the prospective arrivals in the near future. Hence the great cause for the timidity observable a few weeks since has been removed, while at the same time the views of those who are looking for a very material falling off in our crop have been strengthened. The scarcity and very high rates for freight have, however, tended to limit the operations of shippers, while spinners, owing to the considerable stock they still hold, have only purchased in a small way. At the close to-day, however (as noticed above), there was less buoyancy, and prices favoured the buyer. This was probably due, however, more to the financial derangements in London, and the fear that the Bank of England would further advance its rates of discount, than to any inherent weakness in, or any change in the position of, cotton. For forward delivery there has been a less active movement, but the improvement during the week is about the same as for spot cotton. Low middling closed to-day at 19¾c for October, 19¾c for November, 19¾c for December, 19¾c for January, 20¼c for February, 20¼c for March, and for April, 20¼c. The total sales of this description for the week are 72,650 bales, including 2,000 free on board. For immediate delivery the total sales foot up this week 16,491 bales, including 8,941 for export, 6,186 for consumption, 680 for speculation, and 684 in transit. Of the above, 583 bales were to arrive. The following are the closing quotations:—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary per lb	17¼ @ ...	17¼ @ ...	18 @ ...	18¼ @ ...
Good ordinary	19½ ...	19½ ...	19¼ ...	19½ ...
Low middling	19¾ ...	20⅛ ...	20⅛ ...	20¼ ...
Middling	20¼ ...	20¼ ...	20¼ ...	21¼ ...
Good middling	20¾ ...	21¼ ...	22 ...	22¼ ...

For forward delivery the sales (including 2,000 free on board) have reached during the week 72,650 bales (all low middling or on the basis of low middling).

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:—

	Week ending Oct. 6, 1871.			Week ending Oct. 6, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	3938	3262	5158	6725	6326	2624
Columbus	1089	830	2168	2710	2434	3486
Macon	2102	1501	2759	4873	4359	4219
Montgomery	2220	1692	3337	3644	1406	3813
Selma	1785	1662	1941	3631	2711	3875
Memphis	7991	4971	5786	4342	2387	5939
Nashville	1211	921	880	273	569	1603
	20336	14839	22039	26198	20192	25759

The above totals show that the interior stocks have increased during the week 5,437 bales, and are to-night 3,720 bales *less* than at the same period last year. The receipts have also been 5,862 bales less than the same week last year.

The exports of cotton this week from New York show an increase since last week, the total reaching 7,221 bales, against 5,009 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1871; and in the last column the total for the same period of the previous year:—

—*New York Commercial and Financial Chronicle.*

NEW YORK, October 13.—According to Messrs Moffatt, Dawkins, and Co's report, the week's receipts of cotton at all United States' ports have been 64,000 bales, and since the 1st of September, 180,000 bales. Shipments to England, 16,000 bales; direct to France, 2,000 bales; and to the continent none. Total since the 1st of September, 78,000 bales. Stock at all ports, 147,000 bales. Middling Upland, 9¾d. cost and freight, per steamer.

NEW YORK, Oct. 17.—The receipts of cotton at all United States' ports for the last four days have been 42,000 bales. Shipments to England, 5,000 bales; to France, 2,000 bales. Middling Upland, 9¾d. cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Oct. 14.—This market has been very dull and depressed in tone for some days, as the business done lately has been so limited that stocks have very materially increased, especially in cloth, and now that the excitement in cotton has disappeared, and in its place a dull market at lower prices, buyers of yarns and goods are naturally inclined to wait, in the hopes of buying cheaper shortly. In yarns, all coarse numbers are dull, medium numbers are in moderate request, while fine counts continue well engaged. Cloth is particularly depressed and difficult to move, especially the makers of 39 in shirtings, for which there seems no demand.

BRADFORD.—The wool market has an improved tone. There is more inquiry for wool and rather more business is doing. Lambs and fleece wools, particular wethers, are quoted 1d. higher, and prices are stiffer than they were a week ago. The yarn market shows a better feeling. There is a slight increase in the demand for twofold 30's and 36's, as well as in genappe yarns. In the piece-market there is less disposition on the part of many merchants to do business. The shipping transactions are, consequently, very small.

LEEDS.—The woollen market has been quite brisk. There was a full attendance of merchants and manufacturers, and both the Manufacture and Bradford trades were well represented. The expectation of buyers was that stocks were very low, and those who wanted to get up their spring goods were naturally in a difficulty. The sale of white goods was most extensive, but the deliveries made direct from the cloth hall far exceed the supplies which are accumulated there on market days.

BIRMINGHAM.—The thread market was decidedly better than it has been for some weeks. There was little or no business passing except for covering up stocks. The market for Yorkshire goods was in correspondingly slow condition, but prices were quite firm.

NOTTINGHAM.—The lace trade is in much the same state as last week, business being in a backward and unsatisfactory condition for the time of the year. Lace yarns have advanced in price, and raw silk remains firm. Hosiery yarns maintain high values.

BELFAST.—Flax.—For this season of the year supplies in our market were not extensive. A fair moderate demand prevailed at unaltered prices. Yarns.—Sales effected reached a tolerably large amount. Stocks stationary. Prices steady. Powerloom linens (brown).—Business transacted in almost all descriptions was again of a fair steady character. Stocks very moderate. Handloom.—Good makes of light linens have been disposed of as fast as produced. Bleached linens.—Demand healthy, though by no means active. Full prices current were generally obtained.

BIRMINGHAM.—Contrary to the general experience of the meeting following quarter-day, there was a rather large attendance on 'Change to-day, and transactions, if not very extensive in the aggregate, were fairly numerous. Since last week the labour-market has assumed a more settled aspect. The general quotations for bars among respectable firms is £7 10s. Hoops and plates are scarce, and for these prices rule relatively higher. The pig-iron market is firm without change, makers being well under contract.

WOLVERHAMPTON.—An excellent tone pervaded the meeting of iron and coal masters and hardware merchants. In every department of the industries of South Staffordshire there is great activity. The difficulty is to get the work out of hand sufficiently early. Even at the extraordinary price of 32s a ton, delivered here, very large sales of the choicest samples of Cumberland ore occurred. Other ores are selling in similar quantities freely. Coal is in great request, as well for all kinds of manufacturing and smelting operations as for domestic purposes. Hence another 9d a ton has been put upon the coal sold in the thin-coal district on the Wolverhampton side, where the prices of certain Bloxwich samples are 8s 9d a ton.

DUNDEE.—Our flax market continues firm, but the amount of business doing in common and medium sorts is still of a limited character, there being little or no disposition as yet on the part of consumers to add to their stocks. For the better descriptions of flax, however, there is still a good inquiry, and as certain kinds are already becoming scarce prices are very stiff. Tows of medium qualities continue to be in good request, at about former prices. Common and low qualities of jute continue dull, and holders find difficulty in selling such at satisfactory prices. Of good and fine qualities there is comparatively little for sale in this market, and any suitable parcels that offer find buyers at steady prices. Flax and tow yarns have been in rather more limited demand. The demand for linens is at present very good, and for various descriptions of jute goods there is also an extensive demand, so that manufacturers are all fully employed.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, OCT. 6.

The activity and buoyancy in flour and wheat, noticed in our last, subsided on Tuesday, and since then the whole market has been depressed, except for rye. The receipts of flour continue moderate. On Saturday and Monday last the demand was active, almost without precedent. In those two days the sales aggregated nearly one hundred thousand barrels, including large lines of extra State for October and November delivery, at $7.25 to $7.75. Tuesday morning prime shipping extras were held at the opening at $8, but buyers having withdrawn there was a quick decline to $7.50, and since then prices have given way daily, with a very limited business. Lines of Western extras sold from the wharf at $7, but to-day prices were almost nominal. The family brands have also lost a portion of the late advance. Rye flour has advanced in sympathy with the rise in the grain, and corn meal has been doing better, but closes quiet. Wheat was excited and buoyant the first half of the week, and the opening prices on Tuesday were $1.60 to $1.62 for No. 2 spring, $1.75 for amber winter, and $1.79 for white Michigan; since that day prices have declined 7c to 10c per bushel, and the close dull even at the decline. The receipts have greatly increased, while the demand has greatly fallen off. Private advices from Great Britain have reported a large increase in farmer's deliveries, and limits in hands of export buyers have been materially reduced. Of the wheat arriving much of it pays a good profit, even at the decline, and with the money market weighing close, receivers are quite disposed to sell on arrival. Receipts continue large at the Western markets, being 4,000,000 bushels wheat for the last half of September, against 3,100,000 bushels for the corresponding period of last year. The exports for the same time showed an increase of more than a million bushels, but as they have not been kept up the present depression is felt. At to-day's market No. 2 Milwaukee spring sold at $1.51, amber Michigan, $1.66, and white Michigan, $1.70 to $1.72. Corn advanced to 78c for Western mixed early in the week. Receipts have been small, and the quantity afloat on the canal for this market is quite reduced. But latterly Liverpool has declined, and export orders almost entirely withdrawn, hence sellers closing at 74½c to 75c, in store and afloat, and 77c to 77½c for yellow afloat.

The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

There is no feature of especial interest to notice in the grain trade. The destruction of produce at Chicago has not sensibly affected prices, and the market closed to day with a dull tone. The quotations for wheat showed no material variation from those current at the date of our last issue. Supplies of English wheat have been more liberal, while the show of foreign has been extensive. The quality of the samples, however, has been somewhat indifferent, recent arrivals from the south-east of Europe being much out of condition. Flour has been held for late rates, but theis has checked business. Maize and oats are slightly dearer on the week, and a fair quantity of produce has changed hands. Sound Russian corn has ruled scarce, notwithstanding liberal imports from the north of Europe generally. Fine barley has been very firm in value, while beans and peas have commanded full rates.

The following return shows the imports and exports of breadstuffs into and from the United Kingdom since harvest, viz., from August 26 to the close of last week, compared with the corresponding periods in the three previous years:—

IMPORTS.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 70 grain and seed-laden vessels have arrived at ports-of-call, viz.:—40 wheat, 12 maize, 10 barley, 4 rye, 4 beans, 3 linseed, 2 rapeseed, 1 dodder-seed, 2 palm-nut kernels. The floating grain trade has been firm in tone, with prices generally tending upwards. Wheat—Fine cargoes have been steady at last week's prices. To-day American spring is 6d dearer; inferior sorts slow sale. Maize—Fine cargoes 6d dearer; secondary difficult to dispose of. Barley—Fine cargoes have been eagerly sought after. Rye 6d dearer. The reported sales are as follows:—Wheat—20 arrived cargoes: Berdianski, 55s; Marianopoli, 55s 9d; hard Taganrog, 48s 6d to 50s; New Coast Ghirka, 55s to 55s 6d; Ghirka, from Taganrog, 51s and 52s 6d; Dom ditto, 50s 3d; Rostoff ditto, 54s; Ghirka, from Odessa, 54s to 55s; ditto from Nicolaieff, 54s; Nicopol, 54s 6d per 492 lbs; white Canadian, from Montreal, 63s; red winter, from New York, 59s and 60s per 480 lbs. On passage, new Ghirka Odessa, 54s 6d to 57s per 492 lbs. Shipped or to be shipped, 4 cargoes: new Ghirka Odessa, 54s 9d and 55s per 492 lbs; white, from New York or Montreal, 60s 6d to 61s 3d per 480 lbs, net American terms, for the United Kingdom. Maize—12 arrived cargoes: Odessa, 33s; Moldavian, 33s to 35s; old Galatz, 35s 6d; Danubian, 30s; Ibrail, 32s to 33s 6d per 492 lbs. Wallachian, 29s to 31s; mixed, from New York, 34s per 480 lbs. On passage, 1 cargo ditto, 33s 6d. Barley—2 arrived cargoes: Enos, 26s 6d; Danubian, 28s 6d per 400 lbs. On passage, 5 cargoes: Danubian, 26s 3d to 27s 9d; New Odessa, 26s 6d per 400 lbs. Shipping, 1 cargo New Danubian, 27s per 400 lbs. Linseed—6d dearer on the week. Arrived—2 cargoes Azow, from Tagonrog, 61s 3d and 61s 6d per 424 lbs; and 50 tons East India, from Calcutta, 63s 9d per 410 lbs. Rapeseed—Spot dull; distant, 6s to 1s dearer. Arrived, 1 cargo cultivated Danubian, 73s 6d per 424 lbs. Cotton-seed quiet, but steady.

COLONIAL AND FOREIGN PRODUCE MARKETS

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has been a steady demand throughout the week, the refiners making rather large purchases of West India at full prices to 61 per cwt recovery. The sales to yesterday reached 2,779 casks. Barbadoes by auction was chiefly bought in. Jamaica sold at 28s to 30s 6d for brown and grey, and a good business has also been done by private contract in these descriptions. Grainy sorts have met with a steady demand, and low brown sorts fully support the recent advance. The stock at this port is now 27,600 tons less than at the same date last year. Further business has been done in French loaves for delivery here, and the refined market is rather quiet. Contracts have also been made in beet sugar for this kingdom, but the particulars do not transpire.

Mauritius.—8,529 bags by auction went as follows:—Grainy crystallised, 32s 6d to 38s; and brown, 30s to 32s; soft brown and grey, 25s 6d to 31s per cwt.

Bengal.—1,879 bags soft Gurputtah sold at 28s 6d to 30s 6d for brown and yellow.

Madras.—At the close of last week 1,200 tons grainy Jaggery sold for arrival at 28s 6d, landed terms. Since then no sales reported.

Penang.—2,000 baskets soft brown have sold at 22s 9d; and 2,400 bags at 25s to 29s.

Foreign.—2,678 baskets Java part sold at 34s 6d to 36s 6d for grainy kinds. 1,550 bags low brown Java at 20s 6d. 1,700 boxes Havana, 1,464 boxes and 482 casks Cuba were bought in above the value. Part of the Cuba in boxes since sold at 32s 6d. 209 bags Egyptian sold at 28s 6d to 38s. Privately 1,800 boxes Havana are reported at 36s to 38s for grainy. 140 casks Porto Rico at 31s. 6,800 bags clayed Manila at 26s 6d per cwt.

Floating Cargoes.—One of St Lucia at 25s 6d; one of Havana, No. 11, at 29s; one Porto Rico at 27s 6d; and 24,000 bags Manila Ilo Ilo afloat at 19s 6d for the United Kingdom.

Refined.—The market without further change, and the demand for dry goods has been moderate during the week. Fine Dutch loaves by auction sold at 39s 6d to 40s per cwt. Pieces have not in all cases maintained last week's rates.

MOLASSES.—No sales reported in West India.

RUM.—A few transactions have taken place at former rates, chiefly in common West India. Leewards, 1s 8d to 1s 9d; Demerara, 1s 9d to 1s 11d proof; Jamaica, 3s 3d to 3s 7d per gallon.

COCOA.—The market remains very quiet. Prices remain without alteration. 96 bags Grenada part sold at 67s for superior quality. 170 bags Trinidad partly found buyers at 60s to 73s 6d for grey and red. 915 bags Guayaquil, about one-fourth realised 53s to 53s 6d. 550 bags other foreign were chiefly withdrawn, a small quantity of Surinam selling at 67s to 70s per cwt. The total stock is now reduced to 32,700 bags, &c., against 38,420, and 38,100 bags, &c., in 1869 at the same date.

COFFEE.—The demand for native kinds continues, and further advanced rates have been paid up to 65s for Ceylon and East India afloat. Holders require higher prices on the spot, and good ordinary Ceylon may be quoted at 62s to 63s. The public sales of plantation have gone off steadily at fully last week's rates: low middling to middling colory, 67s 6d to 75s; good middling to bold, 76s to 82s. 5,199 cases 1,803 bags East India nearly all met with buyers: Naidoobatum, 67s to 70s 6d; bold, 72s 6d to 84s; Coorg and Wynaad, 66s to 75s for pale to bold grey, and 73s to 80s for colory. 83 half-bales Mocha sold at 89s 6d for mixed greenish and pale small berry. 755 bags washed Rio at 65s to 73s. Four cargoes of St Domingo have sold for future delivery at 60s. A floating cargo of Rio at 60s for a near port. The next sale of the Netherlands Trading Company will contain 91,200 bags Java and 5,300 bags Rio, against 116,500 bags last year at the same date. The decrease in stock here is now 6,150 tons, chiefly upon colonial descriptions and Brazil. Shipments from Colombo for the season 1870-71 will show a falling off amounting to about 5,000 tons, nearly all plantation sorts.

TEA.—The market is not very active. A moderate amount of business has been done in the teas recently imported, but prices have occasionally ruled rather lower. Fine grades keep firm. During the week there have been several public sales, at which little alteration in prices occurred. A considerable quantity of green tea sold, including Pung Suey and Movune, at 1s 1½d to 3s 9d; low Canton gunpowder at 6¼d to 6½d; young Hyson, 5d to 11d per lb. The total quantity by auction to yesterday was 23,947 packages.

RICE.—There have been transactions of moderate extent. Sales of Caslar, &c., to arrive, at 9s to 9s 4½d ex quay; fine white Bengal at 12s 6d. A floating cargo of Necrancje Arracan off the coast has sold at 10s 4½d, continental terms: one of Moulmein at 10s 4½d. On the spot a parcel of good Madras is reported at 10s 9d; some broken at 9s 9d; Ballam, 10s to 10s 3d; and field Siam at 9s 3d to 9s 6d. Moulmein at 10s 6d. 682 bags Bengal by auction sold at 11s 6d to 11s 9d for middling white. 1,210 bags Ballam were bought in. 6,489 bags Rangoon partly sold at 10s per cwt for old import.

IMPORTS and DELIVERIES of RICE to Oct. 14, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports ....tons	72050	53850	60350	56750
Deliveries	83800	58800	43000	42840
Stock	41690	45260	43030	30470

Deliveries last week, 869 tons.

SAGO remains quiet. 1,269 bags only partly sold at 14s 6d to 15s 6d per cwt for good small grain.

TAPIOCA.—608 bags Penang sold rather higher, from 2¼d to 2¾d; one lot at 3d per lb. 273 bags pearl tapioca at 18s 6d to 19s per cwt.

BLACK PEPPER.—A further slight advance has been paid, and the market continues very firm. By private contract Penang has sold at 7¼d. Singapore at 7¼d. 1,010 bags Penang by auction, 6¾d to 6¾d, mostly 7d. 1,760 bags Alleppy, part sold at 7¼d. A small parcel low grey Singapore 7d. Business has been done in Penang afloat at 6¼d per lb.

WHITE PEPPER.—The prices have advanced about 3d per lb, owing to a strong speculative demand and small stock. Singapore has sold at 1s 1d, closing yesterday at 1s 2¼d. 90 bags by auction realised 1s 1¾d to 1s 2¼d per lb.

OTHER SPICES.—Nutmegs brought full rates in yesterday's sales, when [illegible] were sold as follows: 126 to 127s, 1s 114 to 3s 1d; 84 to 70s, 4s 44 to 74; 68s, 5s 10d. 44 mace sold chiefly at steady rates. Cassia buds and Penang 4s 1d to 4s 2d; ordinary Java 4s 2d to 4s 3d, fine thin bold Penang cloves sold at 1s 8¾d to 1s 8¾d, being again dearer. 176 bags cassia lignea part sold at 1¾d to 2d per lb. 500 bags Jamaica ginger sold generally at 42s to 43s for low and ordinary [illegible] 100 bags Cochin were chiefly bought in. 100 bags sold at 71s for fine, and 70s to 41s per cwt for Bold Pimento. 412 bags [illegible] sold at 2¾d; one lot 2¾d per lb.

SUGAR.—There has been rather more inquiry after sales of about [illegible] bags, chiefly in the early part of the week, but prices [illegible] 5¼, 5¼, 5¼,

fair amount of attention. Foreign breeds also have been more freely purchased. The best Scots and crosses have made 5s 8d to 5s 10d, and the choicest foreign 5s 4d per 8 lbs. With sheep the market has been only moderately supplied. The trade has been quiet, but prices have ruled firm. The best Downs and half-breds have changed hands at from 6s 6d to 6s 8d per 8 lbs. Calves have been in moderate request, at late rates. Pigs have sold on former terms.

SUPPLIES ON SALE.

HOP MARKET.

BOROUGH, Friday, Oct. 20.—Fine new hops are still in demand, and realised further advanced rates. Medium and inferior grades were but little sought after. Yearlings sell readily at prices tending upwards:—Mid and East Kent, 10*l* to 16*l* 16s; Weald of Kent, 8*l* 10s to 10*l* 10s; Sussex, 7*l* 5s to 9*l* 9s; Farnham and country, 11*l* to 16*l*. Yearlings: Mid and East Kent, 3*l* to 6*l* 10s; Weald of Kent, 3*l* to 5*l* 15s; Sussex, 3*l* to 5*l*; Farnham and country, 4*l* 10s to 6*l*; odds, 1*l* 5s to 2*l*.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Oct. 20.—Large supplies of potatoes have been on sale. The demand has been inactive. Regents, 75s to 95s; Rocks, 70s to 75s; Flukes, 100s to 120s; Victorias, 90s to 110s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 20.—There has not been much doing here this week, but public sales are announced for the 25th inst., when about 4,000 bales of sundry descriptions, chiefly fine wools, will be brought forward.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 20.—There was only a thin attendance to-day, and wheat was dull at Tuesday's rates. Flour was slow. Indian corn, 6d down. Other articles were unchanged.

WAKEFIELD, Friday, Oct. 20.—The supplies were moderate to-day. The wheat trade was sluggish, and fine dry qualities maintained last week's prices, but other descriptions were without inquiry. Beans, oats, and malt unchanged.

The Gazette.

TUESDAY, Oct. 17.

BANKRUPTS.

John Burmester, late of Great Portland street.
J. Manning, late of Kingsland road, victualler.

HUBBUCK'S PATENT WHITE ZINC PAINT
Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER
TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 6d. Umbilical ditto, 42s and 52s 6d; postage 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT
ELASTIC STOCKINGS, KNEE CAPS, &c.,
for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

Including a free pass by rail from London to Southampton for passengers and baggage, also dock and wharfage charges.

N.B.—The packet leaving Southampton on the 12th calls at St. Helena; the packet leaving on the 25th corresponds with Natal.

Apply to Passmore and Mercer, 25 Leadenhall street, London, or Thomas Hill, Southampton.

THE COMMITTEE OF THE Seamen's Fund, constituted by Imperial Decree, for the Protection of Russian Industry and Commerce, hereby call upon the Creditors of the Department of Customs in St. Petersburg, which is now determined to maintain unaltered or pursue with all vigour its actions imported to or exported from Russia and Germany, that creditors accustoming Custom House charges with the different ministries of trade and manufactures according to the regulations of Imperial ukase of 1868, regarding the safety and protection of goods, especially of those imported into Russia for the first time, or of such as are not specified in the tariff, the duty at the same time serve to protect the interests of consumers between frontier and inland custom-houses by compensating their respective proprietors and accounts with the Treasury, as Custom proceeds by such transfers have ceased to cause the actions of manufacturers in general to those public institutions, resulting from to actual specimens or patterns of low quotations produced accompanied by brief descriptions, in the absence of the Merchants' Custom House to Petersburg who are empowered by the Society to examine for their museum.

N.B.—Cheap, useful, or patentable articles may be submitted by models or drawings and descriptions.

HOLLOWAY'S PILLS.—Low Spirits.—As autumn advances more persons suffer from unaccountable depression of spirits than at any other season. The change from the heat and apparent exhaustion of summer to the chill and damp of autumn, when, even in the finest weather, the sun is comparatively powerless, is sufficient to depress the strongest constitution. Holloway's Pills effectually clear the blood, by which means they remove a weight of care from the mind. These wonderful pills act beneficially, and speedily rid the digestive organs, that all important laboratory from the vital energy, and thus the true cause of fevers and other grievous disorders. Holloway's pills never fail in any form. In the periodic complaints of females they are invaluable, as they will be found to act like a charm, and may be safely taken at any time without the slightest exposure, as they contain no injurious ingredient.

BANKERS.

Smith, Payne, and Smiths, 1 Lombard street, London, E.C.; Brooks and Co., 81 Lombard street, London, E.C.; the National Bank of Scotland, 37 Nicholas lane, London, E.C., Edinburgh, and Branches; Cunliffes, Brooks, and Co., King street, Manchester.

Messrs CHADWICKS, ADAMSON, COLLIER, and CO. are prepared to receive APPLICATIONS for 13,500 15 per Cent. PREFERENCE SHARES of £10 each, dividend and redemption payable in London. The shares have a preferential right to dividend on the Company's revenues from extensive canals, franchises, and water rights, together with the excellent auriferous gravel beds, near Placerville, El Dorado County, California, with 45 acres unworked, producing a regular yield of gold.

These preference shares will be entitled to all the surplus profits in the way of re-payment of capital out of profits, after 15 per cent. has been paid thereon, and a like amount afterwards on the ordinary share capital, the preference shares will be entitled to full dividends, while the repayment of capital is in progress, and when so repaid, they will be substituted for fully-paid ordinary shares of equal amount, share for share.

TERMS OF SUBSCRIPTION.

£	
1	per share on application.
3	per share on allotment.
2	per share on 1st December.
2	per share on 1st March, 1872.
2	per share on 15th May, 1872.
10	

Special reports on the property by Professor Price, M.E., Alfred Poett, Esq., C.E., J. Ross Browne, Esq., and others, and confirmation thereof by the Mining Bureau of the Pacific, may be had on application.

Payments in advance of calls will be received at a discount of 5 per cent. on any days on which instalments are due.

Default in making payment of any instalment on the date fixed for the same will render all previous payments liable to forfeiture.

No intermediate profit or promotion money will be paid in connection with the undertaking, which comes to the shareholders on precisely the same terms as it is derived from the present proprietors, subject only to the necessary expenses of forming the Company.

Preference will be given in allotment to such applicants as express their readiness to pay up the shares in full on allotment, subject to the discount abovementioned, and where no allotment is made the deposits paid will be returned without deduction.

Minute particulars of the several properties are annexed, and copies of the special reports, and any other information, with maps, &c., may be obtained on application to Messrs Chadwicks, Adamson, Collier, and Co., at 65 Moorgate street, London; or, 64 Cross street, Manchester.

OBJECTS OF THE COMPANY.

1. To acquire and work the Coon Hill auriferous gravel deposits near Placerville, California, by hydraulic power; to work a well-known auriferous vein of quartz; and to purchase the canals, tributaries, water franchises, &c., already existing in that locality.

2. To construct a canal about 30 miles long, to bring water from a higher level, for washing out gold deposits.

LOCATION.

The properties concerned are situate in El Dorado county, being one mile from Placerville, 50 from Sacramento, and 150 from San Francisco, having railway connection with each of those cities, and telegraphic communication with all the world. The surrounding country comprises extensive deposits of auriferous gravel beds, the improved mode of working, which is by means of jets of water undermining the banks, and thus washing out the deposits. For this purpose a good supply of water from a high level is indispensable, but this supplied, the operation is simple, the labour required small, and the results, with such gravel beds as these at Coon Hill, very profitable and certain. Mr Otis, who negotiates this transfer, has been for 21 years resident in California, and has never known an instance of failure in hydraulic washing.

These deposits are in the immediate vicinity of Coloma, where the first discovery of gold in California was made.

PROPERTIES TO BE TRANSFERRED.

1. Existing canals, with their tributaries, sluices, and other hydraulic appliances, having a total length of 142 miles, constructed at a cost of £160,000, and drawing supplies from the South Fork of the American river, all being now profitably worked, but requiring greater elevation of source.

2. The exclusive right to all the franchises and water rights on the slope of the Sierra Nevadas, to extract water from higher levels for hydraulic washing, and for the supply of the towns between Placerville and San Francisco.

3. The "Excelsior" Auriferous Gravel Beds, comprising about 70 acres, averaging 135 feet in thickness, of which 25 acres have been worked, leaving 45 acres, containing about 9,800,000 cubic yards of auriferous gravel deposits. The hill has been worked for 17 years with most rich results, and is still in profitable operation in such parts as the existing water supply will reach.

Through the property runs a vein of gold quartz, which has been, and now is, worked on both sides of the gravel bed, and yielding good returns.

TITLE.

By deeds in fee simple to the Company of all the existing canals, with the exclusive monopoly acquired, to obtain water from higher levels on the Nevada Slope for the supply of new canals, and also by deed in fee simple of the Gold Gravel property, free from any incumbrance, —all now centered in Mr G. W. Swan, of San Francisco.

PURCHASE CONSIDERATION.

Principally of shares in the new Company, namely,—

1. 15,000 ordinary shares, taking dividends only after 15 per cent. has been paid on the preference shares comprised in the present issue.

2. 1,500 preference shares of this issue.

3. The sum of £60,000 in cash. The shares to be issued and cash to be paid only when the legal possession of the property is made over to the Company.

COST OF ADDITIONAL WORKS.

That the construction of the Water Works will be comprised within the sum of £65,000 is certified by the Engineer, Mr F. A. Bishop, C.E., and confirmed by Messrs Price and Poett, and by the expert of the Bureau of Mines of the Pacific Coast. The expenditure under this head will only be made by monthly payments on the Engineer's report of works done. These payments will be made direct through the Company's own agents, and the construction of the Canal and Water Works can be completed in the ensuing year.

MODE OF OPERATIONS.

The auriferous deposits contain an almost uniform percentage of gold, proved by the results of the 25 acres already worked, and by trial borings and tunnels throughout the remainder, to be one dollar from each cubic yard. In 17 years, with the existing fall of water, gold to the value of 5,500,000 dollars, or £1,100,000, as testified by official records, was extracted.

The portions, however, for which the existing fall of water has been available having been washed, a consolidation of ownership has been affected, hence the possibility of the present sale.

The water-course, starting at a higher level, is essential to the working of the remaining valuable deposits; and the capital for the construction of the necessary work is alone required.

The banks of gravel are undermined by means of water jets directed at their base, and in the district, a fall of water such as this Company will provide, is indispensible; and while the Company secures a complete and absolute monopoly, owners of the surrounding and neighbouring claims must of necessity consume the water, the rental for which is collected monthly, and forms a well-secured and permanent income.

By this mode of applying water power, the utmost economy of labour is effected, the water undermining the superincumbent mass, which many labourers would otherwise have to attack. Abundance of Chinese labour is available at a very low rate.

The water will be taken chiefly from the South Fork of the American river, at an elevation of 2,000 feet above the gravel beds, and supplied by miner's inches (of 100 cubic feet per hour), at a rental of 10 cents per inch per 10 hours; and as it is capable of being re-used, is again sold at a lower elevation at an average of five cents per inch. In some cases the water is thus caught and re-used four several times. The supply hitherto provided has been eagerly taken at 25 cents per miner's inch, and the importance of the water force is fully appreciated by the entire community. Claims are transferred by reference to the water accommodation; and a debt for water rent against any claim prevents its sale or future supply of water until discharged.

SOURCES of REVENUE, as Estimated by F. A. Bishop, Esq., C.E.

From Canal.	dols
10,000 inches daily of first water at 10 cents ...	1,000
5,000 inches daily of second water at 5 cents ...	250
	1,250
Allowing an average of 240 working days per annum, this gives a revenue of	300,000
Deduct management, and 10 per cent. of the water for the use of the Company.....	60,000
	240,000

—or £48,000 per annum. The above calculation is based on 10 hours per day for 240 days, but in practice the water is used throughout the 24 hours continuously and paid for accordingly, and the number of working days is also increased. This additional revenue, however, will, it may be conceded, provide an ample margin for any extraordinary contingencies.

From Gravel Beds, being an average of the estimates of the engineers—

	£
From (say) four washings per annum, treating 450,000 tons of deposit, yielding 450,000 dols gold, or	90,000
Expenses of working, management, &c. (say)...	10,000
	80,000

Total revenue as estimated—	
Canal.....	£48,000
Gold beds	80,000
	128,000, or nearly 43 %

From the short time required for construction, a dividend may be looked for the first year; and thenceforward the dividends could be made monthly.

It is to be noted, however, that the greater the rapidity of the operations, the sooner will the deposit be washed. At the rate supposed in the above estimate it would last about 22 years, and thenceforth the canal revenue will continue from sale of water for other deposits.

SECURITIES AND PRECAUTIONS.

All the documents have been certified by H. B. M. Consul at San Francisco. None of the funds subscribed will be paid to the vendors, until the Company's own agent as satisfied himself as to titles and properties, and every necessary investigation made. Messrs Chadwicks, Adamson, Collier, and Co., have instructed Professor Thos. Price, Assayer and Metallurgist, and Alfred Poett, Esq., Civil Engineer, to examine and report on this property. Their reports are confirmed by the certificate of the Mining Bureau of the Pacific Coast (Mons. J. Berton, French Consul, President), and by subsequent reports by Mr J. Ross Browne, Mr Bowe, and Mr Laskie, all of whom have been on the property, and are well acquainted with its character and value.

All these reports have been printed, and copies may be had on application at their Offices, 65 Moorgate street, London; and 64 Cross street, Manchester.

The following contract has been entered into the 6th day of October, 1871, between Stephen Otis, the Attorney of George W. Swan, of the first part, and Charles Black and Michael Buck, on behalf of the intended company, of the other part.

The prospectus is issued with copy of Memorandum of Association attached.

London, October 18th, 1871.

BARNETT'S PATENT ASPHALTE PAVING COMPANY (Limited).

Incorporated under the Joint Stock Companies' Acts, 1862 and 1867.

Capital, £100,000 in 20,000 shares of £5 each. Payment, £1 on application, £2 on allotment, and £2 on the 15th January, 1872. The total amount of £5 per share may, however, be paid in full on application. Upwards of 3,000 shares have already been subscribed by the Directors and their friends. The remainder are now offered to the public, and in their allotment priority will be given to applicants for fully paid-up shares.

OFFICES (pro tem.)—15 Coleman street, London.

ABRIDGED PROSPECTUS.

The importance of the application of Asphalte to the paving of public streets and thoroughfares, railway bridges, &c., appears now to be so generally admitted that the only questions to be considered are those of quality, durability and cost.

The invention of Mr Frederic Barnett, which this Company has acquired, has the singular advantage over others, that nearly 80 per cent. of the materials required are products of this country, and easily procurable, and the remaining portion can be obtained here at an ordinary commercial price, not being the subject of any monopoly. The supply of all the materials is inexhaustible.

The durability of Barnett's Asphalte has been practically tested in Paris by an ordeal of four years, it having been laid down in the Rue Vide Grousset in 1867, the Guichets of the Place du Carousel in 1868, and other parts; and the original certificate of approval of the Ingenieur en Chef des Travaux Publics can be inspected at the Company's Offices.

The Commissioners of Sewers of the City of London have also selected it for re-paving a portion of Moorgate street, extending to Lothbury, and a contract has been entered into with them with a condition for an annual payment by the Commissioners for its maintenance during a period of fifteen years.

The following are some of the special advantages which this system possesses:—

1st. The materials of which Barnett's Asphalte is composed are readily obtainable in this country, to an extent practically illimitable.

2nd. This Company is not dependent upon foreign countries (as many companies are) for a supply of Rock Asphalte, under monopolies for which large royalties have to be paid.

3rd. The freedom from interruption of supply of materials which other companies may have to contend against in the event of any continental disturbances.

4th. The constituents used in this Asphalte render it more durable in character than any other yet employed.

5th. The objection raised to Asphalte pavings on the ground of their slippery condition in certain states of the weather is obviated.

6th. The cost of the materials employed in the manufacture of this Asphalte admits of its being laid down at a reduction of about 20 per cent. below the charges of other companies.

7th. It is not affected by temperature, and occasions no annoyance during the process of being laid down.

The Directors have secured, on advantageous terms, the services of Mr Frederic Barnett, the Patentee, as Manager of the Company.

The purchase by the Company comprises the Letters Patent, patented machinery, temporary works, and the benefit of the contract with the Commissioners of Sewers for the City of London. The purchase money is £55,000, of which however only £10,000 is payable in cash, and the remainder in fully paid-up shares.

Prospectuses and forms of application for shares may be obtained from the Bankers, Brokers, Solicitors, and Secretary of the Company.

BARNETT'S PATENT ASPHALTE PAVING COMPANY (Limited).

Notice is hereby given, that the LISTS of APPLICATIONS for SHARES in this Company, will CLOSE on TUESDAY, the 24th inst. for London, and on WEDNESDAY, the 25th, for the country.

SOLICITORS.

Messrs. Baxter Langham, Esqs., 6 Adam's court, Old Broad street.

SECRETARY.—W. J. Lavington.

OFFICES.—14a, Austinfriars, London, E.C.

This Company has been formed for the purchase and working of certain mining claims situated on the "Sparrow Hawk" lode in Camp Floyd district, Utah Territory, United States of America.

The claims are known as the "Martha," the "Sparrow Hawk," and "Last Chance," and adjoin other, extensively worked mines on the lode. From the various statements it would appear that a tunnel has been driven through the lode for a length of 1,200 feet, and has been found to be of the value of 40 ozs. per ton.

In the last public statement as to the working of the Company, four shafts were sunk and the tunnel driven the whole length of the claims, which will enable them to obtain ore at a very low cost.

The purchase is for £50,000, of which the vendor takes £15,000 in fully paid shares, leaving the Company with a working capital of £35,000.

The vendor's statement, together with the testimony, as to the value of the property, of Mr. Robert Sewell, superintendent of the Pacific Mining Company (Limited), and Captain Alfred Kellogg, managing director of the Utah Silver Mining Company (Limited), are printed herewith.

The agreement is dated October 16th, 1871, and is made between Edward Rose Langham of the one part, and William Rose Langham of the other part.

Copies of this prospectus, together with the form of application for shares, can be obtained from the Bankers, and at the Offices of the Company, where the above agreement and the memorandum and articles of association can be inspected.

VENDOR'S STATEMENT.

The property of the Camp Floyd Silver Mining Company is situate in the Camp Floyd mining district, Utah Territory, about ten miles south-west from Salt Lake City, and 20 miles from Lehi, a station on the Utah Southern Railroad.

The claims consist of the Martha, Sparrow Hawk and Last Chance, containing an aggregate of about 3,000 lineal feet, on the whole of which 200 feet on each side for working purposes. There are still undeveloped, and are bounded on the east, north and west by the Mormon Canal. The lode averages twenty feet in width, and has been traced for a distance of 3,000 feet, and may be traced for a distance of seven miles within the claims being taken up and owned by different mining companies.

Several parallel veins have been found on the Martha, Sparrow Hawk and Last Chance, proving a continuance of the ore throughout the claims and Camp Floyd district, and the principal development is on the Sparrow Hawk, which is the centre claim. This development consists of a tunnel or adit run in from the base of the mountain, penetrating the lode at right angles from 30 feet to 1,200 feet. The tunnel, from the first wall to the footwall, and for about 400 feet in length, is timbered, the timber being of the best description, and the whole work of which, from end to end, will stand up as a permanent level for all time to come, for practical working purposes, at the lowest possible cost. The average width of the ore-body, as proved by the tunnel, is 20 feet, and the value of the ore is 70 dollars, or £15 per ton, which is at once reduced to smelting and working 30 tons per day, which is the cost of getting and delivering to railroad there, or will not exceed 11 dollars, or £2 per ton.

Upon the Sparrow Hawk lode, half of a 5-stamp mill, including the whole water power, and all the machinery complete, is now on the property, and will be worked by the Company.

The present contract includes three engines, boilers, and machinery complete, for the Martha and Last Chance claims, at a total cost of £3,000, or a saving of £1,000 on the present contract.

Samples of the ore have been sent to the Assistant Mint at Boston, the assaying whereof gives an average value of 70 dollars per ton.

Experiments show that one ton of ore will yield 190 ozs. of bullion per ton, and that the total cost of working will be 11 dollars, or £2 per ton.

The mill is fitted with the most approved system of saving, and from having been engaged in the working of many leads, in proximity of where located, and doing the same for this property, as well as in the treatment of ores from other districts, I have no hesitation in stating that the ore will yield 100 ozs. per ton.

The water and water privileges belonging to the property is unquestionably sufficient for the purposes of working the mines, and a flume will be laid from the mouth of a mountain stream that runs through the property, having a fall of 100 feet.

The Company owns 5 claims for the exclusive working of the mines, and the claims of the miners found on the Company's property, for which they have the right of working, are subject to the payment of a royalty of 5 per cent. on the gross yield.

E. R. LANGHAM.

"CAMP FLOYD MINES.—Lode 6ft wide, traced it myself two miles; next mine to Sparrow Hawk sold for 300,000 dols.; free milling ore average value per ton) 60 dols.; cost, mining and reduction, 30 dols to 40 dols.; mailed report."

Captain Narrow telegraphs:—

"Have re-examined Sparrow Hawk; looking splendid; all it's represented; mailing report."

THE CAMP FLOYD SILVER MINING COMPANY (Limited).

NOTICE is hereby given, that the LIST of APPLICATIONS for SHARES will CLOSE on TUESDAY NEXT, the 24th inst.

W. J. LAVINGTON Secretary.

14a Austinfriars, E.C.

ISSUE OF FIFTEEN THOUSAND 12 PER CENT. PREFERENCE SHARES OF £10 EACH, £150,000.

THE ARGENTINE TRAMWAYS COMPANY (Limited).

Capital, £300,000, in 30,000 shares of £10 each, ten thousand whereof £10 shares are disposed of on terms of this prospectus, fifteen thousand perpetual preference £10 shares, bearing £12 per cent. dividend per annum are now offered for subscription. Any deficiency in one or more years in the preferential dividend to be made good before any dividend is paid on the deferred shares. Payment £1 per share on application, £2 per share on allotment, and the balance on 31st October, 1871. Interest at the rate of 6 per cent per annum will be allowed on the amount paid until 31st December, 1872, when the transfer of the property is to be completed.

In Buenos Ayres—Calle Rivadavia.

PROSPECTUS.

This Company has been formed for the purchase of the valuable concessions granted for and of the Tramways in Buenos Ayres shown in red on the plan accompanying the prospectus, with all stations, stock-yards, stables, horses, and general plant appertaining thereto, for the sum of £150,000 in cash, and £150,000 in deferred shares in the Company, to be handed to the vendor upon completion of the purchase in Buenos Ayres. The Tramways are to be delivered over to the Company on the 31st of December next, fully equipped, and in thorough working order.

The Tramways are constructed in the most substantial and approved manner, with rails 42lbs to the yard, and joints like carpentry, and the stations and stables are most substantially built with brick, wood and iron.

The Tramway is already completed, and working from 25 Sec. 9 Mayo to Almagro, and from Recoveta to the Plaza de la Constitucion, as shown by the thick red lines. The junction from Almagro to San José de Flores was expected to be completed and at work by the 1st of this month (October).

The map A shows that this Tramway system is one of the best, if not the best, that could be applied in Buenos Ayres, as it takes the traffic from the four central points of the city along the principal streets, as well as one route from the Great Southern, the Western, the Northern, and the Buenos and Barracas Railway Stations.

The Company acquires two stations—the Rivadavia, situated on the Sec. line in Florida road, near the Almagro Station of the Western Railway, having an area of about 6,000 square yards, and containing waiting room, offices, sleeping accommodation for servants, stalls for 100 horses, and sheds for 6 tramcars; a covered arena for 20 carriages, large corn and hay stores, horses, and a spacious yard for exercising. The second station—La Recoleta—situated at the northern extremity of the system, has an area of about 5,000 square yards, with passenger, waiting room for 2, and servants accommodation, stabling for 120 horses, covered shed for 12 carriages, and is also supplied with fodder. Both stations are well supplied with water.

Four hundred horses and twenty-eight carriages are to be handed over to the Company.

Although the system is at present incomplete, and the commercial portions many months ahead for traffic, an Omnibus has been established for the past 3 years, the Right Hon. Edward Ellice, on September 16th, to the effect that the number of passengers travelling over those portions now opened for public traffic, viz., between the 25 degs. de Mayo, Rivadavia and the Almagro Stations on the Western Railway, La Recoleta, and 25 degs. de Mayo, La Recoleta and the Plaza de la Constitucion, as stated above, averaged nearly 6,000 daily (about 4,000 passengers passed in the first 3 months, and Sundays about 7,000 passed in 4 hrs), and on the 14th August last, the total number of passengers carried was 7,000 (equal to 4,000 per day). 4,000 passengers over this line to Recoleta, and 3,000 passengers over the lines to La Boca, &c. These passengers are a source of 3 to 4 per cent. of profit. The lines now open and opened over about 3 kilometres of the length of tramways purchased by the Company, and when more easy and practical, with the new tramway lines are also put in and opened, on the completion of the line to be opened, the passengers will be increased 4 times, or about 24,000 per day.

By the 31st of December 7 Mr Billinghurst, one of the directors of the managing committee of 31st December, is now in England, has received instructions to purchase and forward to Buenos Ayres 7 passenger cars and 7 horses, and 7 sets of harness, and 7 sets of fittings, and 7 sets of spare wheels, and 7 sets of spare axles, and 7 sets of spare springs, and 7 sets of spare boxes, and 7 sets of spare bolts, and 7 sets of spare nuts, and 7 sets of spare screws, and 7 sets of spare pins, and 7 sets of spare rivets, and 7 sets of spare washers, and 7 sets of spare nails

A Sinking Fund of 2½ per cent. per annum, the annual amount of which is to be invested in Consolidated Six per cents, on 1st May and 1st November, so as to accumulate the whole loan at par in 21 years.

The bonds drawn will be payable on the 1st February and 1st August next succeeding each drawing.

The first drawing will take place on 1st May 1872.

If any instalment is unduly delayed or not received without exception, and if any part of the proceeds required for the allotment of deposit shall not be duly applied thereto, the 10 per cent. first on allotment and the instalments of [illegible] per cent.

As the Government is desirous of affording the holders of the outstanding balance of The Montevideo Municipal Loan of 1868, an opportunity of participating in the benefits of the Sinking Fund hereby created, they have power to issue the said Loan, subject to the present terms, the arrangements and agreements to be made as to the amount of the loans to be exchanged being left entirely at the option of each holder.

The objects of the Loan are:—

1. To consolidate and liquidate the debts of the Republic of Montevideo which have been guaranteed by the State, by exchanging with the holders of the same for cash, and to issue them with a good currency.

2. To pay off certain claims and debts as specified in the General Budget.

3. To complete the construction of water works, docks, &c. Public Works of Montevideo, which commenced some time ago by the State, the Republic of Montevideo having contributed £[illegible] to the Loan of 1868, which was authorised as part of the Municipal Loan of 1868 to £[illegible] and amounting £[illegible] of the Montevideo Municipal Loan of 1868 to £[illegible] authorised.

The proceeds of the present Loan will be paid to the Board of Public Credit against the instalments by which the authorities of the Republic shall specifically appropriate the amount of the said instalments to the payment of the interest deposited by the holders, and the redemption of the capital sums [illegible].

In the meantime, however, as a sum of £[illegible] is required for the construction of a Custom House at Montevideo, the said amount to be repaid out of the proceeds of the Loan, it is proposed to appropriate any loans thereon, on the completion of the contract, the existing contract will be immediately liquidated.

The general loan will be guaranteed by the general revenues of the Republic of Uruguay, and as security for the punctual payment of the interest and the redemption of the capital sums, the Republic of Uruguay specially pledges the Customs Revenue of the Republic of Montevideo, which is collected at the Custom House of the Republic, and which is to be paid over to the Board of Public Credit, and which is to be applied to the payment of the interest and the redemption of the capital sums [illegible].

The Customs Revenue for the year 1870 amounted according to Official returns, to £[illegible] of which £[illegible] proceeding from goods [illegible] the Custom House, and which [illegible] the Republic of Uruguay, and as security for the punctual

ISSUE OF 8,000 SHARES OF £10 EACH, OF THE

AUVERGNE BITUMINOUS ROCK AND PAVING COMPANY, LIMITED.

Incorporated under the Companies' Acts, 1862 *and* 1867.

Forming part of the 15,000 Shares of £10 each, constituting the Share Capital of the Company.

DIRECTORS.

Colonel the Hon. A. H. A. Anson, M.P., Dudley House, Park lane.
Lord Alan S. Churchill, 4 Lowndes square.
Major A. G. Dickson, M.P., Waldershare Park, Kent.
S. Lloyd Foster, Esq., Old Park Hall, Walsall.
Nelson Girdlestone, Esq., Admiralty.
W. T. Marten, Esq., 30 Great St Helen's.

MANAGING DIRECTOR IN PARIS—Mons. A. Jaloureau, 86 Rue Neuve des Matburins, Paris.

BANKERS.

Messrs Barnetts, Hoares, Hanburys, and Lloyd, 62 Lombard street, E.C.
The Bank of Scotland, 45 Lothbury, E.C., Edinburgh, and Branches.

SOLICITORS—Messrs Evans and Co., 28 Nicholas lane, E.C.
BROKERS—Messrs Sandeman and Dobree, 2 Royal Exchange buildings.
AUDITORS—Messrs Chadwicks, Adamson, Collier, and Co., 65 Moorgate street.
SECRETARY—Alfred Conder, Esq.

TEMPORARY OFFICES—St Clement's House, Clement's lane, E.C.

The Directors of the Auvergne Bituminous Rock and Paving Company (Limited) are prepared to receive subscriptions for 8,000 shares of £10 each in the Company, payable as follows:—

£1 per share on Application.
£3 — on Allotment.
£3 — on the 1st December, 1871.
£3 — on the 1st January, 1872.

The Company has been formed for the purpose of acquiring and working the extensive well-known and valuable mines of Bituminous Rock, which are situate in the district of Auvergne, in the Department of Puy de Dome, France.

The property consists of six mines, which are known by the names of the Chamalieres, the Puy de la Burriere, the Pont du Chateau, the Malintrat, the Lussat, and the Dallet, and are held under seven concessions granted by the French Government in perpetuity.

The district over which the concessions entitle the proprietors to quarry or mine is about 12 miles in length, by 2½ miles in breadth; and such right exists over this surface wherever any indication of bituminous rock appears.

The seven concessions cover properties varying from 35 to 1,000 acres, and they extend together over an area of upwards of 3,000 acres.

The actual demand for asphalte for paving and other purposes in the principal towns in Great Britain, the continent, and in transatlantic cities, is already very great; and, from the success of the roadways and pavements laid down in London and other large cities and towns, it is certain that this demand will be enormously increased. The public estimation and confidence in investments of this description are sufficiently indicated by the high prices at which the shares of some of the more successful asphalte companies now stand.

The Dallet Mine furnishes a bituminous limestone in inexhaustible quantities, which, upon careful comparison with the celebrated Val de Travers rock, is found to be similar in every respect, with the great advantage that at the Dallet Mine rock of any degree of bituminous impregnation can be obtained, which, by blending (but without the admixture of any extraneous bitument), will produce asphaltes for roadways, perfectly adapted either to hot or cold climates. Besides this, the properties acquired by the Company contain within them bituminous rocks of almost every known composition, and are available for every purpose to which asphalte is applied, being suitable alike for roadways and pavements, and the various degrees of impregnation of the limestones, sandstones, quartz, and basalts, with bitumen, render them of incalculable value.

The Pont du Chateau, the Chamalieres, and the Lussat Mines furnish, in great quantities, rocks impregnated with varying proportions of bitumen up to 25 per cent., which are of a similar character to the Limmer or Hanoverian, and are perfectly adapted for pavements.

The Dallet and Pont du Chateau Mines, which cover about 1,160 acres, and which form the most valuable part of the property comprised in the concessions are within 500 yards of the River Allier, the principal tributary of the Loire, which is navigable to the sea at St Nazaire by vessels of 80 tons burdens. The rock can thus be delivered in the Thames at a cost, including all expenses, of 27s per ton, and in Paris at about 24 francs per ton, and railway communication with Bordeaux is always available at an increased cost of about 2 francs per ton. It is estimated that this rock will find a ready sale in London at over £3 per ton, and as a minimum consumption of 20,000 tons per annum is confidently relied on, it will be seen that even on the lowest scale very large profits will be realised.

The other mines are at somewhat greater distance from the shipping place, but the extra cost of transport will not in any case exceed 4s per ton.

In the Malintrat Mine a small shaft has been sunk for the purpose of obtaining pure bitumen which exudes from the rock, from which from 150 to 200 kilos per day are collected, realizing in Paris from £17 to £18 per ton of 1,000 kilos. By further exploration, and the use of a small plant, this yield can be very considerably augmented.

There is also a ready market both in Paris and London for mastic, which is an asphalte prepared especially for pavements, courtyards, &c., and which can be produced at the Company's mines at a cost of about 25s per ton, and will realise in Paris and London over £5 per ton.

The acquisition of the whole of the Auvergne Bituminous Basin will enable the Company to supply, not only the best description of rock asphalte for roadways, but likewise asphalte materials adapted to every description of work, and at the same time to supply the pure natural bitumen for oil distillers, japanners, and varnish makers, at prices, as it is believed, below those of any existing company.

The distance of these mines from both Paris and London being less than that of any of the principal asphalte mines of other companies, and there being every facility for water carriage from the foot of the mines, the cost of transport is so reduced that this Company will be able successfully to compete with the prices obtained for other asphaltes.

From the product of these mines pavements and other works have been formed at St Cloud, and elsewhere in the neighbourhood of Paris, by Messrs Jaloureau, during many years, by which the value of the material has been practically and successfully tested.

There are no Royalties payable in respect of any of the mines, and the whole of the taxes amount to about £20 per annum only.

Power has been taken by the Memorandum and Articles of Association of the Company to execute contracts for paving, by which a large revenue is also expected to be secured. For this purpose the margin provided of £30,000 will furnish abundant working capital.

Arrangements have been made on behalf of the Company with Monsieur A. Jaloureau, of Paris, who is well-known as an eminent and practical authority on asphalte, to act as Managing Director of the Company in Paris; and arrangements have also been made with his firm, of a satisfactory character, for the Company to take over the benefit of their existing contracts, together with the use for a term of their extensive business premises at Clichy. The stocks in hand, &c., are to be taken at a valuation.

In verification of the statements above contained, attention is drawn to the report of Mr William Perkins, the consulting chemist, who has had very great and long experience in asphalte, and who has made a careful survey of the property, and has tested the bituminous rocks in every possible way.

The terms of the purchase of the several properties and concessions are £120,000, payable as to £50,000 in cash, and as to £70,000 in 7,000 fully paid-up shares of the Company of £10 each. The vendors have agreed to pay all expenses incident to the establishment of the Company up to the allotment of shares.

The principal advantages offered by the purchase of the concessions and property may be summed up as follows:—

1. Absolute ownership of the mines and property in perpetuity.
2. Exemption from Royalties or any annual payment whatever, except a nominal amount for municipal rates.
3. Inexhaustible supplies of the finest description of bituminous limestone and other rock, having an established market value.
4. Facility and cheapness of carriage.

In offering for public subscription the 8,000 shares comprising the present issue, the Directors believe that they can recommend them as an investment which will yield unusually satisfactory results.

The following contract has been entered into with the Company:—

A contract, dated the 13th day of October, 1871, made between Lucien de Clebsattel, of the one part, and Lord Alan Spencer Churchill and Alexander Geo. Dickson, M.P., on behalf of the Company, of the other part.

A copy of the Memorandum and Articles of Association, and the above contract, may be seen at the Offices of the Company's Solicitors, No. 28 Nicholas lane, E.C.

The allotment of shares will take place as follows:—

First—To persons who desire to pay up in full on allotment, which will entitle them to dividend calculated from the time of payment.

Second—To persons who desire to pay up by the above instalments.

Should no allotment be made, the deposit will be forthwith returned in full.

Applications must be made in the annexed form, and be accompanied by a remittance of £1 for each share applied for, and forwarded either to Messrs Barnetts, Hoares, and Co., 62 Lombard street, E.C.; the Bank of Scotland, 45 Lothbury, E.C.; or to the Secretary, at the Company's Offices.

London, 17*th October*, 1871.

ISSUE OF 8,000 SHARES OF £10 EACH, FORMING PART OF THE CAPITAL OF £150,000, IN 15,000 SHARES OF £10 EACH, of the

AUVERGNE BITUMINOUS ROCK AND PAVING COMPANY, Limited.

FORM OF APPLICATION. (To be retained by the Bankers.)

To the Directors of the Auvergne Bituminous Rock and Paving Company, Limited.

GENTLEMEN,—Having paid to your credit at your Bankers, Messrs , the sum of pounds, being £1 per share on my application for shares of £10 each, of the Auvergne Bituminous Rock and Paving Company, Limited, I request you to allot to me that or any less number of the said shares; and I hereby agree to accept the same, and to pay the balance in respect of such shares, in terms of the prospectus, dated the 17th day of October, 1871.

Name in full.....
Address.....
Profession (if any).....
Date.....1871.
Signature.....

(Addition to be signed by Applicant desiring to pay up all the instalments on allotment.)

I desire to pay up my subscription in full on allotment, thereby entitling me to a priority in the allotment.
Signature.....

THE AUVERGNE BITUMINOUS ROCK AND PAVING COMPANY, LIMITED.

Notice is hereby given, that the LIST of SUBSCRIPTIONS for the above SHARES will be CLOSED THIS DAY (Saturday), the 21st inst., at FOUR o'clock, for LONDON, and MONDAY, the 23rd inst., for the COUNTRY, after which no application will be received.

This day is Published, No. X., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for October gives the Highest and Lowest Prices of Stocks, Shares, and other Securities during the Month, the month in which the Dividend in each case is payable, the last four Dividends, &c. in the aggregate.

A FINANCIAL RECORD OF THE MONTH; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to October 25.

Advertisements for the next Number to be published on November 15 must be sent, to insure insertion, on or before November 28.

The December Number of the INVESTOR'S MONTHLY MANUAL will give, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the latest quotations for 1870 (as to indicate the Exact Movement during the Twelve Months), a Complete Directory, the names of the Markets where each Security is chiefly dealt in, a Financial History of the Year 1871 (including a Tabulated Chronicle of Events), besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. A copious Index will be added for purposes of reference.

The Joint-Stock Supplement will be published on Saturday, the 16th of December.

OFFICE—340 Strand.

THE MERITS AND THE SHORTCOMINGS OF THE PRESENT POLICY OF THE BANK OF ENGLAND.

The policy of the directors of the Bank of England in not reducing their rate on Thursday last has been supposed to be dictated by some secret reasons. But as far as we can learn, there were none such. The directors, we believe, were guided as usual by the state of the accounts before them, and especially by the respective amounts of the banking reserve and the bullion, in comparison with the probable demands upon them. Upon a consideration of these they decided not to reduce the rate, and we believe that they decided wisely.

In former times no doubt we should have considered that the Bank of England with a banking reserve of 11,572,000*l* and bullion of 21,655,000*l* was exceedingly rich. We used in former periods to work on far less amounts than these, but there has been a great change in the money market since those times. There has been no sharp drain on the money market since 1866, and since then the ordinary liabilities—the private deposits—of the Bank of England have augmented thus:—

	£
Private deposits in 1866	18,764,000
— now	23,958,000

And not to speak of the private banks, which are an unknown element, the deposits of London joint stock banks have also, as is well known, since then increased exceedingly.

As our liabilities have augmented, we need therefore a reserve much larger than used to be sufficient. We have had a sharp warning of this on the present occasion. Our banking reserve was reduced with most unusual rapidity.

	£
On the 6th of September it was	24,817,000
On the 7th of October it was	20,214,000
Decrease	4,603,000

Such a sudden drain in former times, and with the amount of reserve we used to think sufficient, would have caused a panic. The scale of English transactions, both banking and commercial, has vastly increased, and we need an augmented reserve to provide against demands much greater and more rapid than we were used to.

On the present occasion we are liable to a great demand for Germany—to the tendency to an unfavourable exchange, which always makes money dearer in October and November, and has often caused panics at that time—and to an accumulated demand for several minor foreign loans, which, though not much individually, come to something collectively. The Bank directors consider, and, as we think, consider wisely, that, looking to these large impending demands (and the unknown German demand especially), their reserve is not more than sufficient, and would not bear diminution. As yet there is no accumulation of extra reserve. We have only about what we should consider our normal sum. As soon as any money is taken from us on the one side, we ought to be receiving from abroad money to compensate it on the other.

But the foreign exchanges have recently tended downwards. We cannot therefore rely on receiving money from abroad as well as we could a short time since. So far from the present reserve of the Bank of England being such as would enable them to reduce their rate of discount, the present rate does not continue to produce the effect on the exchanges which it produced at first, which it was intended to produce, and which it must produce if it is to be of real value.

The real objection to the action of the Bank is not that they have not reduced their rate, and so lessened their reserve, but that they have relied too exclusively on the maintenance of their rate, in order to protect and augment that reserve. The lessons of past periods of this present kind is that a high Bank rate is always necessary to affect the exchanges, and to bring us money, but that it will not of itself *alone* always rectify the exchanges, and bring us the money we require.

The reason is very plain. The action of the Bank of England acts on the foreign exchanges only when the Bank of England rate is followed by the market rate. If anyone abroad—say, a foreign banker—is thinking of remitting money to England for investment, he thinks of *what he can make of it.* And his guide to this is the market rate. If he sees that by remitting here he can make (say) 5 per cent. of his money by discounting three months' bills, he will direct his agents to buy those bills, and provide them with the funds accordingly. But the Bank of England rate by itself and alone is of no moment to him. That is the charge which the Bank of England makes to its customers, and the remitter of foreign money has nothing to do with it or with them. He has simply to see how much he can make of his money in Lombard street, and for that purpose he looks at the bills he can buy in the market, and at the rate he can make of them, and so calculates his profit. A high rate charged by the Bank of England, except in so far as it guides and is followed by the English market rate, will not induce a foreign capitalist to send money here; standing alone it will not give him a shilling of extra profit of itself; it will no more induce him to remit here than a high rate charged by the Bank of Belgium.

No doubt the action of a high value of money on the minds of foreign capitalists, and the supplies it thereby brings us, is not the only action, though it is that by which it acts most quickly, and brings us money in a moment, and almost as if by magic. There is also a much slower action on the trade of the country, by which prices here fall, exports are augmented, and imports diminished, the balance of trade is turned, and money is paid to England. But here, even still more, the rise in the Bank of England rate has no effect unless the market rate follows it. The discount business of the Bank of England is a very small part of the discount business of the country. If the great body of discounters charge less than the Bank, the trade of the country will go on as before, prices will not fall, and the contemplated effect on the exchange will not be produced.

But, it will be asked, how can the Bank of England operate on the market? Only in the way in which in former times it has acted effectually—by taking money out of the market. On several occasions like the present, the Bank of England has borrowed largely on Consols in the open market—has in that way abstracted the funds which were seeking employment there—has prevented them from lowering the market rate of discount—has kept that rate on a level at least with its own. In that way, and in that way only, can a rise in the Bank of England rate, in such cases as the present, produce an effect on the exchanges. If the Bank loses command of the market, and allows the market rate to droop below its own, its own action on the rate of discount is only so much effort thrown away—it brings no money from abroad, and keeps no money here.

Some people have thought there was something strange and anomalous in these borrowings upon stock by the Bank of England. But it is no more anomalous than the system which places the whole of the final and unlent reserve of the country in the hands of a single bank. If all persons under great pecuniary liabilities—all bankers and all bill-brokers—kept in their own till an equal cash proportion of their reserve, no similar expedient would be necessary, for no similar difficulty would be felt. A foreign drain of money would then act equally on the cash reserve of all bankers and all bill-brokers; the reserve of each would be equally diminished by it; all would be equally anxious to arrest and stop it. But under our system all the actual cash is in the banking department of the Bank of England; the whole pressure comes on one till; the entire responsibility of meeting it falls upon a single Board. So long as our system is in this fundamental respect peculiar, we must expect to meet at every turn with other consequent peculiarities; and, at any rate, while the Bank of England is exclusively burdened with an exclusive and great responsibility, we must expect that at times it will require a peculiar and exceptional policy in order to perform its duties.

As the Bank have deliberately chosen the right course, we hope that they will persevere decidedly in it; that they will not falter between two policies; that, having augmented their profits by charging a higher rate to their customers, they will not let that fine on them be useless to the country; that they will sacrifice some proportion, it may be a considerable proportion, of their unusual profits; that they will not have it said that they raised the rate because it was profitable, but would not borrow on stock because it was costly; that as they have already done the agreeable duty, they will now do the disagreeable one also.

A COMPROMISE OF THE EDUCATIONAL CONTROVERSY.

Birmingham is determined to make a great and critical question of the School Boards' right to pay denominational fees. It is no doubt somewhat unfortunate that the debates which are now going forward so hotly in the country, and especially in Birmingham, were not anticipated by any discussion in Parliament at the time the 25th clause of the Education Act was first under consideration. At that time the difficulty which has now assumed such huge proportions was not even perceived by the argus eyes of the Radical party, though they were all bent on discovering, and perhaps we should hardly wrong them much if we said *magnifying*, the defects inherent in the compromise proposed by the Government. The Vice-President of the Council himself said more than once in the course of debate, though in reference, we believe, to the Free School question, that wherever there was a School Board it would be competent to it, if it pleased, under this clause, to pay the fees of really poor people's children at any qualified school, denominational or otherwise; and his remark was never challenged. Doubtless at that time he himself had no conception of the kind of fierce local controversy to which this power would give rise,—in other words, doubtless he had overlooked the bearing of the provision on the very question which it was so nice a point to settle in Parliament, and certainly no one else had been vigilant enough to see what had escaped him. Thus the one great impediment to the smooth working of the Act is mainly due to a Parliamentary oversight; at least we may fairly assume that if the question had not been overlooked in Parliament there would have been at least a discounting of the difficulty in the shape of a thorough debate, and probably a compromise calculated to satisfy in some measure the exponents of the rival demands. Nothing irritates more than an unforeseen grievance. The party which considers itself least successful in the struggle always turns to such a grievance as a new oppression, and is apt even to think and speak, without sufficient consideration, as if it were due to the unscrupulous wiles of the enemy. It has been so in this case. The question which really attracted no one's attention at the time of the passing of the Act, as to the power of School Boards to pay the fees for poor children in other than Board Schools, is now become the sorest of all sore points in the working of the Act, and winning for Mr Forster at Birmingham an amount of political vilification, which, if it continues long, will be likely in the reaction to win for him the reputation of a political martyr—a political saint. It would be better for all parties if instead of waging this war *à outrance* we would but go back upon our steps, take up the matter as it would have been taken up if the difficulty had been foreseen at the time the Education Act was discussed, and apply, by an Amending Act, the remedy of some such reasonable compromise as would in all probability have then been suggested and accepted.

Now, for the reasons we gave not long since, we do not think that it will be possible to take from the School Boards the power of granting to poor parents any reasonable alternative there may be between different elementary schools to which their children would have access. The effect of making it imperative on School Boards to compel the children of the poor to come to Board Schools, when others more congenial to the religious views of their parents were open to them, would be that public opinion would almost inevitably side with the parent, and the compulsory power would lapse into something purely nominal. We observe that the Birmingham Educational Reformers are sinking their tone a good deal in relation to compulsion, no doubt from

apprehension of this very difficulty. While they are pressing home the question of the multiplication of Board Schools, descanting at great length on the need for Free Schools, and expounding the "religious difficulty" with impassioned eloquence, the cry for compulsion is all but extinguished. Mr Dixon tells us that on that head we must be very cautious, and trust to the influence of time, and scarcely anyone else insists on it at all. Now surely this is a serious mischief, and the Birmingham reformers must themselves be quite aware that their rapidly-cooling enthusiasm on this head is due to political necessity, and not to moral conviction. They must take their choice between tenderness with religious scruples, and tenderness with parental laxity. The Government propose to be tender with religious scruples, and hope to be secure with parental laxity. The Birmingham reformers propose to ignore religious scruples, and consequently, as they begin to see, they must be very tender with parental laxity. We cannot help pointing out to them that this is a mistake. The first object is to get over the shocking indifference of the poor to the educational welfare of their children. And if in doing so we have to concede a good deal to religious scruples which are not of the most enlightened kind, why it is political wisdom and even equity to do so.

At the same time we are quite willing to admit that it is by no means a desirable thing to set School Boards disputing whether they will pay the fees of the poor children at denominational schools or not. It is a sort of dispute very like the old vestry disputes about Church rates,—one sure to destroy the harmony of the School Board,—to set all its elements at bitter variance. Then again it is a great mischief that a ratepayer should even be convinced in his own mind (whether truly or not does not much matter) that he is compelled to pay an additional 1d or ½d in the pound, or whatever it be, for the support of some religious propagandisms to which he objects. It tends to make the Education Rate needlessly unpopular, whereas it is in the highest degree desirable that it should be a popular rate. Under these circumstances, we should propose that the School Board, when compelling a parent to send his child to school, should be allowed either to remit the fees at a School Board school, or, if the parent prefers a qualified denominational school, to pay the fees of the child at such a school, but not out of the rates. All fees paid at denominational schools should be carried to a separate account, and defrayed by a grant from the Council of Education, just as the grants towards the expenses of such schools already are. We are quite aware that this proposal would not meet the objections of those who, like the thorough-going secularists and some of the Nonconformist sects, object equally to any expenditure of public money, whether in the form of taxes or rates, on schools managed by denominational managers in the interest of a special religion. But then even the Birmingham League has not yet demanded the withdrawal of all annual grants to denominational schools, and, politically speaking, everyone knows that at the present moment such a demand would be absurd. All that can be effected is to withdraw all matter for religious controversy from the local boards. That can be at a great measure effected, and certainly, so far as it can, it ought to be effected. We submit that an Amending Act, withdrawing the burden of the fees of poor children at denominational schools from the rates and throwing them on the Education Vote, would do all that at the present moment can be done to make the Act work smoothly in this respect. We want it to be certain that if compulsion is to be applied, however cautiously, you must not refuse poor parents the right of selecting a properly qualified religious school if they prefer it, and we want it to be equally certain that compulsion ought to be applied as soon and as widely as it safely can be. It seems it equally clear that there is no reasonable prospect, even in the eyes of those who most wish it, of dispensing for years to come with denominational schools as an element in our national education system. If these two premises be granted, it seems to be clear that the most which can be effected to render the Education Act palatable to all parties is to make all the local grants strictly undenominational, and to leave to the Central Department the duty of helping the denominational schools. If this can be effected, we may hope for a fair trial for the Education Act. If it cannot, we may be quite sure it will not have a fair trial. The Liberal members for a hundred different constituencies will be constantly worried by influential constituents,—whether they be in a majority or not will hardly matter,—to oppose the education policy of the Government. In other words, they will be constantly pressing upon the political Secretary of the Treasury the expediency of getting rid of this unpopular education question in some way or other,—they will not many of them very much mind *how*, so long as their own lives are rendered easier,—and the political Secretary of the Treasury will soon be perfectly aware that "if something "is not done," the Government will get an unpleasant reminder in the shape of some disagreeable defeat. And once that happens, the fate of the Education Act becomes very doubtful; some hasty and ill-considered short cut out of the difficulty is exceedingly likely to be adopted. By far the wiser course would be for the rational-minded men on both sides to come to a compromise; and we can see no compromise so likely to meet the practical men of all parties as the one we have ventured to propose.

THE PARIS SAVINGS' BANK DURING THE POLITICAL CRISIS OF 1870-71.

The Paris Savings' Bank, established in 1818, and having the patronage of about two thousand administrators, or, as we should call them in England, managers or members of committee, has weathered the political storms of the last twelvemonth with considerable success. On the 1st January, 1870, it owed an aggregate sum of 2,167,229*l* to 271,069 depositors. At the end of 1870 there still remained 1,721,269*l* to the credit of 254,416 depositors. The first half of the year had presented no particular deviation from the experience of the corresponding period in 1869. In point of fact, on the 30th June, 1870, the Savings' Bank owed its depositors 2,176,000*l*; an increase of about 60,000*l* beyond the balance on the 30th June, 1869. On the declaration of war in July, 1870, the deposits immediately lessened, and the withdrawals and applications of deposits to purchases of rentes doubled and trebled their usual number. The temptation afforded by the low price of rentes was a great stimulus to this course of action by the depositors. In August, the withdrawals went on at an increasing ratio, and in one week amounted to about 92,000*l*. This was the week of the issue of the National loan of 30,000,000*l*. But there were other causes which had their share in influencing withdrawals, namely, the call to military service, the mobilisation of the National Guard, the exodus from Paris to the provinces, the exile of the German inhabitants of Paris, the stoppage of work, the fear of the future. No less than 45,000 withdrawals of deposits arose from these combined causes in July, August, and September. The Savings' Bank even afforded facilities to those who were enrolling themselves under the national flag, and to the German workmen expelled from Paris; for, prompted by humane motives, it paid immediately or within 24 hours in cash, instead of subjecting them to the usual notice and delay in payment. As many as 4,000 of these prompt payments were made.

Altogether, from the beginning of July to the middle of September, 1870, 440,000*l* were repaid. Already, in August, the Minister of Finance had become anxious as to the effect upon the Treasury of this current of withdrawals, which had extended also to the savings' banks in the provinces. He therefore advised their availing themselves of the power of 15 days' delay in payment, as settled by the regulation of June 4, 1857. The blockade of Paris was imminent, when, by decree of the Government of National Defence, dated September 4, 1870, it was resolved that the deposits at the savings' banks should only be repayable in coin to the extent of 50*f* for each depositor, the balance to be settled, if the depositor desired it, by Treasury bills with 3 months to run, and bearing 5 per cent. interest. The incidence of this regulation was lightened, however, by exceptions made in favour of the societies for mutual help, and which were allowed to withdraw their whole deposits in cash if required.

The council of the Paris Savings' Bank moved the Government to consent to repayments in cash, in successive sums of 50*f* each, with intervals of 15 days or a month; but the Minister of Finance did not deem it prudent to pledge the Treasury to this course absolutely, but on the 18th October he authorised a second repayment of 50*f* in cash. Similar monthly, or nearly monthly, authorisations from him followed. The results were all that could be desired. The confidence of the depositors was fully maintained. From October, 1870, to the end of March, 1871, payments were made in cash to 37,000 depositors to the total extent of 70,000*l*.

From the teaching of these results, the Paris Savings' Bank derives the moral that, whilst it is true that the liability to repay savings' bank deposits may be a source of embarrassment in a time of intense crisis, it is a liability frequently much overrated when its measure is compared with the aggregate amount of such deposits which it is at all likely will be demanded back. Thus the decree of 17th September, 1870, gave the depositors power to withdraw 50f in cash, and affected each of no less than 245,000 depositors. They might therefore have claimed, at 50f each, an immediate repayment of about 480,000*l*, when allowance is made for some of the deposits being under 50f. But the whole sum actually withdrawn in cash in the month following the decree was only 12,000*l*; and notwithstanding the removal of the power of limited cash withdrawals from month to month, the aggregate amounted in six months to only about *one-seventh part* of what might have been withdrawn—*i.e.*, to a total of 70,000*l*, instead of to between 480,000*l* and 490,000*l*. Even the total gross withdrawals of 70,000*l* must be reduced by the sums freshly deposited during the six months, and amounting to 30,000*l*. So that all that the French Treasury was called upon to repay in cash was about one million of francs, or (say) 40,000*l*.

Of the new depositors in these troubled times, 14 per cent. were soldiers and sailors, the ordinary proportion of these classes being only 3½ per cent. The new depositors of the workman class were 50 per cent. of the total, whilst in the previous year, 1869, they amounted to 60 per cent. of the total.

March, 1870, and its insurrection brought a fresh crop of troubles to the Paris Savings' Bank. The Ministry of Finance and the Caisse des Depôts et Consignations had migrated to Versailles. The communication to and from Paris was too hazardous to keep up. The precaution of having kept a good balance at the Bank of France helped for a time, but at length that resource failed. Fortunately two of the members of the council of the Savings' Bank were also regents of the Bank of France. These two gentlemen, MM. Henri Davillier and M. Denière, induced the Bank of France to aid the Savings' Bank with an advance. Then came the disasters of the Commune. The insecurity it brought in its train caused the fresh savings' bank deposits to sink to a few thousand francs per week, to less indeed than during the thick of the German siege. In three of the mairies which were burned down during the Commune, the archives of the Savings' Bank depositors were saved, but in the conflagration of the mairie of the 12th arrondissement, some thousands of passbooks (*livrets*) were consumed. But what was worse, in the burning down of the Ministry of Finance, all the inscriptions in 4½ per cent. Rentes belonging to the depositors perished. By good fortune however no loss will ensue, as, with much labour and trouble, the claim of each depositor is susceptible of being otherwise clearly established and admitted.

On the 12th July last, the National Assembly passed a law to repeal the decree of 17 September, 1870, and gave full latitude to depositors to deal with the whole of their funds. The demands for repayment were considerable in the first week, but have subsequently abated. The result, after allowance made for the funds of 4,509 depositors having been applied, at their request, to purchases in small sums of rentes of the new National loan of 1871, to the extent of 5,291*l* of rente, representing a capital of 83,870*l*, may be best understood from the following figures of the total of deposits at four dates, viz.:—2,160,000*l* in July, 1870; 1,760,000*l* on 17th September, 1870; 1,640,000*l* on 15th June, 1871; 1,560,000*l* in July, 1871, after the operation in rentes above adverted to. This large diminution of 600,000*l*, or of nearly 28 per cent., in the cash resources of a prudent class of the population is serious. But as a matter of figures it admits of a qualification, from the fact that the population of the classes from which savings' bank deposits are chiefly recruited has also diminished in Paris in the year July, 1870-71, so that the *proportionate* diminution of these resources, as compared with the present population, is not really so great as 28 per cent. Already, with a, relatively speaking, more settled state of things, deposits have again begun to come in satisfactorily, and the administration of the Paris Savings' Bank appear to look hopefully forward to the future of their most excellent institution.

In times of exceeding difficulty like those we have been recounting, the strain must have been severe on the ability and zeal, as well as on the complete loyalty to their duties, of the officers and clerks of such establishments as the Paris Savings' Bank. But it would appear that all have proved themselves equal to the emergency. The acting chief, M. Faudon, has especially earned praise for his distinguished conduct in these trying and unparalleled circumstances, during which the natural alarm and anxiety of nearly a quarter of a million of depositors—quite an army, as it were, of industrious, and alas too often needy, workers for their daily bread—had to be faced, answered, and conciliated. The general results of this episode in the history of prudential associations are, on the whole, sufficiently encouraging, and we agree with the administration of the Paris Savings' Bank in concluding that the grave crisis through which their institution has passed proves once again the vitality of its principles, but that the return of settled labour and of political prosperity is necessary before they can again work satisfactorily, or resume a progressive success that has been sorely tried.

BUSINESS NOTES.

THE WAR TREASURE OF GERMANY.—A Bill for creating a war treasure for the Germanic Confederation, in substitution for the war treasure which it has been the traditional policy of Prussia to maintain, has been introduced and debated in the German Parliament. It has met with but slight resistance, and, it may be assumed, will shortly become law. The amount is to be 40,000,000 thalers, or about 6,000,000*l*. It was so likely that the German Government would dispose of a large sum in this manner that the feeling is rather one of relief at the amount being so little. It should be remembered however that at the present moment this war treasure is not the whole amount which the German Government is locking up—the creation of a pension fund and the retention of gold for the new coinage, besides other measures, all giving the Germans a permanent hold on large sums, even after they repay their debt. It will be impossible to be completely reassured as to their action on the money market until something is known of the arrangements for the investment of these various funds.

LONDON AS A MONETARY CENTRE.—We may direct attention to the statements of our Paris correspondent respecting the effect which a forced paper currency has had in causing the settlement of French trade transactions to be made in London. Foreign merchants, it is stated, are apprehensive about receiving bills payable in French money, which may be at a discount, and prefer instead bills drawn on London, which are payable in gold or its equivalent—that is, in an international money of known value. As our correspondent also notices very properly, a similar effect is produced so long as French paper is depreciated by the regulation in the issue of the late French loan providing for the establishment of an agency in London, where the coupons will be paid at the fixed exchange of 25f 30c. The exchange on Paris being now about 26f, there is an advantage in remitting the coupons to London for payment. There are also several foreign loans where the coupons are payable alternatively in London or Paris, and these coupons, for the same reasons, all come to London for payment. London is thus becoming more of a financial centre than ever, partly in consequence of the war, and partly in consequence of some of the financial expedients which the war induced the belligerents to try.

THE NOTE CIRCULATION IN FRANCE.—There has been a remarkable increase in the note circulation of the Bank of France. At first, it will be remembered, when the Bank resumed business after the suppression of the insurrection, the circulation steadily decreased. It was 89,985,000*l* on the 29th of June, but fell the week after to 84,000,000*l*, and on the 27th of July to 79,320,000*l*—a fall of 10,000,000*l* in one month. And this process appears to have gone on gradually, with some slight fluctuations, until the 28th of last month, when the figure was 76,960,000*l*—a fall of 13,000,000*l* from the amount of the issue at the date when the Bank resumed business. Since last month however the notes out have increased week by week, and the amount in this week's account is 88,400,000*l*, or very nearly the same as it was at the end of June. These changes in the note circulation are the more important as the paper has a forced currency, and it is diffi-

cult not to connect them with the present premium upon gold in France.

EIGHT HOURS' SHIFTS.—Mr Brassey has lately suggested as a means of meeting one of the difficulties which employers have in conceding short time to their workmen, the continuous working of their machinery, which would enable them to employ three different sets of men, each working eight hours a-day. By this means not only would the great loss which employers dread from their machinery standing idle an hour or two more per day be avoided, but a new source of profit must be opened up as compared with the present system. One hears the proposal often made, and there is obviously a *prima facie* reason in it. Machines do not get tired like men, and it is apparently a simple economy that they should not be restricted in their daily performance by the limits of human endurance. We doubt however whether the increase of profit by the adoption of the system is so capable of almost indefinite expansion as might at first sight be supposed. In many cases it will be capable of great expansion, especially where there is a high rate of profit on the gross produce—in such cases (say) as it would have paid a negro-driving planter to kill off his slaves; but where the rate of profit is lower other considerations would come in. Clearly the capitalist who worked his machinery continuously would have to replace it more frequently—that is, he would have a larger amount annually to lay aside for wear and tear; and it might happen that the expense of renewals was so large in proportion to the value of the machine as to make it the only material element as regards profit, the interest on the original capital expended being a minor matter. In that case not much would be gained by working continuously, for if there was more work there would be more renewals. The capitalist, it might be said, would be enabled to do three times his former business with the same capital; but this would only be true if more capital was not required in other directions in proportion to the amount of the business. The extreme profit to the manufacturer of working any machinery constantly is thus not to be assumed, even if it is certain that machines only require renewals in proportion to the work done; but even on this point, which seems so certain, we own to having some doubts. It may be possible that the continuous working, or the attempt at it (for *quite* continuous working is impossible), is more costly for renewals in proportion to the work done than the working with frequent intervals. In regard to one kind of machinery at least—locomotives on railways—we are informed that the best managed lines do not attempt continuous working on account of its costliness. The rough rule of railway engineers is only to take 16,000 miles per annum out of their locomotives, any increase of work beyond that rate being attended with a disproportionate expense. To put the limitation in another form, railway engineers have only 40 per cent. of their locomotives on the average under steam at one time. The consequence is that companies which possess fully-equipped lines have less to pay annually for repairs and renewals in proportion to the work done than companies whose lines are deficient, and the account is still in their favour if we allow for the additional interest on the larger original capital. We need not discuss all the reasons for this; but what is the case with locomotives may be the case with other machinery, so that it will often be a nice problem for the capitalist to ascertain what is the most profitable rate of working for his machinery—at what point it would pay him best to increase the quantity of his machinery rather than take more work out of a smaller stock. We are much afraid that it is only within narrow limits that employers will be enabled to economise their machinery by double or treble shifts.

THE CONSUMPTION OF COTTON.—We receive from M. Ott-Trümpler, of Zurich, his usual October circular relating to the consumption of cotton in Europe during the previous annual season—that is, for the year from October 1, 1870, to September 30, 1871. M. Ott-Trümpler's estimate is as follows :—

	England. bales.		Continent. bales.		Whole of Europe. bales.
Stock in ports, Oct. 1, 1870	559,000	...	200,000	...	759,000
Importation in the season	3,170,000	...	2,099,000	...	5,269,000
Total provided	3,729,000	...	2,299,000	...	6,028,000
Stock on Sept. 30	507,000	...	253,000	...	760,000
CONSUMPTION	3,222,000	...	2,046,000	...	5,268,000

In stating the above, we have deducted the exports and re-exports between England and the continent, showing in each case the net imports. The consumption for a series of years, according to the same authority, is as follows :—

	England. bales.		Continent. bales.		Europe. bales.
1870-71	3,222,000	...	2,046,000	...	5,268,000
1869-70	2,760,000	...	1,627,000	...	4,387,000
1868-69	2,587,000	...	1,916,000	...	4,503,000
1867-68	2,822,000	...	1,782,000	...	4,604,000
1866-67	2,414,000	...	1,733,000	...	4,147,000
1865-66	2,319,000	...	1,616,000	...	3,935,000
1864-65	1,873,000	...	1,182,000	...	3,055,000
1863-64	1,565,000	...	1,033,000	...	2,598,000
1862-63	1,332,000	...	814,000	...	2,146,000
1861-62	1,217,000	...	776,000	...	1,993,000
1860-61	2,612,000	...	1,776,000	...	4,388,000
1859-60	2,560,000	...	1,712,000	...	4,272,000

The extraordinary magnitude of last year's consumption will not fail to be observed, being nearly 1,000,000 bales in excess of any previous year. M. Ott-Trümpler calculates that there is not a real increase of consumption to that extent, in consequence of the large stocks held by spinners at the end of September, 1871, as contrasted with an almost total absence of stock at the end of September, 1870. Manufacturers have bought up stock in anticipation of a rising market, and it is estimated that the English manufacturers alone thus hold from 300,000 to 350,000 bales more than they did last year, while the continental manufacturers have also larger stocks—the excess of stocks held by English and continental manufacturers together being reckoned at 500,000 bales at least. Still the figure remaining—4,768,000 bales—is higher than any previous year's consumption, and shows how completely the lack of supplies created by the American war has been filled up. The average consumption per week is 91,694 bales, against 84,365 bales the previous year, and 88,539 bales in 1867-68, the highest year since 1859-60.

RELATIVE VALUES.—A curious proof of the market distinctions which arise between articles which are of precisely the same intrinsic value, has been furnished this week by the dealings in the new issue of the Caledonian Railway ordinary stock. This new issue is to receive dividend in exactly the same manner as the old stock, to commence from the date up to which the dividend on the old stock has been paid; and as the old stock is now quoted ex new and ex div., the two stocks are in fact in precisely the same conditions. If anything the new stock had rather the advantage in the last account, for purchases of the old stock had to be paid for on the 27th of October, while the allotment letters of the new stock are only to be taken up on the 3rd of November. Yet in spite of these facts, the new issue all through the week has been between 2 and 3 per cent. lower in price than the old stock. The reason assigned is the quantity of the new stock in the market; but as the two are in reality interchangeable, and purchasers of the new stock will in fact obtain certificates which are not distinguishable from the certificates of the old stock, the large amount of the new issue on the market should have affected both old and new alike. We should recommend investors in Caledonian ordinary stock to purchase the new stock exclusively so long as it is lower in price than the old. They will simply get the same article for less money.

PATENT GAS.—We have more than once expressed the opinion that we shall soon have room for a speculative mania in companies formed to work out some new application of science. The great successes of new companies have lately been of this character. Tramway, asphalte, and sewage companies have successively been in favour, and large premiums have been pocketed by the original holders of shares, or those who bought in early. Telegraph construction and submarine cable companies have been of a similar character and have had a similar experience, though for reasons which we pointed out at the time the submarine cable companies have come far short of the hopes of the projectors. The tendency towards companies which apply new inventions or discoveries in science is thus established, and the very latest illustration appears to be as remarkable as any, the application of science moreover being in quite a different direction. The Patent Gas Company was formed several months ago, with a capital of 50,000*l*, in 1*l* shares, to work a new process for the manufacture of gas. The principle of the invention to be

applied, we understand, is this—to distil gas at a low temperature instead of a high one, as on the present system, by which means it is possible to use iron retorts, instead of retorts of clay, at a great saving of expense, while the gas produced from the same coal is 30 per cent. more in quantity and of 50 per cent. better quality than the gas produced by previous methods, and the remaining products are also more valuable. The point which the public will appreciate is that there is said to be little or no sulphur in this new and cheaper gas. Such is the account of the invention which has been privately making way, the latest facts coming out regarding it being that a French company has bought the privilege of using the patent in France for 100,000*l*, and that works are being erected for lighting the town of Barnet with gas at an early date, which will supply an experiment on the largest scale. It is hardly to be wondered at therefore, when the public mind is beginning to be awake to such matters, that the original 1*l* shares are at 13 premium, having been at 18 to 20, and that the new issue, which is only to existing shareholders, is at 4 to 5 premium. The rise is equal to 400 or 500 per cent., quite like the recent rise in asphalte and sewage companies. Such is the latest application of science which has come upon the Stock Exchange, and the examples of success have now been so frequent that they must tend to turn people's heads. A joint stock company seems hardly a fit agency for dealing with so novel a matter as a new invention, but after a certain stage, and when results are secured of which outsiders can judge, the monopoly furnished by our patent law appears to supply the essential condition for successful joint stock working. We need hardly add that, notwithstanding the great success of some new companies of this sort, the ordinary investor should not touch them, the risk being really extreme, and the failures manifold. The matter is one of sheer speculation, to be ventured on only by capitalist speculators, after the closest inquiry. It may well be doubted however whether the public is any wiser than it was, and the development of the new speculative mania which we look forward to should be followed with some anxiety.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts into and Payments out of the Exchequer between April 1, 1871, and Oct. 21, 1871 :—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1871-72.	Total Exchequer Receipts To Oct. 21, 1871.		Same time last year.	
	£	£	£	£	£
Balance on 1st April, 1871—					
Bank of England	...	5,678,915		7,633,761	
Bank of Ireland	...	1,344,520		972,887	
			7,023,435		8,606,648
REVENUE.					
Customs	20,100,000	10,854,000		10,994,000	
Excise	22,420,000	11,088,000		11,167,000	
Stamps	8,750,000	5,320,000		4,871,000	
Taxes	2,330,000	400,000		797,000	
Income Tax	8,820,000	1,641,000		1,451,000	
Post Office	4,670,000	2,242,000		2,330,000	
Telegraph Service	750,000	425,000		240,000	
Crown Lands	375,000	140,000		150,000	
Miscellaneous	4,100,000	2,724,891		1,699,156	
Revenue	72,315,000		34,843,891		33,689,156
OTHER RECEIPTS.					
Advances, under various Acts, repaid		1,394,944		1,173,177	
Money raised for fortifications		...		...	
Money raised by Exchequer Bonds		...		...	
Temporary advances not repaid		1,400,000		...	
			2,794,944		1,173,177
Totals			44,662,270		43,468,981

EXPENDITURE AND OTHER PAYMENTS.

	Budget Estimate for 1871-72.	Total Exchequer Issues To Oct. 21, 1871.		Same time last year.	
	£	£	£	£	£
EXPENDITURE.					
Interest of Debt	26,910,000	18,096,843		18,070,262	
Other charges on Consolidated Fund	1,820,000	1,167,483		1,297,597	
Supply Services voted by Parliament	43,283,000	22,497,344		20,007,473	
Telegraph Service	420,000	280,000		210,000	
Expenditure	72,433,000		42,041,670		39,585,332
OTHER PAYMENTS.					
Advances under various Acts		893,703		678,361	
Expenses of fortifications		...		...	
Exchequer Bonds and Bills, &c., paid off		143,300		[illegible]	
Surplus income, to reduce Debt		739,179		1,656,121	
			1,776,182		2,359,982
Balances on Oct. 21st, 1871—					
Bank of England		631,763		1,166,809	
Bank of Ireland		212,655		356,858	
			844,418		1,523,667
Totals			44,662,270		43,468,981

The following are the Receipts on account of Revenue during the week ending Oct. 21 :—

	Receipts of Week Ending Oct. 21.
	£
Customs	761,000
Excise	874,000
Stamps	390,000
Taxes	6,000
Income tax	143,000
Post Office	nil.
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	108,356
Total	2,282,356

The total receipts of the previous week were 1,107,827*l*.

The Exchequer issues of the week on account of expenditure were 711,000*l*, viz. :—

	£
Interest of debt	200,000
Other charges on Consolidated fund	nil.
Supply services	511,000
Telegraph services	nil.
	711,000

During the week the cash balances have decreased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Oct. 14	784,305	213,426	997,731
— Oct. 21	631,763	212,655	844,418
Decrease	152,542	771	153,313

THE POLICY OF ANY LONGER MAINTAINING THE BANK "MINIMUM RATE."

TO THE EDITOR OF THE ECONOMIST.

SIR,—We have had during the last fortnight another illustration of the inconvenient and awkward action of the official Minimum rate of the Bank of England. For reasons perfectly sufficient as regards the Banking Department of the Bank and the replenishment of its reserve, the Directors have kept the official minimum at 5 per cent. per annum. But in the outside money market the rate for good bills has been 4 per cent. or less, and on the Stock Exchange has been 2½ per cent. or under. By long custom the banks and discount brokers regulate their allowance of interest on deposits on the basis of one per cent. under the Bank minimum, and the consequence has been that these establishments have been, and are, large losers. Discrepancies the same in character have been of constant occurrence of late years; but the divergence in the present instance is more serious than recent instances, and attracts more attention. On general principles, any such thing as a minimum rate of discount is as indefensible and absurd as a minimum price of corn or coffee, with the additional aggravation that neither corn nor coffee change in value so sensitively and rapidly—not from day to day, but from hour to hour—as loanable capital. The rapid extension of the London Money Market, and the concentration within it of an increasing share of the financial business of the world, have radically altered the conditions under which some thirty years ago the Bank official Minimum rate became nearly the most important circumstance relating to that market. Then the Bank was the predominant discount and lending power—now the Bank, as compared with the aggregate of its competitors, has no longer, except under certain special events,

by any means the preponderating place; and more and more it becomes manifest that rates which are right and prudent for the Banking Department are not applicable to outside dealers in money. Sooner or later therefore the self-interest of these outside dealers will compel them to break through the tradition which has so far led them to fix their terms on the pivot of the Bank minimum; and as this action of the dealers will arise in the natural course of the growth and development of a wholesome trade under perfectly free competition, it follows that whatever is best for the dealers is best for the customers who resort to them.

One or both therefore of two things will before long happen. First: the Banking Department of the Bank of England will cease to issue notifications of a minimum rate, and will simply, like other dealers in loanable capital, follow the daily and hourly course of the market. Secondly: supposing the Bank minimum proclamations to be maintained, the outside dealers will cease to act upon them as the controlling index of the rates of interest to be adopted by themselves.

Imitating examples already in force in Scotland, it may perhaps be found convenient for the principal Banks and Discount houses to agree among themselves, from time to time, the rates to be allowed by them on deposits, so as to avoid unseemly or embarrassing disagreement among themselves.

The soundest and most scientific course would be for the Bank itself to abandon the notifications;—and to this conclusion it is no secret that many of the leading members of the Bank Court have themselves arrived. W. N. H.

27 Oct., 1871.

P.S.—The non-alteration yesterday of the minimum of 5 per cent., in the face of daily declining rates outside, adds further point and cogency to what is said above.

Literature.

CRACROFT'S INVESTORS' RECORD OF PURCHASES AND SALES, with Calculations Adapted to every Investment. Second Edition. London: Effingham Wilson. Bernard Cracroft, 4 Austinfriars.

WE had occasion in noticing the first edition of this work to point out the merit of its leading idea—the combination in one volume of a form of book adapted to the record of investments in stocks and shares, with numerous tables, to enable investors and agents to estimate the yield per cent. on the stocks they hold, or might possibly purchase. There is now a large class of people whose sole business it is to look after the investment of their own money, or who have a large business in that capacity as agents of others, and the book-keeping expedient for them is as special as that of any other trade. The author's object here was to supply the special form of bookkeeping required, and the utility of combining with it a good apparatus for investment calculations was obvious. This second edition however is so much improved as to call for a fresh notice. Instead of making it a record of stocks and shares exclusively, the author has added special forms of entry for other forms of investment—such as insurances, loans, and freehold, leasehold, and copyhold property. By this means the book will be more variously useful, and gentlemen of the legal profession who have miscellaneous sets of securities to look after will find it especially serviceable. In detail the present edition is a great improvement upon the first, which was but a rough sketch compared with it. The calculation tables have been added to, simplified, and otherwise improved, so that nothing more is needed, we should think, to assist an investor in this way.

THE PRACTICAL LINGUIST, being a System based entirely upon Natural Principles of Learning to Speak, Read, and Write the English Language. By DAVID NASMYTH, LL.B., F.S.S. In Two Parts. Part I. London: David Nutt. 1871.

THE author has applied to the English language a principle which he had previously introduced in the teaching of German and other foreign languages. He first ascertains by calculation the comparative frequency with which words are used in ordinary speech or the most common books, and then frames a series of lessons, based upon introducing words according to the frequency of their actual use. The principle appears to be well wrought out, and results in a series of reading lessons, by which it is evident that learners will be gradually familiarised with their difficulties.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Oct. 26.

The returns of the Bank of France for this week, last week, and for the week ending 8th September, 1870, are as follow:—

	Oct. 26, 1871.		Oct. 19, 1871.		Sept. 8, 1870.

Bills discounted	14,875,000	.....	...
Prolonged bills	...	.....	8,500,000
Treasury bonds	nil.	.....	nil.

The premium on gold has varied little during the last week, and still remains at from 20f to 22f per thousand. The scarcity does not so much arise from the speculation in bullion and its exportation, as from the habit of hoarding so common in France, and which has been aggravated by the present panic. More than a month ago the premium on gold was as high as from 8 to 10 per cent., but the fact that any difference existed in the value of notes and specie was unknown to the general public, and in ordinary trade no preference was shown for the latter. This ignorance might have continued longer, but for the advertisements of some money changers announcing that they purchased gold. The consequence was first the almost immediate disappearance of all the gold from the circulation, and then the small divisionary money. A change of half-a-franc is now generally made in the shops for the charge of a twenty-franc note, and even on those terms notes are not always received. In the cafés and places of public resort, the waiters inform customers that if they want change they cannot be served. The Government has contradicted the rumour that the Bank of France intended to issue ten-franc notes, and is making efforts to accommodate the public by a large issue of small silver coin. A considerable quantity of one and two-franc pieces of the Pontifical States

had been withdrawn from circulation in France two years back, in consequence of the sum allowed by the international convention with France, Italy, Belgium, and Switzerland having been exceeded. They have now been again issued, the Government announcing that they shall be gradually withdrawn from circulation as soon as the crisis has terminated. The Mint is at this moment striking off 100,000 two-franc pieces daily, with a proportionate quantity of others—one franc and half-a-franc. This rate of production is to be continued for twelve days longer. Additional offices have been opened at the Bank for changing large notes into those of 20f, 25f, and 50f each, or into silver money; but to obtain coin applicants have to produce a certificate from the Commissary of Police of their quarter, showing that it is required for paying workmen, or for other business purposes, and not for speculation.

M. Michel Chevalier, who was one of the first writers in the French press to predict the depreciation of the paper money, now turns that fact to account to combat the Protectionist tendencies of the Government. He says in the *Debats*:—"We are forced to give about 26f in banknotes to procure one pound sterling in London, the par of which is 25f 21c. Every effort we shall make to render foreign countries our debtors will modify the rate of exchange in our favour, and the exportation of French merchandise will evidently have such a result. Our interest is therefore to increase our exports..... To increase our exports, it is necessary to render the production as easy and economical as possible—that is to say, we must abandon all duties on raw material, and open our gates wide to machines, tools, looms, and implements of all kinds, which are often better and cheaper abroad than in France. Baron Seillière, whose factories, from their size and excellent organisation, cause him to be classed among the chief manufacturers in Europe, declared before the committee for the commercial inquiry in 1870, that the French duties on machinery formed the greatest obstacles to the progress of industry and cheap production in France. The fact is undeniable. The consequence to be deduced is that if we wish that French industry, by the excellency of its conditions of production, should export an increased quantity of merchandise to the foreign markets, it must be allowed to purchase in any country and without duty its instruments of labour as well as its raw material."

The daily quotations of the rate of exchange on London are now watched with almost as much attention as the variations in the funds, as the prices of such bills enter largely into the calculations of all commercial operations with foreign countries, as in consequence of the unsettled state of the French money market it has become a common practice to stipulate that import or export orders shall be paid in bills on London. The fluctuations in those rates date as far back as the months of August and September of 1870, when the interruption in the trade of France, and the large purchase of military stores and provisions in England, had caused the price of the pound sterling to advance from the par of 25f 20c to 25f 45c; on the investment of Paris it had risen to 25f 75c. The announcement of the loan after the peace produced an influx of English capital, and for a time the exchange descended to par, but after a short interval the large purchases of bills for the payment of the Prussian indemnity again forced upwards the rates until they reached 26f, and at one moment 26f 20c or a premium of four per cent. The engagement made by the Government emission of the loan of two milliards to establish an agency in London for the payment of the dividend in pounds sterling, will now contribute to maintain the rate of exchange, and many coupons will be sent there, and the amount be returned in notes or drafts, which the Treasury will have to purchase at an advance of three or four per cent. on the amount of the dividend they represent.

With the exception of railway stock, for which lower rates are accepted, the Bourse has been firm throughout the week, and securities of all other kinds show an advance in prices. The following are to-day's quotations:—

	October 19.			October 26.

The municipal loan of 1871 is more demanded, and the premium has again risen to 7f. The premium on gold remains at from 18f to 20f, and exchange on London at 26f. Sovereigns, 25f 95c to 26f; and English notes, 25f 97½c to 26f 2½c.

The Minister of Finance is said to be now in treaty with the Prussian Government for the payment of the fifth half-milliard of the indemnity in French Five per Cent. Government stock, at 95, with the proviso that it should not be negotiable for a period of eight years.

The Credit Rural of France has held an extraordinary meeting, to which was submitted by the Board of Directors a proposal to modify the statutes, so as to permit the company "to lend its aid, in France or abroad, to docks, bonded warehouses, and other useful enterprises, either by undertaking the total or partial emission of their shares, by advancing money to, or purchasing the stock of, such companies, or in any other way the board of directors may decide on." The meeting voted unanimously the resolutions proposed.

M. Pinard, the principal founder of the Comptoir d'Escompte, and for more than twenty years the chairman of its board of directors, has just died, at the age of 56. To M. Pinard was chiefly due the large extension in the business of that company, by the establishment of branches in India, China, and the colonies.

The Vieille Montagne Mining Company has announced a subscription for a loan of five millions of francs, in bonds, issued at 475f, bearing 25f interest yearly, and reimbursable, at 500f, by drawings in ten years from the year 1883. Shareholders will have a priority until the 11th November. The object of this loan is the purchase of mines in Sardinia and Algeria, and of works in the south of France.

A decision of importance has just been rendered by the Tribunal of Commerce at Rouen. M. Franchomme, of that town, sold on the 29th June last 250 barrels of refined petroleum, at 45f per 100 kilos, to MM. Renaux and Sons, to be delivered in the course of the month of July at Lille. On the 8th of the latter month the duty on the article was increased by a decree, and M. Franchomme refused to execute the contract, except on an advance of price equivalent to the additional duty. An action was brought by the buyer, and the Court has now given a verdict for the plaintiff, annulling the contract, and condemning M. Franchomme to pay 8,000f damages and the costs. The judgment was based on the fact that in all time bargains the object of the purchaser is to guard against a rise in price from any unforeseen event; also, that if an increase of duty was sufficient to annul the contract, from a parity of reasons a reduction of duty should produce the same effect, and the result would be to introduce a disturbing element in commercial transactions.

The Chamber of Commerce of Strasburg has laid before the German Federal Chancery a memorial on the projected monetary reform. For some time past Germany had assimilated her weights to those of France by the adoption of the metrical quintal of 50 kilogrammes in the Zollverein. The metre, the litre, and the gramme, with their subdivisions, have also been adopted under different names, and will shortly be brought into use in all parts of the Empire. The memorial shows that only one more step has to be taken to place the German system in complete harmony with that of France, which is to fix the monetary unity at five grammes of silver, and consequently to take the franc as the principal money of account with a gold coin of 25f, which would become the common medium of business transactions, and would be readily accepted in all foreign countries.

The measure of the Prussian Government abolishing the forced currency of notes of the Bank of France in the annexed province, and the closing of the Strasburg branch of that establishment, is producing great inconvenience in Alsace. The Chamber of Commerce of Strasburg has petitioned the Minister of Commerce at Berlin to decree a prorogation of the dates for the payment of bills for three months, as was done in Paris during the siege. A judgment just rendered by the Tribunal of Commerce at Strasburg adds to the difficulty by establishing a precedent in direct opposition to the new legislation. A money-changer of Bischwiller had offered to pay two acceptances with notes of the Bank of France, which were refused by the Bank of the German Union, which has now branches in Alsace and Lorraine. The German bank had the bills protested, and the affair was recently brought before the Tribunal of Commerce, which decided that the notes were a legal tender, on the grounds that the forced currency was decreed at a moment when the French Government possessed sovereign authority in Alsace and Lorraine, and that although those provinces have since been separated, the French laws are maintained, with the exception of those formally abrogated by

the authority; and that as no law has repealed that by which notes were made a legal tender, the payment in notes was valid.

The contractors for the Peruvian loan of 1870 have issued notice that after the 31st inst. steps will be taken for declaring the forfeiture of all scrip certificates on which the entire capital has not been paid up.

The hands, male and female, of MM. Martin and Brisson's plush manufactory at Tarare, 450 in number, have just turned out on strike for an increase of wages. They demand an advance of 10 centimes per metre, and the abolition of fines; they ground their claim on the high price of food, and the inferior quality of the raw material given to them to weave.

The Lyons-Mediterranean Company has announced that it will pay, from the 1st November, an instalment of 20f per share on the dividend for the year 1871.

The Eastern Company has given notice that it will propose to the general meeting of shareholders, to be held on the 4th November, to fix its dividend for the year 1870 at 25f per share.

The Company of the South of Austria and Upper Italy Railways has also decided on paying a first coupon of 7f 50c per share on the dividend of 1871, from the 2nd November.

A notice from the Minister of Finance informs the public that in execution of the law of the 23rd and 25th August, doubling the stamp duty on bills, those from the colonies, on which the old duty only was paid, must be stamped a second time in France before they can be negotiated, endorsed, accepted, or paid.

The following are the latest quotations of the produce markets at Havre, per 50 kilos, duty paid:—

COTTON.—New Orleans ordinary, 118f for delivery; low middling, 114f for December, 112f 50c for January to March; Oomrawuttee fair, 88f; good ordinary, 91f; Peruvian, 120f.

COFFEE.—Hayti, 142f 50c; Cape, 145f; Jamaica, 147f 50c; Porto Cabello, 82f 50c in bond; Rio, 138f 50c to 142f 50c; in bond, 76f to 82f.

SUGAR.—West India, No. 4, 58f 50c to 59f in bond; in Paris, native, 88 deg., 64f, white, 71f in bond per 100 kilos; refined, 142f and 143f.

HIDES.—Tampico dry, 125f; Bahia dry, 127f 50c.

WOOL.—Buenos Ayres, 1f 80c to 2f per kilo; La Plata, 1f 80c to 2f 20c; at Marseilles, India, 2f 5c.

TALLOW.—La Plata ox, 57f 50c to 58f 25c; sheep, 54f 75c to 56f; saladeros, 59f.

PETROLEUM.—American, 85f per 100 kilos in bond.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap 32, for the week ending on Wednesday, the 25th day of October, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	35,930,735	Government debt	11,015,100
		Other securities	3,984,900
		Gold coin and bullion	20,930,735
		Silver bullion	...
	35,930,735		35,930,735

BANKING DEPARTMENT.

	£		£
Proprietors' capital	14,553,000	Government securities	15,201,028
Rest	3,117,282	Other securities	19,464,541
Public deposits, including Exchequer, Savings' Banks, Commissioners of National Debt, and dividend accounts	4,094,448	Notes	10,847,160
		Gold and silver coin	724,531
Other deposits	23,958,163		
Seven-day and other bills	514,367		
	46,237,260		46,237,260

GEORGE FORBES, Chief Cashier.

Dated the 26th October, 1871.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

LIABILITIES.	£	ASSETS.	£
Circulation (including Bank post bills)	25,597,942	Securities	35,112,569
Public deposits	4,094,448	Coin and bullion	21,655,266
Private deposits	23,958,163		
	53,650,553		56,767,835

The balance of Assets above Liabilities being 3,117,282*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts compared with those of last week exhibit—

	Increase. £	Decrease. £
Circulation	...	770,974
Public deposits	334,355	...
Other deposits	821,531	...
Government securities	...	600,000
Other securities	...	314,284
Bullion	1,301,845	...
Rest	2,649	...
Reserve	2,012,330	...

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house:—

	Week ending Oct. 25, 1871. £	Week ending Oct. 18, 1871. £	Week ending Oct. 26, 1870. £
Thursday	11,718,000	15,508,000	8,902,000
Friday	15,961,000	37,796,000	10,914,000
Saturday	14,261,000	19,397,000	11,262,000
Monday	13,357,000	15,726,000	9,757,000
Tuesday	13,912,000	15,676,000	11,475,000
Wednesday	11,586,000	15,220,000	9,346,000
Total	80,795,000	119,323,000	61,656,000

GEORGE DERBYSHIRE, Chief Inspector.

Bankers' Clearing-house, October 26th, 1871.

The total since the 4th of January, 1871, is 3,791,392,000*l*, compared with 3,163,139,000*l* for the corresponding period last year, showing an increase of 628,253,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz.:—

At corresponding date with the present week.	Oct. 30, 1861.	Oct. 28, 1868.	Oct. 27, 1869.	Oct. 26, 1870.	Oct. 25, 1871.

In 1861, money continued easy, the Bank minimum being above the open market rate for everything except six months' bills. The Americans had just dispatched a maritime expedition to seize the ports of the Secessionists.

In 1868, money still continued easy at 2 per cent., though the foreign exchanges were again rather more against England. The Government of the Danubian Principalities had just granted a concession for the extension of the Lemberg-Czernowitz line to Jassy, with a branch which would open a communication with Odessa.

In 1869, money was not much in demand, though a recent advance in the continental rates had been maintained. Mr Boutwell, the American Finance Minister, had just promulgated his intention to attempt refunding the American 6 per cent. debt at a lower rate of interest.

In 1870, money was easy on account of the check to business and new undertakings caused by the war, and the consequent accumulation of money in Lombard street. The capitulation of Metz had just occurred, and proposals for an armistice had been made by the English Government to the belligerents, but had come to nothing. The French delegate Government had just effected a loan of 10,000,000*l* in London.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 2,326,234*l*; in 1868, an excess of 4,214,092*l*; in 1869, an excess of 3,005,104*l*; and in 1870, an excess of 2,587,107*l*. In 1871, there is an excess of 4,493,622*l*.

DISCOUNT AND MONEY MARKET.—The present condition of the market is most anomalous. The abundance of money in the open market which we had to notice last week has increased, and in the middle of the week the minimum open market rate was 3½, or almost 1½ under Bank rate. Short money has, in fact, been so abundant that it has been impossible to place it. All through the week, moreover, gold has kept flowing into the Bank. The consequence was a very

general impression on Wednesday and Thursday morning that the Bank minimum should be lowered, but the Bank directors at their meeting on Thursday resolved to maintain it, and the result has been—coupled with the abundance of money seeking employment in Lombard street—a great unsettlement of the open market. The bill brokers are almost unable to give any quotations, numerous special transactions being entered into, and the confusion is increased by the custom which has grown up of allowing for deposits at call 1 per cent. under Bank rate, and at notice ½ under. The joint stock banks and discount houses are, as the result, encumbered with money, for which they pay 4 per cent., but which they cannot employ wholly at that rate or above it. The market is thus completely unsettled, business being done and rates quoted much under the Bank minimum, with abundance of money about, but the settled custom of the market to allow 1 and ¾ per cent. under the Bank minimum being completely upset so far as the discount houses are concerned. After lowering their rates in the middle of the week to 3½ for new money at call and 3¾ at notice, several of the leading discount houses have to-day resolved to allow only 3 at call and 3½ at notice for new money, though they still allow 4 for old money, both at call and at notice. Other discount houses will only take new money upon special arrangements. Representatives of the joint-stock banks also met to-day to consider the expediency of adopting similar steps; but though the majority were in favour of a reduction, it is understood that the London and County, National Provincial, and Union Banks would not admit the expediency of a change of custom, and of course the proposal, which could only be carried out unanimously, has fallen through.

To-day there has been rather an improved demand at the Bank, and also partially in the open market—bills having been held over in expectation of lower rates, and now coming forward for discount. There has been little demand for the Stock Exchange on account of the settlement, the difficulty being to place money there on any terms.

The changes in the Bank account are such as would have usually led to a change in the rate. The bullion has increased 1,301,000*l.* during the week, being now 21,655,000*l.*, and the reserve has increased 2,012,000*l.*, being now 11,572,000*l.* The private securities have also run off to the extent of 314,000*l.*, while the Government has repaid 600,000*l.* The Bank is thus stronger than it was the previous week. The account is in fact rather better than was anticipated. The Bank directors have thus been rather guided by their anticipation of the commitments for the ensuing two months, and their knowledge of the instability of the short money which is now in Lombard street, and is choking up the usual avenues for its employment. It is right to notice also that the foreign exchanges are still rather less in our favour than they were a week ago, and yesterday and to-day there has been a great deal of activity in the bullion market, large withdrawals from London being now looked forward to, though as yet rather more is coming in than what is going out.

The principal change in the Bank of France account is a farther increase in the note circulation, which is now about 89,000,000*l.*, or 12,000,000*l* more than it was a month ago.

We subjoin our quotations for mercantile paper having various periods to run; but the quotations, we need not say, are subject to the observations we have already made as to the unsettled state of the market:—

Bank bills—Short	3⅞ 4	per cent.
Do 4 months	4	per cent.
Do 6 —	4 ¼	per cent.
Trade bills—3 months	4 ¼	per cent.
Do 4 months	4½ 5	per cent.
Do 6 —	4½ 5	per cent.

As we have stated above, the allowances for money by the joint stock banks and discount houses are at various rates, and it is impossible to give any one current rate. The joint stock banks, after their failure to come to an agreement to-day, may still be considered to hold out 4 per cent. as their rate for money at call, but this is really for old money only, and several of the leading banks protect themselves by refusing new money. The discount houses also allow 4 per cent. for old money, both at call and at notice, but their current rates, as we have stated above, are "not more" than 3 per cent. for money recently taken at call, and 3¼ at notice.

The discount quotations current in the chief continental cities are as follows:—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.
Paris	6	5	...	5
Vienna	6	7	5	6⅜
Berlin	5	4	4	3½
Frankfort	5	4	3½	3¾
Amsterdam	4	3	3¾ 4	2⅝ 3
Brussels	3½ ...	4½	3¼ ½	4
Hamburg	...	...	2½	4¼
St Petersburg	8	6	6	6

The Stock Markets.—The week has been one of considerable activity, with a much improved tone compared with what has prevailed lately. The favourable Bank return of last week and the continued influx of gold, with the continuance of cheap money in Lombard street, have induced speculators to operate largely, and there has also been a considerable amount of *bona fide* investment. For reasons we have often pointed out, the permanent current in the markets is towards a much higher level of prices—the demand of the public with their savings being rather for old investments than for new undertakings, while the upward movement is stimulated in the case of the leading railways, banks, and other home securities, by the enormous increase of the business of the country which is now going on, and which is making all these leading undertakings year by year more profitable. Hence after every fluctuation caused by apprehensions about the money market, there is a renewed advance of prices. This week the advance has been to a point, in some cases, *beyond* the high figures touched before the first panic set in on the advance of the Bank rate to 3 per cent., and in all cases to at least very nearly the old level. The progress of the account seems also to have been favourable, on the whole, to an upward movement, the bears having had to buy back largely, and in one or two instances pay backwardation, and the contangoes, with one or two exceptions, having been unusually light. Since Thursday the markets have been weaker, in consequence of the Bank not following the open market and reducing its rate; but there has been no great fall in prices, the favourable character of the Bank return, and the continuance of cheap money, reassuring operators about the future. In the case of English railways, the continuance of good traffics is for the present a stronger influence than any apprehensions about money.

The new loans brought out last week are understood to have been completely successful, and the new undertakings generally have also succeeded.

English Government Securities.—The advance in Consols was from 92⅜ ⅞, the closing price of last week, to 93 ⅛ on Wednesday, but the closing price on Wednesday was ⅛ less, and the action of the Bank directors in maintaining the rate produced on Thursday an immediate fall to the closing point of last week. In the afternoon of Thursday, however, and to-day there has been a recovery, the quotation at noon to-day being 92⅞ 93 for money, and 93 ⅛ for the account, but the best price has not been maintained till the close—the last quotations being 92⅜ ⅞ both for money, and the account.

Subjoined is a list of the highest and lowest prices of Consols every day:—

	CONSOLS. Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	92⅞	92⅞	92⅞	92⅞	1s to 6s pm
Monday	92⅞	93	92⅞	93	2s to 7s pm
Tuesday	92⅞	93	92⅞	93⅛	2s to 7s pm
Wednesday	92⅞	93	92⅞	93	2s to 7s pm
Thursday	92⅞	93	92⅞	93	3s to 8s pm
Friday	92⅞	93	92⅞	93	3s to 8s pm

The following are the changes for the week, taking the latest unofficial prices for quotation:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

Queensland Government 6 % Bonds, 1884-5	108 9	.....	110 11	+ 2
Victoria 6 %	110 11	.....	111 12	+ 1
Ditto New 5 %	104½ 5½	.....	105 6	+ ½

FOREIGN GOVERNMENT SECURITIES.—The improvement in this market from last Friday to Wednesday was very steady. Spanish rose from 33⅝ ⅜ to 34 ¼, French 5 per cent. loan from 9 13/16 7/8 to 10⅛ ⅜ premium; Turks from 45 5/16 7/16 to 46½ ¾, Egypt (1868) from 79⅝ ⅜ to 79⅞ 80⅛, and other stocks in proportion, the rise being very general, and being stimulated by advances on the continental bourses, where, as here, there has lately been a steady movement towards a higher level of values. On Thursday, however, the maintenance of the 5 per cent. Bank rate had rather a bad effect in this department, though the fall was instantly recovered from by the continued abundance of money in the open market, and the circulation of reports as to the expected favourable character of the Bank return. Spanish however was specially affected by a Madrid telegram published in the middle of the day, to the effect that the new Finance Minister "intended to propose" to the Committee of the Budget a tax of 18 per cent. on both the internal and external debt. The old Spanish stock was consequently at one time at 33¼ ⅛, but recovered before the close of the day to 33⅞ 34, the report being believed incredible after the recent straight forward conduct of the Spanish Government. The new loan was less affected, and closed at 3 to 3¼ premium. To-day the market generally opened strong, and remains good, though prices were rather flatter in the afternoon, partly from the usual realisations at the end of the week and partly from the absence of dealing incidental to the settlement, which has again been on a large scale, and has taken up the time of brokers and dealers. In the afternoon there were also some rumours as to approaching withdrawals of gold. Spanish fluctuated rather rapidly from hour to hour, according to varying impressions respecting the truth of the telegram from Madrid as to the intentions of the Finance Minister, but the limits of oscillation were the same as yesterday, and at the close the feeling was better, the final quotations being 33 7/19 9/16, and the new loan 2⅝ to 2¾ pm.

The allotment letters of the new Costa Rica loan were delivered on Tuesday, and the lists for the new Uruguay loan were closed on Tuesday for London, and on Wednesday for the country. The closing quotation for Costa Rica is 5 to 7 prem., and for Uruguay ⅛ to ⅜ prem.

With regard to the announcement respecting the intention of the new Finance Minister in Madrid, to levy a tax of 18 per cent. on the internal and external debt, the prevailing opinion among the best authorities on Spanish affairs in the city appears to be decidedly against the trustworthiness of the telegram. They do not think such a proposal would find favour among Spanish politicians of any class, who are now fully sensible of the importance of maintaining Spanish credit abroad. Even if a particular Minister should entertain a proposal of the sort, his entertaining it would be far from insuring that his colleagues and Parliament would agree, especially in the face of the pressure that would certainly be brought to bear before the measure could be carried. Comment on the proposal is unnecessary. It is the most flagrant and unblushing attempt at repudiation which has been thought of since the Austrian Government resolved some years ago on the fatal course which has excluded it from the European money markets. The mere suggestion of the scheme is disastrous to the rising credit of Spain, and no time should be lost by the authorities in Madrid in repudiating the plan ascribed to them.

Annexed are our usual quotations showing the changes for the week :—

ENGLISH RAILWAYS.—The market this week has been a very strong one, the causes which we have already described inducing speculators to operate freely. The increase of traffic has again been very remarkable this week, and coupled with the notion which is now spreading, that the increase is of an unusually profitable kind, in consequence of a large proportion of it being in passengers, gives speculators and investors the certainty of a large increase in the dividends at the end of the half-year. The advance of the week was most remarkable in Caledonian, which on Wednesday touched 115½; Great Western, which were at 107½ 108; South Eastern Deferred, which were at 74½ 75; Great Eastern, which were on Thursday at 46 to 46¼; and Chatham and Dover Preference, which have been at 66¾ 7¼. The maintenance of the Bank rate at 5 per cent. produced a fall of ½ to 1 per cent. all round, except in Great Eastern, where there was backwardation to pay on Thursday as the account progressed. Caledonian fell to 113½ 14; Great Western to 106¼ ⅜; South Eastern Deferred to 73¾ 74¼; Chatham and Dover Preference to 66¼ ⅜; and Midland, North-Western, North-Eastern, and other heavy stocks between ½ and 1 per cent. The fall however was almost wholly recovered from on Thursday evening. Brighton were specially affected on Thursday by the reported revival of a scheme for a direct line between London and Brighton, and fell to 68¼, the best point of the week having been 69½ 70. Such reports are likely to be current now for some weeks, but we should deprecate very much in the public interest the revival of the old vice of competition in railways, from which however the southern lines could easily save themselves by amalgamation. To-day the markets opened good, but after the middle of the day prices became weaker, from the causes we have already touched on as affecting the foreign market. At the close they are rather lower all round than they were on Thursday evening, but as will be seen there is still a considerable rise as compared with the closing prices of last week. Great Western have remained exceptionally strong, closing at 107 to 107½.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Caledonian	112⅜ ⅜	.....	114½ ¾	+ 2⅜
Great Eastern	43⅜ 4½	.....	45⅞ 6	+ 1½
Great Northern	133 34	.....	133 34	... ...

Metropolitan District 6 %	120 22	.....	120 2	... ...

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Oct. 21 to 818,729*l*, being an increase of 72,594*l* on the corresponding week of last year. The aggregate receipts of the half-year to date are now 12,760,030*l*, being an increase of 917,538*l* on the corresponding period of last year. The principal increases for the week are—London and North-Western, 12,194*l*; North-Eastern, 11,506*l*; Lancashire and Yorkshire, 5,389*l*; Midland, 9,068*l*; Great Western, 6,429*l*; South-Eastern, 4,853*l*; Great Eastern, 2,938*l*; and North British, 3,475*l*. The following shows the details of the increase in each case, for week and for the whole period :—

RAILWAY TRAFFIC RETURNS.

	Week's Receipts. Amount.	Inc. or Dec. on Corresponding week in '70.	Aggregate Receipts of Half-year to date. Amount.	Inc. or Dec. on Corresponding period in '70.

	818,729	+72,594	12,760,030	+917,538

* In these cases the aggregate is calculated from the 1st of August.

The applications for the new 305,000*l* B Debenture stock of the Chatham and Dover Company, which were issued preferably to the holders of the Arbitration Preference stock, have exceeded the amount required, the total amount applied for being 500,000*l*. The new issue of Caledonian Ordinary stock has been dealt in at a premium, about 2½ per cent. under the premium on the old stock.

FOREIGN AND COLONIAL RAILWAYS.—The following are the principal changes for the week :—

AMERICAN SECURITIES.—The effect of the Chicago disaster upon the value of American securities has now been fully recovered. It would appear that the extent of the loss caused by the conflagration has been much exaggerated, and the evil will be further mitigated by the rebuilding of the city in a more substantial and safer manner. Already the leading mercantile houses and banks have commenced their ordinary avocations. The following shows the changes for the week in this department :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	90 ½	.....	91 ⅝	+ 1⅛
Ditto 1865 Issue	90½ ½	.....	91 ⅛	+ ⅝

Pennsylvania Gen. Mort. 6 % Bonds, 1910	95½ 6½	.....	95½ 6½	... ...
Virginia 6 % Bonds	50 2	.....	50 2	... ...

JOINT STOCK BANKS.—Only a limited business has been transacted in this department, nevertheless most of the changes in prices have been of a favourable character, London and River Plate and Anglo-Egyptian have risen 1, Alliance, London Joint Stock, Union of Australia, and Union of London ½. On the other hand Australasia have declined 1, and Agra A ¼.

TELEGRAPH SHARES have ruled flat, and close at an almost general decline on the week. Anglo-Mediterranean show a reduction of 3; Great Northern, ½; Marseilles, Algiers, &c., ¼; West Indian, ⅛; but Anglo-American have risen 1; and French Cables, ½. In construction shares, Silver's are ½ better.

MINES.—There has been considerable activity in the demand for mining shares, and the general tendency of the quotations has been upwards. In the British market we note an advance of 7½ in Wheal Buller; 2 in Tin Croft; 1 in East Bassett, Providence, and Tankerville; ½ in Great Laxey; and ¼ in West Caradon. On the other hand Van shares have given way 2; Wheal Grenville, ½; and Crenver, ¼. In the foreign market there is a rise of 2 in Eberhardts; 1 in St John del Rey; and ¼ in Colorado; but Chontales, Pacific and Sweetland Creek have given way ¼; and Cape Copper, ½.

The letters of allotment of the Camp Floyd Silver Mine shares have been forwarded. The closing quotation to-night was 2 to 2¼ prem.

A prospectus has been issued of the Nant-y-Blaidd Silver-Lead Mine. Capital, 20,000*l*, in 10,000 2*l* shares. The company is formed to purchase the lease of a property of 300 acres, situated in the county of Montgomery, and "in the centre of the most successful mines in Wales." The assayers' certificates are stated to be highly satisfactory. Contracts have been made for the erection of self-acting machinery, and "much work has been done to prove and lay open the lodes, and it will at present pay for working." The price of purchase is 2,000*l* cash and 7,000 fully-paid shares.

MISCELLANEOUS.—In this department but little activity has prevailed, though some important changes have taken place in the quotations for new undertakings. The official list shows a rise of 2 in Native Guano; 1 in Peninsular and Oriental Steam, Madras Irrigation, London and Glasgow Engineering; ⅛ in Lisbon Steam Tramways and ¼ in Hudson's Bay. On the other hand, Italian Irrigation Six per Cent. guaranteed bonds have given way 2; Fore Street Warehouse, London Financial and Rio City Improvement ½, and North Metropolitan Tramways ¼.

In the new undertakings, Patent Gas shares improved this morning to 18 to 20, and the new shares to 6½ to 7, closing easier at 12 to 14, and 5½ to 6 pm. respectively. Montrotier Asphalte shares opened this morning at a nominal quotation of ½ discount to ⅛ pm., but shortly improved (notwithstanding the limited number of transactions) on a rumour that the company had a contract for the paving of Brussels to 4 to 4½ pm., closing 3½ to 4 pm. Limmer Asphalte shares are quoted 4 to ¼, United Limmer ¼ discount to ¼ pm, Barnett's Asphalte ½ discount to par, Auvergne Asphalte 1 dis. to par, Native Guano 29 to 30, Phosphate Sewage 13 to 15, Sombrero Phosphate 1 dis to par, and Agentine Tramways par to 1 premium.

A prospectus is issued this evening of the Société Française des Asphaltes, Limited—capital 80,000*l*, in 8,000 shares of 10*l* each. The company is formed to purchase the mines of Garde Bois, Lovagny, in Haute Savoie, France, and the mine of St Jean de Maruejols, situate near St Ambroix, Gard, France, and the business works and machinery at Lovagny, and plant and stock-in-trade in Paris, of the company known as the "Société Française des Asphaltes." The concessions of the mines are stated to be in perpetuity, the St Jean mines without a royalty, and the Garde Bois at a royalty of 2½f per

ton. The asphalte of the company is stated to have been successfully laid down in the principal towns of France, including Paris, and the company, it is also stated, possesses convenience for transit, works in going order, and a skilled staff of workmen.

A prospectus is issued this evening inviting subscriptions for 25,000 A shares of 10*l* each of the Cesena Sulphur Company. The company is formed with a capital of 350,000*l* (of which 250,000*l* is in A or preferred shares, and 100,000*l* in B or deferred shares) to purchase "very valuable sulphur mines, pits, furnaces, and appliances" in the Romagna in Italy. The production of the mines is stated to have been already large under most adverse financial circumstances, the present rate of production at 3*l* 7*s* per ton being sufficient to pay nearly 12 per cent. on the A shares, but it is "confidently estimated" that the production will easily be raised in 1872 to 40,000*l*, giving 14 per cent. to the A shares, and 5 per cent. to the B shares; in 1873 to 53,000*l*, giving over 15 per cent. to both A and B; and in 1874 to 73,000*l*, giving over 20 per cent. to both A and B. The amount to be paid to the vendors is 218,000*l* in cash, and 100,000*l* in B shares (the whole amount); the terms of the issue as between A and B being that B receive no dividend until 14 per cent. is paid to A; after that B will receive exclusively up to 14 per cent.; and the subsequent profits will be divided *pro rata* between A and B.

EXCHANGES AND BULLION.—The exchanges this week still continue to be rather less favourable to this country than they were a fortnight since, but there is no particular change in the quotations.

The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—The influx of French coin has been very great during the week, and the large amount of 1,248,000*l* has been sent into the Bank since the 19th inst., counterbalanced by a withdrawal of only 58,000*l* in sovereigns, which have been sent to the Cape. The exchanges are at such a point as will continue to attract gold hither, and on the 3rd proximo the P. and O. steamer will bring nearly 600,000*l* from Australia. The Essex has brought 26,000*l*, and the Christina Thompson 56,000*l*, from Melbourne.

Silver continues in demand, and transactions have taken place at 60⅜d per oz standard. The Ceylon has taken 108,000*l* to Bombay, and we have received about 90,000*l*, chiefly from New York.

Mexican dollars continue to arrive in small parcels from New York; the price, however, remains without much alteration, the old coinage being in some demand for the out-going mail of to-morrow.

Exchange on India for Bank drafts at 60 days' sight is 1s 11¼d per rupee.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto refinable, 77s 11d per oz std, last price. Silver—Bar silver, fine, 5s 0⅜d per oz std; ditto containing 5 grains gold, 5s 0⅜d to 5s 0½d per oz std, last price; Mexican dollars, 4s 10¾d to 5s 0¼d per oz, last price.

The sum of 262,000*l* in gold was sent into the Bank of England to-day, while 25,000*l* in sovereigns was withdrawn for shipment to the East.

According to the *Gazette* return the imports of the precious metals into the United Kingdom during the week ended October 25 were:—Gold, 577,946*l*; silver, 195,746*l*. The exports were:—Gold, 685,600*l*; silver, 318,800*l*.

NOTICES AND REPORTS

STOCKS.

Egyptian 7 per Cent., 1868.—Bonds to the number of 3,700, representing 74,000*l*, have been drawn for redemption on the 15th January.

RAILWAY COMPANIES.

Buenos Ayres—Great Southern.—Interim dividend announced at the rate of 8 per cent. per annum, free of income tax.

Carmarthenshire Mineral Railway.—Capital, 160,000*l*, in 10*l* shares. It is intended to apply for Parliamentary powers for a line from Carmarthen to the Llanelly Railway at Pontardulais. The length will be about 19 miles, with branches of about eight miles, making a total of 27 miles.

Central Uruguay Railway of Montevideo.—The trustees publish reports from the local director of the company and Mr Higgins, C.E., who has just returned from a special mission to Montevideo to report on the position and prospects of the railway. According to Mr Higgins' report the present rate of traffic, deducting 50 per cent. for working expenses, would leave a net revenue of 10,400*l* per annum, or say 2,350*l* per annum more than is necessary to cover the 7 per cent. guarantee on the nominal capital of 10,000*l* per mile. A favourable account is also given of the prospects of the farther development of the line.

Denver and Rio Grande.—Messrs Jay Cooke, McCulloch, and Co. announce that the coupons will be paid on and after the 1st November next at their banking house.

Dingwall and Skye.—Result of first year's working—revenue, 11,328*l*; expenditure, 9,290*l*; balance, 2,038*l*. Capital expenditure, 270,004*l*.

London, Chatham, and Dover.—The applications for the second issue of "B" debenture stock amounted to 560,000*l*, there being only 359,000*l* to allot.

North London.—A special meeting is called to sanction the issue of 250,000*l* additional capital.

Orel-Vitebsk Railway.—4,100*l* in bonds has been drawn for redemption at par.

San Paulo.—At the meeting a dividend at the rate of 6⅝ per cent. per annum was declared.

Smyrna and Cassaba.—The half-year's gross receipts amounted to 31,831*l*, and the net earnings to 11,117*l*, as against 34,121*l* gross receipts and 13,927*l* net earnings for the corresponding half of 1870. A balance of 8,883*l* would consequently be required from the Government to make good the guaranteed income of 20,000*l*. The amount due on the guarantee for the year ended December last had not yet been received, but the remittance was daily expected. The profit and loss account showed a balance of 4,041*l*, after providing for interest on debentures and preference shares, and (subject to the receipt of the amount payable by Government) the directors recommend the declaration of a dividend at the rate of 1¾ per cent. per annum, leaving 488*l*.

Sutherland.—The Duke of Sutherland's line was opened on the 19th of June, which resulted in a marked improvement in the traffic of the Sutherland line. The revised working agree-

[CONTINUED FROM PAGE 1309.]

ment with the Highland came into operation on the same day. The capital account showed that 178,399*l* had been expended. The revenue for the year amounted to 5,834*l*, the expenses to 4,543*l*, and the net revenue to 1,291*l*.

West Flanders.—Half-year's dividend, 6s 4d on the original, and 5s 8d on the 5½ per cent. preference, shares.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

General Finance, Mortgage, and Discount.—Dividend declared at the rate of 6 per cent. per annum, free of income tax.

Scottish Australian Investment.—The report to be presented on the 2nd of November shows an available total of 15,955*l*, and recommends a dividend at the rate of 5 per cent. per annum, and an appropriation of 7,000*l* to reserve (thus raised to 23,000*l*), leaving 1,455*l* to be carried forward.

ASSURANCE COMPANIES.

Bee Hive Fire Insurance, Limited.—At a special meeting it was resolved to increase the capital to 250,000*l*, by the issue of 40,000 shares of 5*l* each.

MISCELLANEOUS COMPANIES.

British Australian Telegraph.—Information, dated the 17th of September, has been received of the arrival at the Cape of the steamships Hibernia and Edinburgh, with their cable on board. The vessels would proceed to Port Darwin immediately after coaling.

Regent's Canal.—At the meeting the net profit for the half-year was stated at 12,557*l*, and a dividend of 7s per share was declared, free of income tax.

Royal Mail Steam Packet.—The report for the first half of 1871 states there has been a "considerable decrease in the expenditure, and at the same time a very important increase in the receipts; and that in consequence the 'surplus' exceeds that for the first six months of 1870 by 38,559*l*. A distribution of 4*l* 10s per share (of which 1*l* 15s is from the insurance account) is therefore recommended." A bonus of 10 per cent. on officers' salaries will be given for the year. The saving in disbursements has been chiefly in coals, wages, and provisions, while the additional receipts extend over all the heads of freight and passage money, with the exception of intercolonial freight, in which there is a very trifling decrease.

Singapore Gas.—At the meeting a dividend was declared at the rate of 7½ per cent. per annum, less income tax, on the preference capital, and a dividend at the rate of 7 per cent. per annum, free of income tax, on the original capital.

Wood Street Warehouse.—The directors report that the auditors—Messrs Goods, Daniels, and Limbert—have drawn up as a basis for the future management of the company a statement of its present financial position. The statement shows that after a dividend of 10 per cent. per annum for the last half-year there is a "considerable surplus." A circular has been sent to the shareholders by Mr Arthur Kimber, recommending them to subscribe for 4,400 shares, which are still unallotted, in order to secure a quotation on the Stock Exchange, and stating that he will take 1,000 shares, and would have taken the whole for himself and friends if the direction had not "wished that any existing shareholders should have an opportunity of taking some before otherwise appropriated."

MINING COMPANIES.

Rossa Grande Gold—A call is made, payable on the 12th December, of 1s per share.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

The next mail for New Zealand, via San Francisco, will be despatched from London on the evening of Thursday, the 16th November.

Commencing on the 2nd November next, the fortnightly mail service to the Bahamas, via New York, will be resumed. The regular despatch of the mails from London will take place on the evening of every alternate Thursday, as follows:—Thursday, November 2, 1871; November 16; November 30; December 14; December 28; January 11, 1872; January 25; February 8; February 22; March 7; March 21; April 4; April 18; May 2; May 16. Supplementary mails will be forwarded on the evening of each succeeding Saturday, on the chance of their reaching New York in time for the Bahamas branch packet, which is appointed to leave New York every alternate Thursday. From Liverpool the despatch of the mails will take place on the same days as from London, and from Dublin on the following days.

The undermentioned offices have been opened since the publication of the last list of postal telegraph offices, or will be opened for the transaction of telegraph business on the 25th October:—England—Aberayron (Cardiganshire); Bow (North Devon); Bristol Cattle Market; Carshalton, near Sutton (Surrey); Earls Heaton, near Dewsbury; Great Horton, near Bradford; Highworth, near Swindon; Holm Rook, near Carnforth; Kempsey, near Worcester; Laceby, near Grimsby; Madeley, near Newcastle (Staff.); Millfield, near Peterborough; New Quay (Cardiganshire); Ockbrook, near Derby; Ossett, near Wakefield; Penistone, near Sheffield; Shrivenham (Berkshire); West Bromwich, Hill Top; Witheridge, near Morchard Bishop; Yoxford, near Saxmundham. Scotland—Ballachulish, near Fort William; Taynuilt, near Inverary. Ireland—Crumlin, near Lurgan; Gracehill, near Ballymena; Kildorrery, near Mallow; Kircubbin, near Newtownards; Portumna, near Ballinasloe; Thomastown. The undermentioned railway station has been opened for the transaction of telegraphic business on behalf of the Postmaster-General:—Scotland—Abingdon Station (Caledonian Railway). *Note.*—Madeley (Salop)—This office is not yet open for postal telegraphic business.

British Columbia having become a part of the dominion of Canada, all correspondence for that province will henceforth be chargeable with the same rates of postage, and will be subject to the same regulations of transmission, as correspondence for other parts of Canada.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The grain trade was without any new feature of importance to-day. The supplies of English wheat on offer at Mark lane were liberal, while there was a good show of foreign wheat on offer. Sales progressed quietly in all descriptions at stationary currencies. Flour was held on firmer terms. Barley, maize, and oats were slightly easier, but peas, beans, and oilseeds commanded rather more money. This week's imports of foreign and colonial produce into London have amounted to 29,860 quarters of wheat, 13,480 barley, 26,720 oats, 1,630 maize, 1,960 beans, 940 sacks and 3,780 barrels of flour.

At Liverpool and Wakefield this morning the grain trade ruled quiet, at unaltered prices for wheat and flour,

The Liverpool cotton market has been exceedingly dull throughout the past week, and only a very moderate business has been done. The total sales of the week amount to 52,690 bales, of which the trade have taken 36,020 bales, speculators and exporters 16,670 bales. The imports are 81,009 bales, the actual exports 9,754 bales, and to-day's stock is 518,850 bales. Yesterday, a rather better feeling prevailed, and prices recovered to the extent of about ⅛d per lb, so that with a rather quieter market to-day, we close at about $\frac{3}{16}$d decline since last Friday.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended October 26, 1871:—

	Imported.	Exported.
American.....bales	23,132	1,075
Brazilian	5,860	414
East Indian	50,999	13,552
Egyptian	4,224	43
Miscellaneous	4,574	1,047
Total.....	88,789	16,131

At New York on Oct. 26, middling Upland cotton was quoted at 18½ cents per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, Sept. 29:—As usual at the close of the rainy season, the departure of the English mail steamers is changed to the Saturday of each week, and there has consequently been an interval of ten days since the issue of our last circular. The settled fine weather which has lately been reported on the coast indicates that we may expect supplies from the coast ports earlier than usual, and already what cotton was stored there during the rains is being shipped, one or two boats from Bhownuggur having arrived to-day. The quantity however that can come forward just now is unimportant, as the greater part of what remains of the old crop, and which will offer the best selection, cannot be removed until the roads are repaired, probably three weeks to a month hence. The business done has, notwithstanding the intervention of three days' holidays, been larger than for some time past, aggregating about 3,700 candies. Of this quantity 1,400 candies are sawginned Dharwar for delivery in 2 to 3 months at 225 rs to 235 rs per candy, and 300 candies Dhollerah 1 month delivery at 216 rs to 225 rs. The balance is made up of Kutch, Julgaum, Barsee, Vingorla, and Sholapore descriptions, with one or two small parcels of M. G. Broach that have been stored here throughout the monsoon. Accounts from the districts continue good, and unless some very unusual circumstances intervene, we think a crop equal both in average of quantity and quality to last year's may be calculated upon. From Broach we hear that the cotton crop is in good condition, and should only the usual light showers fall in December and January, the crop will be much earlier than last year. With the heavy dews peculiar to the country the cotton plants can do without more rain, and the only thing now to be apprehended is that the deficiency in the rainfall so far may be made up by a heavy fall later on, when a great deal of damage would be inevitable. This was the case with the 1870 crop, but heavy rain at that time of the year is very unusual. From Hingunghaut our correspondent writes on the 27th as follows:—"If the weather continues favourable we may expect an early and a bumper crop." Akote, 26th—"Cotton crop in good condition, weather favourable." Khamgaun, yesterday—"Weather fine, crops healthy." From the Dhollerah and Dharwar districts we have no late advices. Tinnevelly—We are without our usual telegram.

Export of Cotton from Bombay to September 29.

Actual exports since last mail left, 5,205 bales.

The Imperial Ottoman Bank has furnished the following report, dated Alexandria, October 14:—We have had a week of brisk business, and with larger receipts, which have been freely offered by holders at lower figures than the extravagant prices paid last week. There is a great scarcity of extra stapled cottons, and all the lots that are so called show very defective staple. In common current sorts our present receipts are better in quality than those of last season. Contracts for November, December, and January delivery are in small demand, at equal to 10⅜d per lb, f.o.b. Fully fair open, with staple, 10¼d per lb, f.o.b.; good fair, with staple, 10½d to 10⅝d per lb, f.o.b.; fully good fair, with staple, 11d per lb, f.o.b.; good to fine, with staple (nominal), 11¾d per lb, f.o.b. Arrivals from October 7 to October 13, 31,900 crs; sales from October 7 to October 13, 13,670 crs. Shipments from October 6 to October 12:—England, 2,433; France, 105; Italy, 243; Austria, 37—total, 2,818 bales.

There has been a moderate demand for sugar throughout the week, and prices have been well maintained. The stock in the United Kingdom is estimated at 134,830 tons, against 183,725 tons last year, while the quantity of East India cotton afloat for the United Kingdom and the continent (not including Government exports from Java) is 34,600 tons, against 32,200 in 1870 and 26,000 in 1869. Inferior coffees have been in active request at a rise of 1s to 2s per cwt, while other sorts have been very firm in value. The quantity of East India afloat for the United Kingdom and continent (not including Government exports from Java) is 15,800 tons, against 18,600 last year, and 13,170 in 1869. Rice has ruled very steady both on the spot and afloat. The quantity on passage to the United Kingdom from the East is 118,500 tons, against 165,500 in 1870, and 122,200 in 1869. Cocoa has ruled dull of sale, but oils and oil-seeds have continued firm.

Annexed is Messrs Durant and Co.'s circular:—The periodical public sales have been concluded. The quantity printed was about 2,000 bales Bengal, 3,200 bales China, 800 bales Japan, and 1,200 bales Canton, with sundry parcels thrown silk. The whole was allowed to pass rapidly, with perhaps even less than the usual small extent of bidding, except the thrown silk, which was chiefly printed to be sold "without reserve." The general market is quiet but firm. All good medium China silk is scarce, and in good demand. Japan silk continues neglected. Bengal silk shares the same fate. Canton silk continues in full consumption. The deliveries are good.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on September 15, observe:—Although the weather has been much milder, arrivals of wool have not materially increased. Way-bills for considerable quantities have however been received, and we shall shortly have full supplies. The news from England continues to be highly favourable, and the general tenor of advices is that we may expect higher prices for wool for some time to come, owing to the check which low prices have given to increase of production in Australia and the River Plate, and to the ever-increasing consumption of woollen goods all over the world. The stock of wool in first hands is very small—every load being sold immediately on arrival, at almost any prices holders like to ask. We have not known such a state of things for many years. Scoured wools—Uitenhage scoured is more sought after than any other description, and sellers have obtained an advance of ½d to 1d on last quotations. Fair quality sells readily at 1s 7½d, and good 1s 8d to 1s 8½d. For one choice parcel 1s 9½d has been refused—the holder preferring to ship. Country scoured has advanced about ½d per lb. Fleecewashed wools—The arrivals of this description have been so small that quotations must be considered nominal. One or two small lots, taken to complete orders, have realised an advance of 1d to 1½d per lb. Grease wools—The last accounts from America report short stocks and active demand, every cargo having been sold immediately on arrival at continually advancing prices; consequently houses here have had limits increased, and prices have advanced fully ½d. Good average quality sells readily at 7½d to 8d, and choice at 8½d. Wools suitable for washing have also advanced, the holders finding a ready sale for the scoured at remunerative prices.

The annexed is dated New York, Oct. 13:—The great Chicago disaster, with its serious consequences, continues to overshadow every other consideration in the business world, yet the volume of trade is in the aggregate quite large. As the smoke of the conflagration clears away, we begin to get

more reliable information regarding the position of affairs there. It was natural that the first accounts should partake somewhat of the general distraction and discouragement; but it now appears that the original estimates of losses were exaggerated. The figures are still vague and uncertain, but enough is known to show that the situation is not nearly so dismal as it appeared in the early part of the week. It appears that only about one-fourth of the grain in store in the City has been destroyed, and that the live stock yards and packing establishments remain intact. The water-works are uninjured, and all the populated parts of the City are being supplied. All the bank vaults are safe, and some of the banks have already resumed business. The insurance companies prove to be in a better position than had been supposed—and the same remark, in fact, may be made of the whole business situation. The effect of the disaster in financial and commercial circles here has not been quite so serious, perhaps, as might have been expected, though the markets for money and securities have been pretty badly demoralised. The pressure to obtain money to meet claims arising out of the disaster has overcome considerations as to intrinsic values, and public securities have fluctuated widely, and in most instances declined heavily. Some of the merchandise and produce markets have also been unfavourably affected, notwithstanding the vast quantities of merchandise that have been destroyed at Chicago, and that must sooner or later be replaced. The difficulty in procuring monetary accommodation, especially on stock collateral, has been very great, and extreme rates have been paid. On call, the rate has varied from 7 per cent. to that figure in gold, with frequently ⅛ to ¼ per cent. commission added. Mercantile paper has been almost neglected, and quotations are wholly nominal. Gold has ruled from 114 to 114¾, with not much activity or excitement in the market. Foreign exchange has ruled heavy and lower, in consequence of a pressure to sell bills drawn on London by one or two of the New York agents of British insurance companies subjected to losses by the fire at Chicago. At the close there was a calmer feeling in financial circles, and money was obtainable on call at 7 per cent. in currency on Governments. Stock operators had to pay higher rates. Exchange was flat, thereby interfering to some extent with the export trade.

THE COTTON TRADE.

LIVERPOOL.—October 26.

The cotton market opened quietly, and as the week advanced great heaviness prevailed, the sales being limited, with the supply abundant, and an irregular decline was submitted to of fully ¼d per lb. To-day, with an increased business and firmer tone, prices have partially recovered, but are still about ¼d below the quotations of last Thursday. For Sea Island the demand has been only moderate, but the recent advanced rates have been fully maintained. American has been pressed upon the market, and had given way about ⅛d per lb. To-day prices have been steadier, though closing about ¼d per lb below the rates of last week. New York advices up to the 26th instant quote middling Upland 18½ cents, costing to sell in Liverpool 9 1/16d per lb by steamer. For Brazil the demand has been limited, Maranham is unaltered, but other kinds are ⅛d per lb lower, while Santos has fallen ¼d per lb. Egyptian has been very freely offered, and prices, especially of new cotton, have given way fully ¼d per lb. The stock of this description taken on the 19th instant proved to be 15,470 bales, or 7,860 bales above the estimate. East Indian has been much pressed for sale, and the business done yesterday was chiefly at a decline of ⅛d per lb. To-day, with an improved demand, prices have slightly rallied, and close generally at ¼d under last week's currency, except in the better qualities, which are only ⅛d lower.

In cotton to arrive and for future delivery the transactions have been moderate and at lower rates, but with some recovery to-day. The latest quotations are—American, basis of middling, from any port, not below good ordinary, October-November shipment 9⅜d; delivery November 9⅜d; December-January 9 5/16d; New Orleans, not below good ordinary, November delivery 9½d; new crop, shipment November 9⅝d; November-December 9½d, 9 7/16d, 9⅝d; Texas, not below good ordinary, November delivery 9 5/16d per lb.

The sales of the week, including forwarded, amount to 52,690 bales, of which 6,050 are on speculation, and 10,620 declared for export, leaving 36,020 bales to the trade.

October 27.—The sales to day will probably amount to about 10,000 bales, the market quiet, without change.

Descriptions.	Imports from Jan. 1 to Oct. 26. 1870. bales.		1871. bales.	Exports from Jan. 1 to Oct. 26. 1870. bales.		1871. bales.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	681,590
An increase of quantity taken for consumption of	494,630
An increase of actual exports of	253,960
An increase of stock of	9,380

In speculation there is an increase of 348,410 bales. The imports this week have amounted to 81,009 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to October 20) is 47,000 bales, against 63,000 bales at the corresponding period last year. The actual exports have been 9,754 bales this week.

NEW YORK.—OCT. 13.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Oct. 13. From the figures thus obtained it appears that the total receipts for the seven days have reached 64,097 bales, against 46,044 bales last week, 34,073 bales the previous week, and 20,606 bales three weeks since, making the total receipts since Sept. 1, 1871, 186,617 bales, against 272,583 bales for the same period of 1870, showing a decrease since Sept. 1, this year, of 85,966 bales. The exports for the week ending this evening reach a total of 18,417 bales, of which 16,537 were to Great Britain, 1,778 to France, and 102 to rest of the continent, while the stocks as made up this evening are now 145,486 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending Oct. 13.	Exported to		Total this week.	Same week 1870.	Stock.	
	Great Britain.	Continent.			1871.	1870.

Total since Sept 1	73016	5716	78732	73215	..	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 10,245 bales, while the stocks to-night are 35,699 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Oct. 6, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph:—

Total last year	...	195879	42755	1491	501	44752	93740	146360

The market the past week has been compelled to contend with unfavourable surroundings. As the week opened the directors of the Bank of England raised its rate of discount to five per cent. This was at once felt at Liverpool, resulting in a decline in the cotton quotation of ⅛d, while here its influence was seen not only in a present yielding in prices, but also in a less confident feeling being prevalent among holders even at the decline. Before there was time to recover from these unfavourable influences the news of the Chicago fire reached the city, and the market became further depressed in consequence of the monetary troubles realised and anticipated growing out of that disastrous event. On top of all, however, there was a large increase in the daily arrivals of cotton at the southern ports. These circumstances all tended to depress prices, but one by one their effect in great part wore off, and towards the close, with a slight renewal in the animation at Liverpool (but without any improvement in prices there), our own market recovered its tone, with an advance on Thursday of ⅛c in quotations, the market closing that day at 20⅛c for middling Uplands. For immediate delivery the total sales foot up this week 16,849 bales, including 11,007 for export, 4,720 for consumption, 215 for speculation, and 907 in transit. Of the above 856 bales were to arrive. The following are the closing quotations:—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary.....per lb	17⅞ @ ...	17⅞ @ ...	18 @ ...	18½ @ ...
Good ordinary	19⅛ ...	19⅛ ...	19½ ...	19⅝ ...
Low middling	19⅞ ...	20 ...	20⅛ ...	20⅜ ...
Middling	20⅛ ...	20⅜ ...	20⅝ ...	21 ...
Good middling	21⅜ ...	21⅝ ...	21⅞ ...	22¼ ...

For forward delivery the sales (including 200 free on board) have reached during the week 75,050 bales (all low middling or on the basis of low middling).

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:—

	Week ending Oct. 13, 1871.			Week ending Oct. 13, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	4558	3116	6600	8029	5587	5266
Columbus	1608	837	2939	2369	1979	3876
Macon	3161	2099	3821	4392	3957	4655
Montgomery	2864	1743	4458	1987	1641	4159
Selma	2112	1722	2331	3267	3592	3550
Memphis	12271	11109	6858	6883	8318	4504
Nashville	1635	1583	933	1092	1158	1547
	28209	22209	27940	28019	26232	27557

The above totals show that the interior stocks have increased during the week 5,901 bales, and are to-night 383 bales *more* than at the same period last year. The receipts have also been 190 bales *more* than the same week last year.

The exports of cotton this week from New York show an increase since last week, the total reaching 11,684 bales, against 7,221 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1871; and in the last column the total for the same period of the previous year:—

—*New York Commercial and Financial Chronicle.*

NEW YORK, Oct. 20.—According to Messrs Moffatt, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 83,000 bales, and since 1st of September

272,000 bales. Shipments to England, 27,000 bales; ditto to France, 5,000 bales; and to the continent, 2,000 bales. Total since 1st September, 111,000 bales. Stock at all ports, 185,000 bales. Middling Upland, 8¼d, cost and freight, per steamer.

NEW YORK, Oct. 24.—The receipts of cotton at all United States' ports for the last four days have been 50,000 bales. Shipments to England, 13,000 bales; ditto to France, 1,000 bales. Middling Upland, 9 1/16d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Oct. 26.—Our market has continued dull and depressed throughout the week, and prices are again easier, with more irregularity than before. The business of the week has been much under the production, hence stocks are beginning to be cumbrous, particularly in cloth still, and a quiet business has taken place whenever producers, pressed to sell, will concede something on current rates. Yarns for the home trade are only bought for immediate wants; for shipping some purchases have been made at low rates. Cloth continues very sluggish, and difficult to move, even at a concession.

BRADFORD.—The wool market has shown a more cheerful aspect, and prices have had a hardening tendency. The result is felt in the inability of spinners to effect business at the late rates. There is, notwithstanding, more disposition shown to operate, and a fair amount of business has been done. The demand is still most apparent in all deep-grown wools. In the yarn market there has been more inquiry. If spinners were willing to accept last week's rates, large orders in two-fold yarns might have been placed. There has been a moderate attendance of merchants in the piece market.

ROCHDALE.— The attendance of buyers was moderately large, and there were many inquiries after assortments. Prices, however, ruled so high as to preclude much business. Prices of wool were exceedingly firm, especially for middle and good English, as well as for colonial sorts. There was a fair inquiry for Yorkshire goods, but their dearness prevents new orders being given out as freely as otherwise would be the case.

LEEDS.—The woollen markets have been quiet, principally on account of the scarcity of goods. In the coloured cloth-hall there were very few woollens offered, except tweeds and meltons. All the goods sold commanded the fullest prices, inasmuch as there is nothing making to stock. Manufacturers are fully employed, and orders for the spring trade keep flowing in.

WOLVERHAMPTON.—There is no falling off whatever in the activity at the works in this district. Every variety of the produce of South Staffordshire is in great demand, from the coal and ironstone up to the most finished article in iron or any other metal. Nor are there any indications of any immediate falling off. As a result the makers of iron from the raw material are in the market for the means of carrying on their furnaces, at the same time that the proprietors of the mills and forges are still inquiring for pig iron. Prices continue to be quoted up. Ore is worth more nearly every week. Best hematite pigs have risen in the quarter 15s a ton, and to-day the Workington Iron Company have put up the prices of their Bessemer iron 5s a ton. The prices now are 5*l* 10s a ton short weight, free on board at the works.

DUNDEE.—The flax market is without alteration, except that the demand for fine qualities is not quite so eager as it was, and some of the descriptions that were more particularly wanted having been cleared out, there is now not so much business doing. Tows continue in fair demand at firm prices. Jute continues without alteration; the better sorts are in fair demand, but common and medium qualities still move off very slowly. The demand for flax yarns has been moderate, and prices are very firm. Tow yarns are in active request, and the tendency of the market is upwards. Jute yarns have been much in demand at improving rates. The demand for linen goods is at present very good, both from the home and foreign markets, and several leading firms have issued advanced price lists.

CARDIFF.—The little change in the steam-coal trade since last week is on the side of improvement. There is a general revival in the French demand, but it is still considerably below the purchases made previous to the late war. In the iron trade there is a large amount of activity evinced, the shipments having been unusually heavy during the past week.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Oct. 13.

The market for flour and grain opened the week heavy; but on Monday, the great fire in Chicago, with the probability that supplies would be greatly curtailed thereby, developed considerable speculation. This subsided on Wednesday, and on Thursday nearly the entire speculative advance was lost, under a pressure to sell growing out of the monetary necessities of the situation. To-day a decided advance abroad was partially neutralised in its effects by a decline in exchange and an advance in ocean freights. Flour has arrived more freely, and the local demand has been good, with a varying speculation, as stated above. On Tuesday good lines of extra State could have been sold at $7.40 to $7.50 for future delivery, followed by a brisk decline to $7, but closing at $7.10 to $7.25, with "seconds" of Western and State brands selling at $6.85 to $6.90. Family brands have been more steady. Rye flour has been dull at the advance. Corn meal fairly active and firm. Wheat was in speculative demand on Monday and Tuesday, but the views of holders were so extravagant that very little was done. No. 2 spring (Milwaukee) sold at $1.60, and from this figure there was a rapid decline to $1.54 yesterday, followed by some recovery to-day, with 75,000 bushels sold at $1.55 to $1.56 for No. 2, and $1.58 for No. 1. Winter wheats have not been so variable, moderate sales having been made to-day at $1.59 for No. 2 red, $1.67 to $1.70 for amber, and $1.72 to $1.75 for good to prime white. Corn advanced to 80c to 81c for Western mixed, in store and afloat, receding to 76c to 78c, and closing to-day at 80c for prime loads afloat, which are comparatively scarce, but worth not more than 77c in store. Receipts have been comparatively small, and there are no indications that supplies will be materially increased during the remainder of the season of inland navigation. Many holders therefore look for higher prices, but the necessity of raising money causes holders to meet the demand freely. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The grain trade has remained without any important feature throughout the past week. Trade, as usual at this period of the year, has ruled very dull, and prices close nominally without alteration in the absence of important business. Supplies of English wheat have been fairly extensive, farmers having threshed out more freely in order to meet payments falling due about this time; but there has been much inactivity in the demand for all descriptions. Stocks of foreign grain have been on the increase; but the deficiency in the home crop, the indifferent quality of the grain now arriving from the South-East of Europe, and the approaching close of the navigation in the Baltic and on the American canals have prevented any actual decline in the quotations. With ample deliveries and a limited demand, it is not improbable that less money may have to be taken; but in the present uncertain state of the money market it is impossible to speculate upon the course of the market. Flour has been held on former terms.

Barley and rye have been in good demand at steady currencies; but maize and oats have sold at a slight reduction. The imports of beans have been in excess of the limited demand current, and less money has been accepted; while peas have sold at late rates.

The following return shows the imports and exports of breadstuffs into and from the United Kingdom since harvest, viz., from August 26 to the close of last week, compared with the corresponding periods in the three previous years:—

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last se'nnight 86 grain and seed-laden vessels have arrived at ports-of-call, viz.:—44 wheat, 16 maize, 10 barley, 8 rye, 4 beans, 6 linseed, 3 valonea, 3 palm kernels. The floating grain trade was at first quiet in tone, but to-day the demand has improved. Wheat—Early this week American 1s to 2s and Black Sea and Azow 1s to 1s 6d cheaper, but recovered 1s since Wednesday. Maize—Fine sorts steady; inferior neglected. Barley steady. Rye at first firm, but later the demand fell off, and 6d to 1s less money had to be accepted. The reported sales are as follows:—Wheat—17 arrived cargoes: Berdianski, 55s 1½d; Ghirka, from Nicolaieff, 54s 6d; New Coast Ghirka, from Taganrog, 55s per 492 lbs; palish, from Odessa, 54s 7d; yellow ditto, 55s per 480 lbs; spring, from New York, 56s 6d; No. 1 ditto, 57s 1½d to 58s; No. 2 ditto, 58s; red winter, from New York, 59s; ditto from Baltimore, 58s; white American, from New York, 63s; No. 1 spring, from Montreal, 56s 6d per 480 lbs. Maize—6 arrived cargoes: fine Galatz, 35s per 492 lbs; Wallachian, 31s 6d; Bulgarian, 32s 6d; old mixed, from Montreal, 34s; Western mixed, from New York, 33s 9d. Barley—2 arrived cargoes: Marianopoli, 22s 3d; Wallachian, 27s 9d per 400 lbs. Linseed steady, and dearer on the week, but to-day again quiet. Rapeseed steady. 100 tons ordinary brown, from Calcutta, 69s per 416 lbs. Cotton-seed—No change.

COLONIAL AND FOREIGN PRODUCE MARKETS

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market remains firm, with a steady inquiry, but the sales of West India have been of moderate extent, partly on account of the higher rates required by the importers. Up to yesterday 1,873 casks sold, including a few parcels by auction. Jamaica, 28s to 31s; Barbadoes, 30s to 34s; low descriptions still meet with ready buyers, and in some instances at a slight recovery upon last week's quotations, especially for soft brown Mauritius. Grainy kinds remain without change. The Porto Rico offered by auction has been chiefly bought in, a few lots grocery only selling in the room. Refined has been rather quiet. The continuance of heavy deliveries has caused a further decrease in stock to 63,100 tons. Last year's stock was nearly 50 per cent. larger, and the falling off, as compared with those of 1867 and 1869, is also very important.

Mauritius.—10,008 bags by auction all sold: grainy and crystallised, brown and yellow, 31s to 36s; soft brown, 25s 6d to 30s.

Bengal.—1,100 bags were bought in.

Penang.—692 baskets soft brown sold at 22s 6d to 24s. 1,540 bags, chiefly soft grainy yellow and white, 33s to 34s; middling soft yellow, 31s 6d. Privately sales at 22s 6d to 22s 9d for soft brown.

Java.—Of 5,180 mats low brown 650 sold at 21s to 21s 6d, the remainder being held at 23s.

Manila.—About 48,000 bags clayed have changed hands at 23s 6d to to 26s 6d; the bulk low quality at 23s 6d to 24s. 30,000 bags Ilo Ilo afloat at 19s 6d for the United Kingdom.

Other Foreign.—420 cask 60 barrels Porto Rico by auction part sold at 31s to 36s. Of 1,800 boxes Havana the chief part was taken in. A few lots brown sold at 28s 6d to 31s. 226 bags low brown Egyptian, 26s. Privately 550 casks 400 barrels Cuba at 31s.

Floating Cargoes.—No sales reported.

Refined.—There has not been any improvement in the demand for dry goods, but the lowest quotation is 39s 6d per cwt for common descriptions. Pieces have not quite maintained their previous value.

MOLASSES.—A floating cargo of Barbadoes sold, but no particulars known.

RUM.—Transactions during the week have been limited, including Jamaica at 3s 4d. Leewards sold at 1s 9d per proof gallon. There have not been any further sales of Mauritius or Penang rum.

COCOA.—The market remains quiet, and the sales of colonial have gone rather flatly. 1,035 bags Trinidad about one-third part sold. Good ordinary to fair, 62s 6d to 72s 6d; good to fine, 75s to 90s 6d. Some low and very ordinary qualities at 55s to 59s 6d went rather cheap. 343 bags Guayaquil were withdrawn. 234 bags ordinary Bahia sold at 38s per cwt.

TEA.—During the week a few public sales have taken place, the principal feature being the supply of green. Fine qualities sold steadily; others went easier. The quantity presented was 8,315 packages. New season's Moning sold steadily at 1s 4½d to 1s 6d. Fine Ping Suey and Moyune gunpowder, 3s 3d to 3s 7d; fine Moyune young hyson, 2s 0½d to 2s 11½d. By private contract there has been a steady business done in teas from recent import at full prices for black leaf Congous. Several sales have also been made in scented teas.

Indian teas have been in good demand privately. Fine descriptions at full prices, and common to middling at easier rates. There were very few parcels sold by auction on Tuesday.

COFFEE.—There has been a very strong market, with higher prices

by 1s to 2s, under the influence of an active export demand, decreasing stocks, and favourable result of the Dutch sale yesterday, when good ordinary Java went 1½ to 3 cents over valuations, viz., 40½ to 41 cents. Business has been done in native and East India afloat, of which particulars are not reported. Orders have been executed for America. Two floating cargoes of Rio and one of Bahia have sold, the latter said to be at or about 57s. At the public sales, 1,934 cask 234 barrels 1,000 bags plantation Ceylon sold as follows:—low middling to middling colory, 69s to 77s; good middling to fine, 78s to 89s 6d; pale and grey, 68s to 72s; bold, 72s 6d to 77s. 1,200 bags native part sold: good ordinary, 63s 6d to 64s 6d; bold, 66s. 28 casks 3,078 cases 7,233 bags East India: Coorg and Wynaad, 67s 6d to 82s; bold, 76s; Mysore, 85s to 101s; native kinds, 62s 6d to 66s. The latter descriptions were chiefly bought in. 210 casks 548 bags Courtallum sold at 69s 6d to 78s 6d for pale and mixed to middling colory, and bold at 72s to 78s 6d. 458 bales, &c., Mocha, were all disposed of at 90s 6d to 94s 6d for mixed greenish to good. 642 bags Guatimala, 58s to 69s 6d. 229 bags washed Rio at 64s to 71s. 2,165 bags Costa Rica, at 66s to 75s per cwt for pale to middling colory. The statistics continue most favourable for the future course of prices, the stock here being now 7,570 tons less than in the previous season, and still decreasing under the influence of deliveries larger than at any former period.

RICE.—There is more inquiry and several floating cargoes have sold, including two of Moulmein at 10s 6d, one at rather less, continental terms; also one Rangoon at 10s 9d, similar terms. One Bassein cargo at 11s, ex quay. Askoolie has sold at 10s 6d, ex quay. On the spot, several parcels white Bengal sold at 10s 4½d to 13s; good Raugoon, 10s 6d. By auction, 1,867 bags sold at 11s 9d for middling white. The sound portion of 4,058 bags Madras were taken in at 11s per cwt.

IMPORTS and DELIVERIES of RICE to Oct. 21, with STOCKS on hand.

	1871.	1870.	1869.	1868.

Deliveries	84430 ...	59910 ...	50120 ...	43620
Stock	42300 ...	45130 ...	43980 ...	32330

SAGO.—280 bags good small grain sold at 15s 6d. 86 bags sold at 18s 6d per cwt, and the market is quiet.

TAPIOCA.—1,464 bags were chiefly taken in. A few lots sold at 2¼d to 2½d per lb for Singapore.

BLACK PEPPER.—There has been a steady market with only moderate sales. 1,490 bags Singapore by auction chiefly sold at 7⅜d to 7½d for brownish and 7¼d for black, one lot 7⅝d. 453 bags Malabar realised 7⅜d. Privately, Penang has sold at 6⅞d, and afloat at 6 13/16d per lb.

WHITE PEPPER maintains the high rates last quoted. Singapore, 1s 4d. 376 bags by auction were taken in, and some part sold at that price. 502 bags of old import by auction with short prompt: Singapore, 1s 3½d to 1s 3⅝d; Penang, 1s 2¼d to 1s 3¼d per lb. The former sold for arrival at 1s 2d per lb.

OTHER SPICES.—30 cases good bold Penang cloves sold at 1s 8d to 1s 8¼d. 10 casks Amboyna kind, at 6½d. 100 bales Ceylon cinnamon were chiefly bought in. 601 bags sold. Chips, 3d to 9¼d; bark, 1⅝d to 2¼d. 476 bags Pimento were chiefly bought in. A few lots sold at 2⅜d. 67 cases Penang nutmegs sold at full prices; 72 to 69's, 3s 7d to 3s 10d; 90 to 84's, 3s 2d to 3s 5d; 124 to 119's, 2s 11d to 3s per lb. 6 casks Java withdrawn. 131 cases 91 bags Cochin ginger, slight wormy, 55s; broken, 40s to 47s. 362 barrels Jamaica sold at full rates: low to good, 42s to 80s; bold, 110s to 195s. 45 bags African 35 per cwt.

SALTPETRE.—There is rather more inquiry, with small sales on the spot at 31s to 31s 6d; refraction 8 to 4½. Several sales have been made for arrival: usual terms, 31s; refraction 20, 28s 6d. The stock is still rather small compared with former years, and the market is now very firm.

IMPORTS and DELIVERIES of SALTPETRE to Oct. 21, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported .... .tons	9000 ...	8470 ...	9440 ...	5880
Total delivered	9520 ...	11330 ...	8720 ...	8780
Stock	1880 ...	1960 ...	4900 ...	5220

Deliveries last week 235 tons.

DRYSALTERY GOODS.—A few transactions have been reported in gambia during the week, and quotations remain as before. 60 bales Bengal safflower sold at 9*l* 2s 6d to 11*l* for middling to good quality. Turmeric is quiet. A parcel of China galls sold at 52s 6d to 53s 6d. Fine cutch sold at 35s for SM, but there is less inquiry than last week, and 3,317 packages by auction only partly sold.

SHELLAC.—Prices are without material change. 380 chests by auction went as follows:—Garnet, 6*l* 15s; fine button, 8*l*; good orange, 7*l*; native ditto, 6*l* 15s per cwt. Business has been done for arrival.

METALS.—There has been a steady business this week, but the easier rates of money do not lead to any increase of speculative demand. Scotch pig is active with considerable sales, the latest being at 62s 9d to 63s cash. English manufactured maintains its position, and the shipments keep large. Spelter is in demand. Sales of Silesian at 18*l* 15s to 19*l* per ton. English rolled zinc by auction sold at 22*l* 15s to 22*l* 17s 6d. There has been more inquiry for copper during this week: Chili, &c., 67*l* to 69*l*; Walaroo, 76*l* 10s to 76*l* 15s; English selected, 76*l* per ton. In foreign tin sales were at one time made at 136*l* to 137*l* for Straits on the spot and afloat. Subsequently the market became quiet, and Straits sold at 135*l* 15s to 136*l* per ton. No change in English tin or lead. Tin plates continue in good demand.

HEMP.—Manila is firm, but rather quiet. The only public sale has been 211 bales damaged, which realised current rates. Of 2,480 bales East India by auction, a portion sold: Coconada, 20*l* to 20*l* 15s; Sunn, 23*l* 10s to 25*l* 10s per ton.

JUTE.—The market is very steady, with moderate transactions on the spot at about last week's rates. Consumers' stocks in Dundee are getting low, and the demand for yarns continues good. A rather large business has been done for arrival here during the week at firm prices.

LINSEED.—There has been a fair demand, with prices about the same as last quoted. Calcutta on the spot, 62s 9d to 63s. Sales made afloat at 63s to 63s 6d. Bombay on the spot, 61s 6d. Odessa autumn shipment, sold at 61s 9d. Taugunrog, close at hand, at 62 per quarter.

OILS.—There has been some revival of demand for sperm, with sales at 81*l* per tun, the market closing buyers at that price. Pale seal quoted 34*l* to 34*l* 10s per tun. Olive remains quiet, although the reports of a deficiency in the crop is confirmed. Palm steady. Lagos 38*l* to 38 10s, and 39*l* required by some holders. A good deal of business has been done in Ceylon cocoa-nut to arrive up to 39*l*. On the spot it is quoted 38*l* 10s to 39*l*, and inferior in proportion. The finest Cochin, from scarcity, brings recent high prices. English brown rape has advanced to 45*l* 10s to 45*l* 15s. To the end of the year 5s more paid, and 46*l* 10s first four months of next. The market is now quiet. Linseed oil firm, and in small supply. 34*l* 15s paid on the spot; 34*l* 10s delivery early next month, and a large business for later delivery at 33*l* 15s to 34*l* per ton to April next.

TURPENTINE.—American, 48*l*; French, 47*l* per ton, the latter being dearer.

PETROLEUM is quiet. American refined, 1s 5¾d to 1s 6½d; forward deliveries, 1s 5¾d to 1s 6d per gallon.

TALLOW has been steady throughout the week, but prices are rather easier than on Friday last. New Petersburg on the spot and to the end of the year 47s 9d to 48s; March, 48s 9d to 49s. The market is now without much animation. A full supply of Australian declared for sale to-day.

PARTICULARS OF TALLOW—Monday, Oct. 23. 1871.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market has been firm, with an active demand for West India. 2,141 casks sold to-day, making 4,038 casks for the week. 213 bags Mauritius sold at 36s 6d to 37s for crystallised yellow. 1,300 bags Bengal part sold at 29s 6d to 32s for Gurpatta. Privately, 3,000 bags Taal Manila at 22s per cwt.

COFFEE.—556 casks 73 barrels 391 bags plantation Ceylon sold at firmer rates. 865 bags native, 64s to 68s for good ordinary to bold. 272 casks 2,134 cases 2,122 bags East India chiefly sold at about yesterday's rates. 8,788 bags Costa Rica went at full prices. 100 bags good Java brought 72s 6d. 723 bags Guatimala, 65s 6d to 75s per cwt.

RICE.—3,500 bags Madras by auction were sold at 11s to 11s 3d. Two floating cargoes of Necrancie Arracan at 10s 4½d per cwt.

SALTPETRE.—70 tons Bengal sold afloat at 29s 6d to 30s 6d.

DRYSALTERY GOODS.—314 bales Bengal safflower part sold at easier rates, from 7*l* 10s to 9*l* 11s per cwt. 134 chests lac dye were bought in.

OILS.—479 casks cocoa-nut by auction part sold. Ceylon, 38*l* 10s; Sydney, 34*l* to 40*l*. 683 casks palm part sold: Lagos, 38*l* 10s to 39*l*; other kinds, 32*l* to 38*l* per ton.

TALLOW.—Australian went 6d dearer, and 1,527 casks were chiefly sold: mutton, 45s 6d to 48s 6d; beef, 44s to 46s per cwt; inferior in proportion.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that Almeria grapes are in good demand at high prices. Valencia and Malaga oranges of the new crop to hand, and have a ready sale. Malaga lemons at easier rates. Black Spanish and Brazil nuts have a moderate sale. French walnuts dull. Chestnuts maintain their value. West India cocoa-nuts of good quality in request.

DRY FRUIT.—A quiet week in all fruits, especially curranta, and although prices are not lower, the trade seem determined to hold off until their country demand sets in again, which may be some weeks hence. The arrivals of the week are far in excess of the deliveries. There is no particular sort in demand. Valencias are firm without much activity; the trade are working off 500 tons a-week. Sultanas sell irregularly. Turkey figs have been sold very cheaply at auction, and some slight improvement may be reported.

ENGLISH WOOL.—More demand for good wethers and deep-grown hogs. Prices firm.

COLONIAL WOOL.—Market active; prices very firm. Next series will commence 23rd November.

FLAX.—Market firm.

HEMP.—Market very firm both for Russian and Manilla.

SEEDS.—Very little business has been transacted in seeds during the past week, and prices of all descriptions were in buyers' favour.

TOBACCO.—The transactions in North American tobacco during the past week have been but of a limited character, that of the old imports have been chiefly dealt in. Some considerable progress has now been made in sampling the late arrivals, the bulk of which proves light in colour, with but little body. In other growths there has been a fair business done.

LEATHER.—The leather trade of the past week has not shown any change. The supplies at Leadenhall were small on Tuesday, and prices in general were stationary. The articles the most scarce and in request were crop hides, English butts, particularly those of the lightest weight and best quality, light common dressing hides, English shoulders, strong English bellies, heavy calfskins, and English horse hides.

METALS.—The easier money market has had a favourable effect on business. Copper has been in fair demand, without change in values. Iron continues very firm. Tin has been inmoderate request, but the very high prices prevailing necessarily induces caution on the part of buyers. Spelter is commanding better prices. Lead steady, and the same may be said of tin plates.

METROPOLITAN CATTLE MARKET.

MONDAY, Oct. 23.—The total imports of foreign stock into London last week amounted to 16,766 head. In the corresponding week in 1870, we received 14,488; in 1869, 11,277; in 1868, 7,372 head.

A firm tone has prevailed in the cattle trade to-day, owing to the cooler weather. The supply of beasts has been less extensive than on Monday last, but it has, nevertheless, been good. The receipts from abroad have been on a full average scale, and have included some meat carrying stock. With a fair demand the choicest breeds have made 5s 4d per 8 lbs. As regards the arrivals from our own grazing districts, the supplies have been only moderate. There has been a healthy demand, and prices have ruled firm. The best Scots and crosses have found buyers at 5s 8d to 5s 10d per 8 lbs. Only a moderate supply of sheep has been in the pens. The trade has been firm, and prices have been well maintained. The best Downs and half-breds have sold at 6s 10d to 7s per 8 lbs. Calves have been steady, and quite as dear. Pigs have sold at full prices.

SUPPLIES ON SALE.

	Oct. 24, 1870.	Oct. 23, 1871.
Beasts	2,980	4,650
Sheep	17,100	18,220
Calves	236	276
Pigs	270	125

METROPOLITAN MEAT MARKET.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	3	4	to 4	0	Inferior mutton	4	0	to 5	0
Middling ditto	4	4	4	8	Middling ditto	5	0	5	6
Prime large ditto	4	8	5	0	Prime ditto	5	8	6	0
Prime small ditto	5	0	5	4	Large pork	3	8	4	4
Veal	5	0	5	4	Small pork	4	8	5	4

HOP MARKET.

BOROUGH, Friday, Oct. 27.—Fine hops move off quickly at extreme prices. Medium and inferior grades, however, are neglected. For yearlings a steady inquiry prevails at prices favouring sellers. Mid and East Kent, 10*l* to 16*l* 16s; Weald of Kent, 8*l* 10s to 10*l* 10s; Sussex, 7*l* 5s to 9*l* 9s; Farnham and country, 11*l* to 16*l*. Yearlings: Mid and East Kent, 3*l* to 6*l* 10s; Weald of Kent, 3*l* to 5*l* 15s; Sussex, 3*l* to 5*l*; Farnham and country, 4*l* 10s to 6*l*; olds, 1*l* 5s to 2*l*.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Oct. 27.—There have been fair supplies of potatoes on offer. The trade has been quiet, at about late rates. Regents, 65s to 90s; Rocks, 60s to 75s; Flukes, 100s to 120s.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 27.—The sales by auction held here on Wednesday attracted a fair attendance from the home trade, and the fine River Plate wools were competed for with spirit, and realised full prices. Some washed North African also met with good demand; but other kinds were neglected, and chiefly withdrawn.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 27.—At this market to-day trade was very quiet. Fine wheats were fully as dear; but lower qualities were 1d to 2d per cental down. Indian corn was 1s dearer. Beans were slow of sale. All other articles were unchanged. The attendance was very moderate.

WAKEFIELD, Friday, Oct. 27.—The wheat trade was steady to-day, and for fine old and new dry wheat there was a fair consumptive demand at last Friday's rates. Barley was in better supply, and prices were 1s lower. Another account says the wheat trade was very strong, and nothing can be sold cheap, therefore the demand was limited to immediate requirements.

The Gazette.

TUESDAY, Oct. 24.

BANKRUPTS.

Edward Hart Smith, Dulwich, Surrey, solicitor.
Edward Augustus Bullock, Beccles, Suffolk, watchmaker.
George Hull, Clapham, Beds, licensed victualler.
William Thornton, Cleckheaton, mechanic.

SCOTCH SEQUESTRATIONS.

Thomas Muir and Thomas Renwick, Glasgow, tea merchants.
Alexander Carlyle Sommerville, Edinburgh, draper.
Archibald Kier Murray, Glasgow, printer.
Thomas Laurie, Glasgow, merchant.

THE GAZETTE OF LAST NIGHT.

BANKRUPTS.

Francis William Taylor, Coleman street, general agent, builder, and contractor.
W. R. Phillips, Piccadilly, no occupation.

EGYPTIAN GOVERNMENT 7 PER CENT. LOAN OF 1868.

No ice is hereby given, that a DRAWING of BONDS for Redemption at PAR on the 15th January, 1872, took place on the 23rd instant, and that a List of the Numbers drawn, may be had on application to the Imperial Ottoman Bank (London Agency), 26 Throgmorton street, E.C.

WILLIAM W. LANDER, Secretary.

25th October, 1871.

AUSTRALIAN MORTGAGE LAND AND FINANCE COMPANY (Limited).

NOTICE.—An Interim Dividend, at the rate of 10 per cent per annum, on the paid-up capital of the Company, for the half-year ending June 30 last, will be payable on and after the 4th November next. Dividend warrants, free of income tax, will be forwarded to those shareholders whose names appear on the Register on the 24th instant, from which date until the 31st the Transfer Books will be closed.

PEYTON WM. CLEMENT, Secretary.

144 Leadenhall street, 16th October, 1871.

IMPERIAL OTTOMAN TREASURY BONDS.

Notice is hereby given, that the Imperial Ottoman Treasury Bonds and Coupons falling due 31st October, 1871, of which lists have been left with Messrs B. Tubini and Co., will be PAID by them at their Offices, 20 Threadneedle street.

Holders of said bonds and coupons are requested to leave them, with duplicate lists, at the Offices of the above firm, where forms may be obtained, five clear days for examination previous to calling for payment.

London, 25th October, 1871.

THE BRITISH AND FOREIGN TRAMWAYS COMPANY (Limited).

Subscribed capital, £300,000.

DIRECTORS.

H. G. Erichsen, Esq.	William Sheldon, Esq.
L. Floersheim, Esq.	Lieut.-Colonel C. Napier Sturt, M.P.
William Morris, Esq.	James M. Walker, Esq.
Philip Rose, Esq.	

BANKERS—Messrs Glyn, Mills, Currie, and Co.

SOLICITORS.

Messrs Baxter, Rose, Norton, and Co.
Messrs Ashurst, Morris, and Co.

OFFICES—No. 7 Lothbury, E.C.

This Company is prepared to entertain proposals for Tramways either in the United Kingdom or elsewhere.—Address, with full particulars, to

J. BARBER GLENN, Secretary.

OUDE AND ROHILKUND RAILWAY COMPANY (Limited).

The Oude and Rohilkund Railway Company are prepared to receive TENDERS for IRON ROOFING and SUPPORTS for Workshops in course of erection at Lucknow. Drawings and specifications may be seen at the Office of Mr J. M. Heppel, the Consulting Engineer of the Company, No. 2 Stoney's gate, Westminster, on and after the 30th instant, and copies of the same may be obtained, on payment, up to and not later than Tuesday, the 7th November proximo. Tenders endorsed "Tender for Iron Roofing," addressed to the undersigned, may be delivered in sealed envelopes at the Office of the Company, 110 Cannon street, E.C., not later than Eleven o'clock on the morning of Wednesday, the 22nd November proximo. The Directors do not bind themselves to accept the Lowest or any tender.—By order of the Board,

C. C. JOHNSON, Managing Director.

110 Cannon street, E.C., 25th October, 1871.

VANT-Y-BLAIDD SILVER-LEAD MINE (Limited).

Issue of the remaining 2,000 shares.

Capital, £20,000, in 10,000 shares.

£1 on application, and £1 on allotment.

On payment of the £2, share certificates or warrants to bearer will be issued at the option of the subscriber.

BANKERS.

The London and Westminster, Lothbury, E.C.

OFFICES—34 Walbrook E.C.

The main lode having been cut, the Directors entered into a contract for the erection of the necessary machinery for dressing the ore, and now offer the remaining shares to the public.

The agent at the mine writes on the 16th October, 1871, that the main lode had been cut, and "that it is a beautiful lode." On the 19th October he further writes "I am very pleased to be able to tell you that we have a splendid lode making in the shallow adit. We have now a beautiful branch of lead in the centre of the lode, nearly solid ore."

Prospectuses, and forms of application, and all information can be obtained at the Offices of the Company.

T. B. CASTELLO, Chairman.

COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decrees of 20th of July, 1854 and 31st of December, 1866.

Recognised by the International Convention of 30th April, 1862.

LONDON BANKERS

The Union Bank of London.

LONDON AGENCY—144 Leadenhall street, E.C.

MANAGER—Theod. Dromel.

The London Agency grants Drafts and Letters of Credit, and purchases or collects Bills payable at the above-name places.

The Agency will conduct banking business of every description with the Continent, India, China, &c., &c., &c. upon terms to be ascertained at the Office.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

MAPPIN AND WEBB'S NEW PREMISES, MANSION HOUSE BUILDINGS, CITY.

FINE CUTLERY, ELECTRO SILVER PLATED WARE, SPOONS AND FORKS, SOLID SILVER, DRESSING BAGS and CASES, and ARTICLES for PRESENTS in every variety.

As Inferior kinds are often Substituted for the sake of extra profits.

MESSRS GABRIEL'S SEDADENT.

THE CURE FOR TOOTHACHE.

Sold by all Chemists.

Price 1s 1½d. Post free, 1s 3d.

This extraordinary application, marvellous in its effects, gives immediate relief without injuring the tooth, and forms a temporary stopping.

Prepared only by—

MESSRS GABRIEL, DENTISTS,

(Established 1815),

64 LUDGATE HILL, CITY, and 56 HARLEY STREET, W., } London.

(Their only Establishments.)

Where they practice their painless system of DENTISTRY.

DINNEFORD'S FLUID MAGNESIA.

—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.

DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

HOLLOWAY'S PILLS AND OINTMENT.

—Health to the sick, strength to the weak, and perfect digestion to the dyspeptic.—Purifying and renovating properties of a remarkable kind are the characteristics of these remedies. The poor sufferer, well nigh worn out by length ned disease, may still be strengthened and restored by the tonic influence of these medicaments. In dyspepsia, loss of appetite, flatulence, and liver complaints, while the pills are taken, the ointment should be rubbed over the digestive organs. In heart and chest complaints it should be rubbed on the back and chest as assiduously as salt is rubbed into meat. By steady perseverance with this treatment, the blood is purged of all impurities, and the whole animal system thoroughly regulated.

WOOD STREET WAREHOUSE COMPANY, LIMITED.

The following Letter and Report have been issued by order of the Directors :—

100 Wood Street, Cheapside,
London, E.C., October 10th, 1871.
Secretary's Office.

SIR,

I am instructed to inform you that, for the satisfaction of the Shareholders, the Directors, on the decease of Mr Hugh Jones, the late Managing Director, and as a basis for the future management, requested the Auditors — Messrs Good, Daniels, and Limbert — to prepare a statement of the financial position of the Company, and, this having been done, they now place the same before the Shareholders, made up to the 30th September last, from which it will be seen that, after payment of the dividend at the rate of 10 per cent. per annum lately declared for the last Half-Year, and providing for all outstanding expenses, there remains a considerable surplus, which cannot fail to be considered most satisfactory.

I am glad to be able to add that the business is progressing most favourably ; the sales every week continue to show a great increase over those of the corresponding weeks of last year.

I am, Sir,
Yours obediently,
H. J. WESTRUP,
Secretary.

BANKERS—National Provincial Bank of England, 112 Bishopsgate street, and all its Branches.

SOLICITORS—Messrs Sharp and Turner, 13 and 14 Clement's lane.

AUDITORS—James Ford Esq., 76 Cheapside.

SECRETARY (PRO TEM.)—Frederick W. Smith, Esq.

OFFICES—35 Gresham House.

PROSPECTUS.

This Company has been formed for the purpose of acquiring and working the Bitumen and Asphalte Mines of Di Castro, in the Romagna, Italy, which have been known and worked from time immemorial, as the Col di Pecce, or Mountain of Pitch. They are held under a concession granted by Pope Pius IX., dated 13th October, 1855, in perpetuity at a yearly rental of £2 a-year, and no royalties whatever. The concession has been recognised by the Italian Government. The concession gives the right to all minerals, which, independent of the bitumen and asphalte, may prove most valuable, particularly so as lignites have been found in large quantities, which have been tried on the Rome and Naples Railway successfully. These mines cover an area of about 10 square miles, or about 6,000 acres, and contain enormous deposits of pure bitumen and richly bituminous limestone; they are capable of supplying the whole world with bitumen and asphalte paving of the finest qualities. The mines are within a mile of the main line of railway from Rome to Naples, and consequently the transport of their produce to Naples or Civita Vecchia, and thence to France and England, can be effected at lower rates than any of the Swiss or Savoy mines. There is no doubt the Rome and Naples Railway would construct a branch line to the works, which, under any circumstances, will not cost more than £1,200.

From the engineers' reports, it appears that with a plant costing about £15,000, 15,000 tons of pure bitumen may be extracted yearly, leaving a clear profit of at least £6 per ton, or £90,000 a year. This, the most important branch of the business, will have the anxious attention of the Directors, and by an increase of plant it is believed the yield of bitumen may be largely augmented.

The engineers' reports also state that the supply of asphalte is practically inexhaustible, and can be delivered in England or France at a price not exceeding 38f per ton. The asphalte from these mines has been laid down in Rome, Naples, Milan, and other large towns in Italy, and after three years' wear is in excellent condition. It has proved to be capable of standing the greatest solar heat, and excels in hardness, toughness, and durability.

The price for asphaltic mastic in Paris is £5 per ton, and it would therefore command about the same price in this country, but at present it is a monopoly in the hands of two or three companies, who will not sell to contractors and others. The Directors of this Company, however, propose to sell to the public at a fair price, and believe by so doing they will secure very large profits.

The use of asphalte as a paving material is now an acknowledged fact, and it has been computed that the annual consumption in London alone will soon exceed 200,000 tons, and that the requirements of the other large towns throughout the United Kingdom will be yearly a million of tons. This enormous consumption is producing an increased demand for pure Bitumen, which is the essential ingredient from which all asphaltic mastic is manufactured.

As an important adjunct for carrying on the asphalte paving business of this country, and supplying the concrete, &c., necessary, the Directors have secured a lease of the Arlesey Concrete and Cement Works, near Hitchin, through which the Great Northern Railway passes, at a yearly rental of £1,100, for 21 years, with the right to purchase, any time within three years, for £15,000. These works cover an area of about 12 acres, and are now in full operation, and will enable this Company to contract immediately for the relaying of streets with asphalte, in the best possible manner, at about one-half of the cost now usually charged.

The Report on the Mines of Mr James Wright, C.E., is annexed.

The property has been secured for the sum of £130,000, £80,000 of which has to be paid in cash, and £50,000 in fully paid-up shares of the company, leaving £20,000 for working capital, &c. The contract is dated the 22nd October, 1871, and is made between Monsieur le Commandeur T. B. Dol of the one part, and William Ferriday Songey of the other part.

If no allotment is made, the deposit will be returned in full.

Copies of the concession, contracts, report, and articles of association can be seen at the office of the company's solicitors.

ISSUE OF £10,000 SHARES OF £10 EACH OF THE
DI CASTRO BITUMEN AND ASPHALTE COMPANY, Limited.

FORM OF APPLICATION.

(To be Retained by the Bankers.)

To the Directors of the Di Castro Bitumen and Asphalte Company, Limited.

Gentlemen,—Having paid to your credit at the National Provincial Bank of England, the sum of ..... pounds, being £1 per share on my application for ..... ordinary shares of £10 each, of the Di Castro Bitumen and Asphalte Company, Limited, I request you to allot to me that or any less number of the said shares, and I hereby agree to accept the same, and to pay the balance in respect of such shares, in terms of the prospectus.

Name (in full).....
Address .....
Profession (if any).....
Date .....1871.
Signature .....

(Addition to be Signed by Applicant desiring to pay up all the Instalments on Allotment.)

I desire to pay up my subscription in full on allotment, thereby entitling me to discount on prepayment of the instalments at the rate of 6 per cent. per annum, and a priority in the allotment. Signature .....

REPORT of Mr JAMES WRIGHT, C.E., upon the ASPHALTE MINES of "DI CASTRO."

12 Copthall court, Throgmorton street, London, E.C., October 20, 1871.

Dear Sir,—In accordance with your request I now beg to submit to you my report upon the Bituminous deposits and Mines of "Di Castro."

The Concession under which these Mines are held from Pope Pius the Ninth, in perpetuity, contains ten square Roman miles, equal to about 6,000 acres, for a yearly payment of 10 scudi = 50 francs.

The workings or mines are about 2½ miles from the station Poti Castro on the main line of Railway from Rome to Naples. A short tramway of about ½ of a mile would put them in communication with the main line. They are situated near the top of a hill called the "Col di Pece" (pitch mountain) and have been known and partially worked for many years, but upon such a limited scale as to do little more than show the magnitude and importance of the deposit.

There are three open cuttings or quarries showing a face of rock about 100 metres in width, and a depth above the level of the valley of about 150 metres. By forming another tunnel further down the hill, a large face would be opened up from which an almost unlimited supply of bituminous rock could be within a short time ready for quarrying.

The geological features are very peculiar, and palpably manifest that the whole district is one of great interest and importance as a field for supplying a large source of bituminous materials.

The formation is hard metamorphic limestone, resting upon a younger basaltic rock; the limestone has apparently been broken up by means of pressure from the fumes of bitumen into thin lamina, in some parts into a hard conglomerate, the condensed bitumen being deposited between the layers. I draw particular attention to this as constituting the difference between these deposits and those of Switzerland and Savoy, the latter having the bitumen evenly distributed throughout the particles of the lime, giving it a granular structure; the Di Castro and similar deposits having the bitumen deposited between the laminæ or breccia of the rock, giving it a lamillar structure. Analyses which I made of samples give an impregnation of bitumen varying from 8 to 16 per cent.

I have no hesitation in saying that an Asphaltic Mastic can be manufactured from the rock which will form an excellent paving material equal to any in use.

The two great sources of revenue will be—

1st. From the manufacture of pure Bitumen.

2nd. From the manufacture of Asphaltic Mastic for paving purposes.

Large quantities of the former can be cheaply made, yielding a profit of at least £6 per ton, and unlimited quantities of the latter can be manufactured at the ordinary prices. The advantage which the trade would possess for export lies in facility for transport; with a little outlay for a tramway or light railway, the manufactured or raw material can be transported from the works—

	francs.			francs.
To Civita Vecchia	13½, or, if the tramway is made,			10
Naples	11½	—	—	8
The freight to England would be, I believe, about	21	—	—	21
So that the cost of transport to England for one ton of the manufactured material would be	33½	—	—	30
But one ton of the imported mastic is equal to about 1½ of ordinary mastic for paving of 11 per cent., hence the cost per ton would be	22½	—	—	18
Cost of manufacture	20	—	—	20
Say	42	—	—	38

This I consider very moderate.

The Asphaltic Mastic has been laid down in various parts of Italy, at Rome, Naples, and Milan. At Rome, in the Senators' Palace, it has been down over two years, and, although badly executed, is very hard.

In the Palazzo d'Espagne the pavement has been laid down three years, and appears in excellent condition. In the Quirinal, although the execution of the work is bad, the pavement is hard and very durable.

In conclusion, I may summarise the advantages which the deposit possesses as follows:—

1st. There is practically an unlimited quantity of bituminous rock.

2nd. From this rock pure bitumen can be extracted in very considerable quantities. I am not prepared to state the exact cost of manufacture, but I am under the mark when I say a profit of at least £6 per ton would accrue.

3rd. Practically, any quantity of Asphaltic Mastic can be made from the bitumen rock, which will form an excellent paving.

4th. This Mastic can be made at a cost certainly not exceeding but in all probability a good deal less than, 20 francs per ton.

5th. The cost of transport from the works in Italy to the Thames could not exceed 30 francs.

6th. Labour is cheap and abundant, and fuel on the estate.

7th. The Mastic could be delivered in England, including all cost, for 50 francs per ton.

8th. The selling price of Mastic in Paris is 100 francs (£4) to 125 francs (£5) per ton.

No company sells Asphaltic Mastic in England: it is practically a monopoly in the hands of two or three companies, and no individual contractors can purchase it.

(Signed) JAMES WRIGHT.

P.S.—I may add that, with a plant which will not cost over £15,000, bitumen may be extracted to the extent of 15,000 tons yearly.

Messrs C. DEVAUX and CO. are authorised to receive Subscriptions for 25,000 A Shares in

THE CESENA SULPHUR COMPANY, LIMITED.

Registered under the Companies' Acts of 1862 *and* 1867.

The Capital of the Company is £350,000, divided into two classes of Shares, viz.:—

25,000 A (Preferred) Shares of £10 each. 10,000 B (Deferred) Shares of £10 each.

The B Shares are to be considered as fully paid up, and are to be taken in part payment by the Vendors, and will receive no dividend until 14 per cent. has been paid in respect of each year on the A Shares.

When 14 per cent. has been paid in respect of each year upon the A Shares, the B Shares will be entitled to all further profits until they also have received 14 per cent. per annum in respect of each year. The net profits beyond this will be divided *pro rata* between both classes of Shares.

£1 DEPOSIT ON APPLICATION, AND £2 ON ALLOTMENT.

The remaining Capital is payable at the following dates:—

£2 10s on the 30th of November, 1871; £2 10s on the 30th of December, 1871; £2 on the 15th of February, 1872.

Subscribers have the option of paying up in full.

Priority will be given in the allotment to persons applying to pay up their Shares in full.

Interest at the rate of 10 per Cent. per annum will be paid by the Vendors up to the 30th December next on all Capital paid prior to that date. Thereafter Dividends will accrue on the fully paid-up Shares and on the respective amounts paid on the other shares, from the dates of the several payments.

TEMPORARY OFFICES—62 King William street, E.C.

This Company is formed for the purchase of very valuable Sulphur Mines, Pits, Furnaces, and appliances, situated in the Romagna, in Italy, which, under most adverse financial circumstances, produced, as certified by the documents hereafter referred to, 3,000 tons of sulphur in 1868, 4,000 in 1869, 6,000 in 1870, and in the seven months ending 30th September, 1871, 4,654 tons, or at the rate of about 8,000 tons per annum, an average which has increased during the last two months to 8,800 tons—the intention being to greatly increase this production, and to improve and extend the processes employed in working, smelting, and refining the mineral.

This rate of production shows, at the estimated profit of £3 7s per ton, sufficient to pay at once nearly 12 per cent. on the A shares, but the Directors having carefully collated the statements which have been laid before them as to the working and future prospects of the property with those contained in the report specially addressed to them by their engineer, Mr G. A. Barkley, believe, as the result of his examination, that the profits of the Company may be confidently estimated as follows:—

In 1872, on 12,000 tons, £40,000, equal to 14 per cent. on the A shares, and 5 per cent. on the B shares
In 1873, on 16,000 tons, £53,000, over 15 per cent. on both the A and B shares
In 1874, on 22,000 tons, £73,000, over 20 per cent. on both A and B shares

And that, with a further limited outlay in works and plant, an increase in this last return may be anticipated.

The properties to be acquired consist of the twelve mines of Boratella, Polenta, Borello, Tasca, Monte Aguzzo, Monte de Codruzzo, Ca de Guido, Ca de Castello, Campitello, Alzuno, Linaro, and Rivoschio, extending over about 4,297 acres, situated between 12 and 20 miles of the town and railway station of Cesena, in the province of Forlì, in Italy.

The presence of sulphur-bearing strata is believed to extend under all the properties, but with one exception none have hitherto been worked to any extent; the energy and enterprise of the late owners having been mainly concentrated during the last four years in developing the resources of the Mine of Boratella. Notwithstanding the insufficiency of capital at their command, and the consequent onerous conditions to which they have been compelled to submit, a sufficient development has been given to this mine to prove its great resources and value.

The underground workings, Mr Barkley reports, already cover some eight acres, throughout which the sulphur-bearing schist is found at a depth of about 390 feet below the surface, averaging from 10 to 12 feet in thickness, and yielding 15 per cent. of sulphur in the furnaces; the area of this mine remaining unworked being about 535 acres. After allowing 50 per cent. for pillars and waste, the engineer calculates that Boratella alone should supply, according to every indication hitherto obtained, upwards of 1,367,100 tons of sulphur, equal to, at present market prices, a gross money value of about £8,202,600.

The mine is worked by two drawing shafts and an inclined plane. It is entirely free from water; and, moreover, little or no timber is required for the support of the roof. The appliances at present in use, especially those for transporting the mineral to the shafts, lifting it to the surface, and reducing it to sulphur, are rude, and leave room for great improvement.

Nevertheless, under all present disadvantages, a large production of sulphur is obtained. The yield, as certified by a notarial deposition taken at Bologna on the 27th September, 1871, rose from 3,000 tons in 1868, to 6,000 tons in 1870; whilst the quantity produced in the seven months ending 30th September, 1871, as certified by a further notarial deposition taken at Cesena on the 5th of October, 1871, was 4,440 tons, irrespective of 214 tons which were obtained from the Polenta Mine during the same period.

The cost of working, reducing, refining, and delivering this sulphur at the railway station at Cesena is also stated in the same deposition, dated 27th September, 1871, to have been about £3 5s per ton during the present year. It must however be borne in mind that as this cost includes the sums paid under the onerous liabilities above referred to (which have now been bought up and extinguished), the cost of production in future will be relieved to an extent which is estimated by the engineer at 12s per ton.

The whole of the sulphur is sold in Italy, where the consumption is so great that a large additional quantity is imported annually from Sicily. The average selling price of the qualities produced has been ascertained to be above £6 per ton, deducting from this £2 13s for cost of production, the balance of £3 7s represents the estimated future profit per ton. The production of 1872 is calculated to reach 12,000 tons, and to return on the first year's operations considerably more than sufficient to pay 14 per cent. to the A shareholders, whilst the engineer further reports that by the introduction of improved methods of working, at a moderate expenditure, the production may confidently be expected to rise to 16,000 and 22,000 tons in 1873 and 1874 respectively, whilst a still further extension may be looked for thereafter.

The amount to be paid to the vendors is £218,000 in cash and £100,000 in B Deferred Shares. The company is to enter into possession of the mines, property, and plant on the 1st January next, up to which time interest at the rate of £10 per cent. will be paid by the vendors on all capital paid previous to that date. The remaining £32,000 will be reserved for working capital and for payment of the cost of registration in Italy.

EXTRACT FROM THE REPORT OF MR G. A. BARKLEY.

"In conclusion, it appears to me that the property consists of mines of mineral lying at comparatively small depths below the surface. That these mines are far easier to work than an ordinary colliery, the seams being higher, the roof better, and no elements of extraordinary expenditure, such as gas or water (at all events, as far as the Mine of Boratella is concerned) being present.

"That one ton of sulphur, which should be produced for £2 13s, and be sold at Cesena for from £6 to £7, should give a net profit (taking the selling price at the former rate) on each ton of sulphur of £3 7s, and that labour being abundant and good, there is no reason why the production of the mines, which is now about 60,000 tons of mineral per annum, should not be as readily increased to 150,000, as it would be to work 150,000 tons of coal from an English colliery. In putting therefore the production of the mine at—

12,000 tons of sulphur in 1872,
16,000 — — 1873,
22,000 — — 1874,

unless circumstances quite unforeseen by me and the other engineers (whose reports I have consulted) should occur, I have perfect confidence that, with ordinary energy and skill, these quantities can be readily obtained. I estimate the quantity of sulphur for 1872 at 12,000 tons only, as time must be allowed for extending, improving, and adding to the appliances and means at present in use.

Prospectuses and forms of application for shares may be obtained in the accompanying form at C. Devaux and Co., 62 King William street, and at the brokers and solicitors of the company.

Should the number of shares allotted be less than those applied for, the surplus of the amount paid on application will be applied towards the payment due on allotment, and any remaining balance will be returned forthwith.

In the event of no allotment being made, the deposit money will be returned in full.

In case any instalment shall not be duly paid, the shares, with the amount paid thereon, will be liable to forfeiture.

Copies of the memorandum and articles of association, the original contract with the vendors, the report of the engineer, notarial copies and translations of the Italian documents above referred to, and of the conveyances to the vendors, can be inspected at the offices of the solicitors of the company, No. 2 Suffolk lane, Cannon street.

THE CESENA SULPHUR COMPANY, Limited.

No.—— LETTER OF APPLICATION.

To be retained by the Bankers after payment of the deposit.

Messrs C. Devaux and Co., London.

Gentlemen,—Having paid to your bankers the sum of £ , being a deposit of £1 per share on A shares in the above Company, I hereby request that such number may be alloted to me, and I agree to accept such shares, or any less number, allotted to me, subject to the provisions of the memorandum and articles of association, and I hereby authorise my name to be placed on the register of members of the Company in respect of such shares.

CENTRAL URUGUAY RAILWAY OF MONTEVIDEO.

9 Victoria Chambers, Westminster, S.W.,
21st October, 1871.

The Trustees have much pleasure in bringing to the notice of the Bondholders of the Central Uruguay Railway the subjoined very satisfactory Reports received from Senen Rodriguez, Local Director of the Company, and George Higgin, Esq., C.E., who has just returned from a special mission to Montevideo to report on the position and prospects of the Railway.

By order,

W. H. DAWSON, Secretary to the Trustees.

(TRANSLATION.)

London, 18th October, 1871.

To the Trustees of the Bondholders of the Central Uruguay Railway.

GENTLEMEN,—I have just arrived in the Neva, and it is pleasant to me to communicate to you that on my arrival in Montevideo, the contracts, which I had concluded with Messrs Waring Brothers for the loan, and the construction of the section to the right bank of the river Santa Lucia, with mortgage of the line, were accepted with applause. The mortgage has been registered.

On my arrival at Montevideo I encountered a strong opposition in the public press against what had been done, but this disappeared so soon as the contracts were known, and the shareholders in general meeting passed a vote of confidence in the directors for what had been done, accepting, as did also the Government, the contract *ad referendum*, of which I was the bearer, for the continuation of the line to Durazno.

The Government, completely satisfied, also ordered the liquidation of the guaranteed interest upon £10,000 per mile for the two years the line has been working, though not having been previously demanded by the directory.

I enclose you a fortnightly statement of the products of the traffic from the 1st of July, in which the trains started from the station of Bella Vista, distant 1½ miles from the capital. Now that from the second fortnight of July—the trains start from Montevideo—the figures of the statement explain, better than I could do it, the future of a line which at present is only open for 11½ miles of its length.

The pleasure traffic on feast days is so great that we are short of carriages for the passengers; had we these, the product would be considerably augmented.

The works contemplated in the contract with Messrs Waring are being carried forward with great activity, and we believe that when the line reaches Canelones we shall be short of rolling-stock to conduct the great quantity of grain which this department produces.

On my departure from Montevideo the arrival was expected from Buenos Ayres of Dr Andres Lamas, a notable person in that country, who, in union with the Brazilian Minister, the Baron of Cotegipe, was going to mediate in the internal questions which divide the natives, and a satisfactory termination for both parties was hoped for from this mediation, because both parties desire peace.

With respect to the works of the Railway, they have been in no way interrupted; both contending parties respect the progress of the Republic.

I salute you with respect,

(Signed) SENEN M. RODRIGUEZ.

Table showing the gross receipts in pounds sterling of the section already opened of the Central Uruguay Railway from the 1st July to 15th September, 1871:—

2nd — — —	633
1st — — August	668
2nd — — —	701
1st — — September	774

(Signed) HENRY SHARPE, Accountant.

Montevideo, September 15th, 1871.

London, 18th October, 1871.

To the Trustees of the Bondholders of the Central Uruguay Railway Company.

GENTLEMEN,—On my arrival from Montevideo I hasten to lay before you the result of my observations on the state of affairs in that country with respect to the Central Uruquay Railway.

You are already aware that the contracts executed in the spring of this year were unanimously ratified both by the shareholders and the Government.

The works between Las Piedras and Santa Lucia are now being actively pushed on. A most favourable line has been obtained, so much so as to lead me to believe that within a period not exceeding nine months you may safely calculate on the opening of the Railway to the town of Santa Lucia.

There can be no doubt that all the works will be executed within the estimate.

The Government have recognised their guarantee on the 11½ miles already open, and have ordered it to be paid through the proper offices.

The state of the traffic on this portion of the line is very satisfactory

Since the opening in July of the piece necessary to bring the train into the city, there has been a marked and steady increase in the receipts.

The gross earnings for the first fortnight of the last month were 3,869 dollars—say in round numbers £800, equivalent to £20,800 per annum on 11½ miles. Deducting 50 per cent. for working expenses, this would leave a net revenue of £10,400 per annum, or say £2,350 per annum more than is necessary to cover the 7 per cent. guarantee on the nominal capital of £10,000 per mile, thus securing to the bondholdors a return of 10 per cent. on their actual cash investment, independently of the guarantee.

These results have been obtained during the winter season, the country having been in a state of civil war, which, although it has ceased to be serious, is not yet quite extinguished, and with very insufficient resources as regards station accommodation and rolling-stock, so much so that on feast days the company are compelled to reject large numbers of passengers.

In consequence also of the short length of the line, no goods have been as yet carried.

The results given are purely passenger traffic.

The opening of the line to Santa Lucia will give a great impulse to the passenger traffic, and will undoubtedly create a large goods traffic.

It is the opinion of practical people in Montevideo that the line when open to Santa Lucia will pay more than double the amount of the Government guarantee.

After having made myself adquainted with the facts of the case, I see no reason to suppose that these opinions are exaggerated.

It would be contrary to all experience, if in a line of this description, forming a trunk railway from a capital and shipping port like Montevideo, into a vast interior full of cattle stations, and fast filling up by emigration, the goods traffic did not exceed the passenger traffic, so soon as the line is opened far enough to supersede the bullock carts and other primitive conveyances, by which a great part of the import and export trade of the country is now carried on.

According to the most trustworthy statistics this trade now exceeds the large amount of £8,000,000 a-year, carried on principally through Montevideo.

The number of ships entered and cleared at the port during the year 1869, exclusive of coasting vessels, amounted to 2,848, with a tonnage of 990,842. The amount of Customs revenue has increased during the last ten years in an extraordinary manner, and the tendency is still upwards, as is shown by the fact that the returns of the last month of July show an increase of more than 50 per cent. over the same month of 1870.

With these facts I cannot doubt that the Railway will command a large and increasing goods traffic when opened to Santa Lucia, and in no case should I consider the Government will ever be called upon to pay their guarantee on this portion of the line.

The prospects of the country as regards peace were favourable at the date of our departure from Montevideo, the remains of the insurgent army being reduced to small scattered bands—indeed, so much security was felt as to the future, that, when I left, the defensive works round the City of Montevideo were being demolished by the Government.

In conclusion, and after visiting the locality, I may express my belief that there is no railway in South America more certain to command a large traffic, and give good results, than the Central Railway of Uruguay.—I am, gentlemen, your obedient servant,

(Signed) GEORGE HIGGIN, Mem. Inst. C.E.

On October 28 was Published, No. X., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for October gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains

A FINANCIAL RECORD OF THE MONTH;

New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to October 25.

Advertisements for the next Number, to be published on November 25, must be sent, to insure insertion, on or before November 23.

The December Number of the INVESTOR'S MONTHLY MANUAL will give, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the latest quotations for 1870 (so as to indicate the Exact Movement during the Twelve Months), a Complete Directory, the names of the Markets where each Security is chiefly dealt in, a Financial History of the Year 1871 (including a Tabulated Chronicle of Events), besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. A copious Index will be added for purposes of reference.

This Double Number will be published on Saturday, the 30th of December.

OFFICE—340 Strand.

SOME REASONS WHY THE BANK OF ENGLAND IS NOT LIKELY TO LOWER ITS RATE THIS MONTH.

The policy of the Bank of England has been falsely ascribed to a demand for a loan, consequent on the failure of an American operation, and to other erroneous causes. But the real reason is very simple, if we refer to the accounts of the Bank of England.

	£
This time last year the private deposits were	23,294,000
They now are	18,186,000
Increase	5,108,000

—and the large increase is entirely a deposit of a particular kind. It is money in the hands of bankers, and of certain bankers who are known to be holding it mostly against the forthcoming payment to Germany, and the rest against an exceptional transaction relating to the dividend on the French loan. It is now well known that the Banque de Paris, in consideration of a large commission and a payment of 10,000,000*l* in French banknotes by the French Government, undertook to find that sum in gold in London, and obtained also for a commission the acceptances of first-class houses for that sum, which fall due on or about the 25th of November. In preparation for the payment of these transactions, a very large sum has already accumulated in London. It has mostly been placed on deposit with certain banks, and as they are not able to employ most of it, it appears for the most part to their credit at the Bank of England; at any rate, it appears to someone's credit. And this is the main reason why the private deposits in the Bank of England are so much greater than usual. A minor reason is that the dividends on the French loan can, under the present remarkable state of the French exchange, be advantageously asked for here instead of in Paris. And the money so held on both accounts is temporary money, which will be immediately withdrawn from us when a temporary purpose is served. The Bank of England,—the English money market, it may be said, as a whole,—is therefore like a banker who holds a very large deposit payable at a very short date, and has, as is common in such a case, a very great difficulty in employing that deposit. The peculiarity of the moment is that this money is both dear and plentiful; it is dear, because we have to provide for a large liability at the end of this month; it is plentiful, because a portion of the money to provide for that liability has been remitted hither. We are thus in an intermediate position. If the whole had been paid to us, money would not have been dear, for we should have had nothing to provide; and if no part had been paid to us, money would not have been plentiful, for the unusual surplus which now makes it plentiful would not have existed.

It is thought that the Bank of England is in an exceptionally strong position, and the superficial facts appear so. But in reality we are under a great liability of an unusual character. When we are concerned with an ordinary trade demand, we can generally say that very large sums in bullion will not be suddenly required; the ordinary auxiliary modes in which trade balances are settled forbid it. But we are now in presence of a *political* demand. The German Government may ask for bullion for all the bills due to it on the 25th of November, and to meet that possible demand the Bank of England must be provided not only with the ordinary resources which it commonly needs, but also with very extraordinary resources, for which it usually has no occa-

sion. Some people say—"France will remit what "we have engaged for her, and so it will be all "right." But as we see by the Bank account, she has remitted a part, and the withdrawal of even that part would make an inconvenient diminution of the present Bank reserve. It would reduce it to 7,000,000*l.* And we must take into consideration that France *may* not remit the whole. The great probability is that she will, but still possibly she may not. We are the parties primarily liable. Houses here of good credit who could pay the money, even if the whole of it does not come from France, have made themselves liable. In one way or in another they will obtain the gold from the Bank of England which they require to send to Germany, and the Bank of England must accumulate what would otherwise be an extravagant reserve in order to provide for it.

No doubt the German Government may take long bills for the money, or may allow the money to remain here on profitable deposit. But a banker greatly dependent on a single person must not speculate on the peculiar intentions of that person; he must make himself ready to pay the maximum of demand which that single creditor can, in the absence of a contrary agreement, urge upon him.

We hope too that there is no doubt that France will remit all which she ought. But the case, as we understand it, is very remarkable: 10,000,000*l* in French banknotes were given sometime since to the Banque de Paris by the French Government, and in return the French Government holds good bills, which, at the peril of the parties, must be paid in gold in London. But there is a *hiatus* between the paper in Paris and the gold in London. No doubt there is much gold in the Bank of France, but cash payments being suspended, it can not be got out without the consent of the Bank. This is not the last payment by a very great deal which France has to pay to Germany; the first of many monthly instalments, amounting to over 3,000,000*l* is to be paid in January next. The Bank of France therefore, anxious though it may be to support the Banque de Paris and its co-operators, may well think that looking to the coming demand on it and the coming necessities of the French Government, it has not adequate means to support them entirely. As bankers, we must look to the worst event; we must be safe, even if France does *not* remit the whole, and if Germany *does* require to be paid the whole.

And although the rumour that a request for a loan of 2,000,000*l* had been made on behalf of American houses to the Bank of England is untrue, yet this is true—that certain houses here have engaged to pay 14,000,000*l* of the new American loan, which is now at a discount, and that, supposing the persons who have taken that loan not to have means of their own to pay the money due to America, a large borrower may be brought into the money market just when that market is weak, and when all its resources have been already strained by demands unusually heavy.

On these grounds we think it clear that the Bank will not be able for some time—probably not this month—to reduce its rate of discount. We wish we could think that in merely maintaining that rate they were doing all which is required. But we cannot think so. We consider that, in face of the great impending liability, *all* means of acting on the exchanges ought to be used, but the principal means has not been used. The market rate—the main guide of exchange dealings—has been allowed to fall below the Bank rate, and though the Bank is getting what ordinarily would be considered a fair additional supply of gold, yet in the present extraordinary position, we cannot think that supply enough. If the case be true at all—if it be a case for any measures—it is a case for the strongest measures. The market rate ought, by a large borrowing on stock by the Bank of England, to be raised, if not quite to the Bank rate, at least to something more nearly approaching to it.

The consequence of permitting the Bank rate to differ so much from the market rate is now evident. Ordinarily the Bank rate is the guide of many transactions, because it is supposed to be a rough approximation to the market rate. But now that the Bank rate differs altogether from the market rate, it is no longer permitted to rule the most important of these transactions. The joint stock banks and the bill-brokers have begun to disregard it, and very soon all the public will begin to do so likewise. The peculiar influence on the market rate which has by custom belonged to the Bank rate will cease to exist. If the Bank of England do not raise the market rate nearer to their own, they will, day by day, find that their own rate has less influence.

MR GLADSTONE AND THE PEOPLE.

Mr Gladstone's speech at Greenwich marks a new era in English politics,—not that it is for him a very great speech, and still less that it is the speech of a statesman as such,—if it *had* been, in that place and delivered to such an audience it would probably have been a great mistake and a sad failure,—but that it marks the coming of the time when it will be one of the most important qualifications of a Prime Minister to exert a direct control over the masses—when the ability to reach them, not as his views may be filtered through an intermediate class of political teachers and writers, but *directly* by the vitality of his own mind, will give a vast advantage in the political race to any statesman. We are not saying that the power of addressing twenty-five thousand people for two hours, and holding their attention and interest in spite of plenty of hostile elements in the great crowd, is one which above all others we delight to see in a leading statesman. As far as our own tastes go, we might prefer the sort of statesman who could only reach the nation through comparatively select audiences like Parliament, whose power is reserved for the higher regions of statesmanship, and who possesses none of the notes of the great popular orator. All we are saying is that the time is evidently approaching when such statesmen will be at a considerable disadvantage, even as heads of an Administration, when a power like that evinced by Mr Gladstone will be of the very first importance even for his position as leader of the House of Commons and first Minister of the Queen. Criticise Mr Gladstone's speech as you will—virulently, contemptuously, patronisingly, compassionately, or from any other point of view, however depreciating,—no politician in his senses will deny that it has added greatly to the strength of the Government's position; that it has to some extent neutralised much of the political result of the process of many months' slow decay and demolition of his power. If Parliament were to meet again to-morrow, Mr Gladstone's position would be quite changed. It would be at once felt by all his discontented allies as well by his party foes that Mr Gladstone's direct command over the people is still immense,—that the result of an appeal to the people by him against a divided and hostile Parliament would very probably end in his full reinstatement in power, with as large a majority as ever. Mr Gladstone has illustrated most remarkably his reserve power outside Parliament. No English Minister probably ever had less of a personal Parliamentary following than Mr Gladstone. There he has no phalanx like Lord Russell's Whig phalanx, and Lord Palmerston's personal admirers. In Parliament he has no body-guard. But he has shown once more how easily he can get the ear of the electors themselves, and that under circumstances of no little difficulty,—circumstances in which both his policy and his shortcomings as a local representative combined to make him unpopular with his audience. Parliament fully appreciates this reserve power in a Prime Minister, which secures him, as it were, a separate and private appeal to the people,—an appeal not simply through the people's representatives, and what the people may or may not understand of his reported Parliamentary speeches, but by direct personal influence. Parliament may not like it,—may think it even a dangerous power,—may echo the grumblings of three years ago over Mr Gladstone's stumping tour in Lancashire; but Parliament will recognise and respect it as a new store of political force, as a guarantee that the Premier has more direct relations to the people than any other Premier of our times, and that if he becomes unpopular with the representatives of the people, he may still be more popular with the people themselves than even those representatives. Undoubtedly Mr Gladstone's Greenwich speech will serve as a conspicuous mark for the date when it first became advisable for a Minister to cultivate the gifts of a great popular orator,—an orator who can deal with political topics in the broad, easy, and animated style which touches the people, and without any of that subtle flavour of Parliamentary skill which only suits the statesman.

Mr Gladstone not only displayed this sort of power in a very remarkable degree at Greenwich, but what is quite as remarkable as anything else, it is a late-acquired power.

He was from the first no doubt a good Parliamentary speaker. Lord Macaulay, in his review of Mr Gladstone's early book on Church and State, speaks of his Parliamentary promise in high terms. But the constitution of his mind was so complex, and his style of argument so little popular, that no one certainly then thought of him as a popular orator. Sir R Peel, if we remember his words rightly, says in his political memoranda, that Mr Gladstone brought "his high character "and great attainments" to the aid of the Conservative Ministry, but evidently thought little of his oratorical powers. Indeed, it was not till he busied himself with finance,—*i.e.*, with very definitely marked-out subject-matter, in which there was no room for subtleties, though much for explanatory and expository dissertation,—that his remarkable faculty as an orator, his artistic power of planning out his subjects, his ease and vivacity in making them interesting to others, his skill in illustrating principles, his animation in recounting facts, began to be generally understood. And it was far later again that he acquired any of that power of fascinating and influencing a genuine multitude, by which Mr Bright first became noticeable. Mr Gladstone's rhetorical powers, at first as little popular as great fluency and earnestness could well be, have gradually worked themselves out into a real command of popular sympathies and the popular intelligence, and the fact is one that at so critical a moment as this will hardly fail to be of the greatest significance to his but recently tottering Government.

We are quite willing to admit that the speech itself, though a very powerful and lively speech from a Prime Minister to his constituents, was in no sense the speech of the head of a great Administration declaring and expounding his policy. Such a speech could hardly have been made to 25,000 people in the open air under the conditions of time and space under which he spoke. A man who has to exert his voice to its utmost, and to interest a great crowd for a considerable time, cannot by any possibility trace out the fine lines of a national policy, even if he had spare energy enough to concentrate his mind upon them in the face of such physical difficulties. But as the speech of a Prime Minister who is also a representative to his constituents, it is not easy to overestimate its ability and its interest. The historical illustration of the difficulty of keeping together large Parliamentary majorities, as introductory to his own expression of confidence in his colleagues and himself, and his complete refusal to admit that this address was his "last dying speech and confession,"—his bold expression of continued confidence in his Irish policy,—his reply to the charge of niggardly economies, which was as far from any yielding of principle as it was from any unfair attack on those Conservative predecessors who had yet, as he showed, economised (and quite rightly economised) more labour in the national dockyards than ever he and his colleagues,—his defence of his military policy,—the moderate and just stand he took upon his education policy,—and finally, his extremely lively and true remarks on the fundamental popularity of the House of Lords, even with the working classes, and the undesirability therefore of doing away with the hereditary principle,—were all treated with a lightness and yet energy of touch, and connected together in so natural and taking a manner, that Mr Gladstone taught the audience, which he was also amusing, without letting them know that he was teaching them. And the last part of his speech on the mistake made by the representatives of skilled labour in their negotiations with certain peers and baronets, through Mr Scott Russell, and in venturing to hope that legislation could do for them what really nothing but individual energy and self-denial could ever achieve, was more than instructive and lively; it went thoroughly home to his audience, and made them feel how thoroughly Mr Gladstone understood their position, and how steadily he could resist unwise demands, even while heartily entering into their most urgent wants.

Thus when Mr Gladstone left the Greenwich hustings, his Government certainly stood in a far stronger position than it has done for many months back. The nation has again learnt to realise that its Prime Minister understands both its unwise wishes and its genuine wants better than almost any other man in it, and that even if misunderstandings must arise between the Cabinet and Parliament, there will be a very strong disposition on the part of the masses to believe what the Prime Minister says of Parliament, more easily than what Parliament says of the Prime Minister.

THE POSITION IN AUSTRIA.

It is difficult to imagine a more harassing, or in a certain sense more dangerous, position than that now occupied by the Emperor of Austria. Pressed by events and the counsel of a man who seemed to him an able statesman—the "unlucky" Premier of Saxony—with his self-confidence weakened by repeated defeats in battle, and hampered by the condition of his treasury, the Emperor consented to the scheme known generally as "dualism." Hungary regained its rights as an independent State, became rather a close ally than a constituent portion of Austria, and commenced, or rather recommenced, a separate political life. The Emperor, having resolved on the concession, agreed to make it complete, and by the revival of the Honved army—the national militia—rendered retrogression impossible, at all events without civil war. He calculated apparently that, with Hungary pacified, Cisleithan Austria would be easy to rule, and forgot that the new arrangement would, as a natural consequence, excite strong hopes of autonomy in every separate nationality. Each has some reason or other to wish for independence, and each has asked for the next thing—an internal autonomy almost complete. The Gallicians wish to govern themselves in order to help Poland. The Bohemians wish to govern themselves in order to restrain the Germans from eating them out. The Moravians and Silesians wish to govern themselves in order to delay the process which is making them German. The Dalmatians chime in for some reason civilised men have not yet penetrated; and finally, the Tyrolese ask autonomy in the interest of their faith. All this while the Germans, who are numerically stronger than any single nationality or section opposed to them, who are much more civilised, and through their relations with Berlin much stronger, are furiously determined not only to govern themselves, but to obtain a predominant influence in the remainder of the Empire. The quarrel has been envenomed by the different sides which the parties have taken in ecclesiastical affairs, the autonomists siding with the Church, and the Centralists desiring religious liberty, and by the either real or apparent vacillation of the Emperor. His Majesty appears to have thought that federalism in some form—a federalism which should leave the Hapsburgs possessors of the central authority—was, at all events, possible; and in appointing Count Hohenwart Minister of Austria, he publicly proclaimed that view. It was found, however, that the demands made by the autonomists, especially the Bohemians, involved not only internal independence but a new central constitution in which the Germans would be lost, and the latter showed symptoms of dangerous disaffection. They would join Germany sooner than be ruled by a Parliament or delegation in which the majority were Slavs. If our readers will imagine a constitution under which a majority of Os and Macs should rule England and order her to break up Italy, they will have a fair idea of the kind of reception the Hohenwart proposals meet in Vienna—a reception still further embittered by radical differences of language. The Emperor, aware of the strong attracting force exercised by Berlin, and perhaps not wholly uninfluenced by his own German sympathies, drew back, offered autonomy within the provinces, but declined to remodel the common constitution, and finally accepted the resignation of Count Hohenwart. The autonomists, on the other hand, meet this change of policy by loud threats of secession, and less audible menaces of insurrection and Russian alliance.

The Emperor has not, it is stated, given up his hope of discovering a compromise which will be endurable to all parties, but we confess we find it difficult to understand the grounds of so sanguine an opinion. States inhabited by men of different races, civilisations, languages, and sympathies have occasionally been held together, but it has always been under one of three conditions. Either the power of the central Government has been almost nominal, as in Switzerland—a country which, strictly speaking, has no foreign policy,—or the nominally equal races have been really governed by a single one of them, as is the case in the British Empire,—or the central power has been autocratic, as was, for two hundred years, the case in Austria. In the only case of the kind in which these conditions were all wanting—that of the Netherlands—years of enforced union produced no attraction, and a bloody civil war was followed by disruption. The circumstances of Austria are peculiarly ill fitted to suggest hope, for in her case there are these especial dangers, that

while the less civilised, less reasonable, and more passionate races possess in the aggregate an overwhelming superiority of numbers, and are sure therefore of ascendancy in any Parliamentary system, the more civilised but weaker race can at any moment save itself by secession, an irresistible confederation of its own kinsmen being ready to receive it. It would tax a very great political genius to succeed under such circumstances, and we cannot but doubt whether the Emperor Francis Joseph will. He may of course content himself with remaining passive. In that case the autonomists will secede, and Austria will be governed by the minority, who will not venture to do any strong act, who must keep up a ruinous army, and who will at the first serious shock find themselves quite powerless to resist an external enemy. They could not, for instance, hope for Bohemian aid in hearty resistance to Russia, or for Tyrolese acquiescence in any distinct act of defiance to Rome. Or he may suspend the constitution, rule in the old fashion with a state of siege, and await some happy turn of events, as his family has so often done before. In that case, however, he will have to rule Hungary with a constitution and Austria without one, and will so enormously increase the attractive force of the North German Empire that he will hold his throne only by anxious deference to the wishes of Berlin. Or he may risk another war, believing that nothing but victory can extricate him, and in that case defeat would be followed by the dissolution of the Empire. There may be of course some other path still, but to ordinary observers no road is left to the Emperor which is not beset with dangers involving the very existence of his Empire and his dynasty,

THE NEW SPANISH REPUDIATION.

THERE is seemingly no end to the financial misfortunes of Spain. After a long career of almost unexampled discredit, due to every cause which can bring that evil on a borrowing nation — extravagant and corrupt expenditure, defective revenue administration, the extreme of political anarchy, and repeated acts of the most flagrant repudiation,—Spain had quite lately commenced to rise a little in financial repute. A revolution and a somewhat tedious interregnum had been succeeded by the election of a Sovereign of undoubted political capacity, who was daily becoming firmly seated; many vices of the old corrupt *régime* had been purged away; serious attempts were being made to put the finances straight, and they had improved comparatively with the position on the eve of the revolution; a good harvest had occurred to put the people in good temper with their new rulers, and give them wealth enough to bear increased burdens, and make the old taxes more productive. The post-revolution statesmen too, with all their defects, had also contrived to spread abroad a belief in their financial honesty, and not a few of them had very emphatically pronounced against a policy of repudiation. For these reasons the impression gained ground that it might be once more safe to trust Spain; and if matters had gone as smoothly as they promised, there is no doubt that notwithstanding all past misdeeds, Spain would very soon have risen in the scale of nations every way, and not least in financial credit. But hardly has this prospect begun to open out than it is all put an end to by the voluntary act of a Spanish Government. There were quite enough chances against Spain in the shape of the persistent corruption of the administration, and a possible relapse into anarchy, but none of them turn out to have been so formidable as the old vice of repudiation. To cover his deficit, the present Finance Minister of Spain simply proposes to pay the foreign creditor 18 per cent. less interest than his Government has agreed to pay. He calls this "taxing the debt," which has been the common phrase since Austria set the example, but of course no repudiation could be more flagrant. And the effect has been as disastrous as possible. Although the Spanish Cortes have not yet agreed to the proposal, the old distrust of Spain has revived in full intensity. In the case of a country like Spain, which has given so many cruel lessons to its creditors, it takes very little to make them believe the worst. It is at once assumed—and not without justice, we think,—that when such a proposal is once made on responsible authority to an inexperienced Parliament whose traditions are wholly tainted, the chances are a hundred to one that it will be carried.

It is not difficult to find reasons for censuring the injustice and folly of the act which the Spanish Government proposes —for holding that repudiation is injurious, and that "taxing "the debt" is repudiation. The only difficulty in the matter is the very simplicity of the case against Spain and similar repudiating States. One can hardly argue a question which involves nothing but the most elementary principles of morality and good policy. Still there is nothing for it but to restate the arguments so long as many foreign Governments are as blind and dishonest as they are, and investors are unwise, or are deceived into trusting such Governments.

First,—on the general question of repudiation we should say that the mischief to a State which practises it can hardly be exaggerated. The direct loss to the Government is alone so great that the more knowing of the discredited States—such as Turkey—make the most painful efforts to evade the necessity which their finances would appear to suggest. It is obviously the last expedient of a bankrupt State to take any step which will close against it the money markets of the world, whatever may be the other advantages promised. As no State can tell what its wants may be, good credit must always be a reserve of incalculable value, and it is worth any price which must be paid. In some respects we are not so sure that credit is a real advantage to a struggling nation. Money easily come by is wastefully spent, and the nation not only acquires a heavy burden for nothing, but loses the benefit of an improved tone of administration which poverty might have produced. But the power of getting money on good terms is naturally a privilege highly valued by Governments, and the loss is always felt as a real loss.

Repudiation by the State however is likely to have indirect effects of an injurious character upon the nation. The distrust of the Government will extend to the whole community. The introduction of foreign capital into such a country through private hands, as well as direct loans to the Government, will be checked, and of the two will be the more serious evil. Money lent to a central Government in Madrid might have done the people little good, but money filtering into the country through the ordinary avenues of business, and to support private industry, will be sadly missed. Indirectly the repudiating acts of the Central Government, in conjunction with other causes, will do much to retard the material development of Spain.

Second,—it is equally clear that "taxing the debt" is repudiation. It is a misuse of language to describe as taxation the mere refusal of a debtor to pay what he owes to his creditor. We make the assertion as broadly as possible, because a good deal of confusion arises from the supposed distinction between an internal and external debt—the former, it is supposed, being justly liable to be taxed at discretion, and the other not. But this is not the case. A State which borrows money at home is as guilty of injustice and impolicy in withholding from its creditors what it has agreed to pay as a State which borrows abroad and repudiates. Its credit is almost equally injured, and it diffuses through the community, and in all communities which deal with it, a distrust which paralyses industry, and subjects the nation to a loss with which the gain to the Government is not for a moment to be compared. As a practical rule, it may be laid down that when the home creditor is taxed the foreign creditor has little to trust to.

The usual assertion is that if this account be true, England is guilty of repudiation, for she taxes her home debt. But this is a misdescription of the English practice. What is done in England is to extend an impartial income and property tax to the holders of the debt, and make them pay equally with other subjects. An income tax may be a wrong thing in itself, but plainly if it is to exist at all it must extend to all subjects alike, whatever the source of their income. This would be clearly seen if everybody, as in Schedule D, was assessed upon his income, and had to pay the tax after receiving it; but no real difference is made, through the tax being deducted, as in the payments of interest under Schedule A, by those who have the payment to make. This is the defence of our English practice, and it will be time enough to discuss foreign counter-charges that we tax our debt when the accusation against them arises from an extension to the debt-holders of an income tax like our own. No doubt even our practice would be unjustifiable if our debt was held abroad, and the Americans, with commendable wisdom, have refrained from extending their income tax to all holders of their debt.

It is unjust then to tax a home debt as well as a debt contracted abroad, and the only distinction is that while an impartial income tax *may* be extended to the former, when the condition of its being substantially held at home is fulfilled, no such tax of course can apply to a debt contracted and held

abroad. The reasons for extending it in the former case do not apply to the latter. In neither case however is there any right or justice in taxing the debt at discretion, and confusion is only introduced by its being supposed that any such right exists as regards the internal debt.

We need hardly notice the special plea set up for the Spanish Government. The tax is not 18 per cent., they say—it is only 10, the remaining 8 per cent. going to form a sinking fund for the redemption of the debt. Such a plea in extenuation richly merits the ridicule which has been heaped upon it, and that is all that can be said. We suspect that most Spanish creditors have been forming a sinking fund of their own—they would be very great fools if they had not done so—but that such a course should have been expedient for individual protection is no reason why the Spanish Government should commit the acts which make it expedient.

We should be glad to see, though we have very little hope, that the efforts which are now being made will keep the Spanish Government from the injustice which it contemplates. The proposal is very tempting to inexperienced popular Legislatures, and it is only too reasonable to anticipate that the temptation to which Austria yielded will prove too much for Spain. But even if nothing worse happens, the "scare" which has occurred should be taken to heart by quiet investors who are tempted by foreign loans. We do our best again and again to warn them of their dangers—to point out how important and difficult of fulfilment in a foreign loan are the conditions of safety which a quiet investor must not dispense with. The dangers, as this Spanish incident has once more proved, are very real and very constant, and it is the most unintelligible infatuation which makes people blind to them.

BUSINESS NOTES.

The New Railway Amalgamation.—The agreement to amalgamate, which has been entered into this week by the boards of the Caledonian and North British Railway Companies, is another important step in the policy of concentrating the management of our railways. It is not so great a step as the amalgamation of the London and North-Western and Lancashire and Yorkshire Railways, the weaker of the latter two companies being larger than either of the two companies which are now amalgamating; but it is an important step nevertheless, and the result will be a united company about the size of the Great Western or North-Eastern, and with a district of equal importance. According to the last half-yearly reports and accounts, the capital expenditure of the amalgamating companies is:—

	£
North British	20,631,000
Caledonian	22,462,000
Total	43,093,000

This is less than the aggregate capital of the Great Western though a little larger than the North-Eastern, and it implies an immense network, being about a thirteenth part of the entire railway capital of the United Kingdom. The aggregate mileage again of the two companies, including foreign lines worked over, is—

	Miles.
North British	865¼
Caledonian	789¼
Total	1,654½

—which is a much larger amount in proportion to the capital than the Great Western or North-Eastern mileage. A glance at the map, however, will best show the magnitude of the present scheme. It will literally embrace the railway network of Scotland—the only lines not to be absorbed being mere outlying branches in comparison. From Carlisle on the one side, and Berwick on the other, there will be only one railway system stretching north to Perth and Aberdeen, and Scotland will in fact be dependent on one company for most of its local and all its through traffic. The only apparent exception to the absorption of all the important Scotch railways into one system is the Glasgow and South-Western line, which is a through line between Carlisle and Glasgow, but the Glasgow and South-Western is a comparatively weak competitor already, and is moreover to be invited into the compact, an invitation which will probably be accepted. The step proposed to be taken is thus a very important one in the progress of amalgamation, and must give a stimulus to farther schemes. Two more such schemes—one to amalgamate the southern and another the eastern counties lines of England—would, in fact, complete the process of dividing the railway system into half-a-dozen districts, managed by a few great boards, which would be conspicuous, and accessible to public opinion. We are glad to see such rapid progress being made with this new development of railways, and we hope no untimely opposition in Parliament will check it.

Bank of France Note Circulation.—We have again to notice a large addition to the circulation of the Bank of France notes. Last week the amount was over 88,000,000*l*, very nearly as high as when the Paris insurrection was suppressed and the Bank resumed business. This week, however, it has been increased by 3,720,000*l*, making the amount almost exactly 92,000,000*l*, which is indeed an enormous issue. The increase in the last few weeks has been nearly 20,000,000*l*, the chief cause apparently being the rapid diminution of the bank's deposits on both public and private account.

The Repayment of the German Debt.—The German Parliament, we observe, has sanctioned the law proposed to it, to authorise the repayment of the first war loan of 15,000,000*l*. According to the terms of the law, the Imperial Government is to give three months' notice of its intention to redeem. As there are already 15,000,000*l* under notice of repayment, half on the 1st of January and half on the 1st of February next, it will follow that, if notice as to the new 15,000,000*l* authorised to be repaid is given soon, the whole repayment next spring will amount to 30,000,000*l*. This would go a long way to compensate both the bills still to fall due, which have been given by France in part-payment of the indemnity, and the eight fortnightly instalments, amounting altogether to 26,500,000*l*, which it is to commence paying on the 1st of January next. The repayments however cannot be fully counted-on until actual notice is given by the German Government under the terms of the new law.

Stamps on Transfers.—The prosperity of the country has lately given a great impetus to investments in Stock Exchange securities, and on all sides we hear complaints renewed of the obstacles interposed by legislation, and especially by the Stamp Laws, to investments in the better class of home industrial securities. The objections are of two kinds. First of all, in English railways and other leading companies there is still no means for changing registered shares into "shares "to bearer," though the principle of such substitution is sanctioned by the Joint Stock Companies' Acts. The necessity of registration is undoubtedly felt as a great nuisance, especially by investors who are accustomed to deal in foreign securities, and whose operations there are not hampered by the delays incidental to registration. In the next place, the stamp duty charged on transfers, at the rate of a half per cent. on the purchase-money, is in reality a very serious matter, and is in fact a premium on foreign as compared with home investments. By dealing in securities which pass from hand to hand, and therefore require no transfer, the investor escapes the stamp duty, and as such securities are mainly foreign, he is tempted away from the English home market, and gives his mind to it less than he otherwise would do. The two grievances help each other—the trouble and delay of registration adding, as well as the stamp duty, to the real cost of transfer. It may be said that they come to very little, and no one is much hurt, but the suffering is much greater than is sometimes supposed. Trustees who have money to invest (say in first-class preference shares of railways) find that if they ever wish to realise the capital they put in, they have against them not only the dealer's turn and the broker's charges, which are unavoidable, but this stamp duty additional, which ensures that with good securities changing little in value they will not only receive a low rate of interest, which they are content to do, but will lose capital every time they make a change. The more active investors again who pay a great deal of attention to the improvement of their capital, resent charges which hamper frequent changes, reduce materially their margin, and make borrowing on their stock while undergoing registration inconvenient or impossible. We have often pressed the grievance on the attention of our Governments, but the circumstances are again such as to make it very important. The remedy is very simple. Reduce

the present high stamp duty in all cases, and enjoin on railway and other companies to permit the cancelling of registered stock and the substitution of shares to bearer, on an annual composition being paid out of the dividends accruing in proportion to the average annual transfers. By this means not only would English investors be relieved of a just grievance, but foreign capital would also be attracted to the better class of home investments to a degree which it would be difficult to over-estimate. The loss to the revenue need be little—nothing at any rate to compare with the gain to the country from the facilities for investments which the change would make.

THE INCREASE OF RAILWAY TRAFFIC.—At the risk of insisting too much on the one topic of the excellence of English railways as investments at the present moment, we have again to notice the remarkable increase of traffic which is taking place. As we pointed out a fortnight ago, there is usually a fall in the weekly returns about the middle of October, but though this is the case the increase in the last fortnight has been as large upon the smaller weekly aggregates as it was upon the higher totals of August and September. The weekly increase on the eighteen railways whose returns we summarise in the appendix amounted to 72,000*l* the week before last, and to 69,000*l* last week—and this is a very high weekly average indeed. It is a curious fact that *already* the increase for the current half-year, although we have yet nine weeks' traffics to get, and in the case of some companies thirteen weeks, is about as great as it was in the whole half-year ending 30th June. The figures are—

	£
Increase in half-year ending 30th June	1,018,597
— current half-year to date (17 weeks).....	985,764
	32,833

There is thus only 33,000*l*, or half-a-week's increase, to make the accrued improvement this half-year equal to the whole improvement in the previous half-year. A comparison of particular companies is very striking. In the following companies the accrued improvement is already greater than the whole improvement in the previous half-year :—

Company.	Accrued Improvement.	Improvement in Half-year ending 30 June.	Excess in Favour of Present Half-year.
	£	£	£
Great Eastern.....	34,928	23,814	11,114
London, Chatham, and Dover...	38,104	7,378	30,726
London and Brighton	40,955	35,010	5,945
Sheffield	34,329	21,258	13,081
Midland	124,846	121,871	2,975
South-Eastern	54,243	22,722	31,521
Glasgow and South-Western ...	13,383	5,311	8,072
North British.....	38,758	35,093	3,665

And in the following companies it will be seen the excess to make up is really very slight compared with the aggregate :—

Company.	Accrued Improvement.	Improvement in Half year ending 30 June.	Deficiency to be made up.
	£	£	£
Great Northern	28,252	39,014	10,762
Lancashire and Yorkshire	99,156	116,258	7,092
London and North-Western ...	152,836	180,830	27,994
London and South-Western ...	27,379	32,640	5,261
North Eastern	153,682	175,064	21,382
Caledonian	45,150	46,956	1,806
Great Western	67,205	110,587	43,382

When it is considered what additions to ordinary dividends were made by the improved traffics of the first half of the year, it will be evident from these figures that a much larger improvement of dividend for the current half-year may be reasonably anticipated. The present increase, as we pointed out recently, is of an unusually profitable kind, but its magnitude is also important, and should itself prepare us for results unprecedented in English railway history.

THE DANGER OF LONDON FROM FIRE.—We observe with some concern that the Metropolitan Board of Works have refused rather curtly the request of Mr Shaw, the Chief of the Fire Brigade, for leave to proceed to Chicago and investigate on the spot the causes of the recent disaster in that city—especially to inquire how its expensive and well-organised fire brigade was beaten in its contest with the conflagration. If the business of the London Fire Brigade is to be well managed, and a disaster like that of Chicago is to be avoided, it is plain that our own firemen should obtain the most minute acquaintance with the Chicago disaster. It is an object lesson to them of the rarest and most valuable kind. The Board of Works however will not hear of any advantage to be derived from inquiry, as if the art of coping with fires in great cities was incapable of improvement, or as if the inhabitants of the Metropolis had no interest in the matter. Of course if London—especially central London—is much less inflammable than Chicago was, or if our Fire Brigade and water supplies are infinitely superior, the question is less pressing, and the Board of Works are right; but we confess we should like to see the evidence on which they base their assumption that we have no concern in the investigation Mr Shaw proposes. It is rather an alarming circumstance that the man who ought to know best is most apprehensive about the inflammability of the city he protects, and he is also the authority for the statement that for its size Chicago was probably defended by a much more powerful organisation against fire than London is. Without sharing the terrors expressed in some quarters as to the extreme inflammability of the business parts of London, we may at least admit that there is no sufficient evidence of our security.

THE EUROPEAN ASSURANCE COMPANY.—The fact that an arrangement has at length been made by an American Insurance Company to take over the business of the European, when several English companies refused to do so, appears to show an advantage which life insurance companies established in a new country possess over companies in older countries. Assuming that the New York Company takes over a greater risk than an English company would have been justified in taking, it does not follow that its conduct is rash. It really may be able to do business at a cheaper rate, and the explanation is very simple. Our insurance tables are usually calculated on a low rate of interest being received for investments—4 per cent., or perhaps less; but though a low rate must be calculated on in an old country, an insurance company in a new country may invest with equal safety at a much better rate. In a country where the average rate for loans and first-class investments is 7, and not 4 per cent., an insurance company may easily work for smaller premiums than is possible in an old country. Or it may concede points to policy-holders which are equivalent to smaller premiums. We see no reason why American companies should not establish themselves successfully in England, or what would come to the same thing, why our English companies should not invest largely in colonial and American investments, which with care and prudence they may safely enough do.

THE METROPOLITAN POOR-RATE LEAGUE.—We observe that at a Conference of the representatives of Metropolitan Vestries and Boards of Guardians held this week, it has been agreed to form a League, having in view the following objects:—"To remove from "local rates any existing national charges and transfer "them to Imperial taxation; to prevent the future imposition "of national charges upon local rates; to encourage and support all legislative enactments which tend to promote local "self-government; to discourage and oppose any attempt at "centralisation or Government interference with local powers; "to bring into assessment to local rates a large amount of "property which does not now contribute to them; and generally, to enunciate and uphold the principle of local control "over local affairs." The formation of Leagues with purposes like these seems likely to prove a serious matter, though the results which may be ultimately arrived at will perhaps surprise and disappoint the projectors. The programme raises the most fundamental question as to the possibility of local government. To take only the first "plank" of the platform—What is meant by keeping local rates free of national charges? The phrase "national charges" is constantly used as if it were quite clear; but all local charges, except perhaps drainage and sewerage, are in fact "national." The support of the poor, which few are bold enough to propose throwing on the Imperial Treasury, is nevertheless a national charge, the whole nation commanding it as a means of dealing with a common difficulty. If we once begin inquiring what charges are logically national, we shall soon leave very little for local taxes to bear. Another plank of the platform is "to bring "into assessment to local rates a large amount of property which does not now contribute to them," a proposal which can have no other issue, we think, than to cause a general inquiry into the entire sources of the national revenue. If local taxes, as we believe, are limited to a certain

kind of local property for the reason, among others, that that property escapes a special Imperial tax which could fairly and with justice to individuals be placed upon it, it will clearly be impossible to adjust local rates without reference to the Imperial system, and without reference, we may add, to the general theory of taxation. Anti-Rate Leagues generally, when they talk about the injustice of some "property" escaping local rates while other property is taxed, ignore altogether the teaching of political economy as to the incidence of property taxes, and their confusion of mind is shown by their speaking sometimes in the name of occupiers and sometimes in the name of owners, who cannot both bear the burden of the identical taxes. In trying to get the confusion cleared up, they may perhaps find the logical and practical conclusion to be that there is room for laying even a heavier tax than that which is now imposed on visible local property.

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts into and Payments out of the Exchequer between April 1, 1871, and Oct. 28, 1871 :—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1871-72.	Total Exchequer Receipts To Oct. 28, 1871.		Same time last year.	
	£	£	£	£	£
Balance on 1st April, 1871—					
Bank of England	...	5,678,915		7,633,761	
Bank of Ireland	...	1,344,520		972,887	
			7,023,435		8,606,648
REVENUE.					
Customs	20,100,000	11,316,000		11,408,000	
Excise	22,420,000	11,699,000		11,878,000	
Stamps	8,750,000	5,476,000		5,071,000	
Taxes	2,330,000	400,000		797,000	
Income Tax	8,820,000	1,672,000		1,488,000	
Post Office	4,670,000	2,292,000		2,330,000	
Telegraph Service	750,000	475,000		290,000	
Crown Lands	375,000	149,000		200,000	
Miscellaneous	4,100,000	2,752,806		1,720,623	
Revenue	72,315,000		36,231,806		35,182,623

Advances under various Acts		894,478		679,161	
Expenses of fortifications		...		...	
Exchequer Bonds and Bills, &c., paid off		143,300		25,500	
Surplus income, to reduce Debt		739,179		2,256,121	
			1,776,957		2,960,78
Balances on Oct. 28th, 1871—					
Bank of England		861,081		889,419	
Bank of Ireland		262,057		415,243	
			1,123,138		1,304,662
Totals			45,881,334		45,073,771

The following are the Receipts on account of Revenue during the week ending Oct. 28 :—

	Receipts of Week Ending Oct. 28.
	£
Customs	462,000
Excise	611,000
Stamps	156,000
Taxes	nil.
Income tax	31,000
Post Office	50,000
Telegraphs	50,000
Crown lands	nil.
Miscellaneous	27,915
Total	1,387,915

The total receipts of the previous week were 2,282,356*l*.

The Exchequer issues of the week on account of expenditure were 939,569*l*, viz. :—

	£
Interest of debt	300,000
Other charges on Consolidated fund	5,775
Supply services	633,794
Telegraph services	nil.
	939,569

During the week the cash balances have increased as follows :—

	Bank of England. £	Bank of Ireland. £	Total. £
Balances on Oct. 21	631,763	212,655	844,418
— Oct. 28	861,081	262,057	1,123,138
Increase	229,318	49,402	278,720

SAVINGS' BANKS RETURN.

THE following Return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending Saturday, Sept. 30, 1871 :—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
	£ s d	£ s d
SAVINGS' BANKS :—		
In money and interest credited	79,616 15 4	85,123 11 5
To transfer certificates from Post Office Savings' Banks to Savings' Banks	213 9 2	...
By transfer certificates from Savings' Banks to Post Office Savings' Banks	...	50,692 8 6
Total	79,830 4 6	135,815 19 11
POST OFFICE SAVINGS' BANKS :—		
In money and interest credited	250,000 0 0	14,865 2 10
To transfer certificates from Savings' Banks to Post Office Savings' Banks	50,692 8 6	...
By transfer certificates from Post Office Savings' Banks to Savings' Banks	...	213 9 2
Total	300,692 8 6	15,078 13 0

	£ s d
Total amount on Sept. 30, 1871, at the credit of—	
The fund for the Banks for Savings	38,131,466 15 6
The Post Office Savings' Bank fund	16,524,943 19 0
Total	54,656,410 14 6
Ditto—by last monthly account	54,426,782 14 5

LIGHT GOLD.

TO THE EDITOR OF THE ECONOMIST.

SIR,—The light gold question is again forcing itself on public attention, and will continue to do so with increasing urgency. The problem of how to deal with it must, sooner or later, be met in a practical spirit; and I beg your permission to offer my contribution towards its solution.

The wear to which sovereigns are subjected from abrasion in the course of circulation consists of *legal* wear and of *illegal* wear. The loss by legal wear is a fixed quantity, being the loss of weight which during their currency gold coins sustain without forfeiting their attribute of legal tender. Any further loss of weight is illegal wear.

	grains
A sovereign is issued of the weight of	123·274
It is current and legal tender down to	122·5
It loses by wear during its legal currency	·774

To-day a sovereign may weigh grs. 122·5, and must be accepted as of the value of one pound. To-morrow it may weigh only grs. 122·499, when the law says it must be defaced, and it will only realise 19 shillings 10½ pence. The loss by wear which the law sanctions thus amounts—

		£	s	d
On	1 sovereign to about	0	0	1½
On	100 — —	0	12	7
On	1,000,000 — —	6,282	11	0

It is estimated that it takes on an average 18 years to wear

a sovereign down from the weight at which it is issued to the lowest weight at which it is a legal tender; and during these 18 years, the public have had the use of the coins, and have individually, on every occasion of their passing from hand to hand, contributed to the reduction of their weight and value. The law throws the whole of this loss, and of any subsequent loss, on the last holder of the coin.

Practically the bankers are the last holders of all the light coin, and on the banking community the loss may be said wholly to fall. I do not propose to exonerate bankers from the charge of notoriously disregarding the law, and advisedly pushing light gold into circulation in preference to heavy gold. I do not believe that they could as a body offer a serious defence to a charge of misdemeanour on this head. But, without going at length into the question, I am prepared to admit much in vindication, if not in justification, of their action. I would go so far as to say that, if such a body as the bankers of Great Britain systematically break a law, there must be something oppressive and unjust in the law. An example may give us a measure of the hardship inflicted on them. One bank is said to lose between 6,000*l* and 7,000*l* a-year by light gold, in spite of all its efforts to recirculate light sovereigns. On a capital of say 1,000,000*l* this would represent about ⅓rds per cent. less dividend to the shareholders, and a much heavier deduction if this bank were to carry out the law.

If the hardship and injustice of the law be admitted, its impolicy needs no demonstration beyond the present degraded condition of our gold coinage.

The general conclusions I come to are these:—1st. That the law having decreed that a sovereign shall be accepted as of the value of "a pound" until it is worn down to the value of 19s 10½d, the loss of 1½d per sovereign should be borne by the National Exchequer, as representing the public who have in fact created the loss; and 2nd. That any further loss should be borne by the last holder who has taken the coin in payment in his own wrong.

To give practical effect to this proposition, the Mint should be instructed to receive light gold coin by tale, and to give credit to the importer—1st, for the exact weight of the coin, and 2nd, for the fixed weight, representing the *legal* wear of so many coins delivered. For example, if 1,000 light sovereigns sent to the Mint are found to weigh (say) 245·250 ozs (which is an approximation to the average weight of the light sovereigns now circulating), they must have lost by *legal* wear between the issue weight and the lowest current weight, 1·613 ozs; therefore the Mint should give credit for 255·863 ozs, to be returned in coin at 3*l* 17s 10½d per ounce.

The particulars of the transactions are as follows:—

	ozs.	s	d	£	s	d
1. Weight of 1,000 light sovereigns	254·250	@ 77	10½ =	989	19	11
2. Legal wear, or Mint loss	1·613	—		6	5	8
	255·863	—		996	5	7
3. Illegal wear, or last holder's loss	·958	—		3	14	5
Issue weight	256·821	—		1,000	0	0

On these terms the last holders of light coin would have to bear a loss of about 7s 6d per cent. for illegal wear, whereas their present loss is at least 1 per cent. If the mass of light coin now circulating were once withdrawn, their loss in the future should be merely nominal.

The establishment of such equitable terms as those I have proposed would, I venture to think, effectually prevent the periodical recurrence of a condition of the coinage such as we are suffering from now, and such as we suffered from in 1842.

But to turn to another branch of the subject. Can the Chancellor of the Exchequer afford to be just? or can increased ways and means be found to meet the increased estimates he would have to present? Assuming an annual coinage of 5,000,000*l*, and the withdrawal of a like amount of light coin, the legal wear to be repaid to the last holder would amount to about 32,000*l* a year. A high authority, in writing to the *Times* the other day, has, I find, anticipated the proposal I would make to the meet this charge. It is that half-sovereigns, which ought only to be coined for home use, should be coined as tokens of the same relative value in metal as our silver coins. The proposed coin would no longer be the *half* of a *sovereign*, it would be a gold *ten-shilling* piece, and should be legal tender only to a limited amount. Assuming that 10,000,000*l* of half-sovereigns were recoined into ten-shilling pieces, with a seigniorage of 10 per cent., the profit would be 1,000,000*l*, less the small cost of coinage. This sum invested, or applied to cancel stock at 90 to 92, would represent an annual gain or saving of 32,000*l* or 33,000*l* a year. Here would be more than enough to pay for the legal wear both of sovereigns and half-sovereigns.

Permit me to add one further suggestion, with the view of defeating the sweaters, and of more effectually enlisting the co-operation of the bankers in maintaining the legal condition of the coinage. There must always be an accidental circulation of sovereigns below the weight of 122½ grains. I would propose that any coin which should weigh less than 122 grains, which would allow for about twelve years' additional wear, should forfeit the right to reclaim for legal wear; and the circulation of such coins should be subject to a substantial penalty. Experience shows that sweaters take a very much larger margin of profit than the legal wear would afford; and the Mint, with the date of the coins as collateral evidence, should be empowered to reject any coin that appeared to have been tampered with, either by chemical or mechanical means. This precaution would further meet the objection that those foreign countries which use our coin would return the light coin on our hands, and take a fresh supply of heavy coin at our expense. These countries absorb largely and return sparingly; and any systematic return of light coin would be checked in this way, if not by the consideration that the cost of transmission and retransmission would probably far exceed the cost of recoinage.—I am, Sir, your obedient servant,

G. F.

London, 26th October, 1871.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Nov. 2.

The returns of the Bank of France for this week, last week, and for the week ending 8th September, 1870, are as follow:—

	Nov. 2, 1871.	Oct. 26, 1871.	Sept. 8, 1870.

A comparison of this week with last, in the principal items, shows :—

	Increase. francs.	Decrease. francs.
Debtor.		
Notes in circulation	93,800,000	...
Treasury balance	...	45,000,000
Deposits	...	39,875,000
Creditor.		
Coin and bullion	...	2,600,000
Bills discounted	8,250,000	...
Prolonged bills	...	19,400,000

The monetary crisis has undergone little variation during the last week, the scarcity of change continuing, notwithstanding the efforts of the Government to palliate the evil by a large issue of small coin. What is wanting is however confidence, which the State cannot give, and with the prospect of payments in specie to Prussia to the amount of 650 millions between January and May next, there is little probability of the premium on gold and silver diminishing. Everyone besides, as a matter of prudence, endeavours to keep a small reserve of coin, and thus becomes an accomplice in withdrawing it from circulation. The Bank of France having formally decided on not issuing notes for a smaller amount than 20f, the Minister of Finance has under consideration a plan that was adopted with some success at Bordeaux during the late war. This is to authorise a number of bankers and financial companies to issue paper money tokens for five and ten francs each, on depositing as a security a like sum in Bank of France notes. The system has just been adopted by the Chamber of Commerce at Lille and one or two other towns. This measure no doubt bears an unfortunate resemblance to the issue of assignats under the first Republic, but the expedient is preferable to that proposed by several journals, which is that the greater part of the specie and bullion reserve of 627 millions in the Bank should be coined and put into circulation, as the credit of the Bank would be quite destroyed by such a measure. Although the issue of these tokens is a dangerous precedent, some such measure is inevitable, in consequence of the drain of specie into Germany. It will perhaps present less inconveniences than any other, as for the sum thus put into circulation, the same amount of notes, by being deposited, will in reality be withdrawn; the paper currency will consequently be in no way increased by it. The *Constitutionnel* states that the Comptoir d'Escompte will be charged with the issue of the five and ten-franc *coupures*, but the announcement is not official.

The premium on gold is to-day from 20f to 24f per thousand; English banknotes and sovereigns, 25f 95c to 26f per pound sterling. The exchange on London, 26f 5c.

One result of the high rate of exchange on foreign bills is that coupons of the loans of European countries are now eagerly sought after. The money changers advertise, not only that they pay them before actually due, without commission, but that they take them at a small premium above their nominal value.

The Bank of France, with the view of proving to the public that it is doing its best to remedy the evil, has published a note stating that it is purchasing ingots of silver on the market, and converting them as rapidly as possible into coin. The amount of papal money it has put into circulation is 1,900,000f, which it declares will be withdrawn, as soon as circumstances will permit, at its nominal value. This assurance was necessary, as the public had at first hesitated to accept it; for at a moment when this money was current in France, the Bank about two years back suddenly refused to accept it as a legal tender, and holders were forced to sell it to the changers at a loss.

The following return of the indirect revenue during the first nine months of 1871 has been issued by the Minister of Finance :—

	Total Estimates for the Year 1871. francs	Receipts Effected in First Nine Months. francs.
Registration and succession dues	311,326,861	205,217,000
Stamps	65,008,926	45,906,000
Customs on importation—Corn & other merchandise	100,285,000	85,323,000
Colonial sugar	33,331,000	22,736,900
Foreign sugar	15,220,000	23,638,000
Export duties	126,000	272,000
Navigation dues	234,000	141,000
Divers Customs charges	1,215,000	869,000
Salt—Customs	16,967,000	16,810,000
Excise	6,738,000	3,733,090
Potable liquors	217,947,000	161,447,000
Native sugar	63,170,000	55,042,000
Divers receipts	63,719,000	28,755,000
Tobacco manufacture	205,565,000	156,701,000
Gunpowder	11,036,000	6,784,000
Post Office—Letters, &c.	82,342,000	57,749,000
Money orders	1,861,000	1,140,000
Transit of foreign mails	4,508,000	147,000
Divers	41,000	6,000
Total	1,200,573,787	872,416,000

According to the above table, a sum of 328 millions will be required in the last quarter of the year, to make up the estimated income from these sources. The month of August produced 124 millions, and September 121½ millions, but October, November, and December cannot be expected to be so productive, as those two months profited by the payments of duties, &c., made in anticipation of the increased tariffs, many of which did not come into operation until the 15th October.

The railway companies have now posted notices in all their stations, to the effect that notes will not be received at their nominal value, when the change to be returned exceeds five francs.

The subject of the silver coinage was brought forward in one of the last sittings of the Council General of the Seine, when the Prefect explained that by the international convention France had the right of issuing silver money to the amount of six francs per inhabitant, and that a margin of about thirty millions remained before the maximum would be reached. The motive for limiting the issue of each of the contracting powers is that the standard of the coin is only $\frac{835}{1000}$, and consequently a profit is derived from the coinage, the coin of each country being current in all of the others that have adhered to the convention.

The communications in Paris and with the suburbs have long been quite insufficient, partly in consequence of the monopoly of the Omnibus Company, which in order to reduce its working expenses and increase the daily earnings of each vehicle, has always kept the number below the requirements of the public, and partly from the circuitous route followed by the railways which serve the environs. The Prefect of the Seine appears to have been much struck on his late visit to London with the convenience of the tramways and underground railways, and one of his first acts on his return was to ask for the appointment of a committee of the Council General of the Seine to consider the advisability of introducing the system into Paris. He recommends the construction of two underground lines through the centre of the city, one passing direct north to south from the Eastern terminus, under the Seine by a tunnel, to the station of the girdle railway round the city, beyond the Luxembourg. The other to run from the Lyons or Vincennes terminus on the east side, to some point of the same circular railway near the Bois de Boulogne on the west. The committee was appointed, but has not yet sent in its report.

The continued complaints of commercial interests respecting the delay in the conveyance of merchandise sent by railway have moved the Minister of Public Works to revise the regulations fixing a limit of time for the delivery of goods, which had been suspended since the war. A decree has been issued re-establishing from the 15th November the former dispositions for goods sent by passenger trains, for animals and for merchandise of the 1st and 2nd categories, by goods trains. The regulation will not apply to articles of the 3rd and following classes until the 1st January next, but senders may enjoy the privilege by paying the tariffs of the 2nd class. The companies, on the other hand, are authorised to charge rent for goods not removed within 48 hours, or to have them carted, at the cost of the owner, to some public warehouse, or to the premises of the parties to whom they are addressed.

The upward movement on the Bourse has continued during the week, and nearly all securities show a marked advance. The French loan and Italian Fives have each gained nearly two per cent. The following are the latest quotations :—

	October 26. f	c	November 2. f	c

The board of directors of the Credit Mobilier Company has issued a long address to its shareholders, giving the text of the resolutions to be submitted to the meeting of the 11th November, exhibiting the present situation of the company, and explaining the motives for its proposed reconstitution. This communication, of which the following is a summary,

estimates the present value of the original capital of 120 millions of francs at 48 millions. As, however, the greater part of this reduced amount is locked up, and will not be realisable for a long time to come, the company, under its present constitution, would be condemned to limit its action to insignificant operations, from which little profit is to be derived. The company has, however, a complete organisation, and very extended relations, and the board has considered that, with a sufficient disposable capital, those advantages might be turned to account in the interest of the shareholders. The question to be put to the meeting will therefore be this—Shall the company continue to restrict its operations to current affairs, to the recovery of the assets, and the payment of the liabilities? or shall it rather adopt measures which will enable it to utilise the living forces of the company by a return to the general movement of affairs? In the first case, the shareholders must for a long time abandon all idea of a distribution of any dividend, which is forbidden by the statutes so long as the capital is incomplete, and many years must elapse before the present value of 48 millions could be increased to 120; in the second, the first thing to be done is to obtain a fresh working capital sufficiently large to produce profits in proportion to the amount of the old and new capital combined. The statutes do not authorise the reduction of the original capital, consequently the only means of attaining the proposed end is by winding up the former company, and bringing its net assets into the new association. The board therefore proposes to put into execution Art. 58 of the statutes, which empowers it, in case of the loss of one-half of the capital, to pronounce the dissolution of the company. The new company is to be called the Société de Crédit Mobilier, the word *Générale* in the former title being omitted. It will possess a capital of 80 millions, divided into 160,000 shares of 500f each. Of the total of 160,000 shares 96,000 will be attributed to the holders of the 240,000 of the former company, who will receive two of the new for five of the old. Of the new capital of 32 millions one-fourth will be paid-up immediately, and the remainder in three, six, and nine months. Of the remaining 64,000 shares, 48,000 will be reserved for the old shareholders, who, in addition to the two new shares they are to receive for the old, will have a right of subscribing for a third. The remaining 16,000 are promised to a group of bankers and capitalists, who also engage to take those of the 48,000 for which the original holders shall not exercise their right of priority. The subscription for these latter will be open from the 12th to the 21st instant inclusively.

The Italian Credit Bank Company has held its meeting in Paris. The report read showed that the company has obtained a settlement of its claim for 5,906,000f due by the Roman railways, for which it has received delegation drafts on the Italian Government, payable at intervals of six months down to the 31st December, 1873, and has already recovered a sum of 1,174,000f. The net profits for 1870 amounted to 480,000f, which has permitted the distribution of a dividend of 4 per cent., and the carrying over of 57,000f to next year. A shareholder having demanded the winding-up of the company, the president replied that such a proposal could only be taken into consideration if half of the capital was sunk, whereas the capital of the company was intact. Those shareholders who wished to withdraw would however soon have an opportunity, as the board had in preparation a combination by which they would be able to dispose of their shares at par.

The Charentis Railway Company has also held its meeting. The report showed that the receipts in 1870 were 184,692f more than in 1869. The company has applied to the Government for powers to construct three new branches—Niort to La Suze, Limoges to Gannat, and Blaye to Bordeaux. Those projects are opposed by the Orleans Company, the network of which extends into the same district.

The creditors of the bankrupt Lyons to Sathonay Railway Company have met at the Paris Tribunal of Commerce, and ratified the sale of the line to MM. Erlanger and Co. for three millions, which sum will cover about 90 per cent. of the claims admitted. The shareholders will receive nothing, as the total assets are insufficient to pay integrally the bondholders and the ordinary creditors.

The Banque de Credit et Depot des Pays-Bas announces the payment from the 2nd inst., at Paris or Amsterdam, of an instalment of 9fl 17c or 20f per share, on account of the dividend for 1871.

The Guillaume-Luxembourg Railway Company pay the coupons of interest on its three and five per cent. bonds from the same date, at the offices of the Eastern Company in Paris.

The De Gouhenans Company of Salt Works, Coal Mines, and Chemicals, also announce a provisional dividend of 10f per share on the current year.

The Linen Company of Cohm and Co. has fixed its dividend for 1870-1871 at 26f 30c per share.

The Montataire Iron Work also pay 25f per share, being the remainder of the dividend for 1869-1870; and the Besseges Coal Company 15f per share on account of the year 1871.

The following are the latest quotations of the produce markets at *Havre* per 50 kilogs, duty paid:—

COTTON.—New Orleans, 112f to 125f; Georgia, 121f; Peru, 120f; Bengal, 82f; Oomra, 90f; Texas, 117f.

COFFEE.—Hayti, 145f to 146f; Rio, 144f, in bond 82f 50c; Santos, 150f; Malabar, 150f; Ceylon plantation, 155f; Manila, 148f.

SUGAR.—French West India usine, 63f.

WOOL.—Buenos Ayres, 197f 50c; Spanish, 240f.

COCOA.—Guayaquil, 92f 50c, in bond; Bahia, 53f 50c.

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house:—

	Week ending Nov. 1, 1871.	Week ending Oct. 25, 1871.	Week ending Nov. 2, 1870.
	£	£	£
Thursday	10,837,000	11,718,000	10,758,000
Friday	36,205,000	15,961,000	23,005,000
Saturday	18,053,000	14,261,000	15,162,000
Monday	14,708,000	13,357,000	10,911,000
Tuesday	16,380,000	13,912,000	10,422,000
Wednesday	14,424,000	11,586,000	11,039,000
Total	110,607,000	80,795,000	81,297,000

JOHN C. POCOCK, Deputy Inspector.

Bankers' Clearing-house, November 2nd, 1871.

The total since the 4th of January, 1871, is 3,892,999,000*l*, compared with 3,244,436,000*l* for the corresponding period last year, showing an increase of 648,563,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during

a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding dates with the present week.	Nov. 6, 1861.	Nov. 4, 1868.	Nov. 3, 1869.	Nov. 2, 1870.	Nov. 1, 1871.
Circulation, including bank post bills.....	£ 21,575,597	£ 25,156,529	£ 24,680,949	£ 25,283,434	£ 26,013,893

In 1861, the Bank reduced its rate from 3½ to 3 per cent. in consequence of the continued restriction of business and resulting in abundance of money. A proposal had been made to impose a differential tax for some time on American cotton, so as to guarantee importers from other quarters against the effects of a stoppage of the blockade. It was becoming less and less likely that a peaceful solution of the American dispute would be arrived at.

In 1868, there had been some expectation of a rise in the Bank rate, but it did not take place, though there was now rather more activity in the open market than had lately been the case. General Grant had just been elected President of the United States.

In 1869, there was a good deal of activity in the money market, owing both to an increased demand for commercial discounts and the extent of investment which had lately been in progress; and the Bank rate was raised from 2½ to 3 per cent. The cotton trade in Lancashire was greatly distressed, owing to the high price of cotton, and the difficulty of obtaining a corresponding price for the manufactured article.

In 1870, there was rather an improved demand for money, partly caused by an expectation of the success of the proposed armistice, which would produce a withdrawal of foreign money deposited in London pending the war.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 2,945,623*l*; in 1868, an excess of 2,892,744*l*; in 1869, an excess of 1,907,106*l*; and in 1870, an excess of 2,025,336*l*. In 1871, there is an excess of 4,242,790*l*.

Discount and Money Market.—Business continues in the very anomalous position which we described last week. At the weekly meeting on Thursday, the Bank directors once more declined to lower their rate; but money is even more abundant than before in the open market, and the private banks and discount houses have continued and extended their departure from traditional custom in respect to allowances for money. As we noticed last week, the discount houses had lowered their rates for *new* money from 4 per cent. at call, and 4¼ at notice, to 3 and 3½ per cent. respectively, though they still continued to allow 4 per cent. for old money, but this week they have made the reduction uniform, the terms being now 3 and 3½. The rates for money are of course correspondingly low, the minimum rate for 3 months' Bank bills being quoted at 3⅛, while the best short paper is 3⅛, large special transactions, we hear, being entered into at fractionally lower rates. The rate for six months' Bank bills is 4 per cent., or 1 per cent. under Bank rate. The demand is only moderate, both at the Bank and in the open market. On the Stock Exchange the abundance of money is almost without precedent, the difficulty of lenders being to find borrowers at any price.

In this state of the market the action of the Bank of England in still keeping up its rate is naturally criticised with some sharpness. Its position has certainly been strengthened very much during the week. The bullion has increased 857,000*l*, and the securities have run off—to the extent of 200,000*l* in Government and 413,000*l* in private securities. On the other hand, its deposits are almost unchanged, public deposits having increased 505,000*l*, and private deposits 664,000*l*; the only increase of its liabilities being in the circulation, which is 416,000*l* more. The banking reserve has increased 483,000*l*, and is now 12,000,000*l*. The Bank's position is thus very much stronger than it was when the rate was put up to 5 per cent. It is observable, however, that the account is not quite so favourable as might have been expected from the known influx of gold during the week and the abstraction of business which might be supposed inevitable when there is so great a difference as there is now between the open market rate and the Bank's. A large amount of gold has also been withdrawn for Germany during the last ten days, though the demand has not come on the Bank. Looking at the payments which are known to be due this month and next, the expediency of erring on the side of excessive caution, if there is to be any error at all, should be acknowledged. In the meantime, there is no sign of any farther immediate strain upon the Bank. The demand for gold for export has ceased for the moment, the arrivals of gold being all taken to the Bank; and the continental exchanges, after going down up to Tuesday, have again risen. As gold is still coming from France, and there is a large shipment of gold from Australia to come in on Monday, there is apparently every likelihood that the Bank for a few days will be much stronger even than it closed on Wednesday. Since writing the above however, we have a telegram from Paris, which we understand to mean that the rate of discount there has been raised to 6 per cent.; and the effect of this measure on the exchanges and the influx of money from France remains to be seen.

The changes in the Bank of France account again show traces of the present drain of money from that country. The note circulation has increased 3,720,000*l* during the week, making with the increase which we noticed last week an addition of 17,000,000*l* to the paper currency in about four weeks. Both Government and private deposits have also diminished—the former 1,800,000*l* and the latter 1,600,000*l*. The note circulation is now 92,000,000*l*, or 30,000,000*l* in excess of the usual amount before the war.

We subjoin our usual quotations for mercantile paper, having various periods to run. The market is now more settled than it was, though there are still many special transactions :—

Bank bills—Short	3½	per cent.
Do 3 months	3⅝	per cent.
Do 4 —	3¾ 4	per cent.
Do 6 —	4	per cent.
Trade bills—3 months	3¾ 4	per cent.
Do 4 months	4¼ ½	per cent.
Do 6 —	4½ ¾	per cent.

The allowances for money by the private banks and discount houses are as follow:—

Money at call	3	per cent.
Do at 7 and 14 days' notice.....	3¼	per cent.

The above may be considered the market rate. Though the joint stock banks have failed as a body to come to a formal arrangement about their terms, the matter is still under discussion, and as regards new money at least the custom of allowing one per cent. under Bank rate is not invariably adhered to.

With reference to our remarks last week on the action of the joint stock banks, we have received the following communication from the Union Bank :—

TO THE EDITOR OF THE ECONOMIST.

Union Bank of London, Princes street,
London, E.C., Nov. 1, 1871.

Sir,—The attention of the directors of this bank has been drawn to the "Discount and Money Market" article in your issue of the 28th ult., wherein a meeting of representatives of joint stock banks is mentioned as having been held to consider the expediency of lowering the rates, and at which meeting the "Union Bank" would not admit the expediency of doing so.

My directors desire me to write you that if this bank is referred to it must have been under some misapprehension, as they were not aware of the meeting, and could not therefore have objected to a change in the rate.—I am, Sir, your obedient servant, John Seath, Secretary.

We fear the directors of the Union Bank have interpreted too literally what we mentioned about representatives of the joint stock banks "having met-" It would perhaps have been more exact to say that the representatives of the banks had been conferring on the subject of a reduction of their allowances for money, and that the issue was a failure to come to an understanding, in consequence of the opposition of the banks we named, including the Union Bank. That there was no formal meeting does not alter the substantial fact which we communicated to our readers. The banks would certainly gain if they were more ready to confer

where they have interests in common than some of them appear to be.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	6	6	...	5
Vienna	6	7	5	6⅜
Berlin	5	4	4	3½
Frankfort	4	4	3½	3⅞
Amsterdam	4	3	3¾ 4	2⅝
Brussels	3½	5	3¼ ½	4⅛
Hamburg	...	...	3½	3½
St Petersburg	7	6	6	6

THE STOCK MARKETS.—The course of business this week has been very much the same as last, there being a strong tendency upwards in every description of security, only slightly checked by recurring apprehensions of dearer money. These apprehensions, however, have gradually become fainter as gold keeps going into the Bank, and the abundance of money in the open market steadily increases; and the effect on Thursday of the Bank maintaining its 5 per cent. rate was hardly felt. The rise has been especially strong in foreign securities—excepting Spanish—and in English railways, which keep on improving with the improvement in the traffic returns, notwithstanding any adverse influences connected with the state of the money market. A special impetus has also been given to the dealings in this department by reports, and subsequently the definitive announcement, of an amalgamation being agreed upon between the Caledonian and North British railways. To-day almost all the markets have been very strong in tone, especially the railway market. Last evening there had been some reaction owing to reports of large quantities of gold—rumour said 3,000,000*l*—being "insured" to go to Germany, but this falsity has been proved to-day by the continued influx of gold into the Bank, and the turn in the continental exchanges. The buying has consequently been very strong all round, the upward movement acquiring force as it continues. So far as we can learn, the buying for permanent investment is once more very considerable, and a large amount of stock is likely to be taken off the market at next account. With regard to the rumoured large shipment to Germany, the fact we understand to be that a particular shipment of 800,000*l*, part of the recent withdrawals, is referred to, but the money has been obtained in the open market, and nothing will come out of the Bank. In the open market, as we have already stated, there is now no farther demand for bullion.

In the miscellaneous market Bank shares have been rather flat, in consequence of reports as to the losses which are being sustained by the continued cheapness of money in the open market, and the high rate which the banks pay for their deposits through adhering to the traditional custom of allowing 1 per cent. less than Bank rate. There has been a drop in Asphalte companies' shares, caused by the introduction of new companies.

ENGLISH GOVERNMENT SECURITIES.—In this department the full effect of the cheapness of money was felt early in the week, and notwithstanding the near approach of the account, there was an advance in Consols on the closing price of last Friday. To-day the firm tone of the market has been fully maintained, and Consols close steady, at 92⅞ 93 for money and 93⅛ for the December account. The improvement is fully ⅛ compared with last week.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money.		Account.		Exchequer Bills.
	Lowest.	Highest.	Lowest.	Highest.	March and June.
Saturday	92¼	92¼	92⅛	92⅛ (Nov.)	3s to 8s pm
Monday	92¼	92⅛	92⅛	93	3s to 8s pm
Tuesday	92¼	93	93	93⅛ (Dec.)	3s to 8s pm
Wednesday			Holiday.		
Thursday	92¼	93	93	93⅛	3s to 8s pm
Friday	92¼	93⅛	93	93⅛	5s to 10s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Consols for money	92⅛ ¼	92⅛ 3	+ ¼
Ditto December	...	93 ⅛	... ...
Reduced 3 %	91 ⅛	91⅛ ¼	+ ⅛
New 3 %	91 ⅛	91⅛ ¼	+ ⅛
Bank Stock, last dividend 4½ %	240 42	238 40	− 2
India Stock, 10½ %, red. at 200 Apl. 30, 1874	206 8	206 8	... ...
Do 5 %, red. at par, Jul. 5, 1880	112½ ⅛	112½ ⅛	... ...

Notice has been given by the Bank of England that on Saturday, the 2nd of December, Consols, 1854, New 5*l* per Cents., New 3*l* 10s per Cents., New 2*l* 10s per Cents., Annuities for Terms of Years, India 5*l* per Cents., and Metropolitan 3*l* 10s per Cent. Consols will be transferable without the dividend due on the 5th of January; also that the transfer books of East India Stock will shut on the 8th of December, and open on Saturday, the 6th of January.

EXCHEQUER BILLS 5s to 10s prem.

COLONIAL GOVERNMENT SECURITIES.—The following are the changes for the week in this department :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Canada 6 %	108 9	108½ 9½	... ...
Ditto 5 %	101¼ 2½	102 3	+ ¼

FOREIGN GOVERNMENT SECURITIES.—As we have stated, there has been a very considerable advance this week in almost every description of foreign security except Spanish. Up to Thursday evening there had been a rise of nearly 3 per cent. in the scrip of the new French loan; of 1 per cent. in Turkish 5 per Cent. of 1865; of 1 in Egyptian of 1868; and in other French, Turkish, and Egyptian stocks, as well as other foreign stocks, in proportion. As we noticed last week, this upward movement appears to be led by a great speculation for the rise which has been in progress on the continental bourses, where a plethora of money like what is now found in Lombard street produces a corresponding effect. Spanish have not quite remained at the point to which they fell, viz., 32½ ⅜, improving a half per cent. on Wednesday and Thursday, under the generally favourable tone of the market, and owing to a persistent belief on the part of holders that the pressure to be put upon it will be too strong for the Spanish Government to resist. To-day the good tone of the market was maintained, though not to the very close, a dull feeling setting in, in consequence of weaker prices from Paris. As will be seen from our usual list, the advance for the week is generally very important, especially in French, Turkish, Egyptian, and Italian. Spanish have likewise continued to improve to-day, the disposition being to interpret favourably the delay in submitting the proposal to tax the debt to the Cortes.

The following are the resolutions adopted at the meeting of Spanish bondholders on Tuesday :—

1. That the prospectus of the last Spanish loan, declaring the bonds to be "free from Spanish taxes," the imposition of an income tax would be a flagrant breach of faith, and would entitle the subscribers to refuse payment of the instalments not yet due, and to claim return of payments already made, with adequate compensation.

2. That the taxation of the external debt under existing circumstances would be destructive of the credit of Spain, and would compromise her honour, and would prove most injurious to the true interests of her people.

3. That this meeting, having considered the reply of his Excellency the Ambassador of Spain to the letter addressed to him by the Council of Foreign Bondholders, regrets to find that his Excellency does not reply to the specific question put to him by the Council, and points out to his Excellency that in his letter he attempts to place on the bondholders the duty of redeeming the debt of the country, a duty which appertains to the whole Spanish nation.

4. That a memorial be addressed to the Finance Minister of His Majesty the King of Spain, earnestly entreating him not to sanction such a suicidal policy.

5. That the bondholders willing to serve on a committee be requested to communicate such willingness in writing to the Council of Foreign Bondholders, who will call a meeting of such bondholders for the purpose of appointing an executive from their number.

6. That the Council of Foreign Bondholders, in conjunction with such committee, be requested to take all necessary measures for protecting the threatened rights of the bondholders.

7. The committee are requested to consider the expediency, in the event of the tax being imposed, of issuing certificates to holders of Spanish bonds, protesting against and claiming indemnification for all deductions made from the full amount of the coupons, and of taking measures in the event of the Government committing any act of default against the admission of any new Spanish securities upon the London Stock Exchange and all other public exchanges.

Annexed are our usual quotations showing the changes for the week :—

The quotations of the new loans are as follow:—Costa Rica, 5 to 7 prem.; Uruguay, par to ¼ prem.

ENGLISH RAILWAYS.—As will be seen from our subjoined list, a very material rise has taken place this week in the leading lines, the traffic returns continuing to be very favourable, and investment purchases steadily going forward. There has been comparatively little fluctuation, prices since last Saturday having been steadily maintained, or tending slowly upwards. The exceptions are Caledonian and North British which were rather flat in the beginning of the week, but improved rather rapidly on Thursday, when reports of an intended amalgamation became current, and on Friday improved about 3 per cent., when a definite announcement was made that the boards of the two companies had agreed to a complete amalgamation. Both stocks close at nearly the highest price touched—Caledonian at 118½ ¾ and North British at 60½ 61. From the quantity of competitive traffic and the number of duplicate trains on the two lines, there is no doubt that amalgamation will possess the maximum of advantages for both shareholders and the public. The ordinary stock in the case of both companies is also very small in proportion to the whole capital, so that very slight improvements will have a great effect on the dividends. It may be considered all but certain that the amalgamation will secure the payment of all the preference charges on the North British and a surplus for the ordinary shareholder, while it would take only a small saving, not more than 50,000*l* per annum, to give an extra 1 per cent. to the Caledonian shareholders.

We understand that the terms of the proposed amalgamation between the Caledonian and North British Companies are—a division of the exsiting gross receipts in the proportion of 61 per cent. to Caledonian, and 39 to North British; an "equitable" division of the future additional receipts, and the management of the undertaking by one board. If necessary an application will be made to Parliament to carry out the amalgamation.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	114½ ¾	115½ ¾	+ 4
Great Eastern	45¾ 6	46½ ¾	+ ¾

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Oct. 28 to 809,424*l*, being an increase of 68,677*l* on the corresponding week of last year. The aggregate receipts of the half-year to date are now 13,569,453*l*, being an increase of 985,764*l* on the corresponding period of last year. The principal increases of the week are—London and North-Western, 10,017*l*; North-Eastern, 8,970*l*; Great Western, 7,699*l*; Midland, 7,209*l*; Lancashire and Yorkshire, 5,412*l*; South-Eastern, 4,292*l*; Caledonian, 4,025*l*; and Great Eastern, 3,553*l*. The following shows the increase or decrease in each case for the week and for the whole period:—

RAILWAY TRAFFIC RETURNS.

AMERICAN SECURITIES.—The tendency of prices in this department has again been upwards, as will be seen from the list below, nevertheless most American railway shares are lower. A statement gained currency during the week that application had been made to the Bank of England for the loan of two millions owing to the failure of "a recent large "financial operation;" it is scarcely necessary to add that this was without foundation.

	Closing Prices last Friday.	Closing Prices this day.	Inc or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	91 ¼	91½ ⅜	+ ⅛
Ditto 1865 Issue	91 ¼	91⅝ ⅜	+ ⅛

Pennsylvania Gen. Mort. 6 % Bonds, 1910	95¼ 6½	95½ 6½	... ...
Virginia 6 % Bonds	50 2	50 2	... ...

JOINT STOCK BANKS.—The changes in the quotations for Bank shares have not been important, but the tone of the market has ruled steady throughout the week. Hongkong and Shanghae and Colonial have risen 1; London and West-

minster ½; Alliance ¼; but Albion have declined 1, and Union of London ½. Imperial Ottoman shares closed firm, in consequence of the improvement in Turkish Government securities.

TELEGRAPHS.—There have been few dealings in this department, and the changes are unimportant. Great Northern, and Marseilles and Algiers have risen ¼, French Cables ⅛; but British Australasian are ⅛ lower. Telegraph Construction shares, however, closed flat, at a decline of 2½.

MINES.—A fair amount of activity has been apparent in the mining share market. Eberhardts have fluctuated considerably, but finally closed at an advance of 5; while in other foreign mines Pacific and Sierra Buttes both show an improvement of ¼; Anglo-Argentine and Yudanamutana of ½. On the other hand, Russia Copper are ⅛ and Chontales ⅛ lower. In British mines, South Wheal Frances are quoted at a nominal fall of 10, Wheal Granville being 1 and East Caradon ¼ lower. West Chiverton have risen ⅛, Tankerville, East Lovell, and Great Wheal Vor ½.

It is stated that a company will be brought out next week to take over the business of the celebrated Emma Silver Mine in Colorado.

MISCELLANEOUS.—In this department we note a decline of 3 in Peninsular and Oriental, in consequence of the loss of the steamer Rangoon. Native Guano shares are also 3 lower; while London General Omnibus and Peel River have risen 2; Submarine Cable Trust, South Australian Land, British Shipowners, and Australian Agricultural, 1; British and Foreign Tramways, ⅜; Anglo-Mexican Mint, ½.

In the new undertakings, Limmer Asphalte shares are quoted 4⅛ to 4⅜, United Limmer ¾ to ¼ dis, Barnett's Asphalte 1 dis to par, Auvergne Asphalte ¼ dis to par, Di Castro ⅛ to 1½ prem, Societe des Asphaltes Francais ¼ to ¾ prem, Native Guano 25 to 27, Phosphate Sewage 12½ to 13½. Sombrero Phosphate ⅛ dis to par, Patent Gas 14½ to 15½, the new shares 5¼ to 5¾, and Cesena Sulphur 2 to 3 prem.

A prospectus is issued this evening of the Bessemer Steel and Ordnance Company. Capital, 100,000*l*, in 10,000 shares of 10*l* each. The company is formed for the manufacture of Bessemer steel, the steadily increasing demand for which, it is stated, greatly exceeds the present means of supply, and also for the manufacture of wrought iron, steel, and compound guns for siege and naval purposes, together with any class of field guns and carriages, mitrailleurs, shot, shell, and other projectiles, as well as small arms. The company have rented Mr Bessemer's premises on the Thames, at East Greenwich, paying 1,800*l* annually for rent, use of machinery and depreciation, and it is also stated that large and remunerative contracts have been offered.

A prospectus is issued this evening of the issue of 3,500 perpetual 9 per cent. preference shares of 10*l* each, of the Northfleet Chalk Quarries, Limited, a company formed to acquire the lease of and develop extensive chalk pits and quarries, situate at Northfleet, Kent. The ordinary share capital is 25,000*l*, but is to receive no dividend until 9 per cent. is paid to the preference capital, which will also participate rateably in the surplus profit, after the ordinary capital has also got 9 per cent. The profits are estimated at 12,600*l*, or four times the amount necessary to pay the preference dividend.

EXCHANGE AND BULLION.—Up to Tuesday the drooping tendency in the continental exchanges, which we noticed last week, continued, but to-day there has been a turn in the opposite direction, the exchanges on Berlin, Hamburg, Belgium, and Paris having all advanced. There is a corresponding change as respects bullion, there being no longer a demand in the open market, and all arrivals being taken to the Bank. As will be seen below, however, the Bank of France has to-day raised its rate of discount, and the exchanges, which have lately been all against Paris, are unsettled.

The tenders for 400,000*l* in bills on India were received on Wednesday at the Bank of England, when the amounts allotted were:—To Calcutta, 250,000*l*; to Bombay, 100,000*l*; and to Madras, 50,000*l*. The *minimum* price was fixed, as before, at 1s 10⅛d on all the Presidencies, and tenders on Calcutta and Madras at 1s 11⅛d will receive about 64 per cent., and on Bombay at 1s 11⅛d in full. These results show a further increase in the demand for means of remittance to the East.

The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—Since our last circular of the 26th ultimo, the Bank has received 890,000*l*, principally French gold coin; and sovereigns to the value of 52,000*l* have been withdrawn for Egypt. The Roslin Castle has brought 17,500*l* from Otago; Wild Duck, 69,500*l* from Auckland; Elbe, 31,500*l* from West Indies—total, 118,500*l*. The Great Britain has left Melbourne with 83,000*l* for this country.

Silver has been in good demand, and fine bars, suitable for India, have slightly increased in price. The Mooltan has brought 123,300*l* Sycee from China, and we have received about 90,000*l* from the West Indies, and 28,000*l* from New York. The Candia has taken 80,000 to India, and the outgoing steamer of the 4th inst. will also take a considerable amount.

Mexican dollars have increased in value, owing to scarcity; and those brought by the West India steamer have been sold, the old coinage at 60½d per oz., and the new at 59d per oz. The Candia has taken 42,400*l* to China.

Exchange on India for Banks' drafts at 60 days' sight is 1s 11 7/16d on Calcutta, and 1s 11½d on Bombay. Applications for the India Council bills were received yesterday: the amounts allotted were, to Calcutta 250,000*l*, to Madras, 50,000*l* and to Bombay 100,000*l*. Tenders on Calcutta and Madras at 1s 11⅛d receive 64 per cent., and on Bombay at 1s 11½d in full. The minimum, as before, was fixed at 1s 10½d per rupee.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto refinable, 77s 11d per oz std, last price. Silver—Bar silver, fine, 5s 0⅝d to 5s 3/8d per oz std, last price; ditto containing 5 grains gold, 5s 1d to 5s 1 1/16d per oz std, last price; Mexican dollars, new, 4s 11d, old 5s 0½d per oz, last price. Five-franc pieces, 3s 11½d each, none here.

The sum of 232,000*l* in foreign coins was sent into the Bank of England to-day; while 70,000*l* in sovereigns was withdrawn for shipment to the Cape of Good Hope and Alexandria.

According to the *Gazette* return the imports of the precious metals into the United Kingdom during the week ended November 1 were:—Gold, 453,105*l*; silver, 672,389*l*. The exports were:—Gold, 978,706*l*; silver, 329,142*l*.

We are indebted to Messrs J. Allard and Co., of Paris and London, for the following telegram, giving to-day's exchange and bullion quotations in Paris:—

EXCHANGE, PARIS, 3rd November.

	LONG.			SHORT.

Worksop Water (Limited)	10,000	10

NOTICES AND REPORTS

STOCKS.

New South Wales Loan for 374,900*l.*—This amount has been placed in Sydney at a minimum of par.

Settling Days.—The Stock Exchange Committee appointed Friday a special settling day in the partly and fully paid-up scrip of the Costa Rica Government Six per Cent. loan, which is to be marked; and Tuesday, the 7th November, a special settling day in the English scrip (partly and fully paid up) of the Three per Cent. Consolidated External Debt of Spain. The consideration of the question of quotation is deferred for the present, the decision of the Cortes respecting the proposed income tax on the external and internal debts being awaited.

Swedish Provincial Mortgage Loan, 1852.—Bonds representing 5,100*l* have been drawn for redemption at par on the 1st December.

RAILWAY COMPANIES.

Bucharest and Giurgevo State Railway Bonds.—At the fourth drawing, bonds to the extent of 27,300*l* were drawn.

Buenos Ayres—Great Southern.—Owing to the illness of the general manager, the various details necessary for compiling the report and statistics usually submitted have not been received from Buenos Ayres. The health of the officers of the company suffered severely from the effects of the excessive work and anxiety during the late epidemic, and the accounts have become more varied and intricate owing to the growth of traffic, and by the opening of the construction accounts of the Salado and Las Flores Extensions. Business, which was much depressed during a great portion of the past half-year, has now recovered, and the prospects of continued prosperity are good. The directors feel justified in recommending the payment of an interim dividend of 16s per share, equal to 8 per cent. per annum, free of income tax, being at the same rate as for the corresponding period of last year.

Caledonian.—North British.—It is officially announced that the directors of the two companies have concluded an agreement to amalgamate both undertakings on terms satisfactory to the respective boards.

East Argentine.—All preliminaries having been settled, there will be "an immediate commencement of the works." A call of 1*l* per share is payable on the 23rd inst.

Leven—East of Fife.—Half-year's gross revenue, 8,990*l*; net revenue, 4,663*l*. The Leven section received dividends at the rate of 10 per cent. per annum, and the East of Fife 4¼ per cent. per annum.

North Wales Narrow Gauge Railways.—Capital, 240,000*l*, in 24,000 shares of 10*l* each. The construction of the main line from Corwen to Portmadoc, joining the Great Western and North-Western Railways, will be first undertaken. A two-feet gauge will be adopted, and the line will pass through Beddgelert, Capel Currig, and Bettws-y-Coed. A large mineral traffic is looked for, and the cost of construction is estimated at 3,500*l* per mile, or 5,350*l*, including rolling-stock and all contingent expenses.

Royal Sardinian.—It is announced that the shares of the undertaking having been reduced to 10*l*, the shareholders who have paid 20*l* will have 10*l* per share returned to them.

West Flanders.—At the meeting a dividend on the original shares of 6s 4d, and on the preference shares of 5s 8d, was declared for the half-year.

BANKS

Royal Bank of Liverpool.—The liquidators announce a fourth payment of 10s per share on the ordinary shares, and 5*l* per share on the preference shares.

ASSURANCE COMPANIES.

Life Association of Scotland.—At the annual meeting, the new policies were stated to have been 1,525 for 645,148*l*, yielding in annual premiums 20,946*l*. The income was 306,715*l*. and the funds are now upwards of 1,434,000*l*.

MISCELLANEOUS COMPANIES.

Cesena Sulphur.—Yesterday was the last day for receiving town applications for shares, but country applications will be received to-day.

Limmer Asphalte.—This company's asphalte is to be laid in Cornhill, in Grafton street, Dublin, and at the Crystal Palace.

Lisbon Steam Tramways.—The works are reported to be progressing, and the Larmanget engine has been tried with success. Powers for an extension of 16 miles to Cintra have been obtained.

London Pantechnicon, Limited.—Capital, 50,000*l*; in 5*l* shares The object is to provide means "for the warehousing, removal, and sale by auction (or private contract) of furniture, luggage, merchandise, glass, paintings, carriages, plate, wines, &c., &c."

Patent British Asphalte, Limited.—Capital, 100,000*l*, in 10*l* shares; first issue, 50,000*l*. The purchase of Mr Rogers' patents will be effected for 28,000*l* (13,000*l* in shares), by which, it is stated, an asphalte equal in all respects to foreign productions can be manufactured from materials entirely native to this country. Numerous testimonials are furnished with the prospectus, and it is announced that roadways can be laid for 12s per square yard, and that at that price a considerable profit will remain. No foreign mine will be purchased, and no royalties will be paid.

MINING COMPANIES.

Carmaux Mines.—Half-year's dividend, 10 francs (less 25 centimes, French tax).

Colorado Terrible Lode.—A meeting is called for the 13th instant, to consider a proposal for the purchase of the mines and property of the Brown Silver Mining Company. Should the shareholders be disposed to acquire the said property, on the terms which have provisionally been agreed upon, resolutions will be submitted to the meeting to empower the directors to increase the capital.

Eclipse Gold.—A call of 1s per share is payable on the 30th instant.

Illinois Gold and Silver Mining, Limited.—Capital, 62,000*l*, in 5*l* shares; first issue, 50,000*l*. This new company will purchase the "Illinois" gold and silver mines, near Central City, Colorado, which are stated to have been successfully worked since 1859. The purchase price is 40,000*l* (10,000*l* in shares), and the reports are favourable. The property is freehold, and contains a 22-stamp mill, and the mine is described as a true fissure.

Nant-y-Blaidd Silver Lead Mine, Limited.—The list of applications for shares closes on Monday, the 6th inst., for London, and the 7th inst. for the country.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The grain trade ruled quiet to-day at Mark lane. Supplies of English wheat were liberal and there was a good show of foreign, the samples generally being in good condition. The demand for all qualities ruled inactive, and late rates were with difficulty maintained. Flour was held on former terms. Barley, maize, and oats were steady in value; while beans and peas commanded late rates. This week's imports of foreign and colonial produce into London have amounted to 38,360 qrs of wheat, 3,830 barley, 31,420 oats, 140 beans, 270 peas, 9,050 maize, 1,090 sacks and 1,950 barrels of flour.

The Liverpool cotton market opened very quiet on Friday last, and continued so until Tuesday, when there was a better feeling. On Wednesday and Thursday a good business was done, and any previous decline in prices was fully recovered. To-day the market closes dull, with sales 10,000 bales. The total sales are 93,390 bales; of which the trade have taken 52,570 bales; speculators and exporters, 26,820 bales. The imports for the week are 63,360 bales; the actual exports, 14,096 bales; and to-day's stock is 517,060 bales. Quotations show no alteration as compared with this day week.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended November 26, 1871:—

	Imported.	Exported.
American.....bales	13,001	2,118
Brazilian	16,997	1,395
East Indian	25,523	13,170
Egyptian	3,739	106
Miscellaneous	7,949	137
Total	67,209	16,926

At New York, on Nov. 2, middling Upland cotton was quoted at 18¾ cents per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, Oct. 6:—In sympathy with the advices from Liverpool, we have to report a very excited cotton market here, and so great has been the eagerness of buyers to secure contracts (for of ready cotton the stock is almost exhausted), that a further advance of 15 rs to 20 rs per candy on our last circular's prices must to-day be quoted. The business reported has again been large for this stage of the season, amounting to about 7,250 candies for forward delivery and 800 candies on the spot, of which the most important items are—3,800 candies Dhollerah, delivery in one or two months at 220 rs to 235 rs, 1,800 candies sawginned Dharwar, delivery in two months, at 235 rs to 245 rs, and 1,500 candies new Oomrawuttee, delivery up to 10th March next, at 225 rs to 240 rs. At the close it is difficult to find sellers who are willing to contract even at our quotations, say 238 rs for Dhollerah and 245 rs for sawginned Dharwar and new Oomrawuttee, although these prices lay down to sell in Liverpool ¼d to ½d per lb above our last quotations, and there seems little reason to anticipate a more healthy state of things until at all events the new crop begins to come in in quantity, which will not be before the middle of January next. Dealers have generally been tempted by the high prices which buyers have been offering to contract for cotton which they did not hold, in the hope of buying in to advantage in the meantime, and there will, we fear, be considerable difficulty in obtaining delivery in many cases. It is unfortunate, looking to the prospects of next season's business, that we are likely to commence with a very high platform of prices, for whilst there is little prospect of any large profit to shippers, the risk of loss on a serious scale is greatly increased. Accounts from the districts continue very encouraging, and, accidents excepted, a very full crop may be looked for from India next season. We have no particulars of special interest to give, our reports from all quarters being equally satisfactory. Tinnivelly—We have a telegram dated yesterday, quoting 7¼d, cost and freight, market strong.

EXPORT of COTTON from BOMBAY to October 6.

	1871.	1870.
London.....bales	21,705	1,570
Liverpool	677,144	799,156½
Total, Great Britain	698,849	800,726½
Channel for orders	37,333	10,379
Continent	271,248	132,173
China	48,848½	45,641½
Grand total	1,056,278½	988,920

Actual exports since last mail left, 6,203 bales.

The Imperial Ottoman Bank have furnished the following report, dated Alexandria, Oct. 20:—The cotton market was very excited on Saturday and Monday last, but on Tuesday less favourable news arrived from Liverpool, which rendered our market much quieter. Prices have since shown a downward tendency, and are to-day fully ¼d per lb lower than at the commencement of the week. The crop promises to be a large one, but fully good fair and extra stapled cottons are scarce as yet, and in good demand for the continent. Fully fair open, with staple, 10⅜d; good fair, with staple, 10⅝d; fully good fair, with staple, 11¼d per lb, f.o.b. Arrivals from Oct. 14 to Oct. 20, 42,900 crs. Sales from Oct. 14 to Oct. 20, 13,710 crs. Shipments from Oct. 13 to Oct. 19:—England, 3,532 bales; France, 98 bales; Italy, 514 bales; Austria, 397 bales—total, 4,541 bales.

The colonial produce markets have not ruled very active this week. There has been a good inquiry for sugars, and prices are rather dearer on the week. The stock in the United Kingdom is 128,880 tons, against 176,310 tons last year, and the quantity of East India sugar afloat for the United Kingdom and the continent (not including Government exports from Java) is 41,000 tons, against 22,500 in 1870, and 24,500 in 1869. Owing to the receipt of unfavourable advices from America, the demand for coffee has slackened, and buyers have had the advantage. The quantity of East India coffee afloat for the United Kingdom and the continent (not including Government exports from Java) is 12,340 tons, against 8,140 tons in 1870, and 12,340 in 1869. Cocoa has ruled quiet, but unchanged in value. Rice firm; afloat for the United Kingdom and continent, 74,000 tons, against 105,200

and 66,540 tons in 1870 and 1869 respectively. Fine jute has commanded full rates, but common sorts have been easier. Rum has ruled steady in value and demand.

The annexed is dated Havana, October 7:—Our last report was issued on the 6th ultimo. During the first part of the month now under review the sugar market, stimulated by more cheerful news from the United States, was pretty active, the demand bearing principally upon the lower descriptions Nos. 8 to 10 suitable to that market, in which quite considerable transactions were effected on the basis of 10¼rs, and 10½rs for No. 12, according to quality and condition. After that period the demand subsided, and with the continuance of unfavourable advices from abroad received since then, the market has become almost paralysed. Notwithstanding, however, the discouraging advices prices have not given way as might have been expected; on the contrary planters and holders continue to keep aloof rather than to sell at a further reduction, and we must thus place our general quotations, based upon the last transactions, as follows:—Nos. 7 to 10, 23s 7d to 25s 8¾d; 11 to 12, 26s 3d to 26s 9½d; 13 to 14, 27s 4d to 27s 10d; 15 to 17, 28s 4¾d to 28s 11d; 18 to 20, 28s 11d to 35s 3½d; whites, inferior to superior, 35s 3½d to 39s 6d. The stock here and at Matanzas amounts to 191,407 boxes, against 128,412 boxes in 1870. The exports from here, Matanzas, Cardenas, and Sagua la Grande, during the last month, were distributed as follows:—To the United States, 48,621 boxes 5,337 hhds; Great Britain and a market, 5,522 boxes; Belgium, 1,137 boxes; France, 1,794 boxes; Spain, 3,364 boxes; Central and South America, and other parts, 630 boxes 50 hhds—total, 61,068 boxes 5,387 hhds, against 141,726 boxes 7,201 hhds same month last year; and the aggregate of exports from the abovementioned ports sum up to 952,890 boxes 239,173 hhds, against 1,617,932 boxes 341,901 hhds in 1870. The crop—The prospects for the ensuing crop continue to be so far very favourable; abundant showers of rain have greatly improved the condition of the growing cane, and the crop promises to be a large one, if no unforeseen calamity should occur during the present month. At all events, however, the crop cannot be expected to be an early one.

The following report, dated Sept. 30, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—A continuance of fine weather has enabled shippers of produce to clear off stocks from their godowns. Notwithstanding the comparative activity of the fortnight the figures to date show at the close of our export year a decline on coffee shipments of 96,000 cwts. The distribution of our shipments is given beneath:—

PLANTATION COFFEE.

	1871.		1870.
	cwts.		cwts.
To Great Britain	730,363		823,286
Foreign ports	41,962		48,948
Australia and India	14,563		18,185
	786,888		890,419

NATIVE COFFEE.

	1871.		1870.
	cwts.		cwts.
To Great Britain	106,692		66,704
Foreign ports	31,675		59,473
Australia and India	4,021		2,646
	136,388		128,823

Continued firmness in the home coffee market has imparted a very strong feeling in favour of the article on this side, and we have to report transactions to a considerable extent since the date of our last, at extreme rates. Native clean coffee is coming in, but to a moderate extent, at about 49s to 50s picked and dried for shipment.

Mr Helmuth Schwartze reports:—There is no change to report in the market. Prices remain firm, but on the whole not much business done since the close of last sales. Whatever was sold went to the home trade, which, notwithstanding its large purchases in September, appears much less stocked than its foreign rivals. Abroad things are very quiet, and a waiting policy is followed in all quarters. Manufacturers, however, are well employed, and by the time the next sales begin, there will be requirements also for the continent. The strength of the present position of the market lies in the circumstance that the very large rate of consumption continues everywhere undiminished, that in no quarter is there any pressure of stocks, and that the supplies are exceedingly moderate. The arrivals up to date comprise:—Sydney, 15,118 bales; Port Phillip, 5,300 bales; New Zealand, 5,271 bales; Van Diemen's Land, 592 bales; Adelaide, 76 bales; Swan River, 36 bales; Cape, 23,074 bales—total, 49,467 bales. And there are afloat 5,756 bales Sydney; 4,094 bales Port Phillip; 1,484 bales New Zealand; 1,324 bales Adelaide; 2,738 bales Cape—total afloat, 15,396 bales. The total is likely to reach 65,000 bales, but as about 5,000 bales have already been forwarded direct, partly to the country and partly to the continent, the quantity for disposal will probably not exceed 60,000 bales. The following is a comparative statement of the importation of colonial wool into London during 1870 and 1871:—Importation 1871 up to present date—211,464 bales Port Phillip; 141,699 bales Sydney; 108,594 bales New Zealand; 65,077 bales Adelaide; 15,640 bales Van Diemen's Land; 4,884 bales Swan River; 107,407 bales Cape—total, 654,765 bales. Total importation, 1870—Port Phillip, 209,261 bales; Sydney, 142,352 bales; New Zealand, 106,628 bales; Adelaide, 68,545 bales; Van Diemen's Land, 17,318 bales; Swan River, 5,298 bales; Cape, 124,473 bales—total, 673,875 bales.

Annexed is Messrs Durant and Co's circular:—We have to report another month of moderately current business in silk, with continued good deliveries, although not quite equal to the previous month, and without any quotable change in prices, although the arrivals have again been large, and our stocks again show an increase. In China silk there is less change than in any other class, the arrivals being comparatively moderate; the scarcity of good medium silk causing a continual demand, and thus giving general firmness to all. In Japan silk the movements are fitful and spasmodic—every now and then we have a sort of spurt, the comparatively low prices from time to time inducing the idea that it must enter more largely into consumption, and were it not that the stock is so large, and so comparatively small a portion of this season's silk has come forward, the deliveries are really good. In Canton silk consumption goes on as well as could be wished, but the arrivals have been very large. In Bengal silk unfortunately the position is sadly different, consumption continues on the smallest possible scale, and stock increases.

Messrs Van Houten and Ebeling thus review the state of the Dutch tin trade during October:—Throughout this month tin has been in fair demand both for export and on speculation, and quotations show an advance of ¾fl to 1fl. Banca was in very active request at 81fl to 81½fl in the beginning of the month. Since then there has been a quieter feeling, but prices are well supported. Ex the spring sale 1872 a few transactions at 80fl to 81fl are reported. To-day the visible supply for this sale amounts to only 34,442 slabs, against 83,534 slabs same date last year, and 66,149 in 1869. In Billiton a good business has been done at 79½fl to 80½fl, the supply continuing limited. A few lots to arrive changed hands at 80fl to 80½fl. 7,800 peculs Billiton offered in public sale at Batavia on the 6th inst. fetched the average price of 86.93fl, costing to sell here about 81fl. The following statement shows the position of Banca tin in Holland on the 31st October, from the official returns published by the Dutch Trading Company:—

	1871.	1870.	1869.

Quotation Oct. 31 ... Billiton	80¾fl	72fl	72fl

The quantity of Banca tin now afloat for the Dutch Trading Company is 6,250 peculs, equal to 390 tons, against 6,650 peculs, equal to 416 tons, last year. We estimate the quantity

of Billiton tin now afloat at 6,569 peculs, equal to 410 tons, against 9,186 peculs, equal to 570 tons, last year.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, October 3:—Our advises from Tirhoot, Chumparun, and Chuprah, are to the effect that there has been very boisterous weather, accompanied with fearfully heavy rain (over fifteen inches having fallen in some parts in thirty hours), which has put all the country, except the very high lands, under water, and brought the Khoontee Mahai to a standstill; possibly, when the water has drained off, some factories may work a few more vats, but we may look upon the season as pretty well closed, and the total out-turn is not likely to exceed, even if it reaches, 42,000 maunds. In the Benares Provinces and the Doab, the weather has been as bad as in Tirhoot, if not worse, and there is no possibility of fine weather now doing anything to retrieve matters. Estimates that we have received from various planters lead us to think that the out-turn from the former will not exceed 5,000 maunds (against nearly 13,000 last year), while from the latter we should say that 15,000 maunds (against 20,000 last season) is the outside quantity we can now look for. Until we can tell the actual quantity made from Khoonties in Tirhoot, &c., we cannot give a reliable revised estimate, but in putting the total crop at 90,000 maunds, we fear we are likely to be above than below the mark.

The annexed is dated New York, October 21:—During the last half of the week there has been a more cheerful feeling in financial and commercial circles, due to an easier money market and the multiplying evidences of the rapid recuperation from the Chicago disaster. Money is by no means easy, yet where every one is disposed to make the best of the situation, this alone is sufficient to place the market on a better footing. The bank resources are kept down by a considerable drain to the West, but they generally recognize the fact that it is to their interest, as well as their duty, to do all they can to remove all possible obstructions to business. They are generally devoting their resources to the supply of the wants of their customers, which as a rule absorb the bulk of their available funds, leaving a considerable pressure of outside paper to be provided for as best it may, and we hear of negotiations at 10 to 12 per cent. for acceptable mercantile notes, with exceptions at higher rates. The disbursement on Thursday of nearly four millions of greenbacks by the Treasury for bonds purchased, contributed in no small degree to the improved feeling. Call loans have generally been done at 7 per cent. both gold and currency, on good collateral, with a small commission added, in the way of turning stocks, and on Governments the rate as at times been as low as six. The gold market continues devoid of activity or excitement, and the rate has gradually yielded till at length it has touched the lowest point for some two months. Foreign exchange, on the other hand, has advanced under the more favourable aspect of the English money market, indicated by the turn of the continental exchanges in favour of London, through which the Bank of England has gained a million pounds sterling this week, with the consequence of yielding rates of discount in the open market. The discrepancy of produce prices between the home and foreign markets has served to check the export trade, thus unfavourably affecting the freight market. Yet with a light tonnage supply, rates show little or no diminution. The market for all public securities continues unsettled, but as the money market works into an easier position, a substantial reaction is to be regarded as among the probabilities.

THE COTTON TRADE.

LIVERPOOL.—November 2.

The cotton market opened quietly this week, and prices gave way about ⅛d per lb, but on Tuesday the demand increased, and has since continued good, with a steadier tone, and the quotations of Thursday last are resumed in most instances. The business in Sea Island has been of a retail character, at previous rates. American declined fully ⅛d per lb at the commencement of the week, but has recovered, with the exception of the commoner qualities, which are heavy of sale, at about ⅛d below former quotations. New York advices to the 2nd instant quote middling Upland 18¼ cents, costing to sell in Liverpool 10d per lb, by steamer. Brazil has been only in moderate request, and has generally given way ⅛d per lb. Egyptian was much pressed upon the market in the early part of the week, and some sales were made at a decline of ⅛d per lb. Since then a steadier feeling has prevailed, and last week's quotations are again obtainable. East Indian has been in moderate demand, and after some irregularity in the beginning of the week, previous quotations are generally resumed.

For cotton "to arrive" and for future delivery, after many fluctuations, the latest quotations are—American, basis of middling (from any port), not below good ordinary, shipment November-December 9 7/16d, 9⅜d, 9 7/16d; not below low middling, at sea, steamer 9⅛d; delivery November 9 7/16d, 9⅜d—New Orleans, not below good ordinary, delivery November 9⅜d: shipment October-November 9⅜d; November-December 9⅜d per lb.

The sales of the week, including forwarded, amount to 79,390 bales, of which 14,970 are on speculation, and 11,850 declared for export, leaving 52,570 bales to the trade.

Nov. 3.—The sales to-day will probably amount to about 10,000 bales. The market quiet, but without change.

	bales.
An increase of import compared with the same date last year of	696,510
An increase of quantity taken for consumption of	473,190
An increase of actual exports of	247,430
An increase of stock of	53,560

In speculation there is an increase of 352,680 bales. The imports this week have amounted to 63,363 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to October 27) is 67,000 bales, against 80,000 bales at the corresponding period last year. The actual exports have been 14,096 bales this week.

LONDON.—November 2.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The market continued very quiet until Tuesday, but there has been more doing during the past few days, chiefly in arrival cotton. Quotations on the spot remain unaltered, whilst floating parcels close fully ⅛d above last Thursday's rates.

Sales to arrive:—3,400 bales Tinnevelly, at 7⅛d to 7⅜d, July-August sailing, September-October shipment, for good fair; 5,200 bales Western Madras, 6⅞d to 7d, July sailing to October-November shipment, for fair; 7⅛d, for good fair; 300 bales Coconada, 6⅞d to 7d, July sailing to October-November shipment, for fair red; 200 bales Dhollerah, 7 5/16d, July sailing, for fair; 3,050 bales Bengal, 6d, June-July sailing, for fair; 6⅛d, for good fair; 6⅛d, September to November shipment, for fair; 200 bales Rangoon, 6⅛d, September-November shipment, for fair; 200 bales American, 9⅛d, September-October shipment, for middling—total, 12,550 bales.

NEW YORK.—OCT. 20.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Oct. 20. From the figures thus obtained it appears that the total receipts for the seven days have reached 82,538 bales, against 64,097 bales last week, 46,044 bales the previous week, and 34,073 bales three weeks since, making the total receipts since Sept. 1, 1871, 268,874 bales, against 351,090 bales for the same period of 1870, showing a decrease since Sept. 1, this year, of 82,216 bales. The exports for the week ending this evening reach a total of 33,892 bales, of which 26,936 were to Great Britain, 4,441 to France, and 2,515 to rest of the continent, while the stocks as made up this evening are now 184,487 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night :—

Week ending Oct. 20.	Exported to		Total this week.	Same week 1870.	Stock.

Total since Sept. 1	101434	12641	114075	113477	...	...

The market has been dull and depressed all the week, and closes 1/16c lower than the close of last Friday. This downward movement has been induced by the favourable weather for picking purposes which has prevailed for some time past in the South, but more especially during the last two weeks, the increase in the arrivals at our ports, and the dull accounts and lower quotations at Liverpool. Holders have begun to grow timid under the accumulation of stocks, especially as the fine weather is leading to larger estimates of the crop, while Europe with her large stocks in the hands of spinners is becoming quite indifferent about making purchases. The unfavourable report of the crop issued by the Agricultural Bureau in the middle of the week caused a considerable speculation in futures that day, but since then there has been less confidence, though the prices for future delivery have not fallen off to the same extent as the prices for spot cotton, the close to-night being weak at (for low Middling) 18 3/16c, for October, 18 3/16c for November, 19 1/16c for December, 19 1/8c for January, 19 3/8c for February, 19 3/8c for March, and for April, 20c. The total sales of this description for the week are 95,650 bales, including 300 free on board. For immediate delivery the total sales foot up this week 10,764 bales, including 5,878 for export, 3,543 for consumption, 381 for speculation, and 962 in transit. Of the above, 654 bales were to arrive. The following are the closing quotations :—

Middling	19 1/2 ...	19 3/4 ...	19 3/4 ...	20 1/4 ...
Good middling	20 1/2 ...	20 3/4 ...	21 ...	21 1/4 ...

For forward delivery the sales (including 300 free on board) have reached during the week 95,650 bales (all low middling or on the basis of low middling).

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 6,082 bales, while the stocks to-night are 20,424 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Oct. 13, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph :—

Ports.	Receipts since Sept. 1.		Exported since September 1 to				Coastwise Ports.	Stock.
	1871.	1870.	Great Britain.	France.	Other Foreign.	Total.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870 :—

	Week ending Oct. 20, 1871.			Week ending Oct. 20, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	5456	5156	6900	6662	7238	4690
Columbus	1827	1215	3551	2743	2697	4210
Macon	3451	1916	6356	4789	4129	5315
Montgomery	3169	2052	5575	2076	1492	4743
Selma	3805	2925	3212	2624	2216	3955
Memphis	14221	9547	11532	8737	5019	8222
Nashville	2107	2206	834	969	1008	1508
	34306	25017	36960	28605	23799	32643

The above totals show that the interior stocks have increased during the week 9,020 bales, and are to-night 4,317 bales *more* than at the same period last year. The receipts have also been 5,431 bales *more* than the same week last year.

The exports of cotton this week from New York show an increase since last week, the total reaching 14,328 bales, against 11,684 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1871; and in the last column the total for the same period of the previous year :—

—*New York Commercial and Financial Chronicle.*

NEW YORK, Oct. 27.—According to Messrs Moffatt, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 94,000 bales, and since 1st of September 366,000 bales. Shipments to England, 40,000 bales; ditto to France, none; and to the continent, none. Total shipments since 1st September, 151,000 bales. Stock at all ports, 221,000 bales. Middling Upland, 9 1/16d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Nov. 2.—The business of the week has not been of a general character, but chiefly confined to transactions in 8¼ lbs shirtings for the East, of which large purchases were made during the latter part of last week, when prices showed much irregularity. The demand for these seems now satisfied. In other kinds of cloth little has been done, and stocks generally are on the increase, but to counteract this, short time has been adopted in Darwen and Blackburn. In yarns the business of the week has been very moderate, owing to greater firmness in the cotton market. Prices for goods and yarns are steadier, and show less irregularity, but it is not thought that this can be maintained. The market closes with a sluggish demand, but prices are tolerably steady.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—There is still a fair consumptive demand for all good wools, and staplers experience no difficulty in effecting sales whenever they are disposed to make a concession; but prices are on the whole maintained with great firmness, and this tends to restrict operations. The demand still runs generally upon all deep-grown wools. Stocks are considerably reduced. In the yarn market there is a rather weaker tone. The inquiry in both single and twofold yarns is more general, but, judging from the result, more with a view to test prices or to obtain offers from spinners than to effect actual business.

ROCHDALE.—The flannel market continues quiet. Prices ruled quite as high as they have hitherto done, and proved an obstacle to business. Some of the lowest kinds of wool are fetching rather lower prices, but all the better qualities continue to be extremely dear. There was very little business done in Yorkshire goods, but in all transactions the manufacturers were extremely firm in their prices.

DUNDEE.—Our flax market has been very firm, and there has been a fair amount of inquiry for goods on the spot, and rather more business has lately been doing in some of the medium and lower sorts at firm prices. In some instances holders now refuse to sell unless at an advance on previous rates, which tends to check business, as spinners, though more disposed than formerly to keep up their stocks at about current rates, do not as yet seem at all inclined to follow any upward movement of the market. In jute there is still a want of activity in the demand for common qualities, while good and fine descriptions continue to move off freely at steady prices. The yarn markets continues without alteration. Flax yarns are still comparatively quiet, but prices are firm. In linen manufactured goods there is an extensive business doing, and for canvas the demand has lately improved considerably. Jute goods also continue to be in active demand.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Oct. 20.

It is a short story with breadstuffs this week. With a severe monetary pressure, receivers have been free sellers, and prices have rapidly declined, the supply being augmented by offerings from store. The receipts of flour show some increase, though still not excessive. Under a general desire to sell, prices have declined for all grades. Even the family brands have felt the declining tendency. The most important feature in the business of the week was the sale on Wednesday of some 9,000 barrels extra State, mostly for November delivery, at $7.30, with considerable lines of shipping extras from winter wheat, city and southern; but since then the market has been dull and drooping, with shipping extras of western and State brands from spring wheat, quoted in the range of $6.70 to $7.15. Rye flour and corn meals have also declined, and close very dull. Wheat has arrived by canal in large quantities, over 300,000 bushels, being reported in to-day, and prices have daily declined. On Wednesday afternoon and yesterday morning there was some speculation, on the expectation, apparently, that the decline of 10c in a short time would be followed by some reaction; but it had only a momentary influence, and prices again gave way to-day some 2c to 3c per bushel. At this concession there was a large export demand, and the close was firm at $1.47 to $1.48 for No. 2 Chicago, $1.50 to $1.51 for No. 2 Milwaukee, $1.54 to $1.56 for No. 2 and No. 1 Toledo, with $1.58 bid and $1.60 asked for amber Michigan. There has been some export movement in white wheat at $1.55 to $1.70 for inferior to choice, but the close is quiet. Corn has not arrived freely, although the receipts embrace some parcels by rail; lots in store have been pressed on the market, and prices have declined, prime western mixed closing at 75c in store and 76c afloat. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

There is no feature of particular interest to notice in the corn trade. The weather has been favourable, and out-door labour has made good progress, while in the southern dis-

tricts the young wheat plant has already made its appearance above ground. There are some complaints of the turnip crop, which has been attacked by disease; but the accounts of potatoes are more encouraging. The grass lands are in good order, and afford a good bite for the stock. Supplies of English wheat at Mark lane have been liberal, farmers having continued to thrash out freely, and there has been a good show of foreign. Trade, however, has ruled dull throughout the week, and though there is no actual decline to note in prices, the tendency has been downwards. Flour has been held on former terms.

With regard to spring corn, there has been large supplies of barley on sale, which has met a good demand at steady currencies. Maize and oats have also shown firmness, while beans and peas have commanded full rates. Linseed and rapeseed are without change in value.

The following statement shows the imports and exports of breadstuffs into and from the United Kingdom since harvest, viz., from August 26 to the close of last week, compared with the corresponding periods in the three previous years:—

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 39 grain and seed-laden vessels have arrived at ports-of-call, viz.:—14 wheat, 7 maize, 6 barley, 5 rye, 2 beans, 1 cotton-seed, 1 locust beans, 1 rye and barley, 1 linseed cakes, 1 rapeseed and barley. The floating grain trade has this se'nnight been quiet in tone, with prices generally tending downwards. Wheat sales were difficult to effect even at a decline of 1s to 2s per qr. Maize slow sale, and 6d cheaper. Barley has been in quiet demand, and prices without material alteration. Rye has been somewhat irregular. Yesterday the demand improved. The reported sales are as follows:—Wheat—15 arrived cargoes: Don Ghirka from Taganrog, 50s 3d; new coast Ghirka, 51s; Rostoff Ghirka, 48s 6d; Ghirka from Odessa, 53s 7½d; Nicopol Ghirka, 53s 6d to 54s; winter Yeisk, 50s per 492 lbs; red winter, from New York, 59s; ditto, from Montreal, 58s 6d; No. 1 spring, from Montreal, 57s; ditto, from New York, 56s 9d to 57s; No. 2 ditto, 56s 9d; white Canadian, from Montreal, 62s per 480 lbs. On passage, 4 cargoes: Ghirka Nicopol, 55s per 492 lbs; white Canadian, 63s 6d per 480 lbs. Maize—17 arrived cargoes: Galatz, 34s 6d; Danubian, 30s 3d; Wallachian, 28s to 31s 6d per 492 lbs; Sulina, 30s; New Barbary from Mazagan, 34s 9d; mixed from New York, 33s 6d to 34s 6d; ditto from Baltimore, 33s 3d per 480 lbs. Barley—6 arrived cargoes: Azow and Taganrog, 20s 3d to 27s 7½d; new Danubian, 27s 6d to 27s 10½d; Enos, 27s 9d per 400 lbs. Rye—3 arrived cargoes: Azow from Taganrog, 34s 6d to 35s 9d; Nicolaieff, 36s 6d per 480 lbs. Linseed quiet. On passage, 8,000 to 9,000 qrs Turkish, 64s 3d per 416 lbs; 100 tons East India, from Calcutta, 63s per 410 lbs. Shipped or to be shipped: 2 cargoes Odessa, 62s 6d; 3 cargoes Azow from Taganrog, 61s 6d; 1 cargo Berdianski, 63s 6d per 424 lbs. Rapeseed slow sale. Arrived—1 cargo cultivated Ibrail, 74s 6d; 100 tons yellow mixed Calcutta, 73s per 416 lbs; 200 tons ordinary brown from Calcutta, 69s per 416 lbs. Cotton-seed very little business doing. On passage—550 tons Egyptian from Alexandria, 9*l* 12s 6d. Shipped or to be shipped: 2,000 tons ditto, 9*l* 3s to 9*l* 5s per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has been a steady inquiry during the week, and the market is very firm, the refiners taking fair supplies of various descriptions. Manila still meets ready buyers, while other low sugars remain firm. The show of West India having become moderate, the importers require stiffer rates, consequently the sales in three days amounted to but 1,418 casks, including a considerable quantity of Barbadoes, part by auction. Prices of these sorts chiefly ranged from 29s to 33s, and grainy up to 35s 6d per cwt. Two floating cargoes of Mauritius are reported sold for the United Kingdom. Prices generally rule about the same as last week. Further large deliveries have reduced the stock here to 60,000 tons, against 89,600 tons last year, and 86,500 tons in the preceding one. According to the latest returns, the stock in the kingdom was nearly 47,000 tons less.

Mauritius.—Two floating cargoes, together about 15,000 bags, have sold for the United Kingdom: Nos 14 and 14½, 30s 6d to 31s respectively.

Manila.—30,000 bags have changed hands: clayed, 25s to 27s; low brown, 23s 3d to 23s 6d. 3,805 bags Taal by auction were taken in above the value. 5,500 bags Zebu sold to arrive, at 23s.

Java.—11,000 bags low brown (syrups) have sold at 22s 6d.

Other Foreign.—About 2,100 casks Cuba have sold on the spot at 31s to 32s. 1,830 boxes Havana, No 11½ to 12, at 34s 3d. 3,517 boxes Havana and Cuba were taken in. 285 casks 25 barrels Porto Rico, part sold at 33s to 35s 6d.

Floating Cargoes, Foreign.—One of Havana, No. 11½, at 29s 6d, for the United Kingdom.

Refined.—The demand has improved, and prices generally are rather firmer. Stoved goods quoted 39s 6d per cwt upwards, and very low at rather less

MOLASSES.—Business has been done, including Nevis and St Kitt's, at 13s to 15s per cwt.

RUM.—The market is inactive, with limited sales during the week, including Demerara at 1s 9d to 1s 10d proof, and Jamaica at 3s 3d to 3s 7d per gallon. Other kinds have been without alteration.

COCOA.—Holders have been sellers this week upon reduced terms, and the market is quiet. Prices are about 1s to 2s lower in many cases. 603 bags Trinidad by auction part sold: grey and common mixed, 55s to 62s; mixed to fine, 65s to 85s. 485 bags Grenada, 43s to 49s; and the better qualities, 50s to 61s 6d. 781 bags Guayaquil part sold at 49s 6d for mixed. 538 packages other foreign were chiefly taken in, a small parcel of Surinam selling at 64s to 65s per cwt.

COFFEE.—The active demand has rather subsided, the sales latterly being so large that the buyers have supplied present requirements. Business has been done in native Ceylon to arrive at 65s, with guarantee of quality. A few parcels on the spot have sold at easier rates, including a portion of 595 bags by auction at 63s 6d to 64s for good ordinary. The sales of plantation have gone irregularly at from last week's prices to 2s reduction. 1,722 casks 178 barrels 578 bags only partly sold: low middling to middling, 70s to 76s; bold and superior, 76s 6d to 83s 6d; grey, 68s 6d to 76s 6d. 678 bales, &c., Mocha were chiefly taken in. A few lots low and broken sold at 88s 6d. 2,114 cases 290 casks 1,457 bags East India partly found buyers at rather lower rates. The portion disposed of was chiefly Wynaad kinds, at 66s to 76s for pale to bold. Courtallam was partly disposed of at previous rates for small lots. Native Madras, &c, at 63s 6d to 65s did not quite maintain last week's quotations. There have not been any further sales of Costa Rica. 452 bags washed Rio partly sold at 70s to 71s. 281 bags Guatimala realised 66s to 67s per cwt. 11 packages Jamaica were bought in. The stock

in London is 6,430 tons less than at the corresponding date last year, being 21,300 tons, against 27,710 tons and 26,220 tons respectively. Accounts of the Ceylon crop of the season 1871-72 are unfavourable.

TEA.—The absence of arrivals leaves the market bare of qualities most wanted, viz., black leaf congou of fair common to good quality. These grades would find ready buyers if here. The public sales this week have comprised only 4,150 packages, which went at steady prices. There have been delivered for home consumption about 6,000,000 lbs more than last year. Stock in the kingdom 73,000,000 lbs, being about 500,000 lbs in excess.

RICE.—Transactions of fair extent have occurred by private contract. On the spot, white Bengal sold at 11s 3d to 12s 3d; Ballam and Moonghy, 10s to 10s 6d; Rangoon, 10s to 10s 7½d; Madras, 10s 3d to 11s; Raree, 9s 3d to 9s 4½d. 9,100 bags Madras, by auction, part sold at 10s 3d to 10s 6d for middling. 1,263 bags white Bengal at 11s 7½d to 12s. 5,000 bags Moulmein are reported at 10s 3d, ex quay; a parcel of white Bengal, at 10s 4½d, same terms; and 250 tons Madras, to arrive, at 10s 4½d per cwt, ex quay. There were not any floating cargoes of soft grain sold to yesterday.

IMPORTS and DELIVERIES of RICE to Oct. 28, with STOCKS on hand.

	1871.		1870.		1869.		1868.

Stock	42000	...	47000	...	47800	...	32700

SAGO FLOUR.—784 bags Singapore rather more than half sold at 16s 6d per cwt, being dearer. The remainder bought in at that price.

SAGO.—608 bags partly met with buyers at steady rates. Good small, 15s 6d to 16s; bold, 17s 6d to 18s. One lot bold medium at 18s 6d per cwt, being about previous rates.

TAPIOCA.—1,129 bags partly sold at 2d to 2⅝d per lb for Singapore, and 259 bags pearl tapioca, at 20s per cwt.

WHITE PEPPER.—Several parcels being pressed for sale prices have fallen fully 1d per lb. 1,008 bags Singapore by auction were about half disposed of at 1s 1⅞d to 1s 2d, prompt 14 days, and 1s 2¼d to 1s 2½d for full prompt, "without reserve." During the week further business has been done for arrival. Singapore, 1s 1d to 1s 1½d; Penang, 1s per lb.

BLACK PEPPER.—By private contract 6⅛d has been paid for Penang on the spot, and 6⅜d afloat. The market is quiet, and yesterday's sales passed off flatly, and 817 bags Singapore were chiefly withdrawn. A small quantity very low grey sold at 6⅞d, cash. 720 bags Trang were bought in at 7⅛d. 449 bags Malabar were partly disposed of at 7¼d for half-heavy greyish.

OTHER SPICES.—The public sales have been smaller than usual. 61 cases Penang nutmegs were chiefly bought in, being held for higher prices. A few lots small sold at 3s to 3s 1d. 2 cases mace brought extreme rates. 1,129 bags pimento met with a good demand at 2⅜d to 2¾d. 570 bags cinnamon chips sold at 3½d to 9d; bark, 2d per lb. 118 cases Cochin ginger were mostly wormy qualities in small lots, and sold in accordance. Privately African has found buyers at 36s. By auction 63 bags common sold at 25s per cwt. There have not been any public sales of Jamaica.

SALTPETRE.—There has been a speculative demand, and rather larger business for arrival done at advancing prices, viz., about 1,300 tons. The later sales on usual conditions, 32s to 32s 6d: refraction, 20 to 12, 28s 9d to 31s. 2,500 bags on the spot: refraction 8½ to 4¼, 31s 9d to 32s 6d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to Oct. 28, with STOCKS on hand.

	1871.		1870.		1869.		1868.
Imported ..... tons	9270	...	8810	...	9440	...	5880
Total delivered	9690	...	11500	...	8950	...	9250
Stock	1980	...	2150	...	4670	...	4760

INDIGO.—At the sales of Guatimala, &c, middling to good qualities of new import went 3d to 9d dearer, but old and inferior were lower. New Grenada of desirable quality also went 6d to 9d higher. Of 2,850 serons brought forward, about 1,710 sold.

COCHINEAL.—There has been an arrival of 1,373 serons, &c., Teneriffe, but the stock is much reduced. At the sales (postponed from Wednesday to yesterday) 2,208 bags about half sold at previous rates to 1d decline. Teneriffe silvers, 2s 3d to 2s 7d; blacks, 2s 4d to 3s 3d; Honduras silvers, 2s 2d to 2s 7d; blacks, 2s 6d to 3s per lb.

OTHER DRYSALTERY GOODS.—Cutch has become quiet, at last week's quotations. A parcel of damaged and heated by auction sold at 22s 6d to 24s. Gambier in firmer, several sales being made at 16s 9d to 17s 3d, ex ship. A few parcels of turmeric partly sold. Madras, 16s 6d to 17s 9d; Bengal taken in. 53 chests lac dye were bought in.

SHELLAC.—At the public sales 566 chests part sold on rather higher terms, including fine orange at 147s 6d to 150s. Sales of garnet afloat at 5*l* 17s 6d to 6*l* 2s 6d per cwt.

JUTE.—The lower qualities have again declined about 10s. At the sales on Wednesday 11,073 bales about one-fourth part sold at 17*l* 10s to 24*l*, a few good at 26*l* 5s. Business of limited extent has been done for arrival during the week. Trade in Dundee remains without alteration, but jute yarns are in great demand.

HEMP.—A few parcels of Manila have changed hands at 42*l* to 49*l* 10s. There have not been any public sales. Russian was bought in. Clean Petersburg 35*l* to 35*l* 10s per ton.

METALS.—The markets have shown increased activity. Extensive sales have been effected in Scotch pig iron at advancing prices up to 66s cash, being about 3s dearer. Other kinds steady. Speculative operations in Straits tin have led to an important advance, the closing prices yesterday being 139*l* to 140*l* on the spot and to arrive, or fully 3*l* higher than last week. The deliveries are larger and the stock much reduced, viz., to 920 tons. Many sales have been effected in spelter at enhanced prices. Silesian, 19*l* to 19*l* 10s; also afloat, including Rhenish at 18*l* 17s 6d to 19*l* 7s 6d. The stock in London has decreased to 3,620 tons, and in the kingdom to 4,620 tons. Prices are higher. Copper may be quoted steady. Chili, 63*l* 15s to 69*l*. Walaroo, 76*l* 10s per ton.

LINSEED.—The market is rather quiet. Calcutta, 63s; October to December, 63s to 63s 6d; Black Sea, &c, afloat at 61s 6d to 62s per quarter.

OILS.—Common fish oils are without alteration. Pale seal, 34*l*, but colonial sperm has sold in quantity at 81*l*, at which there are still buyers. Olive quiet, although the later reports confirm a deficiency in the crop. English brown rape is firmer, and during the week has improved in value. The market since has become quiet. Latest sales on the spot were at 45*l* 10s to 45*l* 15s; 45*l* 15s to 46*l* November and December; and 46*l* 10s first four months of 1871. Refined, 47*l* 10s to 48*l*; foreign, 50*l*. Linseed on the spot scarce, and worth 34*l* 15s for immediate delivery. A large quantity sold for November and December at 34*l*, and 5s less January to April. Palm has been steady. Fine Lagos, 38*l* to 38*l* 10s; and by some 39*l* demanded. A large business in Ceylon cocoa-nut for arrival, up to 39*l*. Fine on the spot can be bought at rather less, and common at 38*l*. Fine Cochin cocoa-nut scarce at 51*l* to 51*l* 10s per ton. Inferior sorts nominal.

PETROLEUM is quiet. American refined, 1s 5¾d to 1s 6½d. Delivery next four months, 1s 5¾d to 1s 6d per gallon.

SPIRITS TURPENTINE.—French advanced to 47s. American steady at 48s per cwt.

TALLOW.—A quiet tone pervades the market, and prices of Russian are rather lower, viz., 47s 3d to 47s 6d spot and next month, and 48s 3d to 48s 6d March. Old quoted 47s. There will be about 1,200 casks Australian offered by auction this afternoon.

PARTICULARS OF TALLOW—Monday, Oct. 30. 1871.

HIDES.—At the sales of East India yesterday the kips went dearer in most instances, and buffalo hides at a slight advance. There were 148,930 hides brought forward, and 17,630 bought in, leaving over 131,000 sold.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is firm. 444 bags Bengal by auction sold at 29s to 30s 6d for Gurpatta. 441 bags Natal at 26s to 30s 6d for brown and yellow. Barbadoes by auction, 28s 6d to 34s. A large business in West India, viz., 1,203 casks, making 2,621 casks for the week. 850 tons Ilo Ilo Manila have sold for arrival at 20s. 3,000 bags low brown unclayed at 22s.

COFFEE.—487 casks 274 barrels and bags plantation Ceylon part sold at the previous decline. 1,025 bags native were chiefly taken in above the value. Of 113 cases 1,266 bags East India a portion only sold upon former terms. 30 bales Mocha were sold at 87s for mixed greenish. 218 bags Guatimala at 68s.

RICE.—1,766 bags Madras were bought in at 10s 9d.

GAMBIER.—1,093 bales by auction sold chiefly at 17s 3d.

TIN.—Straits, 140*l* cash. Scotch pig iron, 66s per ton cash. Spelter, 19*l* 10s per ton for Silesian.

OILS.—474 casks cocoa-nut by auction part sold: Ceylon, 38*l* 10s to 39*l*; Sydney, &c., 34*l* to 38*l* 10s. 292 casks palm about half sold at 36*l* to 36*l* 10s per ton for low quality. 38 casks sperm were bought in; also 640 casks common fish oil.

TALLOW.—Petersburg new, 47s 3d to 47s 6d; March, 48s 3d to 48s 6d; and 1,179 casks Australian by auction went cheaper by 6d per cwt. Mutton, 45s 6d to 48s; beef up to 45s 6d per cwt. Town tallow the same as last Friday.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that large arrivals of oranges from Spain and Portugal have been received, and sold freely. Messina lemons of the new crop to hand, but are too green to be saleable at present. Almeria grapes maintain the high price obtained of late. Black Spanish Brazil and chestnuts in demand. West India cocoa-nuts of good quality in request.

DRY FRUIT.—Currants have been without any trade for three weeks, and dealers are sufficiently stocked to abstain from buying for some week or two more. The arrivals having been heavy for some weeks past, are now lighter. Valencias sell irregularly on a firm but inactive market. Sultanas dull. Figs selling freely.

ENGLISH WOOL.—A good demand for half-bred and long wools.

COLONIAL WOOL.—The market remains very firm.

FLAX.—Market firm.

HEMP.—Market firm, and a considerable amount of business done the past week in Russian. Manila firm.

SILK.—Market depressed, and prices generally weaker, except for best silk.

SEEDS.—The seed trade is unaltered.

TOBACCO.—There has been rather a better inquiry for North American tobacco during the past week, and although the sales effected have not been large, the market has presented a more active appearance. Prices continue unchanged, full rates are paid for really fine descriptions. In substitutes and segar tobacco there has been a fair business done.

LEATHER.—The leather trade of the past week has shown about an average demand, with little or no variation in prices. At Leadenhall on Tuesday the supply was moderate, but with a small attendance of buyers, the transactions were limited. The articles most wanted continue to be crop hides, the lightest English butts, prime English shoulders, for which the demand was very urgent, good heavy calf skins, and English horse hides.

METALS.—We have had rather more life in things this week. Copper has been in moderate demand. Iron continues to command high prices, and that freely. Tin has again advanced about 40s per ton on foreign. Spelter is in demand, and rather dearer. Lead is quiet. Tin plates have become more inquired for, and are dearer to buy.

METROPOLITAN CATTLE MARKET.

MONDAY, Oct. 30.—The total imports of foreign stock into London

last week amounted to 19,633 head. In the corresponding week in 1870, we received 17,109; in 1869, 11,141; in 1868, 8,480 head; and in 1867, 8,168 head.

There has been a rather larger supply of beasts in the market. Foreign breeds have been well represented so far as number has been concerned, and English stock has been more freely offered, but the general quality of the supply has been indifferent. A quiet tone has pervaded the demand throughout, but prices have been without alteration. The choicest English breeds have been disposed of at 5s 8d to 5s 10d, whilst prime foreigners have made 5s 2d to 5s 4d per 8 lbs. The show of sheep has again been only moderate. English breeds have been scarce. The demand has not been active; but the tone has been firm, and prices have been well supported. The best Downs and half-breds have changed hands at 6s 10d to 7s per 8 lbs. Calves have been in short supply and moderate request, at full prices. Pigs have been disposed of at about late rates.

SUPPLIES ON SALE.

HOP MARKET.

BOROUGH, Friday, Nov. 3.—There has been a good business transacted in fine new hops, at extreme prices. Other qualities have been in better request, at prices tending upwards. Yearlings have sold freely, at an occasional advance. Mid and East Kent, 10*l* to 16*l* 16s; Weald of Kent, 8*l* 10s to 10*l* 10s; Sussex. 7*l* 5s to 9*l* 9s; Farnham and country, 11*l* to 16*l*. Yearlings: Mid and East Kent, 3*l* to 6*l* 10s; Weald of Kent, 3*l* to 5*l* 15s; Sussex, 3*l* to 5*l*; Farnham and country, 4*l* 10s to 6*l*; olds, 1*l* 5s to 2*l*.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Nov. 3.—There has been a moderate supply of potatoes on sale. The trade has been quiet at our quotations:—Regents, 70s to 110s; flukes, 100s to 120s; rocks, 70s to 85s; Victorias, 110s to 120s.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 3.—There appears to be a rather better feeling in our market this week, transactions to a fair extent have taken place, and prices are well maintained.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 3.—The attendance was small to-day, and a quiet tone prevailed. Wheat declined 1d since Tuesday. Flour was 6d to 1s down. Beans were quiet. Saidi, 34s 3d; mixed, 33s 3d. Peas, 46s. Oats and oatmeal were unchanged. Indian corn, 6d dearer; mixed corn, 33s to 33s 9d.

WAKEFIELD, Friday, Nov. 3.—There was a very limited demand for wheat to-day, but there was no material change to note in the value of fine parcels. The barley trade was dull, and prices were again cheaper. Beans and peas were unaltered. Another account says that though the wheat trade is quiet, it is also very strong.

The Gazette.

TUESDAY, Oct. 31.

BANKRUPTS.

James Briggs, Yeadon, Yorkshire, mechanist.
Jane Curry, Newcastle-upon-Tyne, builder.
Oswald Earle, Liverpool, merchant.

Bonn-on-the-Rhine, founded in 1847.—The Principal, Herr THOMAS, prepares Gentlemen's Sons for the Army, Civil Service, and Mercantile pursuits. German and French are constantly spken in his establishment, where the comforts of an English home are provided by an English lady (Mrs Thomas). The highest references given.—Apply to Herrn Director THOMAS Heer Strasse, Bon-on-the-Rhine.—Frequent escorts

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.
Mr WHITE, 228 Piccadilly, London.
Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE CAPS, &c.,

for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.
WHITE, Manufacturer, 228 Piccadilly, London.

ROYAL PRINCESS'S THEATRE.

Sole Lessee—Mr Benjamin Webster.
Managers—Messrs B. Webster and F. B. Chatterton.
112th, 113th, 114th, 115th, 116th, and 117th nights of
EILEEN OGE.

On Monday and during the week at 7.45, EILEEN OGE; OR, DARK'S THE HOUR BEFORE THE DAWN. By Edmund Falconer. With new and beautiful scenery by F. Lloyds. Dances, &c., by Mr J. Cormack. Music composed and arranged by Mr W. C. Levey. The drama produced under the direction of Mr B. Webster. Characters by Mr Edmund Falconer, Messrs George Jordan, J. G. Shore, Barrett, Howard Russell, F. Moreland, C. Seyton, H. Clifford, R. Romer, Cullen, Morris, Travers; Misses R. Leclercq, E. Stuart, Hunsworth, and Mrs R. Power. Preceded by a new Farce by F. Herbert, entitled A CRIMINAL COUPLE. Messrs Barrett, C. Seyton, Cullen, and Miss Lennox Grey. To conclude with a new and original Farce, entitled a MISSIVE FROM THE CLOUDS. Messrs C. Seyton, F. Charles, and Cullen; Misses E. Stuart, L. Gray, and Hudspeth. Doors open at 6.30, commence at 7. Box office open from 10 till 5 daily.

ROYAL STRAND THEATRE.

Sole Lessee and Manageress—Mrs Swanborough.
On Monday, and until further notice, the performance will commence at seven o'clock with the laughable farce, LODGERS and DODGERS. Followed by, at a quarter to eight, Coleman's celebrated comedy, called the HEIR-AT-LAW. Mr John S. Clarke, Messrs H. Crouch, H. J. Turner, W. Joyce, J. Wallace, E. Chamberlaine, and Harry Paulton; Mesdames L. Claire, Raymond, and Ada Swanborough. To conclude with a grand, entirely new, and original burlesque, written by the Brothers Paulton, entitled the THREE MUSKET-DEARS, with a Little One In. The new and splendid scenery painted by H. P. Hall; the beautiful dresses by Mr May, Mrs Richardson, and assistants; properties by Mr Ball; machinery by Mr Bevington; and the music composed and arranged by Mr J. Fitzgerald. The burlesque produced under the direction of Mrs Swanborough and Messrs J. Wallace, and Paulton. Characters supported by the following powerful caste:—Messrs E. Terry, H. J. Turner, E. Chamberlaine, H. Carter, T. Edge, and Harry Paulton; Mesdames L. Claire, T. Venn, L. Wright, O. Armstrong, R. Cullen, Bateman, Pascall, Lennox, and a numerous corps de ballet. Doors open at half-past six. Secure your seats at the box-office, or at the libraries.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.
It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.
Adulterations.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.
Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."
THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.
"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—John Bull, September 14, 1850.

BROKER—William Darley Bentley, Esq., 10 Angel court, Throgmorton street, E.C.

SECRETARY (PRO TEM.)—Mr George Rogers.

OFFICE—1 Basinghall street.

PROSPECTUS.

This Company has been formed for the manufacture of Bessemer Steel, the steadily increasing demand for which greatly exceeds the present means of supply, and also for the manufacture of Wrought Iron, Steel, and Compound Guns for siege and naval purposes, together with any class of Field Guns and Carriages, Mitrailleurs, Shot, Shell, and other projectiles, as well as small Arms.

There are few factories in the United Kingdom used for or adapted to the manufacture of Ordnance on a large scale. For the manufacture of Bessemer Steel there is no establishment in London whatever, the nearest Steel works being at a distance of 130 miles, involving expensive railway dues, and a delay in delivery of all the Steel employed in the numerous engineering and ship-building establishments in London, or shipped from the Thames, and also on all Steel Rails, Wheel-tyres, and Axles, employed on the Metropolitan and other Railways south of the Thames.

With a view to the advantage of being in a position to execute orders without the delay consequent on the erection of new works, and to avoid the large expenditure necessitated thereby at present, the Directors have rented, on most advantageous terms, the existing premises built a few years ago by Henry Bessemer, Esq., on which are already fixed a pair of 40-horse engines, boilers, steam hammers, with steel-converting apparatus, embodying the latest improvements, and also a large quantity of machinery, plant, and tools fixed and ready to commence work almost immediately.

These premises occupy a most commanding position on the Thames at East Greenwich, and comprise a large factory with subsidiary shops, sheds, and offices, about four acres of land, with 280 feet of wharf frontage to the Thames, and arrangements have been made with the Thames Conservancy for the erection of a landing stage and cranes, so as to land and ship all materials and goods direct from the wharf.

The Directors have agreed to pay an annual rent of £1,800 for the premises, including payment for the use of the machinery, and for the depreciation of the same, on a lease of twenty-one years, determinable at the option of the Company at the end of the first seven or fourteen years, with the privilege also of purchasing the ground lease. The Board will lay aside a part of the profits of each year, and invest them in the names of Sir John Lubbock, Baronet, and Henry Bessemer, junior, Esq., who have consented to act as Trustees, to provide a fund for the purchase of the works hereafter, or for such other purposes as may be deemed desirable by the Board. It is further proposed to adapt the works, by erecting additional machinery, to the manufacture of every class of gun now made in this country, as well as for rolling steel rails, tyers, and for making the largest kind of steel forgings.

Although coals are about 12s per ton dearer in London than in the North, this is amply compensated by the lesser cost of Swedish pig iron in the Thames, which will be the material used by the Company for guns and gun tubes, while it largely enters into the manufacture of the better kinds of Bessemer steel, of which anchors, piston rods, crank shafts, and wheel tyres, now so much in demand, are made. Swedish iron is about 10s cheaper in the Thames than in Sheffield, and as it takes about a ton and one-sixth of pig iron to make one ton of steel, the saving in the metal will be 12s per ton of steel, while the extra cost of 4 cwt of coke employed to melt and convert the pig iron into steel ingots will amount to 3s, leaving a balance of 9s in favour of the Company, where Swedish pig iron is used, and in other cases the carriage to London of pig iron and coals will cost less than the carriage of finished steel articles from the works in the North. The moderate rental paid for the works is in itself a full equivalent for any difference in the price of labour, which is also less difficult to manage in London than it is under the trade restrictions of Sheffield.

Large and remunerative contracts have been offered, and will be entered into as soon as the Company is in a position to accept them. The extraordinary profits realised by all manufacturers of Bessemer Steel are well known.

The draft of a lease from Messrs Bessemer can be seen at the Office of the Solicitors of the Company.

Applications for shares, addressed to the Directors, may be made to the Bankers, Brokers, and to the Secretary, at the Offices of the Company, 1 Basinghall street; but no application will be considered unless a deposit of £1 for each share applied for shall have been previously made with the Bankers of the Company. Should a smaller number of shares than those applied for be allotted, the balance of the sum deposited with the Bankers will be appropriated towards the payment of the £3 per share payable on allotment, or in the event of no allotment being made, the whole of the deposit will be returned.

SHIRTS.—THE "LONDON DOUBLE SHRUNK" FLANNEL SHIRTS.—Messrs R. FORD and CO., have all their new patterns of their double shrunk flannel shirts now ready. Patterns sent free, with self-measure. The "London Double Shrunk" are the perfection of flannel shirts. No quantity of washing will ever shrink them.—Richd. Ford and Co., 38 Poultry; Branch, 308 Oxford street, W.

PROSPECTUS.

This Company is formed for the purpose of purchasing and working certain patent rights and privileges which have been granted for the exclusive manufacture of the Patent British Asphalte in the United Kingdom.

The Patent British Asphalte is believed to combine every advantage of other Asphaltes, with extra solidity and safety for horses. Being entirely a home production, the delay and expenses of importation from abroad are avoided; and the whole of the materials being always at hand, and very inexpensive, this Asphalte can be produced and laid at a price far below that of the foreign material; in fact, it can be laid complete, with proper concrete foundation, at twelve shillings per square yard.

The advantages claimed for the Patent British Asphalte are as follows:—

The surface, being partially metallic, is remarkable for its resistence to wear and tear.

It can be laid with a rough surface for public roads, affording a firm foothold for horses, or perfectly smoothed for the paving of court yards, terraces, floorings, and other domestic purposes.

While hard and solid, it is sufficiently elastic.

It is adapted by its peculiar composition, to bear the vicissitudes of heat and cold, even in extreme climates.

It can be laid in solid blocks without heat; or it can be spread as other Asphalte, and on existing road foundations.

The materials of which it is composed are practically inexhaustible, and are cheaply obtainable throughout the United Kingdom.

It is not only far less costly than any other asphaltes in the market, but more economical than ordinary granite-paving.

The Company is not burdened with a heavy outlay for the purchase of a foreign mine.

It has no annual charge in the shape of royalties.

It is not liable to the disadvantages arising from the cost, uncertainty, and delay of importation.

It will be seen by the testimonials attached that the material has been submitted to some of the highest authorities; but even better proof of the practical value of the invention is afforded by proposals already made to the patentees with reference to orders which, while they will only require a few months to execute, will ensure a handsome dividend on the capital.

At twelve shillings per square yard, the profit is very considerable, and the facility with which the works of this Company can be carried out, together with the moderate cost of the material and manufacture, and the comparatively small capital employed, ensure a very large return in the shape of dividends to the shareholders.

Power is taken in the Articles of Association for the sale of the patent rights for the use of the Asphalte in the cities and towns of the United Kingdom, and from this source a very considerable revenue is also anticipated.

Mr Rogers, the patentee, and Mr Whitfield, late Clerk of the Works to the Limmer Company, have placed their services at the command of the Board of Directors.

The increasing approval with which Asphalte Paving is regarded by the public affords undeniable proof that a field exists for practically unlimited operations; and in the event of a further issue of capital being required, preference will be given to existing shareholders.

The only contract entered into by the Company is dated the 30th day of October, 1871, and is made between Joseph Rogers and Gustave de Meirelles Soares of the one part, and Colonel George Davison, for and on behalf of the Company, of the other part; and is the contract for the purchase of the patent rights and privileges for the United Kingdom for the sum of £28,000, payable as to £15,000 in cash, by instalments, and £13,000 in 1,300 fully paid up shares of £10 each, which will not be entitled to dividend until a dividend at the rate of 10 per cent. per annum shall have been paid upon the ordinary shares of the Company.

A copy of the Memorandum and Articles of Association, and the above contract, may be seen at the Offices of the Company's Solicitors, No. 75 Cornhill, E.C.

If no allotment be made, the deposits will forthwith be returned in full.

Applications for shares to be made to the Bankers, Brokers, or Secretary, at the Offices of the Company.

DUNVILLE'S OLD IRISH WHISKY,

BELFAST, of same quality as that supplied to the International Exhibition of 1862, Dublin Exhibition of 1865, Paris Exhibition of 1867, and now regularly to the House of Lords, the quality of which is equal to the finest French brandy, may be had direct from Belfast, in butts, hogsheads, quarter-casks, and cases.—Quotations on application to Messrs Dunville and Co., Royal Irish Distilleries, Belfast; or at their London offices, 4 Beaufort buildings, Strand, W.C.

HOLLOWAY'S PILLS.—THE

Grand Requisites.—Nobody will deny the assertion that for man's comfort and happiness pure blood and a sound stomach rank among his first requirements. Both may be safely and inexpensively secured by these admirable pills, which act gently on the weakest frames, and cause no violent shock to the most sensitive system. Holloway's pills have proved themselves competent to deal constitutionally with these infirmities, which descend from parent to offspring, which often mar the brightest of prospects, and throw a constant gloom over youth. These pills purify both the solids and fluids of the body, and by that salutary process rouse every organ to perform naturally its proper function, every nerve its proper duty.

ISSUE OF 3,500 PERPETUAL 9 PER CENT. PREFERENCE SHARES OF £10 EACH (with right to further Dividends, as hereinafter referred to), of

THE NORTHFLEET CHALK QUARRIES (Limited).

Capital, £60,000, in 2,500 Ordinary Shares of £10 each, and 3,500 Perpetual 9 per Cent. Preference Shares of £10 each.

Price of issue, par, or £10 per preference share, payable as follows:—

£1 per share on application.
£4 — a lotment.
£2 10s — 15th December, 1871.
£2 10s — 15th January, 1872.

With the option to subscribers to pay up the full amount on allotment.

The amount required to provide for the dividends on the preference shares will be £3,150 per annum, while the profits from a contract definitively entered into are estimated at £12,600 per annum, equal to 20 per cent. per annum on the entire capital.

AUDITOR.

David S. Derry, Esq., Secretary, English and Foreign Credit Company.

OFFICES—17 Gracechurch street, London, E.C.

PARTICULARS OF ISSUE.

The Directors of this Company are ready to receive applications for 3,500 Perpetual 9 per cent. Preference Shares of £10 each, which are entitled in perpetuity to a preferential and priority dividend over the ordinary share capital of the Company, with a further right to participate in the surplus profits after 9 per cent. per annum has been paid on the ordinary share capital.

The preference shares now offered for subscription will be allotted at par, namely, £10 for each preference share, payable at the dates before mentioned, or at the option of the subscribers the whole amount may be paid up on allotment.

Dividend will accrue on each instalment from the date of payment of the same, or if they are fully paid-up on allotment, the preferential dividend at 9 per cent. per annum (which will absorb the sum of £3,150 per annum only) will accrue on the full £10, payable half-yearly out of the profits, which, as hereinafter shown, are estimated at £12,600 per annum, or four times the amount required to pay the preference dividend. It may, therefore, looking at the contracts already entered into for working the quarries, be considered practically guaranteed.

The whole of the Preference Share Capital of the Company is represented by the above 3,500 Preference Shares, for which subscriptions will now be received, and no dividend can be paid on the Ordinary Share Capital until 9 per cent. has in each year been duly paid upon the preference shares, and when the ordinary shares have received 9 per cent., all the surplus profit be divided rateably between the Preference and Ordinary shareholders.

Share certificates will be issued when the shares are fully paid up, and preference will be given in the allotment to those desirous to pay up in full for investment.

If no allotment be made, the deposit will be returned in full forthwith without deduction.

The reports on the properties of the Company, the agreement for purchase, and also the Articles of Association, can be seen at the Offices of the Solicitors.

Applications, to be made in the enclosed form, and if accompanied by a remittance of £1 per share applied for, may be forwarded to the Bankers of the Company, or to the Secretary, at the Company's Offices.

London, November 3rd, 1871.

PROSPECTUS.

1. The object for which the Company is established is to acquire the lease of and develop extensive chalk pits and quarries situate at Northfleet, Kent, and also to acquire the lease of a certain wharf, land, and premises known as Scott's Wharf, Northfleet, together with two licenses for the construction of a tramway and tunnel between the aforesaid chalk pits and quarries and the said wharf.

2. The chalk quarries at Northfleet are well known for the excellence of their produce, and its adaptability to the manufacture of lime, whiting, and best cements, particularly the "block" chalk.

3. The chalk upon the lands to be acquired by this Company is principally the "block" chalk. It is favourably situated for easy quarrying, and by the acquisition of the two licenses for the construction of the tunnel and tramway from the quarries to the wharf at the river side, the Company will be able to raise and put the chalk into barges at a comparatively trifling cost. A contract has already been entered into, with a responsible contractor, to construct the tramway, make the tunnel, and complete all necessary work, to place the quarries in working condition within a period of six months; under which he is also guarantees to work the quarries, raise and put the chalk on board ship or railway truck, at the rate of 250,000 tons a year, at prices that at present rates will, after making deductions for every ascertained expense, leave a profit fairly calculated at the rate of £12,600 per annum; therefore, it may be said that a 20 per cent. dividend is practically guaranteed on the entire capital of the Company.

4. An agreement has been entered into for the purchase and acquisition of the quarries, lease of wharf, and the other interests specified therein, dated the 1st day of November, 1871, under which the said several properties are to be acquired, in consideration of an allotment of two thousand five hundred fully-paid ordinary or deferred shares, and a payment of twenty-five thousand pounds in money, and this agreement can be inspected at the Offices of the Solicitors.

5. The report on the quarries annexed to the prospectus is made by a practical authority on the subject, and this, taken with the advantageous arrangements above mentioned, convinces the Directors that they are submitting an investment to the public of quite an exceptional character. The Directors invite a careful perusal of this report

6. Samples of the chalk, and all other information respecting the Company, may be obtained on application to the Secretary, at the Offices.

Offices—17 Gracechurch street, London, E.C.,
November 3, 1871.

FORM OF APPLICATION.
(To be Retained by the Bankers.)
To the Directors of the Northfleet Chalk Quarries (Limited.)

Gentlemen,—Having paid to your credit at your Bankers the sum of pounds, being £1 per share on my application for Preference Shares of £10 each, bearing 9 per cent. preferential dividend, of the Northfleet Chalk Quarries, Limited, I request you to allot to me that or any less number of the said Preference Shares, and I hereby agree to accept the same, and to pay the balance in respect of such Preference Shares, in terms of the prospectus, dated the 1st day of November, 1871.

Branches at Smyrna, Beyrout, Salonica, and Alexandria; and Agencies at Larnica (Cyprus), Paris, and London.

The London Agency receives money on deposit for fixed periods at rates to be agreed upon. It grants Credits on Constantinople, Smyrna, Beyrout, Salonica, Alexandria, and Larnica; purchases or collects Bills drawn on those places, and undertakes the negotiation of all Turkish Government securities and the collection of the coupons.

The London Agency will also execute orders through the Branches of the Imperial Ottoman Bank at Salonica, Smyrna, Beyrout, and Alexandria, for the purchase of produce, such as Cotton, Wool, Silk, Madder roots, Valonea, Opium, Grain, &c.

Terms may be ascertained on application at the Offices of the London Agency, No. 26 Throgmorton street, E.C. E. A. BRENAN, Manager.

CHARTERED BANK OF INDIA, AUSTRALIA, and CHINA,

Hatton court, Threadneedle street, London.
Incorporated by Royal Charter.
Paid-up Capital £800,000

COURT OF DIRECTORS, 1871-72.

CHAIRMAN—Andrew Cassels, Esq.

James Fraser, Esq. | William Macnaughtan, Esq
John Jones, Esq. | Joseph R. Morrison Esq.
Thomas Lancaster, Esq. | Ludwig Wiese, Esq.

BRANCHES AND AGENCIES.

Bombay, | Rangoon, | Hong Kong,
Calcutta, | Singapore, | Shanghai,
Akyab, | Batavia, | Hankow.

The Corporation buy and sell and receive for collection Bills of Exchange payable at the above-named places; issue Letters of Credit; undertake the purchase and Sale of Indian Government and other Securities; hold them for safe custody; and receive interest or dividends as they become due.

Deposits of money are received for not less than 12 months, bearing interest at five per cent. per annum.

THE AGRA BANK (LIMITED).

ESTABLISHED IN 1833.—CAPITAL, £1,000,000.
HEAD OFFICE—Nicholas lane, Lombard street, London.

BANKERS.

Messrs Glyn, Mills, Currie, and Co., the National Bank of Scotland, and the Bank of England.

BRANCHES in Edinburgh, Calcutta, Bombay, Madras, Kurrachee, Agra, Lahore, Shanghai, Hong Kong.

CURRENT ACCOUNTS are kept at the Head Office on the terms customary with London bankers, and interest allowed when the credit balance does not fall below £100.

DEPOSITS received for fixed periods on the following terms, viz.:—

At 5 per cent. per annum, subject to 12 months' notice of withdrawal.

For shorter periods deposits will be received on terms to be agreed upon.

BILLS issued at the current exchange of the day on any of the branches of the Bank free of extra charge, and approved bills purchased or sent for collection.

SALES AND PURCHASES effected in British and foreign securities, in East India stock and loans, and the safe custody of the same undertaken.

Interest drawn, and army, navy, and civil pay and pensions realised.

Every other description of banking business and money agency, British and Indian, transacted.

J. THOMSON, Chairman.

On October 28 was Published, No. X., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for October gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains

A FINANCIAL RECORD OF THE MONTH;

New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to October 25.

Advertisements for the next Number, to be published on November 25, must be sent, to insure insertion, on or before November 23.

The December Number of the INVESTOR'S MONTHLY MANUAL will give, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the latest quotations for 1870 (so as to indicate the Exact Movement during the Twelve Months), a Complete Directory, the names of the Markets where each Security is chiefly dealt in, a Financial History of the Year 1871 (including a Tabulated Chronicle of Events), besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. A copious Index will be added for purposes of reference.

This Double Number will be published on Saturday, the 30th of December.

OFFICE—340 Strand.

Erratum.—In our first article in last week's issue the figures at the commencement showing the private deposits in the Bank at the present time and this time last year were by a clerical error misplaced. It should have been stated that the deposits last year were 18,186,000*l* and this year 23,294,000*l*.

THE MONEY MARKET.

The position is exactly the same as we described last week, except that the Bank of England has received 562,000*l* additional bullion. There are some appearances that the import of gold from the continent has now ceased, and if that be so the Bank of England is not likely to get much richer. We are always liable to many miscellaneous demands for coin and bullion, and now that the Bank of France does not pay in specie everyone who wants gold urgently must go to the Bank of England.

There are only two contingencies which could vitally alter our present situation before the end of the month, when the large payment to Germany becomes due. One is that the Bank of France might sell some of its bullion, but this is not likely, as its liabilities have augmented of late most rapidly, and even her present state is giving anxiety to all the good financiers in Europe. If she began to sell her gold in the market, her credit would be affected materially. The second possible event is that the Berlin Government might lend out some of its present gold, or make some arrangements as to the gold it has to receive. But this is not probable. The policy of the Berlin Government is not wise, but it seems fixed, and it is easily described—to get all the hard cash they can, and not to pay it away before they are obliged.

A most strange assertion has been put forward, that the elevation by the Bank of England of their rate of discount to 5 per cent., and its consistent maintenance there, has not augmented their reserve. It was, as the following figures show, only after the Bank adopted this step, and after it had time to affect the exchanges, that their reserve augmented at all:—

Date.		Bullion.	Banking Reserve.	Rate of Discount.
		£	£	%
August	2	26,213,138	15,488,908	2
	9	25,086,466	14,609,481	—
	16	25,338,609	15,238,769	—
	23	25,360,242	15,400,252	—
	30	25,044,463	15,196,108	—
September	6	24,816,585	14,727,040	—
	13	24,158,814	14,423,619	—
	20	23,497,160	13,711,115	3
	27	21,090,088	11,077,113	4
October	4	20,214,524	8,919,849	—
	11	19,172,898	8,064,963	5
	18	20,353,421	9,559,361	—
	25	21,655,266	11,571,691	—
November	1	22,512,363	12,054,383	—
	8	23,074,930	12,930,685	—

It is quite true that it is the market rate, and not the Bank rate, which governs the Exchanges. But in all cases the terms fixed by the Bank have a considerable influence on the market rate. If at this moment the Bank was to reduce its rate to a level with the present market rate, the market would fall again. The billbrokers and the banks which pay interest will always work below the Bank rate; they must employ their money, and will outstrip the Bank in the competition for bills. Unquestionably the high rate charged by the Bank has limited the demand for bills, as a whole, and so maintained the market rate of discount. The charge against the Bank is

not that they kept up and raised their rate, and in that way to a considerable extent affected the market rate, but that they did not also adopt other means of raising the market rate to a nearer equality with their own. But on that subject we wrote at length last week. We can only hope that the means which have in fact been taken will be found on trial to be sufficient to produce the result desired.

THE NEGOTIATION AS TO THE FRENCH TREATY.

THE question whether the Treaty with France shall or shall not be renewed is at the outset perplexed by a great difficulty. We are negotiating with a Government which has no sound knowledge of the subject. The principal aim of the French Government ought to be to benefit the French consumer. It ought to try to obtain for Frenchmen as much or as many good things as it is possible they should have, no matter where those good things may be produced. But M. Thiers and M. Pouyer-Quertier have shown, by a most consistent course of speaking and acting, that this is the last thing they would ever think of. They are in the "pre-economical state of development." They scarcely think of consumers at all: they think all but exclusively of producers. They desire not that as many Frenchmen may enjoy as much as possible, but that as many Frenchmen as possible may make enjoyable things. They are always wanting to make the tailors happy, but they never think of the people who wear coats. Mr Cobden, when he made the Treaty, was anxious that as many Frenchmen should have as many English things as possible, and as many Englishmen have as many French things. But the present French Government, though they are ready the English should have French things, want to prevent the French from having English things, and it is difficult to deal with people so absurd. Their favourite aims, as far as they can indulge them, are not our aims. M. Thiers delights to say that he began life as a Protectionist; that he has always been a Protectionist; that it is now too late to change, and he is a Protectionist still. Though now, as we believe, sobered by power, though, responsible directly to the French nation, he would not venture on much which two years ago, as an irresponsible orator, he would have demanded; yet still at heart he wishes to return to the maximum of Protection, and only regrets he cannot return to complete Protection. His idea of a good tariff is that which makes the French people most frequently consume home produce, when they would, if left to themselves, desire to consume foreign produce.

The French people are vitally interested in the matter, but the English people are scarcely interested. We certainly shall not impose the duties on French wines and French goods which we took off in 1860. We shall have as many of them, or nearly as many, no matter what the French may be unwise enough to do. The French manufacturers, who use English imports as auxiliaries of manufacture, may be deprived of those imports; the French who like English things may be deprived of those English things; but no Englishman will similarly suffer.

It is not of course true that no Englishman would be the worse if the French treaty were abrogated. This is not the case of making a new treaty, but of discontinuing an old one. Much capital has been invested since 1860 in making goods for the French market; and the owners of that capital will be suddenly impoverished if, on a sudden, they are deprived of that market. All quick changes in the course of trade are hurtful to trade; they depreciate costly plant, and destroy the value of a thousand subsidiary appliances.

Nor, though it simplifies the subject, can we agree with those economists who say that the English nation need not care for English exports. Many thinkers—even abstract thinkers, as we consider them—object to commercial treaties on this ground. They say "Look to your imports: these are "what make you richer: these are what you enjoy; take off "the duties on what foreigners send you, and do not trouble "about the duties which foreigners impose on what you have "to send them." Now we quite admit that the whole good of trade comes from imports. There is no use in exporting unless you are paid for your exports, and imports are the payment. But then, how are you to get your imports? Trade is barter; if foreigners will not exchange with you, how are you to exchange with them? If we try the theoretical argument against commercial treaties by an extreme case, as Ricardo would have tried it, it comes to this, that if every foreign nation imposed a prohibitory duty on all things exportable from England, English imports would be as large as before. But this is absurd. Such a total prohibition of English commodities would of course stop English trade; it would take all the value from all our "purchase-money" in foreign markets; and *pro tanto* every foreign duty on English commodities similarly operates: it lessens their buying value in foreign markets—their import-gaining power.

But it is important to observe that in arguing thus we must compare all our imports with all our exports, and not the exports to a particular country with the imports from a particular country. At present we do not pay France directly for all we buy of her directly. The following figures show that we do not:—

	£
Imports from France to England in 1869	33,537,000
Exports* from England to France in 1869.....	11,460,000
Difference.....	22,077,000

* Exports of British and Irish produce only.

If higher duties are imposed on English commodities, the only effect will be that the direct payments will be somewhat smaller. We must make the payment in some other way. But this is clearly a loss to us, for our trade is rendered less efficient. When Governments do not interfere we trade in one way, if they do interfere we trade in a worse, and the difference is our loss, as a rule. Every foreign duty on English commodities is a loss to all Englishmen, for it impairs more or less our power of obtaining foreign commodities. But in such a case as this it does not impair them very much. Our exports to France are now 11,460,000*l*; our whole exports are 190,045,000*l*. Even if we strike 5,000,000*l* off our exports to France, and substitute 5,000,000*l* to some less desirable quarter, we shall not be much hurt; individual traders would know the difference, but as a nation we should not be sensible of it.

The actual situation is this. Ten years from 1860 having expired, the French are at liberty at any time to give a year's notice that they wish to withdraw from the Treaty, and at the expiration of that year the Treaty is at an end. As we understand, they say that they will give such notice, unless we agree to certain augmentations of the duties on English manufactures. These augmentations are not of an excessive kind, and perhaps they might be diminished by negotiation. But in principle the position of M. Thiers is that he will give the requisite notice, and will terminate the Treaty, if he cannot obtain for French manufacturers increased protection. The simple question therefore before the English Government is whether they will consent or not to that additional protection. If they will, M. Thiers will renew the Treaty for five years.

In favour of acceding to it, it is urged that we shall so preserve our present export trade to France, that we shall prevent the entire return of France to Protection, and the consequent weakening of the Free-trade party on the continent, which the moral effect of the Treaty of 1860, and the many consequent treaties which have followed it, undeniably strengthened. Ten years ago, under a Government in this respect at least enlightened, France helped Free-trade; now, under a less enlightened Government, France will retard Free-trade unless we prevent it, and Free-traders—many French Free-traders—ask us to prevent it.

Of the value of our export trade we have already spoken. We have described as fairly as we can what we believe its magnitude to be. But it cannot be injured all at once. A year's notice must be given, and in a year much of the capital, and many of the arrangements now used for French trade may be changed and fitted for other purposes. And though we should not lay too much stress on this, the French have a difficulty in giving the notice. They have other commercial treaties unexpired. That with Switzerland, for example, has several years to run, and Germany has required, by the recent Treaty, that she shall be placed in all commercial matters on the footing of the most favoured nation. If therefore the French now terminate the English Treaty, and impose duties on English manufactures, they will, whenever Germany can compete, be giving an advantage to Germany. And this will not now be popular in France. Perhaps too, when the actual responsibility of imposing new duties came, the French Government would be wiser. We do not expect them to care for the French consumer; it requires a long economical education to do so, simple as it seems. But

they may care for the French producer, and M. Chevalier has shown in an admirable manner that he would be exceedingly hampered by losing the English imports with which he works. Perhaps after all, even if we decline the present proposal, France may not return to Protection. Some Free-traders wish us to consent to the present offer, but others are silent on it, or are hostile to it. What they fear is the return to Protection. But if return be dubious, we can scarcely be asked to assent to a disputed mode of averting a disputable calamity.

On the other hand, it is urged against a consent to these proposals—

First,—that in so doing we shall give a sort of sanction to a return to Protection. It will go through Europe that England has consented to retrace her steps. M. Thiers will make the most of it. He will ask the other nations with whom France has commercial treaties to imitate England. He will say—"If England, the great apostle of Free-trade, consents to "abandon it when we ask her, surely you, who have "never been so eager about it, may easily consent to abandon "it too." In popular estimation, we should certainly withdraw our moral support from Free-trade, in fear of France possibly withdrawing hers.

Secondly,—we should be giving a dangerous sanction to the delusive doctrine that the object of commercial treaties is to get customers and sell goods. It will be said abroad—"England always gives up her sentiment when there is 'busi-"'ness.' She talks eloquently of the happiness of nations, and "the use of Free-trade in the world. But in practice she "looks to her balance sheet. If she cannot in any way sell "all her manufactures, she will swallow her principles, if by "so doing she will be enabled to sell half."

The balance of these arguments seems to us plain, and therefore, though we regret to decline any proposals from France at this time of difficulty, we think we ought to decline these, because accepting them would do France no good, and would, as a matter of general policy, be sure to produce much evil.

THE GERMAN WAR-TREASURE.

Prince Bismarck in his speach on the proposal to put aside forty million thalers (say six millions sterling) in hard cash in the military chest of the Empire, began by saying that he would not argue the point of the expediency of such a war-treasure at all. The history of recent events, he said, had spoken far more eloquently and conclusively for that policy than he could. Had not Prussia had such a war-treasure ready to her hand, she must have lost time in procuring power to borrow, and would have been attacked on the Rhine, and would have had to recover it from the hands perhaps of the barbarous Algerian troops instead of compelling the French to fight on their own soil. But all this does not in the least show the expediency of keeping six millions sterling lying idle in coin in a military chest, when it might be gaining interest and helping to enrich the nation by discharging its natural functions of a needful reserve in the hands of bankers or of an active circulating medium. It only shows that Prince Bismarck hardly understands the financial aspects of the question he was discussing, and confounds the desirability of being ready with full pecuniary means for war at a moment's notice, with the desirability of locking up a quantity of cash in a box. Supposing, for a moment, we grant Prince Bismarck his whole assumption that the Imperial Parliament ought to give the Administration the means of preparing fully for war and mobilising the army without requiring the assent of either House of the Federal Legislature, and of even declaring war without challenging a discussion of the reasons in a popular House like the Assembly, where every word that is said, as Prince Bismarck observed, "echoes through-"out Europe,"—concede all this to the fullest extent, and still it does not follow that an immense treasure in cash should be kept idle against such a contingency. The emergency of war in a country such as Germany, with a great popular army recruited out of the ranks of the people, creates no new drain on the metallic currency. No doubt a good deal is wanted for the payment of the soldiers and the buying up of stores by the commissariat, but then an immense deal is also liberated by the standstill to which such a war brings the business of the country, and there is no reason at all to suppose that more (if so much) will be needed for the whole transactions of Germany in time of war than is wanted for the whole transactions in time of peace. As far as mere coin is concerned, the ordinary circulating medium will amply supply the wants of the Government in time of war, and all that would be needed to satisfy Prince Bismarck's condition that the German Government should be able to mobilise the army on its own responsibility without being obliged to wait for the pecuniary means, is that that Government should receive from Parliament the full power to borrow for such a purpose the same sum which it now proposes to lock up in a box, without calling for the previous sanction of Parliament. It could then raise six millions sterling in the money market at the shortest notice with the greatest ease, and would not be obliged to waste valuable banking resources in time of peace. There can be no real gain, even of a day, in having all this treasure in coin under lock and key. To be available for military purposes, it would have to be distributed, at considerable expense, to the different centres of military operations, whereas if no recourse were had to such old-fashioned devices for securing the sinews of war, the natural distribution of the circulating medium throughout the great towns of Germany would provide, with far greater convenience, the means of honouring the Government drafts. The German financiers live in a world long past when they suppose that to have a great treasure in silver and gold under lock and key, accumulated without any regard whatever to the localities where its expenditure is to take place, is a necessary guarantee of financial readiness. Germany will have the same wealth in any case, indeed a greater wealth, if some of it is not kept artificially idle; and without this heap of treasure in one place, it would be more evenly distributed throughout the land. Hence all the Government need, in order to obtain what they want when they want it, is power to borrow up to a certain point on their own discretion, and without the authority of Parliament.

As to the rest of Prince Bismarck's speech on this subject, it invites great constitutional questions, as to the virtual right of the Crown or the people to determine on war, which we have not space here to discuss. Let us only say that on the one hand Germany must not be judged in these matters quite by the standard of England. She has a very irregular and very difficult frontier to defend, many powerful enemies, and a great deal to lose by want of promptitude. England, with her barrier of sea, may well afford to defer, till she hears the wishes of Parliament, financial preparations which in Germany it might be dangerous to delay. On the other hand, it may fairly be said that no German Ministry really satisfied of the imminence of danger, need fear obtaining an indemnity from Parliament for anticipating the regular constitutional course, and that it is a great safeguard of popular liberties that the Government should feel quite certain that it must be able to justify its action in such matters to the people. But this is not a point we can discuss in a few lines of criticism. What we wish to point out to Prince Bismarck is that even on his own theory of the discretion which ought to be granted to the Administration in a military emergency, there is no call at all for this childish waste of great resources by shutting them up in time of peace in a money-box. He might have all the power he wants to have, and have it in a far more convenient form, without permanently withdrawing all this sum from the tills and markets of the world.

THE REPUBLICAN VICTORY IN NEW YORK.

We are afraid the recent telegrams from New York, reporting, as they do, a decided victory for the party which considers honesty the best policy, will rather delude people in this country as to the way in which universal sufferage actually works in that city. Our readers are, we believe, aware of the antecedent facts, but we will briefly repeat them. A few months ago the *New York Times*, a journal edited by an Englishman, determined to make a resolute attempt to check the corruption notoriously prevalent in the management of the city finance—corruption so extraordinary that a single official, the Controller, admittedly a poor man in 1867, can be shown to have purchased real estate in three years to the amount of a million-and-a-quarter sterling. Obtaining by rather questionable means possession of the accounts—which, however, were by law directed to be published—the *Times* showed, in a series of articles, that four persons—Oakey Hall, Tweed, Sweeny, and Conolly—had obtained from the Legislature an Act making them virtually irresponsible; that they had run the city enormously in debt; that they had paid

millions on contracts which were not merely fraudulent but impossible; and that they had all become rich. The respectable citizens, extremely irritated, not so much by the plunder as by the impudent extent to which it had been carried, formed a Committee of Inquiry, frightened one or two of the less guilty contractors into confession, and framed a case to go before a jury. A Judge, previously supposed to have been corrupt, issued injunctions prohibiting further peculation, and at last an application was made for the arrest of Mr Tweed, the ablest and most popular of the clique, on distinct charges of theft, which are set forth at length in the last number of the *Tribune* received in England. Meanwhile, as the members of the gang, or Ring, as it is called, are leading Democrats, the Republicans had taken up the matter on party grounds, and called on the electors of the city to expel all who had profited by corruption. The excitement became extreme, and it was in the very thick of it that the November elections came on.

Of the result of Mr Tweed's trial we as yet know nothing, the telegrams from the States being of the most meagre description, but of the result of the elections we know a great deal. Mr Tweed, a man of great courage, much ability, and some *bonhomie*, whether real or assumed, during October defied the Committee of Inquiry, asked boldly what they would do if the electors supported the Ring, and succeeded in a convention held in Rochester in forcing his party to accept a list of candidates for city office drawn up by himself. Apparently he had reason for his confidence as regarded himself, for he was elected to the Senate of his State by a considerable though reduced majority; but he had underestimated the force of feelings which were strongly expressed, even by the men who had originally voted for him. One was the extreme wrath of the native Americans, who still govern in the last resort, at their obvious subjection in all city affairs to the foreign vote. The second was the anger of a section of his own party at the discredit he was bringing on the Democratic cause outside the city, where the influence of his largesses was not felt, and where there are many Democrats interested in honest State Government, because dishonest State Government strengthens the central power. And the third and most powerful of all was the perception of the German residents, who had for some time been organising their strength, and declaring that their victories in Europe had given them new political energy—that they might make up their long-standing quarrel with the Republicans, and almost neutralise the Irish vote. They hate the Irish, and fight them with revolvers if ever they get a chance; they do not benefit by the city corruption; and but for the Puritan element in the Republican party which leads them to interfere with the sale of beer, and to object to certain modes of entertainment which the Germans think their own affair, the Teutons would sympathise with them rather than their rivals. Under adroit management, the particulars of which we have not yet received, the Republicans and the Anti-Corruption Democrats completely coalesced at the eleventh hour, all voting for the same men, and, as we may gather from the nomination of the German leader, General Sigel, the Germans rejoined their ancient allies. Such a combination was of course irresistible, and the whole Ring was crushed, with the exception of Mr Tweed himself—an exception due, we imagine, to the extraordinary number of persons to whom he has rendered aid. As we understand American accounts, although most corrupt and unscrupulous in employing bribery, Tweed owes more of his ascendancy to his personal kindliness and politic habit of interesting himself for the poor, than to his gifts in money. So strong, however, is general opinion against him, that he has been compelled to resign, and the Ring is swept completely out of office.

At first sight this looks like a great instalment of reform, and undoubtedly it is a severe temporary blow to the Ring, and permanent blow to the Democrats; but there are still some exceedingly dubious features in the transaction. In the first place, it is clear that both parties did not join as bodies in punishing frauds, as they would have done in Europe; that heavy masses of votes were thrown for the entire Democratic "ticket," including all four chiefs of the Ring; and that the soul and controller of the whole work of corruption was returned by a majority. Only a section of the Democrats voted with the Republicans, and that section had offered a partial compromise. Then it must be remembered that the anti-corruption party—the Republican—had the support of General Grant's name, and other advantages, which have carried them to the top in States where Tweed is unknown, and where the Republican victory is so complete that it is asserted the President will be re-elected by a majority of three-fourths. And finally, we fear the German vote may have been thrown after an agreement not confined to the punishment of the Ring, but extending over other questions. Had Mr Tweed belonged to the President's party, had the Democrats been in a majority, or had the Germans not been led by men who saw their opportunity, we hesitate to affirm that the Ring would have been so completely overthrown. Even as it is, the chances that any of its members will see the inside of a State prison are exceedingly remote.

The American press teems with suggestions for the permanent removal of the scandals caused by the misgovernment of New York, and some of them seem worthy of acceptance. It is, for instance, obviously expedient that the city budget should be voted in public sittings, and that the appropriations should be publicly advertised, so that jealous eyes may be set at watch to denounce any heinous extravagance. But we have great confidence, we confess, in our own science and in the uniformity of human nature, and we do not believe that while the taxes are voted by one class and paid by another, Government will be pure or debt diminished. This is pre-eminently the case in New York. The immense majority of the voters there are wage-receivers, persons without realised property; yet the only tax is a tax on the total realised property returned as belonging to each citizen. The evil of extravagance therefore never comes home to the body of the people; indeed if they vote for the "right side" it rather benefits them, for they find it very easy to obtain employment in departments which could not go on unless supported by money obtained from loans. Already many public works in New York are stopped, and the papers are entreating the workmen not to riot, and to believe that honesty will benefit them in the long run, and the irritation of the wage-receivers will be a serious danger to the new Government. Unless the people can be interested in economy, it is difficult to believe that a popular Government will be thrifty, and we do not see how this is to be accomplished. The Federal Government has laid its hand upon almost every source of revenue except this property tax, and some possible taxes on the necessaries of life, such as salt, which would create unendurable irritation. Some tax may perhaps ultimately be devised which will give the majority an interest in the cheapness of the City Government, or a second House may be devised, to be elected only by taxpayers; but until some such discovery is made or some such plan attempted, the tendency in New York will be to make government easy and elections pleasant by lavish expenditure and class corruption.

BOARD OF TRADE RETURNS.

THE Board of Trade Returns for the past month have just made their appearance, and again afford satisfactory evidence of the elasticity of our trade, there being again a considerable increase in both the inward and outward clearances. The value of the imports during the first ten months of the current and two previous years was in—

	£	
1869	229,191,430	(Computed)
1870	239,510,874	—
1871	272,704,422	(Declared)

And in October only—

	£
1869	28,115,405
1870	25,372,027
1871	32,810,514

The figures relating to the export trade present equally favourable results, the declared value for the ten months being—

	£
1869	159,162,432
1870	166,284,990
1871	183,538,205

And in October only—

	£
1869	16,454,896
1870	17,550,790
1871	19,947,873

The following statement shows the increase or decrease in the principal articles imported during the ten months of the current year compared with the corresponding period in 1870:—

Imported.	1870. £	1871. £	Increase. £	Decrease. £
Coffee	4,138,645	4,855,967	716,922	...
Wheat and flour	13,460,978	10,918,526	...	5,657,548

Articles.	1870. £	1871. £	Increase. £	Decrease. £
Cotton	43,404,979	46,110,211	2,705,232	...
Flax	5,051,676	4,869,557	...	182,119
Hemp	1,458,252	1,998,151	539,899	...
Indigo	2,377,334	2,663,141	285,807	...
Rice	1,413,194	2,017,397	604,203	...
Silk, raw	6,448,396	7,652,096	1,203,700	...
Silk manufactures	11,003,823	5,399,637	...	4,604,186
Sugar, unrefined	12,755,262	13,464,241	708,979	...
Tallow	2,215,881	2,280,855	64,974	...
Tea	7,741,910	9,195,189	1,340,279	...
Tobacco	1,652,467	3,480,238	1,727,771	...
Wine	3,993,383	5,756,332	1,762,949	...
Wood	7,766,603	9,249,849	483,246	...
Wool	13,911,905	16,383,769	2,471,864	...

The following shows the increase or decrease in the value of the principal articles of export during the ten months ended October, as compared with 1870 :—

Articles.	1870. £	1871. £	Increase. £	Decrease. £
Beer and ale	1,553,631	1,496,248	...	37,383
Coal	4,688,964	5,135,800	446,836	...
Copper	2,395,699	2,420,786	25,087	...
Cotton twist	12,226,774	12,399,566	172,792	...
Manufactures	47,295,314	48,210,039	914,725	...
Haberdashery	4,016,354	5,040,294	1,023,940	...
Hardware and cutlery	3,167,595	3,234,312	66,717	...
Iron and steel	20,714,290	21,883,600	1,169,310	...
Linen and jute yarn	2,048,945	2,080,740	31,805	...
Manufactures	6,688,201	7,197,194	508,993	...
Machinery	4,565,895	4,772,424	206,529	...
Silk manufactures	1,164,399	1,771,491	607,092	...
Telegraph wire	2,382,613	1,441,736	...	940,877
Woollen and worsted yarn	4,054,606	4,986,738	942,132	...
Manufactures	18,179,872	23,145,946	4,966,074	...

BUSINESS NOTES.

The American Minister in the City.—The appearance of the name of the American Minister as the director of one of the new mining companies whose prospectuses have been issued this week, has attracted some notice in the City. It is considered a novelty that the name of a distinguished member of the Diplomatic Corps should appear in such a connection. The novelty however is one rather for regret than commendation, and so far as we have heard this is the general opinion among the City authorities, whose opinion no one who wishes to occupy a good position in the City could afford to disregard. A commercial occupation of any kind appears certainly to be incompatible with the functions of a diplomatist. He ought not to have time for such occupations, and even if his material interests might not sometimes clash with his official duties, the dignity of the office which he ought to support in the interest of the nation he represents is infringed by his contact with the rough world of commerce. The particular occupation chosen in the present case is moreover peculiarly objectionable, as a Minister will be apt to be sought for as a director for the sanction which his name and the official position he occupies will give to the prospectus—a sanction which will be more sought for, and be therefore more dangerous to give, when the undertaking, as in the present case, originates in the country he represents. He ought above all things to avoid the most distant chance or suspicion of having his name trafficked with, and he cannot do so if he once gets mixed up with new companies as a director. We regret therefore very much the step which the representative of the United States has been induced to take. We should recommend him to withdraw his name at once, and we hope in any case that what he has done will not become a precedent.

The Liability of the Overend and Gurney Directors.—The long-pending case of Peek v. Gurney—in which the plaintiff sought to make the directors of Overend and Gurney personally liable to him for the loss he sustained by purchasing shares on the faith of their prospectus—has at length been decided by the Master of the Rolls. The decision contains two points of great importance. First, the general doctrine is laid down that directors who issue false prospectuses, whether the falsity arises from actual misstatements, or from the suppression of material facts known to the directors, are liable to the shareholders who acquire shares in any way on the faith of the prospectus. In the present case the directors knew that the actual insolvency of the firm whose business and debts they took over was a most material fact, and their belief that the business would be exceedingly profitable could not excuse them for suppressing it. So far the judgment should be received with satisfaction, but the second point appears rather questionable. It is that while the general doctrine is clear the shareholders who come into a Court of Equity for redress were bound to exercise due vigilance in making inquiries, and that as the plaintiff had not done so immediately after he became a shareholder, he had no relief against the directors. The Master of the Rolls said he could not approve of shareholders deciding by the event, quietly accepting profits if profits should happen to be made, but throwing the loss when it came on the directors. "When a man takes shares in a company he ought to ascer- "tain at once whether the representations on the faith of "which he took his shares are correct or not." We must say we do not see the reason for this doctrine. The original wrong done is none the less a wrong, although the shareholder is not so vigilant as he ought to be for his own interest in detecting it. His slackness has nothing whatever to do with the offence of the directors, who at least cannot complain of his want of vigilance. We are sure besides that the Master of the Rolls by thus deciding throws upon shareholders quite an impracticable inquiry. No shareholder in this particular case could have learnt anything by inquiring, and we know of one case at least where a shareholder did inquire, and came away as wise as he was before. There are in fact in such cases no materials for getting behind the scenes available for the ordinary shareholder, even if his very confidence in the directors did not lull his vigilance. We are afraid that by this distinction the Master of the Rolls has spoiled what would otherwise have been a most beneficial judgment.

The New German Coinage.—It is now considered tolerably certain that the Bill for introducing a gold coinage into Germany will shortly become law, but it has undergone one or two important modifications in passing through Parliament. One of these is the substitution of a 10-mark piece instead of a 15-mark piece as the lowest denomination of gold coin. As the 20-mark piece, which was to approximate to an English sovereign, is of the value of 19s 7d, the 10-mark piece will be worth 9s 9½d, or 2½d less than our present half-sovereign. Another very important alteration is the introduction of a clause to the effect that the new coins will have a forced currency not only in the payment of debts to the State but in private transactions as well. As a drawback to both these improvements however is the concession of the right of coining the Imperial coins to the separate States of the Empire, but the central Government will still have the right of supervising the subordinate States. There is yet no provision for the withdrawal of the old coinage, so that the effect of the new measure will be to cause a temporary superabundance of the legal currency of Germany.

Company Liability for Directors' Borrowings.—One of the most difficult questions which Courts of Equity has to face is the liability of joint stock companies for debts which their boards have incurred in an unauthorised manner, and we have recently had to notice more than one case in which the company was held liable because the money borrowed in an improper form, or *ultra vires* of the directors' powers, had been spent for the benefit of the company. Vice-Chancellor Malins however—*re* the Marseilles Extension Railway and Land Company, *ex parte* the Credit Foncier and Mobilier of England—has just given a decision, in which the company has been held exempt from liability for an unauthorised debt. The case arose out of the transactions formerly carried on by these companies, when the Credit Foncier and Mobilier was presided over by Mr Albert Grant, termed by the Judge the great "speculator of the age," and which transactions he remarked presented lamentable features. In the course of the transactions the Credit Foncier had advanced 10,000*l* to the Marseilles Company for the purpose of rigging the market, and so floating the latter company, and this sum the Credit Foncier now claimed in the winding-up. But the Vice-Chancellor held that several of the Credit Foncier directors being directors of the Marseilles Company, and the two companies having the same solicitors, who were concerned in the transaction, both sides had full notice of its nature, and as the purpose was unauthorised and improper, the advance was not recoverable from the Marseilles shareholders. There are thus some cases in which shareholders will not be made responsible for improperly-contracted debts, and the case will be a salutary warning to boards of directors or individuals who lend money to limited companies for such questionable objects as "rigging the market." Directors who had incurred such a debt in the name of a company, and had paid it out of the company's funds, would clearly be liable to make good the amount to the assets of the company out of their own pockets. Shareholders should be quick to take the hint.

THE GERMAN BUDGET.—The following is the first regular Budget of the new German Empire, now passing through the Imperial Parliament:—

RECEIPTS.	£
Customs	3,750,000
Excise on beer	480,000
— spirits	1,545,000
— salt	1,575,000
— beetroot sugar	1,800,000
Post Office profits	450,000
Profits of Alsace and Lorraine railways	450,000
Appropriation from indemnity for re-equipment	1,090,500
Telegraph administration profits	900
Appropriation from last year's loan for Navy	183,300
Stamp duty on bills of exchange	202,500
Contribution of States not in Zollverein	160,200
	11,687,400

EXPENDITURE.	£
Army	13,500,000
Navy	750,000
Foreign Office	225,000
Appropriated to form a "cash balance"	1,500,000
Miscellaneous	525,000
	16,500,000

The difference between the receipts and the expenditure, about 4,800,000*l*, is made up by *pro rata* contributions from the respective States of the Confederation, which can, strictly speaking, hardly have a deficit. Certain sources of revenue have been assigned from each State to meet so far the Imperial expenditure, but if there is any deficiency it is met by a levy upon the State treasuries. Of course the above is not the whole Budget of Germany, the separate State Budgets providing for the entire expense of internal administration and the interest of their respective debts.

THE INDIAN GOVERNMENT AND THE "PUBLIC DEPOSITS."—The new Blue Book on Indian Finance contains an interesting piece of evidence respecting an item in the weekly accounts of the Bank of England, about which there is a certain mystery. The item of "Public Deposits," which it would naturally be inferred refers only to the balance of the English Government with the Bank, is in reality a composite item, for it includes the home balance of the Indian Government. The result is, that it is impossible to trace exactly the fluctuations of this item and its causes, as we do not know which of the various depositors is operating, and the difficulty has till now been aggravated by the absence of any knowledge as to the rules of the Indian Council in dealing with their share. It is on the latter point that we find some light thrown in the present evidence. Mr Seccombe, the Financial Secretary of the India Board, stated (page 441 of the evidence) that there was an understanding with the Bank of England that the India Board should keep a balance of half-a-million, and that when the balance exceeded that amount, the Board endeavoured to invest the excess. About 3,000,000*l* was the amount which the Secretary of State should have in his treasury at the commencement of the year, and practically, the balance was at all times from two to three millions, but all the money was not at the Bank, part being outstanding in loans. Out of a balance of 3,000,000*l*, it was "probable that "one-half, in fact as much as we could lend advantageously at "the moment, was out on loan." It came out farther that the India Board's profit on these floating loans varies very much, the balance itself being 5,000,000*l* in 1863, and close on 3,000,000*l* in 1866, and the rate of interest varying; but the highest annual amount received was 125,000*l*, and the lowest 27,000*l*. It will be understood however that the investment of the balance was managed independently of the Bank of England, with which the arrangement was that a minimum balance of 500,000*l* should be kept, though the amount of the actual cash balance, it may be inferred from the above statements, is usually at or above 1,500,000*l*. Another curious fact brought out was that when the India Board at home increased its cash balance by selling bills on India, the Government in India did not reduce its cash balance till the bills were presented. The money represented by the bills *in transitu* would thus appear in both the home and the Indian accounts. As a matter of account, there would not seem to be any impropriety in this, the issue of bills by the India Board on the Indian Government being exactly analogous to a direct issue of Treasury bills by the Government in India, which of course would increase its funds in hand. Still, in a debtor and creditor account of the two Treasuries, the bills *in transitu* should be kept in mind, and should be treated by one or the other Government as part of its floating debt, something to be set off against money in hand and obligations immediately due to it.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending Nov. 4:—

	Receipts of Week Ending Nov. 4. £
Customs	410,000
Excise	680,000
Stamps	165,000
Taxes	10,000
Income tax	34,000
Post Office	nil.
Telegraphs	nil.
Crown lands	46,000
Miscellaneous	6,112
Total	1,351,112

The total receipts of the previous week were 1,387,915*l*.

The Exchequer issues of the week on account of expenditure were 664,937*l*, viz.:—

	£
Interest of debt	nil.
Other charges on Consolidated fund	nil.
Supply services	664,937
Telegraph services	nil.
	664,937

During the week the cash balances have increased as follows:—

	Bank of England. £	Bank of Ireland. £	Total. £
Balances on Oct. 28	861,081	262,057	1,123,138
— Nov. 4	1,409,245	340,556	1,749,801
Increase	548,164	78,499	626,663

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Nov. 9.

The returns of the Bank of France for this week, last week, and for the week ending 8th September, 1870, are as follow:—

CREDITOR.

	Increase. francs.		Decrease. francs.
Coin and bullion	7,300,000	.....	...
Bills discounted	19,333,000	.....	...
Prolonged bills	...	.....	4,000,000

Although the raising of the Bank rate of discount from five to six per cent. appears to have taken the commercial world almost by surprise, such a step was to be expected from the last two or three weekly returns of the situation of the Bank. The amount of notes in circulation had steadily risen, so that on Thursday last the sum had reached a total of 2,289 millions, and it became evident that the legal limit of 2,400 millions would be shortly reached if the Bank had continued its discounts and advances on securities on the same conditions. Two courses remained open to it, either to maintain the same rate of discount and arbitrarily restrict its accommodation, or to increase its rate and allow the diminution to result naturally from the effect of the more onerous terms for its advances. By adopting the latter of those expedients, the Bank has avoided the evil of creating a privileged class among its customers, for those whose paper was accepted would have been obtaining money below its market value, while those whose bills were rejected would from the discredit attached to their paper, from the fact of the refusal, be made to obtain accommodation excepting at an exaggerated price. The rate for advances on securities, which had hitherto been only one-half per cent. more than that for discounts has been increased by one and a-half and is now seven per cent, The Bank, moreover, limits its advances to a sum of 10,000f. This measure will, by rendering money dearer, check the reckless speculations on the Bourse, which during the last month has forced up securities of every class to prices by no means justified by the situation.

The suggestion has been made in many quarters that the Government might have spared the Bank the necessity for raising its rate of discount by authorising it to increase the legal limits to its emission of notes to 2,700 or 3,000 millions. One of the reasons put forward in favour of such a measure is not without some foundation. It is calculated that the circulating medium in normal times consists of about 2,000 millions of francs in coin, aided by twelve or thirteen hundred millions in banknotes. The greater part of the specie having disappeared, either from having been taken to pay the Prussian indemnity, or from having been hoarded by prudent individuals in preference to paper as not liable to depreciation, a large portion of the circulating medium has been thus withdrawn, and requires to be replaced by notes.

The question of the issue of paper money tokens against the deposit of an equal sum of Bank of France notes is now decided, and their new currency will probably be in circulation before the end of the week. The syndicate of banking houses by which this affair is undertaken are the Comptoir d'Escompte, Credit Foncier, Credit Industriel, Société des Depots et Comptes Courants, Credit Agricole, Credit Lyonnais, Banque des Pays Bas, Société Financière, and Banque de Paris. The operation is, however, to be conducted by the Comptoir d'Escompte, which is authorised to commence with an emission of ten millions of the notes. The sum will, however, be increased if found necessary. These notes have not the protection of a forced circulation, but there is no doubt that they will be readily accepted in trade, as they are guaranteed by the syndicate, and are reimbursable at sight at the Bank of France in exchange for the ordinary notes. The Government would perhaps have done well to have gone a step further, and allow the issue of a much larger sum by those banks, instead of authorising a similar emission by the local Chambers of Commerce, for as the Comptoir d'Escompte, Société des Depots, &c., have branches in all the large towns of France, the tokens would have been readily received throughout the country, as an office where they might be exchanged would never be far distant. Under the system adopted the tokens issued at Marseilles will be valueless at Lille, Rouen, &c., and *vice versa*.

An offer appears to have been made to the Minister of Finance, it is not stated by whom, although the fact is not contested, to sell to the Government a sum of one hundred millions of francs in small silver coin, to be delivered at the rate of twenty-five millions a-week, in exchange for the same amount of Treasury bonds payable in two years, bearing interest at six per cent. and two per cent. commission. The proposal was not accepted, on the ground that nothing would prevent the same speculators from again buying up the silver and selling it to the Government a second time.

The money market, which had been falling steadily for the past week, left off with a slight recovery to-day. Rates for all securities show, however, a marked diminution on the return for Thursday last. The latest quotations are as follows :—

The premium on gold is easier, and varies from 15f to 18f per thousand; the exchange on London has fallen to 25f 90c.

The subject of the new Customs tariffs and the proposed duties on raw material, after being nearly lost sight of since the prorogation of the Assembly, has again come into notice during the last few days. M. Thiers appears to have considerably modified his views during the interval; he had virtually made the proposal of the Committee on the Budget to raise the increased revenue required by an income tax instead of by Customs' duties, a Cabinet, or rather Government, question, threatening to resign rather than give way. A note in the semi-official paper, the *Soir*, now declares that "the President of the Republic no longer insists on the voting of the duty on raw material; he appears to have decided on declaring on the reopening of the Chamber that he cares little what taxes are voted, whether on raw materials, incomes, or anything else, provided that the Assembly furnishes the State with a sum of 350 millions.

The *Constitutionnel*, which journal does not, however, now possess the same authority as under the Empire, has published a rather angry note on the subject of M. Ozennes' mission to London to obtain some "simple modifications" in the Treaty of Commerce. It remarks that notwithstanding the insignificance of the concessions asked for, and the longanimity shown by the French negotiator, the English Cabinet has rigorously refused to make any change, and demands the maintenance of the treaty as at present, or its pure and simple denunciation, adding that M. Ozenne has returned to give an account of the failure of his mission to the Minister of Commerce. According, however, to other accounts, only a few of the French demands were rejected, those concerning iron and cotton in particular, and the Government of Versailles is about to make fresh proposals, which it has every reason to believe will be accepted.

M. Michel Chevalier contributes to-day an article in the *Debats* to refute the argument put forward by the Protectionists, that M. Thiers, in his campaign against the Treaties of Commerce, is acting under the pressure of the Conservative party. He declares that it is not to please anyone that the Chief of the State has raised the standard of Protection, and repudiated the most vital parts of the international act of 1860, but solely from his own free will; moreover, that had he been solicited to take such a step, the only influence to which he would have been justified in submitting to was that of the National Assembly, which has been entirely wanting, as in none of the deliberations of that body has it ever prompted the Government to embark in the present imprudent negotiations. There is no foundation, he says, for the pretence that the Conservative party has demanded the re-establishment of the system of Protection as a condition of its support, for every intelligent Conservative admits that the denunciation of the Treaty of Commerce would be a calamity for both the native industry and the consumer, whose interests are too much overlooked.

The proposal to authorise gaming establishments in France as a source of revenue to the Government is now being seriously discussed in some of the journals. The *Constitutionnel*

even goes so far as to say that a report is being drawn up on the resources such a measure would procure, and is to be submitted to the Ministers of Finance and of the Interior. The great argument in favour of the proposal is that the German Governments derived a sum estimated at one hundred millions of francs annually by this means, either from the tax imposed on the various concessions, or from the money spent by travellers. Should such a step be taken, the town of Aix-les-Bains, in Savoy, would probably become the future Baden of France. The Municipal Council there has already decided unanimously on building a Kursaal immediately on gaming being licensed. It is however scarcely possible that a Republican Government, which justifies its usurpation by the corruption of its predecessor, would have recourse to immoral expedients such as the Empire never contemplated in its many pecuniary embarrassments, and at a moment when the old Monarchies are purging their States of such abominations as gaming houses.

A question of interest at the present moment has just been brought before the Tribunal of Commerce at Marseilles. Messrs Vidal Frères and Co., holders of a bill for 6,000f, drawn from the Canary Isles on Messrs Cumella and Gilly, of Marseilles, had refused to accept payment of the same in notes of the Bank of France, on the ground that the printed text of the draft mentioned that payment should be made in gold or silver, and had had the bill protested, An action was brought by Messrs Cumella and Gilly to compel the others to give up the bill in exchange for the nominal amount in notes, and judgment has been given in favour of the plaintiffs, the Court in its summing up deciding that the clause "payable in gold or silver" was only applicable in the country in which the bill was drawn, unless it were the result of a convention agreed to between the drawer and the acceptor to fix the conditions of payment, otherwise the holder of the bill would obtain an undue profit from the premium on gold or silver in the place where the payment was effected. An attestation, signed by bankers and merchants of the town trading with Spain, and put in by the plaintiffs in the course of the trial, declared that the printed formula of the letter of exchange was only inserted to meet the special conditions of banking in that country, and was not held to be valid elsewhere.

The Syndical Chambers of Commerce and Industry in Paris announces a national congress, with the object of inquiring into the present requirements of trade in order to submit them in the form of a memorial to the Government and the Assembly. The labours of the Congress are divided into seven sections:—1. Taxation; 2. Free-trade and Protection; 3. The relations between capital and labour, including strikes and co-operative associations, &c.; 4. Land and water carriage; 5. Commercial and industrial credit; 6. The means of increasing the exports and foreign trade of France; 7. Commercial legislation.

The Bank of Algeria, of which 10,000 only of its shares had been issued, announces a subscription for the remaining 10,000 to complete its entire capital of ten millions of francs. The new shares of 500f each are to be issued at 700f, the premium of 200f being applied to increase the reserve of the company. Holders of the first series are to have a right of priority, share for share. 174f are to be paid on subscribing, and the remainder in three equal parts at intervals of four months. The subscription will be open from the 15th. to the 25th inst.

The mutual association which had been established at the commencement of the first siege of Paris to insure against the risks of the bombardment, has just wound up its affairs by returning 31 per cent. of its deposits to its members.

The Banque de Paris and Banque des Pays Bas are about to be amalgamated and form a new company, with a nominal capital of 125 millions, in 125,000 shares of 1,000f each, one-half paid up by the shares of the old companies. No public subscription will be open, excepting for those holders who do not accept the union, and who will be reimbursed at par. The assets of the Banque des Pays Bas represent a surplus of about 100f per share over the liabilities, and which will be distributed among the proprietors when the old company is wound up. The new company will continue its branches at Amsterdam, Brussels, Antwerp, and Geneva.

The Franco-Egyptian Bank announces a meeting in Paris on the 29th inst., to obtain from the shareholders powers to increase its capital, and introduce various modifications in its statutes.

A letter from Calais, published by the *Journal du Havre*, says:—"The Minister of Public Works has just opened an inquiry on the subject of the proposed steamers for carrying the mail trains between Calais and Dover. Those immense vessels will be 420 feet long and 46 feet broad; they will be able to carry on the deck two trains of fifteen carriages each, and will perform the passage from Calais to Dover in an hour and ten minutes. The company, at the head of which is M. Behic, director of the Messageries Imperiales, proposes to have constructed, after plans of M. Dupuy de Lome, a dock to receive those vessels to the east of the Port of Calais, one mile out at sea. This dock would be deep enough to receive those enormous vessels at any moment of the tide, and would be connected with the shore by an iron bridge. The works would be undertaken by the contractor for the Isthmus of Suez Canal."

The following are the latest quotations of the produce markets at Havre, per 50 kilos, duty paid:—

Cotton.—New Orleans good ordinary, 126f; very ordinary, 118f; Georgia, middling, 115f. low middling, 113f; Oomrawuttee good ordinary, 89f; Tinnevelly, 91f, Madras, 87f; Bengal, 81f. Sales last week, 6,241 bales; arrivals, 8,977; stock, 121,390.

Coffee.—Hayti, 142f 50c to 146f; Cape, 79f (in bond); Rio, 144f 50c; Santos, 150f; Mysore, 80f (in bond); Manila, 148f; plantation Ceylon, 155f. Sales last week, 9,500 bags; arrivals, 4,426; stock, 162,878 bags and 2,253 tierces.

Sugar.—West India, 1st jet, sampled, 69f 50c; unsampled, 64f; 2nd jet, 60f 50c. At Marseilles, Mauritius good No. 12 type, 39f; Martinique, 34f 50c, No. 4, both in bond.

Skins.—Maragnan drysalted, 110f; Valparaiso drysalted, 96f; Monte Video fresh salted ox, 85f; Buenos Ayres dry ox, 125f 50c.

Wool.—Monte Video unwashed, 210f to 217f 50c; Buenos Ayres, 187f 50c to 207f 50c; Spanish, 240f.

Cocoa.—Hayti, 93f; Guayaquil, 92f 50c; Para (damaged), 48f to 66f in bond.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Right Honourable the Lords of the Committee of Privy Council for Trade have received from the Secretary of State for Foreign Affairs a despatch, from Her Majesty's Consul at Rosario, reporting that a law has been recently passed, declaring all agricultural colonies established in the province of Rosario, between the Guardia de la Esquina and Melincue, and from San Geronimo to the Canada de Gomez, Totoras and Saladas, and from the Capital to the Sance, and from the Prusianas to the frontier, and from San José to the colony of Helvecia, exempt from all direct taxation for three years from the date of their existence; and colonies established beyond the above limits exempt from direct taxation or taxation on their produce for the term of five years.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the fifth week of October, 1871, and of the corresponding week in 1870:—

	Paupers.				
	Indoor.	Outdoor.		Total.	Corresp'nding Total in 1870.
	Adults and Children	Adults.	Children under 16	5th week Oct., 1871.

The factory inspectors report 500 flax factories in the United Kingdom—155 in England, 191 in Scotland, 154 in Ireland. The returns show 1,419,335 spinning spindles running (more than half of them in Ireland), and 134,000 standing; 48,561 doubling spindles running, and 18,651 standing; 31,894 power-looms running, and 3,407 standing; and 21,861 power-loom weavers. The amount of moving power is 52,017 steam, and 4,978 water. These factories employ 1,822 males under 13 years of age, 11,539 between 13 and 18, and 24,735 above 18; and 3,139 females under 13, and 83,537 above 18. The total is 38,096 males and 86,676 females, making in all 124,772—19,816 in England, 49,917 in Scotland, and 55,039 in Ireland.

According to a circular of Messrs Feuerheerd, jun., and Co., the Oporto vintage of this year, as compared with its predecessor, will rank very low in quality. The changeable weather during the summer months prevented the favourable development and perfect maturity of the grapes, while the rains which fell during the gathering contributed towards the bad result. Thus, the port wines produced in 1871 are mostly unripe and thin, a large proportion being only fit for distillation; and it is presumable that comparatively few will find their way to the English market. The quantity produced is estimated at 70,000 pipes, against about 60,000 pipes in 1870.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

An Account pursuant to the Act 7th and 8th Victoria, cap 32, for the week ending on Wednesday, the 8th day of November, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	37,435,260	Government debt	11,015,100
		Other securities	3,984,900

Nov. 1	26,013,893	22,512,363	27,893,105	34,052,277	12,054,383	—
8	25,679,699	23,074,930	27,964,071	33,233,198	12,930,685	—

In 1861, money was easy in the open market, the effects of the recent restriction of business being still felt. The first Budget of the Secession Government had just been issued, containing evidence of the small pecuniary resources of the States.

In 1868, money still remained at 2 per cent., but rather more activity was at length beginning to be apparent. The American Minister, Mr Reverdy Johnson, and Lord Stanley, had just come to an agreement on the Alabama and other questions in dispute between England and America, but the Treaty was afterwards rejected by the American Senate.

In 1869, there was rather a strong demand for money, and the Bank rate was likely to advance. There had lately been a considerable amount of foreign loans, and the trade demand was increasing. The Indian Government had just made the sudden discovery of a serious deficit in the actual results of the Budget, compared with the regular estimate, and had resorted to strong measures to produce financial equilibrium.

In 1870, there was comparatively little demand for money, the suspense occasioned by the war continuing. The Bank, however, refrained from reducing its rate. The English proposals for an armistice between the belligerents had failed.

Discount and Money Market.—The plethora of money in Lombard street which we had to describe last week continues, and the rates quoted are if anything a fraction lower. In the open market there is beginning to be a fair demand for money, but the supply is still so superabundant as to keep down the rates. There is only a quiet demand at the Bank. During the week some uneasiness was felt in connection with the advance of the rate by the Bank of France, which we noticed last week, and apprehensions were also excited by a somewhat active movement in the bullion market, the shipments, chiefly on South American account, balancing for two or three days the very large arrivals; but the financial crisis in Paris appears to have been got over, and later in the week there was a stoppage in the demand for bullion for export, so that altogether at the close there is an easier feeling. Still great caution is shown on all sides on account of the demands which are known to be impending, and the peculiar character of the money which creates a superabundance in Lombard street. The persistence of the Bank directors in refusing to lower their rate is generally approved of. The feeling is, that the present uneasiness cannot be wholly removed until something more is known about the intentions of Germany respecting the bills which are to fall due at the end of the month.

The Bank account shows a considerable accession of strength. The bullion has increased 562,567*l* during the week, and the reserve 876,302*l*, the private securities having diminished 818,869*l*. As will be seen, however, the reserve is still below the point at which it stood on the 21st of September, when the rate was raised to 3 per cent., while the deposits are 1,000,000*l* more than they were on that date. Since the account was made up, moreover, the Bank has been temporarily weakened by the withdrawal of gold to support the Scotch note circulation, which is increased this week for the customary half-yearly payments on the 11th of November.

The Bank of France account is rather better this week than it promised to be a week ago. The increase of notes is only trifling, while the cash has increased nearly 300,000*l.* The Government balance is, however, still farther diminished by 600,000*l.*

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—Short	3½	per cent.
Do 3 months	3⅜	per cent.
Do 4 —	3 ¾	per cent.
Do 6 —	4	per cent.
Trade bills—3 months	3¾ 4	per cent.
Do 4 months	4 ¼	per cent.
Do 6 —	4¼ ½	per cent.

The allowances for money at the private banks and discount houses are as follow :—

Private Banks at call	3	per cent.
Discount houses at call	3	per cent.
Do with seven days' notice	3¼	per cent.
Do fourteen days'	3¼	per cent.

The above quotation of 3 per cent. is also practically that of the joint-stock banks, at least as regards new money; but they have still been unable to come to an agreement for a uniform rate, and some still profess to give 4 per cent. for deposits. Yesterday, however, the London and Westminster Bank set the example of giving formal notice that it would only allow 3 per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	6	6	...	5½
Vienna	6	7	5½	6½
Berlin	5	4	4¼ ½	3½
Frankfort	4	4	3½	3¼ ½
Amsterdam	4	3	3¼ ½	2¾
Brussels	3½	5	3¼ ½	4
Hamburg	...	...	3¾ 4¼	3
St Petersburg	7	6	6	6

THE STOCK MARKETS.—The markets were a little excited on Saturday and early in the week by the advance of the Bank rate in Paris to 6 per cent., and the fall thus occasioned in the prices on the Paris Bourse. There was rather a serious fall in French securities, and the weakness extended to all the leading markets, English railways being from a half to one per cent. weaker all round, and foreign securities generally about a-half per cent. On Monday morning however the depression was at its worst, and with improved advices from Paris, the continued influx of gold into the Bank, and steady buying orders for investment, there has since been a very firm tone. The result is a very decided general advance upon the closing prices of last week, and in English railways especially the advance is most considerable. This good tone continued to-day until the very close of the market, notwithstanding the approach of the settlement, which begins on Monday.

This week, like the last, has also been marked by the introduction of new companies, which appear now to be more indiscriminately favoured than they were a few weeks ago.

ENGLISH GOVERNMENT SECURITIES.—In this department there has been hardly any movement. The continued abundance of money sustains the market, the rate for money at call here being 2 to 2½ per cent., and, on the other hand, there is little advance in price, partly from the uncertainty which checks speculative buying, and partly from the tendency of "Consol money" to go into railway debenture stocks, and other first-class securities which pay rather higher interest. To-day the feeling has been better, and there is an advance of ⅛ in Consols. The closing quotation to-night being 93 to ⅛ for money and $93\frac{1}{16}$ $\frac{3}{16}$ for the account.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	92½	93	92⅞	93⅛	5s to 10s pm
Monday	92½	92¾	92⅞	93	5s to 10s pm
Tuesday	92⅝	93	92⅞	93⅛	5s to 10s pm
Wednesday	92⅝	92¾	92⅞	93	5s to 10s pm
Thursday	92⅝	93	92⅞	93⅛	5s to pm
Friday	92⅝	93⅛	93	93⅛	5s to 10s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.	
Consols for money	92¾ 3	.....	93 ⅛	+	⅛
Do for December	93 ⅛	.....	93 1/16 3/16	+	1/16

Victoria 6 %	111 12	.....	111½ 12½	+ ½
Ditto New 5 %	105 6	.....	105 6	... ...

FOREIGN GOVERNMENT SECURITIES.—As we have stated, the weaker prices from Paris caused some excitement on Saturday and Monday, and there was rather a severe depression. Subsequently, however, the feeling gradually improved, the financial crisis in Paris passing away, and the steady purchasing for investment being resumed. On the whole, there has not been a very great amount of business transacted since last account, but there is no stock on the market, and very small buying orders are sufficient to raise the price materially. Turkish have been exceptionally strong, there being a large amount of buying, it is understood, on account of German houses. Spanish have continued flat, though there is no farther fall from last week—the flatness being chiefly in the old stock, in consequence of a telegram received on Wednesday that the Budget Committee would recommend the taxation of the old stock, but would exempt the new issue. To-day, the tone has been very good, and prices close generally at the best point of the week.

Annexed are our usual quotations showing the changes for the week :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.

ENGLISH RAILWAYS.—There has been quite an amount of exceptional activity in this department, the reaction last Saturday and on Monday morning being rather severe, and Great Western, Dover A, Caledonian, North-Eastern, Great Northern, and other leading lines, all falling between 1 and 2 per cent. On Monday afternoon however, there was some strong buying in North-Eastern and Great Northern, and at the close there was a sudden rise in each of about 4 per cent.—North Eastern returning to the old point touched before the panic in September, and Great Northern A rising to 162 3. The tone of the market generally was likewise good, and was still farther improved during the week by the announcement of an amalgamation between the Midland and Glasgow and South-Western Companies, notwithstanding a slight depression which this produced in the Caledonian and North British shares. The traffics this week moreover show a large increase, and in the absence of any selling orders the markets are most firmly sustained. Among the stocks which have advanced most, besides North-Eastern and Great Northern mentioned above, are—Great Eastern, South-Eastern, and Chatham and Dover. In Great Eastern the

traffic returns continue to be remarkably good, while it will also be favourably affected by the cessation of the coal traffic competition. South Eastern and Chatham and Dover have for some time been favourite stocks with speculators, and their increase of traffic is also enormous; while an amalgamation of the southern lines, which is likely to happen any day with the present tendency to amalgamations, will be especially favourable to these two companies. The closing prices to-day are about the best of the week, and the market is firm, especially for Sheffield, on a report that the Midland Company is making arrangements to lease the line. Brighton however has been weak on the revival of reports as to the formation of a new company, the prospectus of which is to be issued next week.

The amalgamation of the Midland and Glasgow and South-Western lines is rather a smaller affair than the other amalgamations which have been lately announced, as it is rather an absorption of a comparatively small line into a larger system than an ordinary amalgamation. The advantage of the amalgamation will be that with the completion of the Settle and Carlisle junction line by the Midland Railway, there will be a through line in the hands of a single company between London and Glasgow.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Caledonian	118¼ ¾	.....	117¾ 18	— ¾

The traffic receipts on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Nov. 4 to 807,088*l*, being an increase of 67,801*l* on the corresponding week of last year. The aggregate receipts of the half-year to date are now 14,376,541*l*, being an increase of 1,052,390*l* on the corresponding period of last year. The principal increases of the week are—London and North-Western, 11,826*l*; Midland, 9,735*l*; North-Eastern, 8,813*l*; Great Western, 7,667*l*; Great Eastern, 3,578*l*; Lancashire and Yorkshire, 4,398*l*; and South-Eastern, 2,928*l*. The following shows the details of the increase or decrease in each case for the week and for the whole period:—

RAILWAY TRAFFIC RETURNS.

	Week's Receipts. Amount.	Inc. or Dec. on Corresponding week in '70.	Aggregate Receipts of Half year to date. Amount.	Inc. or Dec. on Corresponding per. in '70.

Great Western of Canada	20	.....	21 ¼	+
Madras 5 %	106½ ¼	.....	106½ 7	+ ¼

American Securities.—There has been a steady inquiry for United States Government bonds, and a further improvement has taken place in the quotations. The value of Erie shares has been sensibly affected by the overthrow of the old administration, and most other American lines have participated in the upward movement. The following shows the movements on the week:—

	Closing Prices last Friday.		Closing Prices this day.	Inc or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	91½ ⅜	.....	91½ ⅜	+ ¼
Ditto 1865 Issue	91⅜ ⅛	.....	91½ ¾	+ ⅜

Panama General Mortgage 7 % Bonds, 1897	80 5	.....	80 5	... ...
Pennsylvania Gen. Mort. 6 % Bonds, 1910	95¼ 6¼	.....	97 ¼	+ 1
Virginia 6 % Bonds	50 2	.....	49 51	— 1

Joint Stock Banks.—Although the dealings in Bank shares have not been on an extensive scale, the general tone of the market has been favourable. Anglo-Egyptian were pressed for sale to-day and leave off at a decline of ½, while British Columbia and Union of London show a similar decline; London and River Plate have given way 1, and English of Rio ½. On the other hand Egypt, South Australia, Hongkong and Shanghae, and National Provincial have risen 1; Anglo-Austrian, New Zealand, Chartered Mercantile of India, London and County, and Union of Australia, ½; and Metropolitan, ¼.

The new Russian Bank for foreign trade has opened its London branch at 6 Nicholas lane. This bank was founded by Imperial Ukase with a capital of 7½ millions roubles, to be paid up within two years. The council is strongly organised, with M. Lamansky, President of the State Bank, at its head. Among the members are MM. Elissejeff, Günzburg, E. M. Meyer, Wyneken, Botkin, Jakuntschikoff, Mahs, Raffalovich, and others, representing the chief firms of St Petersburg, Moscow, and Odessa. In London the bank will be represented by Messrs B. W. Currie, A. J. Eden, C. Magniac, M.P., J. U. Trunninger.

Telegraphs.—The market for telegraph shares has been flat, and at one period of the week prices were much depressed; towards the close, however, a better feeling prevailed, and the quotations do not leave off at the worst point. Still nearly all the changes have been adverse. Anglo-Mediterranean show a decline of 3; British India Extension and French Cables have given way ⅜; British India Submarine and Reuter's ¼; British Australian, and China Submarine and Falmouth ⅛. In Construction shares Hooper's show a rise of ¼, while Telegraph Construction have given way 1¼.

Mines.—There has been an average amount of business passing in mining shares, but the tone of the market has been far from satisfactory, and the adverse changes have been somewhat numerous. In the English market we note a rise of 10 in Wheal Bassett; 6 in Tin Croft; 5 in South Wheal Frances; 1 in Wheal Greville and West Bassett. On the other hand, Wheal Buller and Wheal Seton have given way 5; Tankerville 1½; East Basset, 1; North Wheal Crofty ¾; Great Wheal Vor, Marke Valley ⅛; Assheton, Crenver, and Kingston Downs ¼. In the foreign market there is a fall of 4 in Eberhardts, ½ in Russia Copper, and ¼ each in Colorado Terrible, and Panulcillo.

Miscellaneous.—Quietness has been the predominant feature in the miscellaneous market; nevertheless some important changes have taken place in the quotations. British American Land have risen 6; Peel River Land 3; Rhymney Iron and Australian Agricultural 1; and Otago Southland Investment and Submarine Cables Trust ½. On the other hand,

Scottish Australian Investment have given way 5; British and Foreign Tramways, 1⅞; London Financial, London General Omnibus, Native Guano, Peninsular and Oriental Steam, and Royal Mail Steam 1; Phospho-Guano, ½; London Tramways and North Metropolitan Tramways ¼.

The following are the *nominal* quotations for various new undertakings:—Anglo-Austrian and Anglo-German Bitumen are quoted 2 dis to par; Anglo-Hungarian Bitumen, 1½ to 2½ premium; Limmer Asphalte, 3⅞ to 4¼; United Limmer, 2 to 1 dis; Native Guano, 25 to 26; Phosphate Sewage, 19 to 20; Patent Gas, 11 to 12; New Shares, 5¼ to 5¾; Montrotier Asphalte, 1 to 1½ premium.

A prospectus is issued this evening of the Glasgow, Coatbridge, and Airdrie Tramways Company. Capital, 100,000*l*, in 10*l* shares. The company proposes to construct and work tramways, commencing by a junction with the authorised Glasgow Street Tramways, and passing through several villages between Glasgow, Coatbridge, and Airdrie. The population on the proposed lines is estimated at 100,000, and a large traffic in goods and minerals is also anticipated.

A prospectus is issued this evening of the Williman's Island Phosphate Company, Limited. This company is formed for the purpose of acquiring the property and business of the Williman's Island Phosphate Company, incorporated under an Act of the General Assembly of the State of New York, passed on 15th April, 1857. The existing company, which was established with a capital of 1,000,000 dols, is possessed of part of the tract known as Williman's Island, in Prince William's Parish, Beaufort County, South Carolina, U.S., and extending to about 1,600 acres. The vendors undertake to satisfy the new company that there is a minimum quantity of 5,000,000 tons of phosphatic rock on the island, of an average of 60 per cent. of phosphate of lime. The company also transfers a line of ships, house property on the island, and other property, and the terms of purchase are 235,000*l*, leaving 15,000*l* of working capital. A net annual income of 50,000*l*, giving a return of 20 per cent., is estimated.

EXCHANGES AND BULLION.—There has been a considerable movement in the bullion market during the week, large quantities of bullion arriving and going out, the latter chiefly to South America and the East. For silver the demand at one moment was so great as to raise the price to 61d per oz, but the demand has for the present fallen off. The gold now arriving is also taken to the Bank, there being no demand for export.

The exchanges are almost without change from last week, except the Paris exchange, which has continued to decline with the fall in the premium on gold. There is yet no movement of bullion to Paris, and the exchanges at the very last moment are again tending to be against Paris. Bills on Belgium this afternoon have been rather more in demand.

The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—The movements of gold during the week have been very large, and notwithstanding the withdrawal from the Bank of sovereigns to the value of 732,000*l*, which have been sent to South America and the Cape, no less a sum than 1,320,000*l* in bars and French coin has been sent into that establishment; and as there is at present no demand for the continent, further amounts will follow. The Peninsular and Oriental steamer has brought 417,290*l* from Melbourne; the Great Britain has brought 83,000*l* from Melbourne the McGregor Laird has brought 5,000*l* from Africa—total, 505,290*l*. The Malta has taken 68,400*l* to Bombay, the Marc Antony 123,000*l* to the Cape, and the Neva 555,000*l* to South America.

Silver.—The transactions in silver have been very large during the week, and fine qualities, suitable for shipment to the East, have increased again in price. The Malta has taken 44,540*l*, and the Scindia 50,000*l*, through the Canal to Bombay. We have received about 121,000*l* during the week, chiefly from New York.

Mexican dollars of the old coinage have increased in price, owing to their scarcity, and it is expected that those forming part of the 160,000*l* by the Pacific steamer will realise a good rate. We have received in addition to the above about 52,000*l* from New York.

Exchange on India for Banks' drafts at 60 days' sight is 1s 11 7/16d to 1s 11½d per rupee.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto refinable, 77s 10½d to 77s 11d per oz std, last price. Silver—Bar silver, fine, 5s 0⅞d to 5s 1d per oz std, last price; ditto containing 5 grains gold, 5s 1d to 5s 1¼d per oz std, last price; Mexican dollars, new, 4s 11d, old, 5s 0⅛d per oz, last price. Five-franc pieces, 3s 11½d each, none here.

The sum of 152,000*l* was sent into the Bank to-day; while 62,000*l* was withdrawn, principally for North America.

According to the *Gazette* returns the imports of the precious metals into the United Kingdom during the week ended November 8 were:—Gold, 570,677*l*; silver, 375,476*l*. The exports were:—Gold, 290,100*l*; silver, 181,880*l*.

We are indebted to Messrs J. Allard and Co., of Paris and London, for the following telegram, giving to-day's exchange and bullion quotations in Paris:—

MEETINGS OF COMPANIES NEXT WEEK.

MONDAY, November 13.

Russian (Vyksounsky) Iron Works.

THURSDAY, November 16.

North London Railway, special general, Euston Station.

Uruguay Pastoral Association (Limited), general.

NOTICES AND REPORTS.

STOCKS.

Chilian 5 per Cent., 1870.—Bonds representing 10,600*l* have been drawn for redemption on the 1st January.

South Australia.—The agent-general for South Australia invites tenders for 140,000*l* South Australian Government securities

5 per per cent. bonds, to be sent in to the National Bank of Australasia not later than Friday, the 17th November. The bonds are for 500*l*, 250*l*, and 100*l*, and have a currency up to 1915 to 1920; they will be allotted to the highest bidders, not being below par. Principal and interest payable in London, the latter commencing 1st of next January.

RAILWAY COMPANIES.

Midland—Glasgow and South-Western.—An amalgamation upon equal terms has been arranged between these two companies, to take effect on the opening of the Settle and Carlisle line.

Moscow-Koursk Railroad—Issue of 6 per Cent. Bonds.—Messrs Baring Brothers and Co., have invited subscriptions for 1,700,000*l*, or 20,060,000 florins, in 6 per cent. Russian railway bonds unguaranteed by the State. The Moscow-Koursk railroad, 333 miles long, was constructed by the Government, and has recently been sold to this company. The issue price is 92 per cent. payable by instalments until May next, and the principal is to be redeemed in 18 years by an increasing sinking fund. The line runs from Moscow southward through Jula and Orel, connects various important railway systems, and the receipts in 1870 were 6,626,504 rs, while this year they are expected to be 7,600,000 rs. Messrs Hope and Co. also invite subscriptions in Amsterdam.

Roumanian Railway Bonds.—The London Committee, at the request of the Breslau Committee, have appointed the Anglo-Hungarian Bank in London to receive the 7½ per cent. obligation for conversion into shares of the new railway company. The Breslau Committee telegraphed the above instructions, with notice that the deposit of obligations at Breslau must be effected by the 12th instant. The deposit in London must therefore take place by that date.

Turin and Savona.—At the meeting it was resolved to take proceedings against Signor Guastalla to compel him to fulfil the agreement which he has entered into to form a new undertaking to take over the works of the old company.

BANKS.

Anglo-Egyptian Banking, Limited.—The report states the net profit for the year amounted to 187,496*l*, out of which the directors recommend a dividend of 2*l* per share, free of income tax, making, including a previous payment, 15 per cent. for the year ended August last, and leaving 67,496*l* to be carried forward. Owing to the vast increase of commerce in Egypt, and the extension of agriculture there, it is proposed to double the capital of the company, by the issue of 40,000 shares of 20*l* each, at 5*l* premium per share, to be offered to the existing shareholders in proportion to their holding. The entire amount realised by the premium, 200,000*l*, is to be devoted to the immediate creation of a large reserve fund.

London and South African.—Half-year's net profit, 13,159*l*, out of which a dividend was declared at the meeting of 9s per share, leaving 1,159*l*.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Trust Agency of Australasia.—At the half-yearly meeting a dividend at the rate of 10 per cent. per annum was declared.

MISCELLANEOUS COMPANIES.

Anglo-American Telegraph.—At the meeting an interim dividend was declared at the rate of 2 per cent. for the quarter.

Bessemer Steel and Ordnance, Limited.—Capital, 100,000*l*, in 10*l* shares. The manufacture of Bessemer steel from Swedish pig iron will be carried on by this new company, together with all descriptions of ordnance, shot, shells, and small arms. The premises of Mr Henry Bessemer at East Greenwich, occupying four acres of land with river frontage, will be acquired, together with machinery and plant. Additional plant will be erected, and it is stated large contracts can be entered into as soon as the company is in a position to accept them.

Cape and Natal Steam Navigation, Limited.—First issue of capital, 125,000*l*, in 20*l* shares. Of this 37,580*l* remains unallotted, and Messrs Binney, Verner, and Hollebone have invited subscriptions for the same, and for 75,000*l* in 8 per cent. debentures, having seven years to run. The prospectus announces that the company is already doing a good trade, that commerce with these colonies is improving, and that the security for the debentures is ample.

Medway Gault Brick and Cement, Limited.—Capital, 60,000*l*, in 10*l* shares. The gault clay fields on the banks of the Medway, held under lease from the Earl of Aylesford, will be acquired for 32,500*l* (10,000*l* in shares). The property of 57 acres contains an "almost inexhaustible bed of blue gault brick clay, from which the brick for the High Level sewer, and the Thames Embankment were manufactured.

Northfleet Chalk Quarries, Limited.—Capital, 60,000*l*, in 10*l* shares. 2,500 ordinary shares represent part of the purchase-money, and 3,500 participating 9 per cent. preference shares are issued to the public. These chalk pits and quarries, stated to contain large quantities of "block chalk" of the best description, will be acquired, together with Scott's Wharf, where shipments can be made, and a tramway and tunnel will be constructed between the two. It is calculated that 250,000 tons a-year can be supplied, at a profit of 12,600*l* per annum.

Northfleet Chalk Quarries.—Share list will close this day (Saturday) for London, and Monday for the country.

Société du Cable Transatlantique Francais.—Quarter's dividend, 2 per cent.

Submarine Cables' Trust.—At the meeting it was announced that 420,000*l* in certificates had been taken up, that the value of the securities had improved 20,000*l*, and that the income showed a surplus after covering all charges.

United States Rolling-Stock.—Capital, $5,000,000, or 1,000,000*l*, in $100 or 20*l* shares, one-half to be first issued. Messrs Bischoffsheim and Goldschmidt have invited applications for these shares, the dividends upon which will be payable in gold here or in New York. General McClellan is president of the company, and an agreement has been entered into with the Atlantic and Great Western Railway to supply to that company "the equipment and rolling-stock absolutely needed for the development of its traffic." The demand for new railway rolling-stock in America is stated to be very large, as 5,000 miles are annually added to the railway system.

MINING COMPANIES.

Champion Gold and Silver Mines of Colorado, Limited.—Capital, 75,000*l*, in 10*l* shares, and 75,000*l* in 12 per cent. first mortgage debentures of 50*l* each. The debentures are now offered, and they are redeemable by half-yearly drawings out of profits after 12 per cent. is paid to the shareholders. Upon redemption, which will be at 60*l* per debenture, two 10*l* shares will be given to the holder. The purchase of the "well-known lucrative and paying mine" in Colorado, U.S.A., known as the "California" mine and the "Champion" mine, will be effected for 95,000*l* (60,000*l* in cash).

Emma Silver Mining, Limited.—Capital, 1,000,000*l*, in 50,000 shares of 20*l* each. One-half offered for public subscription. The Emma mine, which the vendors agree to part with for 1,000,000*l*, one-half in cash and the other in shares, was discovered in the early part of last year, and is situated at Little Cottonwood Canon Utah, about 16 miles from the Pacific Railroad. It is stated that since the works were vigorously carried out (which was in the autumn of 1870) the yield of rich ore has been very large, 4,311 tons consigned to England and sold before the 15th of July, 1871, realising 163,655*l* 8s 2d. During the four months ending the 1st September, ore to the gross value of 298,438*l*, or net value of 231,059*l* is stated to have been raised, being at the rate of nearly 700,000*l* a year. When smelting works are erected, the net yield, it is announced, will be more considerable. The prospectus announces that the new company will be placed in possession of a cash balance of 46,300*l*, and ore raised to the value of 135,000*l*; and the first monthly dividend at the rate of 18 per cent. per annum will be paid on the 1st December.

Imperial Ottoman Mining Company, Limited.—Mr F. O. Tompson Delmar has joined the board of this company.

Illinois Gold and Silver.—The directors have announced that as two-thirds of the shares are already applied for the subscription list will close for London on Monday next and on Tuesday for the country. The shares are 1¾ to 2¼ premium.

I. X. L. Gold and Silver Mining, Limited.—Capital, 100,000*l*, in 5*l* shares. The purchase of various claims, including the "I. X. L." of "Buckeye No. 1," in Scandinavian Canon, Silver Mountain District, California, will be made for 53,200*l*, payable at the option of the company either in cash or shares. The board announce that they are so sure that the mine will be a success that they have made their remuneration depend upon profits. Assays and reports by Mr Lewis Chalmers and Mr Graff are favourable, and it is stated "bullion can be shipped in a few days after a mill is erected."

Morvah Consols Tin Mining, Limited.—Capital, 15,000*l*, in 5*l* shares. "These extensive tin properties" will be transferred to the company for 6,000*l*, one-half in shares. The grant is for a term of 21 years, at a royalty of $\frac{1}{24}$th for tin, and $\frac{1}{10}$th for copper. The mine is situated on the Morvah Hill, near St Just, Cornwall.

New Wheal Charlotte.—A call of 5s per share is payable on the 18th inst.

South Utah Mining, Limited.—Capital, 60,000*l*, in 5*l* shares. For the sum of 45,000*l* (15,000*l* in shares) the company will obtain possession of the "Silver Hill Mine," in Bingham Canon, about 25 miles from Salt Lake City. The property extends 2,400 feet on a "master" ledge, of which Capt. Nancarrow, of the "Utah" Company, report very favourably. The ore produces silver and lead.

Vancouver Coal and Land.—Six months' profit, 418*l*. A dividend at the rate of 5 per cent. per annum has been declared, chiefly out of reserve.

Information having been received from the Austrian Post Office of the closing of the navigation of the Danube for the winter, the despatch of mails from London to Constantinople, via the Danube, has been suspended. Mails for Constantinople will, however, be forwarded from London during the winter session as follows:—Via Trieste, every Tuesday morning; via Bucharest and Varna, every Wednesday morning; via Belgrade, every Friday morning, with supplementary mails on the evening of each of those days.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

On the 1st of November and thenceforward, money orders may be obtained at any money order office in the United Kingdom, payable at any place in the Netherlands. The commission chargeable will be uniform with that charged on money orders issued on North Germany, Belgium, Switzerland, and Denmark, viz.:—On sums not exceeding 2*l*, 9d; above 2*l* and not exceeding 5*l*, 1s 6d; above 5*l* and not exceeding 7*l*, 2s 3d; above 7*l* and not exceeding 10*l*, 3s. No single money order will be issued for a higher sum than 10*l*. The issue of money orders in the Netherlands, payable at money order offices in this country, also commenced on the 1st of November.

According to a communication received from the French Post Office, the private steamers which during the past few months have left Marseilles for Malta three times a month, viz., on the 7th, 17th, and 27th, have reduced the frequency of their sailings to twice a month, the departures from Marseilles being now appointed for the 1st and 15th of the month. In consequence of this alteration, mails for Malta intended for convoyance via Marseilles will, until further notice, be made up in London on the 13th of each month, and on the 29th or 30th, according as the month contains 30 or 31 days. When either of these dates falls on a Sunday, the despatch will take place on the previous evening.

The undermentioned offices have been opened since the publication of the last list of postal telegraph offices, or will be opened for the transaction of telegraphic business on the 8th November:—England—Boxford, near Colchester; Burwell, near Cambridge; Fordham, near Soham; Nayland, near Colchester; Sneinton, Nottingham. Scotland—Alford, near Aberdeen: Dufftown, near Aberdeen; Kintore, near Aberdeen; Oldmeldrum, near Aberdeen; Rothes, near Elgin. Ireland—Ashbourne, near Dublin; Aughnacloy (Tyrone); Brookborough (Fermanagh); Elphin, near Frenchpark; Fivemiletown (Tyrone); Kilkeel, near Newry; Strokestown, near Frenchpark.

The next mails for Australia will be despatched from London as follows:—Via Southampton, on the morning of Saturday, the 25th November; via Brindisi, on the evening of Friday, the 1st December.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was no feature of importance to notice in the grain trade to-day. Supplies of wheat were liberal, and the condition of the samples was good. Sales, however, progressed slowly, at a decline of 1s per quarter, as compared with the prices current on Friday last. Spring corn was firm; maize and oats being rather dearer. Flour sold on rather easier terms. This week's imports of foreign and colonial produce into London have amounted to 44,830 quarters of wheat; 5,650 barley; 18,060 oats; 670 sacks and 750 barrels of flour.

At Liverpool and Wakefield this morning, the wheat trade ruled dull, and the tendency of the quotations was downwards.

The Liverpool cotton market has been very quiet during the past week, but at the close prices show a very slight reduction, being only about $\frac{1}{16}$d to $\frac{1}{8}$d per lb below last Friday's rates. The total sales for the week are 60,190 bales, of which the trade have taken 45,000 bales; speculators and exporters, 15,190 bales. The imports are 34,504 bales; the actual exports, 9,231 bales; and to-day's stock is 497,760 bales. To-day the market closes without change. Sales, 10,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended November 9, 1871:—

	Imported.	Exported.
American bales	19,004	1,451
Brazilian	11,026	1,101
East Indian	1,289	9,631
Egyptian	3,109	10
Miscellaneous	2,596	318
Total	37,024	12,511

At New York, on November 9, middling Upland cotton was quoted at 18$\frac{3}{8}$c per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, Oct. 13:—When our last circular was written there was a very strong demand, chiefly for cotton for forward delivery, and after the mail left dealers were refusing to sell, even at the prices we then quoted. With the change in the tenor of our English telegrams however, buyers withdrew almost entirely from the market, and we had some days of extreme quiet, during which little or nothing was done; but owing to the independent position in which dealers are placed, prices did not give way more than 8 rs to 12 rs per candy on the highest point touched. Within the past day or two the feeling has been more confident again, and

contracts have been resumed at the decline, although to a very moderate extent, and by one or two buyers only. The transactions reported throughout the week aggregate abont 2,750 candies, of which 2,200 are for forward delivery and embrace new Oomrawuttee up to 10th March, at 235 rs; Akote, also to 10th March, at 245 rs, Hingunghat, January delivery, at 260 rs, machine ginned Broach, March delivery, at 225 rs, and old Dhollerah and Bhownugger, delivery in 1½ to 2 months, at 225 rs to 227 rs. In sawginned Dharwar there have been no further contracts made, and the quotation is nominally 240 rs. This description has been very heavily sold forward, and as dealers find great difficulty in covering in their contracts, they are disposed to be very cautious. Several native boats have arrived during the week from Bhownuggur, and one or two boats from Carwar and Compta, with sawginned Dharwar, are also reported. The Bhownuggur, so far as we have seen, is clean and bright in colour, but lacks staple very much; of the sawginned we have not yet seen sufficient to enable us to form any opinion of its general quality. The port of Dhollerah will be opened in a few weeks, and free arrivals are expected next month. Crop prospects continue on on the whole favourable, although the continued absence of rain is necessarily making itself felt in some quarters. Khandeish has suffered particularly from the drought, and our last report says that in many places the cotton plants are stunted in growth, and flowering prematurely. In Guzerat also a moderate fall of rain would be very acceptable although the crops are still healthy. Both in the Southern Mahratta and Dhollerah districts several showers have been reported during the week, and the crops are making good progress. From Central India and N.-W. provinces reports point to a very full crop. From the Berars there is nothing fresh to report. Tinnevelly—Our telegram, dated this morning, quotes 7¼d, c. and f.; market firm.

EXPORT of COTTON from BOMBAY to October 13.

Actual exports since last mail left, 13,361 bales.

The Imperial Ottoman Bank have furnished the following report, dated Alexandria, October 27:—A good business has been transacted during the week, at gradually lowering prices. The continued unfavourable accounts from Liverpool have induced holders to meet the demand more freely, and the more moderate figures accepted have enabled buyers to execute orders that a week ago seemed impracticable. We quote—Fair open to good fair, with staple, 9¾d per lb, f.o.b.; good fair, ditto, 9⅞d to 10d; fully good fair, ditto, 10½d. Arrivals from October 21st to October 27th, 55,480 crs.; sales from October 21st to October 27th, 22,980 crs. Shipments from October 20th to October 26th—England, 5,321; France, 123; Italy, 1,333; Austria, 16—total, 6,993 bales.

The colonial produce markets have been fairly animated during the week. Sugar has met a steady inquiry, and closes at an advance of 6d. The stock in the United Kingdom is 123,250 tons, against 166,230 last year, and the quantity of East India sugar afloat for the United Kingdom and continent (not including Government exports from Java) is 41,000 tons, against 22,500 in 1870, and 24,500 in 1869. Coffee has met a good demand; nevertheless prices show a decline of 1s per cwt from the recent highest point. The quantity of East India coffee afloat to the United Kingdom and continent (not including Government exports from Java) is 12,340 tons, against 8,140 in 1870, and 12,340 in 1869. Rice has continued firm in value. Afloat from the East for the United Kingdom and continent, 74,000 tons, against 105,200 in 1870, and 66,450 in 1869. A good business has been transacted in rum, while spices and oils have ruled the turn dearer.

The annexed is dated Rangoon, Oct. 2:—The inquiry for Natsain rice has continued steady throughout the month under review, and our market assumed an upward tendency, shortly after the issue of our last report. We quote to-day 61 rs to 62 rs per 100 baskets Natsain paddy, equal to 133 rs to 135 rs per 100 baskets, or 5s 9d to 5s 10d per cwt, free on board, for 5 and 6 parts rice. Supplies have continued small during the greater part of the month, but they are now slowly increasing. The tonnage loading for Europe amounts at present to about 5,000 tons burthen only, but exports to that quarter have been pretty large since our last—7,169 tons—and several vessels are shortly expected to load thither. Other qualities have been in equally good demand for shipment to the Straits and Bombay, and the market for the same has consequently followed that for Natsain. We have to quote 128 rs to 133 rs for soft kinds of rice, 5 and 6 parts shipping quality. Exports of rice from 1st January up to end of September, during the last six years, are as follows:—

With reference to the wine trade, Messrs Matthew Clark and Sons observe:—The Board of Trade Returns, made up to the end of last month, show an increased delivery of wines for home consumption, amounting to nearly 73,000 gallons during October, as compared with the same month of 1870. This brings the total home consumption of the first ten months of this year to over thirteen million gallons—an increase of a million and ninety-one thousand gallons, as compared with 1870. These statistics, coupled with the unfavourable results of the vintage just gathered, have influenced our markets here, and a fair business has been transacted in all descriptiens at current rates, which in our opinion must soon rule dearer, as stocks of 1869 and 1870 vintages continue to advance in value on the other side. Brandies have been in better demand, especially as regards the older vintages, which have been dealt in at a slight advance on previous rates. 1870's have also been more freely imported, on account of the uncertainty of the opening prices of 1871's. The imports show a decrease of nearly a million gallons, and the home consumption a considerable increase, as compared with the first ten months of the previous year, both features which must tend to stiffen prices on this side.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on September 29, thus refers to the state of the Cape wool trade:—Our wool market is still very badly supplied with produce. The loss of cattle during the winter months was larger than was estimated, and will materially affect our transport for

some time. Wagons are scarce, and rates of carriage very high. The present means of transport are quite inadequate to the increasing trade of the colony, and the question is becoming a very serious one. The demand for all descriptions of wool is very great, and higher prices have been realised, owing in a great measure to the short supply. Uitenhage scoured wools sell readily at 1s 8½d to 1s 9½d for best sorts, Country scoured wools are much sought after. Fleecewashed—but very little has come in. A few bales of the new clip have come in from Gamtoos River, and have been sold at 13½d to 14d per lb. Grease wools for America are higher. Good parcels are worth 8½d to 8¾d. Of washing wools the arrivals have been very small.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, October 10:—There is nothing of interest to add to our last advices of the crop, which we now estimate (as per statement below) at about 90,000 maunds. It has been impossible to get any returns of the quantities made from Khoonties in Tirhoot, Chumparun, and Chuprah, but when the actual invoices are received, we expect the figures now given will prove pretty nearly correct. In our estimate of 25th August last, when we gave a probable total of 50,000 maunds from these three districts, we assumed that the second cuttings would give about one-third of the quantity made from first, which would have been a fair one, and of which there was then every probability; from that date, however, until the commencement of the present month, the whole country has been completely deluged with heavy rain, and such inundations as have not been known for years, in consequence of which the second cuttings proved a complete failure, and will give less than half of what they then promised. There is no improvement to report from the Benares Provinces or the Doab, where the yield from the Khoonties has been poor throughout, and where the heavy rains and inundations completely destroyed the Assaroo crop. Reuter's telegram of yesterday's date gives the opening of the London October sales. Of 3,000 chests passed, 600 chests only found buyers. Cudes are quoted 3d per lb (⅞ rs per maund) higher than in July, but no quotations are given for Bengal qualities. The following is our present estimate of the crop:—Lower Bengal, about 28,000 maunds; Tirhoot, 22,500; Chumparum, 11,500; Chupra, 8,000; Benares, 5,000; Doab, 15,000—total, about 90,000 maunds.

Messrs T. J. and T. Powell report:—Very little change has been apparent in the character of the leather trade during the past month. The supplies have in general been readily absorbed by the demand, and consequently the stocks on hand continue small. During the last week or ten days, however, the demand has slackened, and with the desire on the part of manufacturers to continue realising their productions, there has been less firmness in the market for some articles. This season of the year is frequently rather a quiet period in the leather trade, but when it is remembered that the home consumption of leather is, probably, unprecedentedly large, and that although the shipments are diminished, there is still no inconsiderable export of leather, it is scarcely probable that any great depression in value can at present take place. Raw Goods.—The imports are about an average, including one cargo of hides from Rio Grande, sold to arrive, which comprises the only transaction of importance by private contract. At the public sales nearly all the goods offered have been cleared. Prices in general have been well supported, but at the sale of the 2nd instant the salted Cape and Australian hides were slightly lower, and the East India kips were higher. Stocks of all articles are moderate.

Messrs Churchill and Sim have published the following statistics:—

The weekly circular of Jay Cooke, McCulloch, and Co., with mail dates, October 24, and cable prices, November 8, says:—In United States bonds, there has been a healthier feeling, and although, owing to the decline in gold, currency quotations have not advanced materially, yet their value in gold is ½ to ¾ per cent. higher. Gold has steadily declined from 113¾, our last quotation, to 111¼, and at the close of business to-day has still a downward tendency. To-morrow, the Treasury begins to pay the interest on the Public Debt, due November 1, and amounting to over $23,000,000. A considerable proportion of this amount is due to foreign bondholders, and will have the effect of temporarily augmenting our remittances to Europe; but there is no doubt that the ordinary supply of commercial and financial bills will suffice to adjust these transfers of interest without any movement of gold. At present, the commercial movement appears to favour a lower premium. Notwithstanding the largeness of our importations, our exports also are unprecedentedly heavy. Last week the shipments of produce from this port were $2,600,000 in excess of those for the same week of 1870; and this week there is an increase of $900,000. There is apparently good reason for hoping that our exportable surplus of cotton will realise more than it did last year. The receipts are beginning to show a closer approximation to those of last year than has been generally expected. For the first few weeks of the cotton year, there was a considerable falling off in the receipts from the interior, as compared with 1870; but as we have intimated in previous advices, the difference was to be partly attributed to the prevalence of fever at the ports and to the lateness of the picking season. From the 1st of September to the 13th of October there was a decrease in the total receipts of 82,336 bales, compared with last year, the receipts of last week, however, showed an increase of 110 bales and those of this week also are in excess of the corresponding days of 1870. These facts are producing an impression on the low estimates formed several weeks since and thus far adhered to, and place in a ridiculous aspect the last report of the department of agriculture, which reduces even still lower its previous depreciatory estimates.

THE COTTON TRADE.

LIVERPOOL.—NOVEMBER 9.

The cotton market has been dull throughout the week, with a limited business, and tendency of prices in favour of buyers; quotations are generally reduced about ⅛d per lb. For Sea Island there has been a good demand, and owing to the diminished choice, prices are steadily supported. American, though freely offered, has given way barely ⅛d per lb in the current qualities, whilst the lower kinds continue neglected, and very unsaleable. New York advices to the 9th instant quote middling Upland 18⅜ cents, costing to sell in Liverpool 9⅛d per lb by steamer. Brazil has been in limited request, and is generally ⅛d per lb lower. In Egyptian the business has been moderate, and prices have given way ⅛d to ¼d per lb. East Indian continues to be freely offered, and with only a moderate demand. Prices have been somewhat irregular, at a decline of about ⅛d per lb from last week's quotations.

In cotton "to arrive" and for future delivery the transactions have been limited. The latest quotations are—American basis of middling (from any port), not below good ordinary, November delivery, $9\frac{3}{16}$d; ship named, 9⅛d; Savannah, not below good ordinary, ship named, $9\frac{1}{16}$d; New Orleans, not below good ordinary, loading, $9\frac{3}{16}$d; November-December shipment, 9⅛d; ship named, 9⅛d; Dhollerah, fair, mutual allowance, not below middling fair, February delivery, 7⅛d per lb.

The sales of the week, including forwarded, amount to 60,190 bales, of which 5,420 are on speculation, and 9,770 declared for export, leaving 45,000 bales to the trade.

NOV. 10.—The sales to-day will probably amount to about 10,000 bales, with a steady market.

LONDON.—NOVEMBER 9.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :—

Our market has continued very dull throughout the week, and prices at the close show, in most instances, a decline of about ⅛d per lb, both for cotton to arrive and on the spot.

PRESENT QUOTATIONS.

NEW YORK.—OCT. 27.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Oct. 27. From the figures thus obtained it appears that the total receipts for the seven days have reached 93,969 bales, against 82,538 bales last week, 64,097 bales the previous week, and 46,044 bales three weeks since, making the total receipts since Sept. 1, 1871, 363,039 bales, against 437,622 bales for the same period of 1870, showing a decrease since Sept. 1, this year, of 74,583 bales. The exports for the week ending this evening reach a total of 39,911 bales, of which 39,899 were to Great Britain, none to France, and 12 to rest of the continent, while the stocks as made up this evening are now 219,526 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night :—

Week ending Oct. 27.	Exported to Great Britain.	Exported to Continent.	Total this week.	Same week 1870.	Stock. 1871.	Stock. 1870.
New Orleans	14786	...	14786	8426	47592	68415

Texas	656	...	656	...	30283	8281
New York	13591	...	13591	16487	40181	28500
Other ports	253	12	265	399	25000	14000
Total	39899	12	39911	41832	219526	231802
Total since Sept. 1	141501	12680	151131	169295	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 1,921 bales, while the stocks to-night are 12,276 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Oct. 20, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph :—

Ports.	Receipts since Sept. 1. 1871.	1870.	Exported since September 1 to Great Britain.	France.	Other Foreign.	Total.	Coastwise Ports.	Stock.

Total last year	...	351687	107583	1494	5036	114113	161431	203457

Under the weight of the large receipts at the ports and dull accounts from Liverpool, our market has further declined during the past week, and the feeling has been dull and depressed until yesterday, when with a little more movement at Liverpool there was increased confidence here; but to-day with Liverpool off again the depression here has returned, and the close to-night was dull, at 18⅛c for middling Uplands and 18c for low middlings. The very large receipts which are now being reported at the southern ports are surprising every one, the total for the last two weeks being in excess of the large totals for the corresponding weeks of 1870; this free movement has led to larger estimates of the crop, though some

claim it is only the result of the paying prices which are now ruling, acting upon the necessities of planters who must realise on their crop before the holidays. For forward delivery the transactions have been very large, and prices have fluctuated somewhat, but the close shows, for most months, a somewhat larger decline than for spot cotton, low middling being quoted at 18c for October, 18c for November, 18⅛c for December, 18⅛c for January, 18 1/16c for February, 19⅛c for March, and for April, 19⅛c. The total sales of this description for the week are 149,200 bales, including 300 free on board. For immediate delivery the total sales foot up this week 11,765 bales, including 6,387 for export, 4,390 for consumption, 379 for speculation, and 609 in transit. Of the above, 542 bales were to arrive. The following are the closing quotations:—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary.....per lb	16 @ ...	16⅛ @ ...	16⅛ @ ...	16⅛ @ ...
Good ordinary	17⅛ ...	17⅛ ...	18 ...	18⅛ ...
Low middling	18 ...	18⅛ ...	18⅛ ...	18⅞ ...
Middling	18⅝ ...	18⅝ ...	19⅛ ...	19⅛ ...
Good middling.....	19⅛ ...	19⅞ ...	20⅛ ...	20⅛ ...

For forward delivery the sales (including 300 free on board) have reached during the week 149,200 bales (all low middling or on the basis of low middling).

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:—

	Week ending Oct. 27, 1871.			Week ending Oct. 27, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	5758	8653	5965	7333	6064	5964
Columbus	2159	1114	4596	3198	2774	4851
Macon	3523	2278	6601	5018	4403	5920
Montgomery	3316	2777	6114	3997	2043	5698
Selma	3591	2703	4100	3173	2345	4785
Memphis	13986	13897	11621	12705	10403	10524
Nashville.....	2321	1827	1328	1023	835	1696
	34654	33249	40325	36447	28867	39438

The above totals show that the interior stocks have increased during the week 1,405 bales, and are to-night 887 bales *more* than at the same period last year. The receipts have also been 1,793 bales *less* than the same week last year.

The exports of cotton this week from New York show an increase since last week, the total reaching 14,930 bales, against 14,328 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1871; and in the last column the total for the same period of the previous year:—

EXPORTS of COTTON (bales) from NEW YORK since Sept. 1, 1871.

—*New York Commercial and Financial Chronicle.*

NEW YORK, Nov. 3.—According to Messrs Moffatt, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 97,000 bales, and since 1st of September 463,000 bales. Shipments to England, 30,000 bales; ditto to France, 3,000 bales; and to the continent, 3,000 bales. Total since 1st September, 187,000 bales. Stock at all ports, 263,000 bales. Middling Upland, 9⅛d, cost and freight, per steamer.

NEW YORK, Nov. 7.—The receipts of cotton at all United States' ports for the last four days have been 49,000 bales. Shipments to England, 16,000 bales; ditto to the continent, 2,000 bales. Middling Upland, 9d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Nov. 9.—There has been a quiet business in progress during the week, nearly equal to the production of the district, but the sales made have been rather numerous than individually large. Owing to the easier state of the cotton market, prices have been rather weak and irregular, and though quotations are nominally unaltered, yet the bulk of the business has been done at a concession from these. In yarns there has been little done in shipping qualities, yet spinners are generally working to order. In home trade counts prices are weak, with only a moderate demand. Cloth still continues sluggish in demand, yet a moderate business has been done by those makers who do not adhere firmly to their quotations. In cloths suitable for our Eastern markets a small business has been done, but there is more activity for some of our nearer foreign markets. For the continent there is very little doing, and all heavy goods for the home trade are dull, and stocks show an increase. The market at the close is quiet, with prices pointing in favour of buyers.

BRADFORD.—There is a fair business doing in the wool market. All good deep-grown wools, particularly wethers, continue in good request. Quotations are maintained with great firmness, and staplers, knowing they cannot replace their stocks with any probability of realising a profit, show no desire to effect sales. There is a moderate business doing in some departments of the yarn market. Two-fold and genappe yarns are most in request, and in consequence of the stiffer tendency of wool higher quotations are sought. In the piece market there is no appreciable change. A moderate demand is apparent in most quarters. Prices are very firm.

ROCHDALE.—There has been only a sparse attendance of the buyers of flannels, and an apathetic feeling seemed to prevail both among them and the manufacturers. Stocks are low, but sufficient for all present requirements. Yorkshire woollens sell only slowly, and buyers have come to consider any relaxation in price hopeless. With a slow sale for goods, wool is only likely to be but in poor request. Stocks are low in this locality, and, with the exception of low noils, all kinds are only saleable at full rates.

LEEDS.—A good attendance of buyers in the coloured cloth hall has not resulted in much actual business. The shippers were, as usual, active in search of tweeds, meltons, and coatings. Stocks are low, and they had to pay full rates for all the parcels they could obtain. There has been no change during the last fortnight in the value of wool or any other raw material.

NOTTINGHAM.—There is a fair demand for silk laces, and for warps the inquiry is pretty good. Hair nets, however, are less in request. The market for lace yarns is firm at previous price, and raw silk maintains its value. Business in the hosiery trade continues active. Hosiery yarns are unaltered in value.

CARDIFF.—In the steam-coal trade there continues to be a large business transacted, merchants finding no difficulty in booking orders where anything like early delivery can be secured. For house coals there is an improving inquiry, the cold weather which has set in having added largely to the sales. Quotations show an upward tendency. At the ironworks operations are carried on with regularity, every department being well employed.

BELFAST.—Flax—Quantities offered during the week may be regarded as tolerably large. Buyers operated freely. Prices generally ruled steady. Yarns—Not any symptoms of improvement have manifested themselves in this department. A further increase in stocks has occurred. Linens (brown), handloom and powerloom—Very little alteration can be announced regarding these since last report. Manufacturers of approved makes of many fabrics are working to order, and do not press sales; consequently prices rule steady. Linens (bleached)—Home trade is in a satisfactory condition; some forward orders were placed, still demand not by any means active. Stocks have become slightly increased. Prices unchanged.

DUNDEE.—For flax goods on the spot there has been rather more inquiry during the past week, and several transactions have taken place at about former prices. Holders, however, are generally firmer, and in some instances demand a considerable advance. There has lately been more inquiry for tows, both of common and fine qualities, and in some instances rather higher prices are required. Jute continues rather dull, particularly common qualities, prices of which have still a downward tendency. The yarn market is much as before. Flax yarns are still rather dull, without change in price. Tow kinds active and buoyant, while jute yarns have been very active, with a continued upward tendency. For linens the demand continues good, both for home and foreign markets, while the demand for some kinds of jute goods is still greater than can be immediately supplied.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Oct. 27.

There has been a pretty general recovery of tone and prices for flour and grain during the past few days, but the whole market closes somewhat unsettled. Flour has arrived more freely, and for the first week in several months, the receipts exceed 100,000 barrels. In the past two or three days, there has been a considerable revival of demand for the lower grades, and prices have improved, while the medium and better grades have remained quiet and unchanged. Early in the week, English shippers bought fairly of common extra State at $6.80 to $6.85, and 4,500 barrels sold for the last half of November at $6.95 to $7, and yesterday there was a good business for Great Britain and the British Provinces, at $6.90 on the spot. Rye flour has showed some depression, but corn meal is scarce. To-day, 3,000 barrels fair extra State sold at $6.95 to $7, and the market was generally very steady, but the close was dull. The market for wheat was quite depressed early in the week by the excessive receipts—about a million bushels arriving in three days—and No. 2 Chicago spring sold down to $1.46, with fair winter and common white going at $1.50 to $1.52, choice amber at $1.56 to $1.58, and prime to choice white, $1.60 to $1.65. But with a falling off in receipts here and at the west, and a marked diminution in the visible supply, a considerable speculation sprung up, which has carried up prices 5c to 7c per bushel from the lowest point. There has been some revival of demand from the continent, but the principal strength of the market has been speculative, favoured by a decline in ocean freights resulting therefrom. The regular reports of receipts at and shipments from Chicago were resumed yesterday, but the movement there is on a small scale for the season. To-day, No. 2 spring sold at $1.52 to $1.54, No. 1 do. at $1 56, and choice white at $1.78 to $1.71, but at these prices shippers became sellers, and the whole market closed flat. Indian corn has met with a good trade demand, and latterly speculation has been active. Receipts are moderate, and the quantity to arrive by canal or rail is but small. Foreign advices have been better and ocean freights have declined; but shippers have not been able to do much, as prices have generally ruled above their limits. To-day, Western mixed, favoured by an advance of 9d in Liverpool, rose to 80c in store and 81c afloat, closing buoyant.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The grain trade has ruled dull this week, and prices have shown weakness. Farmers have lately thrashed out liberally, and the supplies of English wheat on offer have been large; while the stock of foreign wheat in granary have been added to considerably by recent importations. There has, however, been a great lack of animation in the demand, and prices have given way 1s per quarter on the week. The fair stocks on hand and the large quantity of grain on passage have deterred millers from operating beyond their immediate wants; and there appears to be every reason that this cautious policy will be adhered to for the present.

Spring corn has shown firmness. Maize and oats are rather dearer; while barley, beans, and peas have commanded very full prices.

The following statement shows the imports and exports of breadstuffs into and from the United Kingdom since harvest, viz., from August 26 to the close of last week, compared with the corresponding periods in the three previous years:—

IMPORTS.

	1871. cwts.	1870. cwts.	1869. cwts.	1868. cwts.
Wheat	10,221,630	7,004,098	9,434,584	5,423,630

Mr Geo. Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 92 grain and seed-laden ships have arrived at ports-of-call, viz., 37 wheat, 8 maize, 10 barley, 13 rye, 7 beans, 5 linseed, 1 rapeseed, 1 cottonseed, 3 valonia, 1 palm-nuts, 3 sundries. The floating grain trade has been quiet, with prices generally tending downwards. Wheat—Slow sale at last week's decline in prices. Maize has been steady at late prices. Barley steady at almost last week's prices. Rye has been in quiet demand, without much alteration in prices. The reported sales are as follows:—Wheat—10 arrived cargoes: Rostoff Ghirka, from Taganrog, 50s 6d; Hard, from Taganrog, 47s; Ghirka, from Taganrog, 49s; No. 1 spring, from New York, 55s 4½d to 56s 5d; spring, from Montreal, 56s; white Canadian, 62s 6d; red winter, from New York, 58s per 400 lbs. On passage, 1 cargo Red winter, from Montreal, 56s 9d per 480 lbs. Shipped or to be shipped, about 6 cargoes: White Canadian winter, from Montreal, 61s 6d; mixed American, 34s 6d; No. 1 spring, from New York, 53s 9d and 54s per 480 lbs. Maize—5 arrived cargoes: Wallachian, 29s 6d to 31s 6d; mixed, 33s 6d; yellow, from New York, 34s 6d per 480 lbs. Barley—2 arrived cargoes: Azow, from Taganrog, 22s; Odessa, 27s per 400 lbs. Linseed—At first quiet, closing steady. Rapeseed steady. Cottonseed quiet—no sale reported.

COLONIAL AND FOREIGN PRODUCE MARKETS

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—As stocks are still much smaller than usual, with continued good deliveries and the yield of beet sugar in Europe less than last season, the position of the market is strong. The importers of West India demand such high prices that transactions to yesterday were only 153 casks. Barbadoes by auction was bought in. A steady demand still exists for low descriptions, business being done in Manila, China, and Jaggery at firm prices. Grainy Mauritius is rather dearer. A leading feature has been the sales of Havana, amounting to nearly 6,000 chests. The landings here last week were 3,160 tons; the deliveries, 5,340 tons; leaving the stock at the close, 57,750 tons, against an average of 83,400 tons in the three previous years at same date. Stocks in other parts of the kingdom have further decreased.

Mauritius.—11,409 bags chiefly sold, and at rather higher prices: brown, 26s 6d to 29s; soft grey, 29s 6d to 31s; grainy and crystalised, 34s to 37s 6d; bold crystals, 40s to 41s 6d.

Penang.—850 bags, sold at 34s 6d to 35s. 390 bags by auction were bought in above the value.

Madras.—4,300 bags Jaggery are reported at 21s 6d per cwt.

Manila.—10,000 bags clayed: Taal at 22s 6d; Zebu, 23s. 3,400 bags good clayed at 28s.

Other Foreign.—Privately 5,750 boxes Havana have sold at 34s to 34s 6d. 8,200 bags soft brown China at 23s, and 1,000 baskets fine Java at 36s 6d. At auction, 700 casks 90 barrels Porto Rico were partly disposed of at 32s to 35s for low to good yellow. Contracts have been made in beet sugar to arrive, including crystals at 29s 3d to 30s per cwt, in bond.

Refined.—There is a better demand for dry goods and prices have ruled rather higher than last week. Common grocery sorts cannot be obtained much under 40s per cwt. Crushed and pieces steady.

MOLASSES.—No sales reported.

RUM.—Business of moderate extent has been transacted this week, the sales including Jamaica at 3s 4d to 3s 9d, with fine up to 5s 6d per gallon; Demerara good, 1s 10d; Leewards, 1s 8d to 1s 9d; Mauritius, 1s 6½d per proof gallon.

COFFEE.—The statistics of the market continue favourable to importers, and there is some recovery in the demand, especially for native Ceylon, which has nearly attained the late highest point. On the spot, 63s 6d to 65s, and for fine bold Ouvah, 68s 6d paid. Several sales afloat at 65s to 66s. 725 bags triage, &c., by auction, sold at 47s to

55s 6d. 1,015 casks 160 barrels 380 bags plantation sorts brought last week's quotations: low middling to middling, 68s 6d to 76s; good middling and bold, 76s 6d to 80s 6d. 616 bags East India chiefly at 72s 6d to 76s 6d for palish Mysore kind. 530 bags foreign Costa Rica, 63s to 68s 6d; Central American, 73s to 78s; Bahia, 61s 6d to 62s. By private contract business reported in Costa Rica, native, East India, and other kinds, the particulars of which do not transpire. The stock in London is now 7,070 tons less than at the same date last year, and the deliveries have increased about 20 per cent.

COCOA.—Common qualities generally remain quiet, but the middling to good meet with rather more inquiry. At the sales on Tuesday prices were without further alteration. 943 bags Trinidad about two-thirds sold at 62s 6d to 72s 6d for grey to fair; and 73s to 105s for good to fine. Granada quiet for common kinds, and 131 bags were bought in. 332 bags Surinam were withdrawn at 58s to 63s per cwt.

TEA.—There have been some fresh arrivals, including red-leaf congous, and the market is very firm. During the week to yesterday 8,473 packages were offered by auction, but did not establish any material alteration in prices. Black-leaf congous sold steadily. Green went rather irregularly. By private contract the medium to fair grades of congou from above arrivals were taken readily by the trade at high prices. There will be unmeasured supply to-morrow.

RICE.—There is not any change in the market, which remains steady. A few parcels of white Bengal have changed hands at 11s to 13s; old Rangoon and Bassein, 10s to 10s 3d. Four floating cargoes have sold for the continent, viz., three Rangoon at 10s 10½d to 11s; one Necrancie at 10s 6d; Bengal afloat at 10s 4½d to 11s per cwt, ex quay.

IMPORTS and DELIVERIES of RICE to Nov. 4, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports ..... tons	77540	60000	67000	62000
Deliveries	87000	62680	52450	45780
Stock	43930	47080	46950	32820

SAGO.—An advance is generally demanded, but the demand has not been very active. 1,313 bags by auction were only partly sold. Low to good small grain, 15s to 16s 6d; fair bold, 18s.

SAGO FLOUR.—2,383 bags Singapore were partly sold at 16s 1½d. The remainder taken in at 16s 6d. A sale has been made afloat at 16s 3d per cwt.

TAPIOCA.—344 bags were chiefly damaged. 55 bags pearl tapioca sold at 20s per cwt for small green.

BLACK PEPPER.—The market is quiet, and there has not been any business for arrival. By private contract small sales have been made in Penang at 6 11/16d to 6⅞d; and good Singapore at 7¼d. At auction yesterday 781 bags were only partly sold at 6¾d for sound; and 120 bags Singapore at 7¼d. 310 bags Siam part sold at 6¾d to 7⅛d 201 bags greyish Malabar were bought in at 7⅛d per lb.

WHITE PEPPER.—At the public sales yesterday 294 bags Singapore sold rather dearer, from 1s 2¾d to 1s 3½d. Privately business has been done at 1s 2½d per lb cash during the week.

OTHER SPICES.—101 cases brown nutmegs partly sold. Penang, 115's, 3s to 3s 1d; 74's to 72's, 3s 7d; Java, 114's to 92's, 3s 1d to 3s 3d; 84's, 3s 4d. 8 casks low quality Dutch part sold, 2s 11d. 24 cases low Padang realised 4s 2d. 41 cases Penang and 50 boxes Amboyna cloves were taken in above the value. 28 bales Ceylon cinnamon sold upon former terms. The next quarterly sales are fixed for the 27th instant. 332 bags chips were chiefly taken in above the value. Pimento is quiet. On Wednesday 1,266 bags only partly sold at easier rates, from 2⅝d to 2⅞d per lb.

SALTPETRE.—Rather firmer prices have been paid. About 250 tons Bengal are reported sold afloat, the latest price being 32s 9d, usual terms for autumn shipment. 900 bags in course of landing are reported at 33s, usual terms. On the spot a few lots of low quality sold at 30s 6d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to Nov. 4, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported ..... tons	9460	9120	9740	6140
Total delivered	9850	11720	9180	9440
Stock	1990	2220	4750	4860

DRYSALTERY GOODS.—The chief feature in these markets has been some speculative business in gambier at higher prices, viz., 17s 4½d to 17s 6d ex ship, and 17s 6d to 17s 9d on the spot for block. Cutch has become quiet, with limited transactions by private contract. 1,168 packages in public sale were taken in. Business has been done in turmeric: Bengal, 18s to 18s 6d; Madras, 17s 3d to 17s 6d. 40 chests lac dye were bought in. Sales of China galls at 52s 6d, but a parcel by auction was bought in at 53s per cwt. 45 bales Bengal safflower withdrawn.

SHELLAC.—213 chests sold at 7l to 7l 5s for good livery orange. A good business has been done privately, including garnet to arrive at 6l 5s to 6l 7s 6d per cwt, rather higher prices than were attained last week.

METALS.—There has been a continuance of activity in these markets, which are now very firm. The speculative operations in Straits tin have been upon a large scale at 3l higher rates, and with the reduced stocks some further advance is expected. Straits on the spot and to arrive, 143l to 144l; for delivery in January, 144l. Banca is worth about the same. English higher, and prices unsettled. A good many sales have been made in copper during the week: Chili, &c, 67l to 69l; Walaroo, 76l 10s to 77l per ton. Quicksilver, 9l 15s to 10l per bottle. The importers ask the latter price. A further advance has been paid for spelter. Silesian, 19l 15s to 20l; Rhenish, &c., 19l 5s to 19l 12s 6d. Scotch pig iron, after falling to 65s 9d cash, is now at 66s 3d per ton, and a good business has been done during the week. London rolled sheet zinc sold by auction at 24l to 24l 2s 6d per ton.

HEMP.—Petersburg is firm at the quotations. Transactions in Manilla are rather limited. Of 2,709 bales by auction, a portion sold at 43l to 46l 5s per ton for low and common qualities. Privately, a limited business reported.

JUTE.—No change can be quoted in prices this week. Several sales have been made for arrival, part near at hand, per steamer, at 25l 5s. Ordinary of the old crop, 16l 10s, landed terms. A very limited quantity sold on the spot.

LINSEED.—The market is firm. Calcutta, afloat, 62s 9d to 63s 6d; on the spot, 62s 6d to 63s. Taganrog cargoes, 62s 3d to 62s 6d per quarter upwards.

OILS.—A few sales of olive have been effected at firm prices, but the market is without activity. Sales of magnitude have been made in sperm at 85l per tun; there are still buyers thereat, but importers demand 87l, and in some cases 90l. Stocks are in a very narrow compass. The disastrous intelligence received from the Arctic fleet announcing that over thirty whalers have been frozen in and abandoned by their crews, has produced little, if any, influence on common fish oils. Linseed oil firm, and in good demand at 34l 10s, and 34l to 34l 5s to the end of the year. First four months of next, 34l. English brown rape has been active. Present value, 45l 15s to 46l; January to April, 46l 10s paid. English refined, 48l. Foreign, 50l to 51l. Cocoa-nut is less in demand than before. Ceylon good, 38l 10s sellers, and to arrive, 38l to 38l 10s, according to date of shipment. Palm firmer, and fine Lagos is held for 39l per ton.

PETROLEUM quiet. American refined, 1s 5¾d to 1s 6d.

TURPENTINE dull. American, 49s; French, 48s per cwt.

TALLOW.—Quotations of Russian have advanced 1s 6d to 2s, and there is a firm market. Petersburg new, 49s 3d; March, 50s to 50s 3d. There has been a good business done. The sales of Australian, &c., to-day will be large.

PARTICULARS OF TALLOW—Monday, Nov. 6 1871.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—There was a good business in West India to-day, viz., 1,558 casks, including a large quantity of Barbadoes. 103 tierces Jamaica by auction were bought in. 715 bags Bengal sold at 29s 6d to 30s 6d for Gurpatta. Privately 3,000 bags clayed Manila at 26s 6d to 26s 9d, and 1,700 boxes Havana at 34s.

COFFEE.—The public sales were small. 1 cask 166 barrels and bags Jamaica, and 71 casks 72 barrels and bags plantation Ceylon, went without further alteration in value. 300 bags Java at 68s 6d. 158 bags Costa Rica at 66s 6d to 67s 6d per cwt.

RICE.—A floating cargo of Rangoon sold at 10s 9d for the continent, or 10s 6d per cwt ex ship for London.

PEPPER.—1,000 bags Penang sold at a lower price, not reported.

SHELLAC was rather dearer again. For fine orange 7l has been refused.

TURMERIC.—818 bags Bengal were taken in at 18s 6d per cwt.

METALS.—Scotch pig iron active at 67s 6d to 67s 9d cash. Tin dearer. Straits, 144l to 144l 10s per ton.

OIL.—498 casks palm by auction, sold chiefly at 34l to 36l 10s for the lower qualities. 215 casks Ceylon cocoa-nut sold at 37l 10s to 38l 15s per ton. 200 tuns fish oil part sold: seal, 35l to 36l 10s; cod, 32l 10s per ton.

TALLOW.—Town rose to 50s 3d. Petersburg, 49s 9d to 50s; and March, 50s 9d to 51s. Australian, by auction, went at 2s advance in most instances, and 2,300 casks chiefly sold: mutton, 47s 6d to 50s; beef, 45s 6d to 48s per cwt.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that oranges of good colour are in request, shipments from the Azores daily expected. Further arrivals of Messina lemons and improved in quality. Almeria grapes have been sold at high prices, heavy rains having injured the remainder of the crop. Black Spanish nuts without alteration, Barcelona improved in value, Brazil selling freely; a moderate supply of French chestnuts with a good demand.

DRY FRUIT.—Currants, owing to simultaneous arrivals of 5,200 tons during a few days, have become very heavy of sale, and buyers are only induced to look at samples where a considerable reduction in price is conceded. The stocks are rapidly accumulating, and the country buyers are well supplied, so that the congestion is felt mostly in London. A few London wholesale houses who have abstained from purchasing for some weeks, will have to replenish stocks in a week or two for actual Christmas demand, and this, it appears, will be the end of the season. Valencia raisins are dull, and buyers are only found by meeting them in price; fine however are scarce. Muscatels and Sultanas quiet but steady. Turkey figs a large trade at very moderate rates.

ENGLISH WOOL.—Very firm for all descriptions.

COLONIAL WOOL.—Consumption steady, prices unaltered, very little doing by private contract.

FLAX.—Market firm.

HEMP.—Market steady for clean Manila, very firm, and 50l paid for good fair roping.

SEEDS.—The trade is quiet, and quotations are unaltered.

TOBACCO.—There has been but little doing in the North American tobacco market, buyers only taking such as they stand in immediate need of. The sampling of the last import has now made considerable progress, and some few parcels have found buyers. Prices generally are without alteration. In substitutes and segar tobacco there has been a moderate business done.

METALS.—The business of the week has been pretty good, and general. Copper has found a steady sale at slightly improving prices. Iron maintains its firm position and good demand. Tin has further advanced in prices. Lead is quiet. Spelter continues to be in request. Tin plates are in good demand.

METROPOLITAN CATTLE MARKET.

MONDAY, Nov. 6.—The total imports of foreign stock into London last week amounted to 16,308 head. In the corresponding week in

1870, we received 16,999; in 1869, 10,849; in 1868, 7,899 head; and in 1867, 16,685 head.

The cattle trade to-day has been in a quiet state. The supply of beasts has been much larger than usual, owing to the heavy receipts from abroad, but the general quality has been inferior. The demand has been inactive, and prices have receded 2d per 8 lbs. For the best English breeds 5s 6d to 5s 8d has been paid, and the choicest foreign have been disposed of at 5s 2d per 8 lbs. The show of sheep has been moderately good, and some fair-conditioned stock has been noticed in the pens. Sales have progressed slowly, but although prices have ruled in favour of purchasers no actual reduction has taken place, the best Downs and half-breds selling at 6s 10d to 7s per 8 lbs. Calves have changed hands at previous quotations. Pigs have met a slow sale at late rates.

SUPPLIES ON SALE.

	Nov. 6, 1870.	Nov. 6, 1871.
Beasts	2,775	5,880
Sheep	16,640	22,190

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Nov. 10.—Moderate supplies of potatoes have been on sale. The trade has been quiet, at late rates. Regents, 80s to 110s; Rocks, 70s to 80s; Flukes, 120s to 140s; and Victorias, 100s to 120s per ton.

HOP MARKET.

BOROUGH, Friday, Nov. 10.—The business doing in new hops has been less active, but prices have been well maintained. Yearlings have been in steady demand, at firm prices. Mid and East Kent, 10*l* to 16*l* 16s; Weald of Kent, 8*l* 10s to 10*l* 10s; Sussex, 7*l* 5s to 9*l* 9s; Farnham and country, 11*l* to 16*l*. Yearlings—Mid and East Kent, 3*l* to 6*l* 10s; Weald of Kent, 3*l* to 5*l* 15s; Sussex, 3*l* to 5*l*; Farnham and country, 4*l* 10s to 6*l*; olds, 1*l* 8s to 2*l*.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 10.—There has been a very fair demand this week for home consumption, resulting in transactions of larger extent than for some little time past, at pretty steady rates, which augurs well for our next series of East India auctions, to commence here on the 21st inst.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Nov. 10.—There was only a small attendance at this market to-day. Wheat in better tone, at Monday's rates. Flour was quiet. Maize, beans, peas, oats, and oatmeal were without change. Beans, Saidi, 33s 6d; mixed, 33s. Peas, 45s. Mixed corn, 33s 6d.

WAKEFIELD, Friday, Nov. 10.—At this market to-day the supplies were liberal. The wheat trade remains quiet. Fine old and new wheats are fully as dear as last week, but there is no demand for other qualities. Barley, beans, oats (shelling), and malt unaltered.

L. King, Esq. with songs by Miss Alice Barth.—Open daily from 12 to 5 and 7 to 10.—Admission One Shilling.

HUBBUCK'S PATENT WHITE ZINC PAINT
Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.
It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.
ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.
Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."
THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.
"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

OXYGENATED WATER HOLDS IN
Solution pure Oxygen Gas, the vital element that sustains life. It is a decided tonic and alterative draught, and from its special action on food during the process of digestion and assimilation is peculiarly suitable for invalids. Price 4s per dozen half-pints.
Laboratory, 36 Long Acre, and all Druggists.

MESSRS GABRIEL, DENTISTS,
(Established 1815),
64 LUDGATE HILL, CITY, and 56 HARLEY STREET, W., } London.
(Their only Establishments.)
Where they practice their painless system of DENTISTRY.

HOLLOWAY'S PILLS.—IN
painful contrast with the recent bright summer, stands the present dark, cheerless season, with all its attendant misery and sickness, and what is infinitely worse, with its catalogue of weekly deaths far in excess of the usual autumnal average. The cause is probably attributable to the pestilential vapours diffused through the dense damp fogs which have been so prevalent of late. These pills purify the blood, which has been contaminated by foul gases, and give tone to the nervous system, whereby typhus, typhoid, gastric, and bilious fevers are warded off. Holloway's pills are also the best known promoters of digestion, and the surest regulators of the liver, and the most valued and effective of all aperients.

PRIZE MEDAL AWARDED.
LIONEL AND ALFRED PYKE,
SOLE PROPRIETORS AND MANUFACTURERS OF THE
REGISTERED
"ABYSSINIAN-GOLD"
JEWELLERY.
The only Imitation equal in appearance to 18-carat Gold.

NEW WORK ON BANKING.

Just published, in fcp. 8vo, price 6s, cloth,

BANKING CURRENCY, AND THE EXCHANGES.

A PRACTICAL TREATISE.

By ARTHUR CRUMP,

Bank Manager; formerly of the Bank of England.

OPINIONS OF THE PRESS.

"Mr Crump's 'Treatise' is full of interesting facts upon all subjects connected with practical banking. The law as it affects cheques, bills of exchange, and bills of lading, is very fully stated, and we hardly know where so much sound information and advice upon general banking matters can be found as in this comparatively small volume."—*British Quarterly Review*

LONDON: LONGMANS, GREEN, AND CO., PATERNOSTER ROW

Price 3s 6d,

FOURTH EDITION, WITH ILLUSTRATIONS BY GILBERT,

MY NEW YEAR'S GIFT TO MY SON.

"We cannot find language sufficiently strong to express our favourable opinion of this handsome volume, nor can we recommend a New Year's Gift so admirably adapted for the rising generation, on whom it is calculated to have a living and a lasting influence."

"A more profitable and mind-elevating New Year's Gift for a father to give his son, a guardian his ward, or a schoolmaster his pupil, could scarcely be devised."

LONDON: WARD, LOCK, AND TYLER, WARWICK HOUSE, PATERNOSTER ROW;
And to be had at 310 Strand; or sent post free for 45 Stamps.

NEW SERIES.

Published Monthly, price One Shilling,

THE FLORIST AND POMOLOGIST:

Publishing Office—171 Fleet street, London, E.C.

FINE FLAVOURED STRONG BEEF TEA at about 2½d a pint. Ask for LIEBIG COMPANY'S EXTRACT OF MEAT, requiring Baron Liebig the Inventor's Signature on every jar, being the only guarantee of genuineness.

Excellent economical stock for sauces, &c.

CURE OF BRONCHITIS, Hoarseness, Colds, &c., by Dr Locock's Waters.—From Mr Buckley, Chemist, Knighton:—"Nov. 4, 1871—I have great pleasure in bearing my testimony to the good effects of Dr Locock's wafers in Coughs arising from colds, and excess of speaking, having derived much benefit from them myself. A case of periodical bronchitis was also completely cured by their use." In asthma, consumption, bronchitis, coughs, colds, rheumatism, and all hysterical and nervous pains, instant relief is given. They taste pleasantly. Sold by all druggists at 1s 1½d per box.

SHIRTS.—THE "LONDON DOUBLE SHRUNK" FLANNEL SHIRTS.—Messrs R. FORD and CO. have all their new patterns of double shrunk flannel shirts now ready. Patterns sent free, with self-measure. The "London Double Shrunk" are the perfection of flannel shirts. No quantity of washing will ever shrink them.—Richd. Ford and Co., 38 Poultry; Branch, 308 Oxford street, W.

EDUCATION.—"ONE YEAR'S Good Schooling" at the English and Continental College, Harrow (close to the station).—A few ANNUAL VACANCIES.—Parents anxious to give their boys, before they put them into any business, a year's finishing instruction in a highly recommended boarding school, of limited number, near town, to be perfected (even if backward) in penmanship, commercial and polite correspondence, arithmetic, bookkeeping (or mathematics and drawing), French conversationally, and gentlemanly manners, are invited to address the Principal, who is assisted by efficient and hard-working masters. Younger boys, to be prepared for public schools, the professions, and competitive examinations, are received for a longer period. Dry playground, with a gymnasium and a splendid cricket field, close to the house, which latter is replete in all its appointments. Highest references as to liberal board, kind treatment, excellent health, and first-class progress of the pupils. Eight first-class masters are engaged to secure the success of thirty pupils. Terms—30 guineas under 12, 35 guineas under 14, and 40 guineas per annum under 15 years of age. 10s for laundress, 10s for books and stationery, and for tuition of dancing, drilling, singing and brass band instruments. 10s per quarter are the only extras. Established 1857. Address Dr VELLERE Harrow

BRINDISI MAIL ROUTE TO Egypt, India, China, Australia, Rome via Falconara, Naples via Foggia, Shortest and Cheapest Route. For through tickets and information apply to the SOUTH ITALIAN RAILWAY.—Agents, Lebeau and Co., 5 Bibter street, London, E.C.

IMPERIAL OTTOMAN LOAN OF 1862.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisham systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as Taught for upwards of 50 years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, ensure perfection after a few easy and interesting lessons. Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution 13 Strand.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

SOUTH AUSTRALIAN GOVERNMENT SECURITIES,

FIVE PER CENT. BONDS, PRINCIPAL AND INTEREST PAYABLE IN LONDON,

FOR £140,000.

The National Bank of Australasia, 47 Cornhill, E.C., is authorised by the undersigned to receive Tenders for South Australian Government Securities, to the amount of £140,000, authorised by the Acts of the South Australian Parliament, No. 14, of 1870-71, and No. 15, of 1870-71, for Extension of Waterworks.

The bonds, which are for £500, £250, and £100, bear interest at the rate of 5 per cent. per annum, commencing on the 1st January, 1872, and mature half-yearly, between 1915 and 1920. Principal and interest are made payable in London, at the dates specified in each bond; the interest by coupon on the 1st of July and 1st of January of each year. A copy of the authorising Acts, and sample of the bonds, may be inspected at the office of the undersigned.

Sealed Tenders, made in accordance with the annexed form, will be received by the National Bank of Australasia until 2 o'clock on Friday, the 17th November, when they will be opened at that hour in the presence of such of the applicants as may desire to be present.

The bonds will be allotted to the highest bidders, provided the rates offered are not below par.

Tenders at a price including the fraction of a shilling other than sixpence will not be necessarily accepted, and in the event of an equality of Tenders beyond the amount of these bonds, a *pro ratâ* distribution of such Tenders will be made. In the same way the bonds falling due between 1915 and 1920 will be distributed, as regards those dates, as near as possible, amongst the successful tenderers.

Five per cent. of the nominal amount tendered must accompany the Tender, and the balance must be paid on Friday, the 5th of January, 1872, when the bonds will be delivered.

Tenderers to whom allotment may be made can have their bonds at once if they desire it, by paying the balance, less the discount, at 1 per cent. below the Bank of England rate.

Forms of Tender may be obtained at the Office of the National Bank of Australasia, or of the undersigned,

FRANCIS S. DUTTON, Agent-General for the Government of South Australia.

37 Great George street, Westminster, 11th November, 1871.

FORM OF TENDER.

SOUTH AUSTRALIAN GOVERNMENT SECURITIES, FIVE PER CENT. BONDS.

To the Manager of the National Bank of Australasia.

Sir,—I (or we) hereby tender for £ Bonds of the Government of South Australia, according to the notice of the Agent-General, dated 11th November, on which I (or we) enclose the required deposit of £ , and undertake to pay £ for every £100 in Bonds, and to accept the same or any less amount, and of such dates, that may be allotted to me (or us), and to pay the balance in conformity with the terms of the said notice.

SOLICITORS—Messrs Haywards, Keele, and Swann, 5 Frederick's place, Old Jewry.

AUDITORS—Messrs Spain and Andrewes, Public Accountants, No. 1 Gresham Buildings, Basinghall street.

SECRETARY—G. S. McKay, Esq.

TEMPORARY OFFICES—47 Finsbury circus, London, E.C.

The present Company has been formed for the purchase and working of the Morvah Consols Tin Mines, upon the Limited Liability principle.

These extensive tin properties are situated in the parish of Morvah, immediately adjoining the parishes of St Just, Sancreed, Zennor, and Madron, all celebrated for their valuable tin produce, not only yielded by the tin streams, but from mines containing true lodes. Some of these have been wrought to the depth of hundreds of fathoms, and found continuously rich from the surface, and for miles on the course of the lodes. The profits from these sources have been unprecedentedly large.

The site of the mine is situate on the northern declivity of the Morvah Hill, one of the bosses of the Great Western stanniferous granite, extending from South St Just to the extreme east of the Dartmoor range.

Not only have the granite tin mines been thus, for centuries, productive, but never in their history have they been so successful as at the present period. To this end a variety of circumstances concur, viz., an enlightened policy on the part of the lords of the soil, by which the dues have been greatly reduced; the introduction of modern machinery and appliances, rendering ores highly remunerative which had formerly been held to be worthless; and the great demand now existing for tin, which has advanced to £90 per ton.

The Company possesses the advantage of entering upon property with shafts already sunk to a depth of 18 fathoms, and levels opened upon the course of lodes proved to be productive of both tin and copper, but especially the former. The additional outlay of £4000 to £5000 is, in the opinion of the best practical authorities, ample to extend the works as proposed, and to erect the necessary machinery for the economical discharge from underground, and the manipulation and cleaning of the ores with despatch at surface.

The existing and prospective high value of tin, and the fact of good quality ores being worth £90 per ton, has of necessity drawn attention to the tin-producing districts of Cornwall, where but few properties in the best neighbourhoods now remain unworked.

The mines are held under a grant, for the term of 21 years, at the very moderate royalty of 1-24th for tin and 1-20th for copper.

The Directors request a careful perusal and examination of the reports, made by some of our most eminent practical mining authorities, containing, as they do, correct information on every important point, as well as estimates of the cost necessary to render the Morvah Consols a dividend-paying property.

It will be seen the lodes are numerous, well defined, and continuous, the precipitous cliffs affording opportunities for ascertaining the character of the veins, only to be obtained under similar physical conditions.

With so many unusually natural advantages combined, the Directors feel no hesitation in presenting this enterprise to the investing public as one of sterling merit, for, under careful working, coupled with practical experience, this property cannot fail eventually to return to its shareholders a handsome and remunerative dividend on the small outlay of capital.

The transfer of the properties, lease, &c., under agreement with the lessee, to be made to the Company for 600 fully paid-up shares, and £3,000 in cash; and provision has been made in the agreement that the lessee shall hand over to the Company the lease, with possession, as soon as the conditions are complied with.

The following contract has been entered into on behalf the Company, viz., an Agreement dated 2nd November, 1871, between James Hammon, of the one part, and George Samuel McKay, on behalf of the Company, of the other part.

Copies of the reports on the properties, with plans, &c., of the workings, also of the lease and the agreement for purchase, and the Articles of Association, can be seen at the Offices of the Solicitors, Messrs Haywards, Keele, and Swann, 5 Frederick's place, Old Jewry, E.C., and at the Offices of the Company, 47 Finsbury circus, London, E.C.

Applications for shares may be made on the annexed form to the Bankers, or at the Offices of the Company.

FORM OF APPLICATION FOR SHARES.

Deposit—£1 per share upon application; £2 on allotment.

To the Directors of the
MORVAH CONSOLS TIN MINING COMPANY (Limited).

GENTLEMEN,—Having paid £ to your Bankers (being a deposit of one pound per share), I request you will allot to me shares in the Morvah Consols Tin Mining Company (Limited), or any less number, which I hereby accept, subject to the regulations of the Company, contained in the Memorandum and Articles of Association, and duly registered; and I hereby authorise you to place my name on the register of members.

SECRETARY—Edwin Miller, Esq.

OFFICES—16 New Broad street, E.C.

The valuable property acquired by this Company, known as the Silver Hill Mine, is situate in West Mountain District, Bingham Canon, about 25 miles from Salt Lake City, Utah Territory, U.S.A. A good main road runs close to the mine, and the Utah Southern Railway (a branch of the Union Pacific) has a station within 15 miles, and will shortly be brought much nearer to the property.

The Bingham Canon has become celebrated for the richness of its veins of lead and silver, which, though only recently worked, are already yielding enormous results.

The famous Emma Mine, one of the richest in the world, is in the neighbourhood of the Silver Hill claim. The Utah Mining Company's works are within half-a-mile of the property; and according to reports lately received from their superintendent, are giving very profitable returns.

The Silver Hill claim extends for 2,400 feet on the run of the lode, which has been proved to be from 8 to 20 feet in width. The lode is described as a "master one," embedded in a soft quartz, known in that locality as the ore-bearing rock, affording great facility for extraction.

From the report accompanying the prospectus of Captain James Nancarrow, the superintendent of the Utah Mining Company, it appears that in August last a shaft had been sunk to the depth of 60 feet, where the lode showed an increasing average percentage of lead and silver. The vein has been cut into at several other places, and ore to the extent of 600 tons is reported to have been taken out. The samples assayed by Captain Nancarrow yielded, on an average, 49 per cent. of lead, and 20 ounces of silver to the ton. Three tons of such mineral, on reduction, would produce over one ton of base bullion, consisting of silver and lead, of an estimated value of £30 per ton.

As there is abundance of wood and water in the locality the cost of extraction and smelting will not exceed that of other mines in the district. In the case of the Utah Mining Company these charges are estimated at £6 per ton.

The vendors state that since the date of Captain Nancarrow's report the shaft has been sunk a further distance of 15 feet, and that under a limited system of working from 20 to 30 tons of ore were being daily extracted from the mine, and that mineral to the value of £20,000 had been exposed to view.

It is calculated that at least 60 tons of mineral can be raised daily, yielding on reduction over 20 tons of bullion. Valuing this produce at £30 per ton, and allowing a cost of £6 per ton (as in the case of the Utah and Saturn Mines), there would be a net profit of £24 per ton per day. Assuming, however, that on commencing operations only the present rate of production, or say 30 tons per day, are treated, the net annual profit, at the very low computation of 200 working days per annum, would amount to £48,000, or 80 per cent. per annum on the entire capital.

The quantity of ore ground already laid open is so extensive that this annual profit may be largely augmented, and, practically speaking, would appear to be limited only by the amount of labour employed, and the extent of appliances for smelting and reduction.

An agreement, dated London, 1st November, 1871, has been entered into between the vendors and Edwin Miller, Esq., as a trustee for the Company, for the purchase of the mines for the sum of £45,000, to be paid for in 30,000 fully paid-up shares, and £30,000 in cash; and may be seen, together with the Articles of Association and Captain Nancarrow's report, upon application at the Offices of the Company.

The 9,000 shares now offered for subscription will provide the cash required on purchase account, and leave a balance of £15,000, which is considered ample for working expenses and for the erection of furnaces capable of reducing 100 tons of ore daily.

Applications for shares must be accompanied with a deposit of 10s per share. In cases where no allotment is made the deposit will be returned without deduction, and where an allotment is made of an amount smaller than that applied for the surplus of deposit will be applied towards the amount payable on allotment.

Applicants desiring to pay up in full will have priority in the allotment.

London, Nov. 6, 1871.

SOUTH UTAH MINING COMPANY (Limited).

Notice is hereby given, that the SUBSCRIPTION LIST for SHARES in this Company will be CLOSED on WEDNESDAY next, the 15th inst. for London, and on THURSDAY, the 16th inst., for the Country. By order, EDWIN MILLER, Secretary

16 New Broad street, E.C.

DINNEFORD'S FLUID MAGNESIA.

—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heart-burn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.

DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

GLASGOW, COATBRIDGE, AND AIRDRIE TRAMWAYS COMPANY.

To be incorporated by Special Act of Parliament, the liability of the shareholders being limited to the amount of their shares.

Capital, £100,000, in 10,000 shares of £10 each.

Deposit, £1 per share on application and £1 on allotment, and the remainder by calls not exceeding £1 per share, and at intervals of not less than three months between each call.

If no allotment is made the deposit will be returned in full.

PROVISIONAL DIRECTORS.

Robert Craig, Esq., Newbattle Mills, Dalkeith, and Caldercruix, and Moffat Mills, near Airdrie.

TEMPORARY OFFICES—63 Bath street, Glasgow.

PROSPECTUS.

This Company is proposed to be incorporated with the view of obtaining the necessary Parliamentary authority to construct and work tramways, commencing by a junction with the authorised "Glasgow Street Tramways," at a suitable point near "Parkhead," and passing through "Shettleston," "Barrachnie," "Baillieston," "Langloan," and "Coatbridge" to "Airdrie," being a distance of about ten miles.

It is also proposed to obtain powers to construct branch tramways from the main line, so as to establish tramway connections with the public railways and the various public works, &c., in the district and on the Clyde, thus enabling waggons to run direct along the railway and tramway system, and from work to work.

The district has long been known as one of the great centres of iron production and manufacture, and as a focus of railway communication to all parts of the country.

The population along the line of proposed tramways may be moderately estimated at 100,000, and is rapidly increasing.

There is a large traffic in goods and minerals capable of being developed by the tramways, which offer a cheap, speedy, and easy mode of conveyance, and it is expected that these will prove feeders to the railway system, and also carry a considerable portion of the goods and minerals, for which the present railway and canal communication is neither convenient nor adequate.

The tramways will place the ironworks and mineral fields of the district in direct communication with most of the public works throughout the City of Glasgow, and the various shipbuilding yards on the Clyde. As is well known, scarcely any of the shipbuilding yards have any communication with the existing system of railways, so that the tramways will necessarily command a great portion of the traffic between them and the ironworks of the district.

Tramways have now been successfully used for several years both in this country and on the Continent of Europe, as well as in America and Canada. There is no prejudicial interference with the streets and roads, as carriages and other conveyances can cross and re-cross the rails without inconvenience.

The district is remarkably well suited for tramways. The roads are wide and regular, and the gradients are unobjectionable, so that the traffic can be worked very economically.

The adoption of the grooved rail, which is laid flush with the road, has removed the objections which formerly existed to the general formation of tramways.

By the system of brakes employed, the tramway carriages can be stopped, while running, within the distance of their own length.

The difference in the question of working expenses between tramways and omnibuses is much in favour of tramways, the average in the case of a tramway being about 60 per cent., while omnibuses can only be worked at a much higher percentage.

Tramway companies recently started in this country, where the traffic has been almost exclusively passengers, have proved very successful; and, looking to the field proposed to be occupied by this Company, where there is a large traffic in goods and minerals, as also passengers, the Directors are satisfied that this is an undertaking of unusual promise.

It is estimated that the proposed capital will suffice for the construction and equipment of a double line of main tramways, and branches of single line.

Forms of application for shares, and sketch plan, showing the proposed main line of tramways, may be obtained at the Temporary Offices of the Company, or from the Brokers and Bankers of the Company.

FORM OF APPLICATION FOR SHARES.

Referred to in the prospectus of the Glasgow, Coatbridge, and Airdrie Tramways Company.

(To be retained by the Bankers.)

To the provisional Directors of The Glasgow, Coatbridge, and Airdrie Tramways Company.

Gentlemen,—Having paid to your Bankers the sum of £ , being a deposit of £1 per share, on shares of £10 each in the above Company, I request you to allot me that number, and I hereby agree to accept such shares, or any less number that may be allotted to me, and to pay the further sum due on allotment, and the calls according to the terms of your prospectus, and I agree to become a shareholder of the Company, and I authorise you to place my name on the register of shareholders for the shares so allotted.

SECRETARY—W. A. M. Browne, Esq.

OFFICES.

114 Palmerston buildings, Old Broad street, E.C.

ABRIDGED PROSPECTUS.

The celebrated I. X. L. Gold and Silver Mines are in Silver Mountain District, California, comprising 3,010 linear feet.

Terms of proposed purchases are £53,000 in cash, or in fully paid shares of the Company, or partly in shares and partly in cash, at the option of directors.

Mr Lewis Chalmers states that these mines are "true fissure veins," therefore inexhaustible deposits of the precious metals; and concludes, "I have no hesitation in recommending their purchase as a lucrative investment."

Mr Graff, another mining engineer of some celebrity, writes, "The only thing needed is a mill to make the mine dividend-paying," as "bullion can be shipped within a few days thereafter."

Arthur J. Wheeler considers "the I. X. L. Gold and Silver Mines the richest in the county."

Titus F. Cronise, in his standard work, "The Natural Wealth of California," at page 260, states the ore crude was sold on the dump at the rate of 100 dollars, equal to £25 per ton.

The Hon. J. Ross Brown, in his report to Congress, pages 171, 172, specially confirms those statements with regard to the value of ore taken from these mines.

Rossiter W. Raymond, United States Commissioner of Mining Statistics, in his report to Congress, says that "these ores can be mined and reduced at a cost of 8 dols (about 36s) per ton, owing to the abundance of water power and timber."

Colonel J. Winchester, in his work upon "Gold and Silver Mines," for these reasons also estimates that these ores could be worked at one half the cost of the Comstock Mines.

Mr Chalmer's assays there, and those of Messrs Johnson, Matthey, and Co. here, made from ore taken at shallows depths, range from £34 to £73 per ton.

Professor Raymond states the average length of lode of twenty Comstock companies, working at Virginia City, as 800 feet, and their average output at 70 tons of ore daily, or 20,000 tons annually. Estimated in the same ratio the I. X. L. Mine should turn out 260 tons per diem, or 72,800 tons per annum.

The Stetefeldt furnace secures a profit from ore worth only 13 dols or £2 10s per ton.

The Directors have so satisfied themselves of the certainty that the Company must pay very large dividends, that they have caused a clause to be inserted in the Articles of Association making their remuneration entirely dependent upon the realised net profits.

Samples of the ore, and plans and sections of the workings, can be seen at the Offices of the Company.

Prospectus, reports, forms of application for shares, and any further information may be obtained at the Offices of the Company.

The following are the dates and names of the parties to the only contracts entered into by the Company:—

Nov. 4, 1871. Agreement between Augustine John Brunton of the one part, and Cuthbert Jephson for and on behalf of the Company, of the other part.

Nov. 4, 1871. Agreement between W. A. M. Browne, on behalf of the Company, of the one part, and Henry Clink, of the other part.

CAPE OF GOOD HOPE, ALGOA BAY, and NATAL.—

The UNION STEAMSHIP COMPANY'S ROYAL MAIL PACKETS SAIL from SOUTHAMPTON on the 10th and 25th of the month, calling at Madeira. The packet of the 10th calls at St Helena. The packet of the 25th corresponds with Natal.

Fares to Cape Town and St Heleua, 30 Guineas and 20 Guineas; to Algoa Bay, 33 Guineas and 22 Guineas; to Natal, 37 Guineas and 25 Guineas.

Passengers and their luggage are taken from London to Southampton free of railway, dock, and agents charges, and the rates of freight include all charges of shipping and agency from Nine Elms.

Apply to Falconer and Mercer, 23 Leadenhall street, London; or at the Union S. S. Co.'s Offices, Southampton

OVERLAND ROUTE via MARSEILLES.—COMPAGNIE DES MESSAGERIES MARITIMES DE FRANCE.—French Mail Steam Packets leave Marseilles as follows:—

Every four weeks from March 19. For Port Said, Ismailia, Aden, Suez, Mauritius, Point de Galle (Ceylon), Pondicherry, Madras, Calcutta, Singapore, Batavia, Saigon, Hong Kong, Shanghae, and Yokohama (Japan).

To ALEXANDRIA fortnightly from December 8.

For passage, freight, and information apply to the Agents, 97 Cannon street, London; G. H. FLETCHER and CO., Liverpool; at the offices of the Compagnie des Messageries Maritimes de France in Paris, Lyons, Bordeaux, and Marseilles; or to Smith and Co., Rotterdam.

* Passengers Eastward of Suez, securing their berths in London, are entitled to the conveyance of their luggage free to Marseilles.

OVERLAND ROUTE.—

The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels by their Steamers for—

	From Southampton.	From Brindisi.
GIBRALTAR ... MALTA	Every Saturday, at 2 p.m.	—

GALLE..... MADRAS..... CALCUTTA ... PENANG ..... SINGAPORE ... CHINA ..... JAPAN	Saturday, Nov. 11, at 2 p.m. And every alternate Saturday thereafter.	Tuesday, Nov. 21 at 2 a.m. And every alternate Tuesday thereafter.
AUSTRALIA ... NEW ZEALND.	Saturday, Nov. 25, at 2 p.m. And every fourth Saturday thereafter.	Tuesday, Dec. 5, at 2 a.m. And every fourth Tuesday thereafter.

And all Ports touched at by the Steamers of the British India and the Netherlands India Steam Navigation Companies.

An abatement of 20 per cent. from the charge for the Return Voyage is made to Passengers who have paid full fare to or from ports eastward of Suez re-embarking within six months of their arrival, and 10 per cent. to those re-embarking within twelve months.

Through tickets to Brindisi can be obtained of Lebeau and Co., 6 Billiter street, E.C. (South Italian Railway Office.)

For Rates of Passage Money and Freight, WHICH HAVE BEEN MUCH REDUCED, and all other information, apply at the Company's Offices, 122 Leadenhall street, London, or Oriental place, Southampton.

STEAM SHIPS.—

The GENERAL STEAM NAVIGATION COMPANY'S powerful and first-class STEAM SHIPS leave from St Katharine's Wharf for—

HAMBURG—Every Wednesday and Saturday. Nov. 15 and 18 at 8 a.m. Saloon, £2; fore cabin, £1 5s. Extra vessels, carrying cargo only, leave also every Tuesday, Thursday, and Sunday morning. For particulars of freight apply to F. Stahlschmidt and Co., 90 Lower Thames street.

HAVRE—Every Thursday. Nov. 16 at 9 a.m. Saloon, 11s; fore cabin, 8s.

ROTTERDAM and the RHINE—Every Wednesday and Saturday. Nov. 15 at 10; 18 at 11 a.m. Chief cabin, £1; fore cabin, 15s. Return Tickets, 30s and 22s 6d.

ANTWERP, BRUSSELS, COLOGNE, and the RHINE—Every Tuesday and Thursday at noon. Chief cabin, £1; fore, 15s. Return Tickets, 30s and 22s 6d. Brussels, 17s 3d; Cologne, 30s 6d. Leaving Antwerp for London every Sunday and Friday at noon.

OSTEND, BRUSSELS, COLOGNE, and the RHINE—Every Tuesday Wednesday and Saturday. Nov. 14 at noon; 15 at 2; 18 at 4 a.m. Leaving Ostend for London every Tuesday, Thursday and Friday night. Chief cabin, 15s; fore, 12s. Brussels, 18s 10d; Cologne, 32s.

BOULOGNE—Daily (except Monday). Nov. 12 at noon; 14 at 1; 15 at 2; 16 and 17 at 3; 18 at 4; 19 at 5 a.m. Chief cabin, 11s; fore, 8s.

From Irongate Wharf for:—

CALAIS—Every Wednesday and Saturday. Nov 15 at 3; 18 at 4 a.m. Chief cabin, 11s; fore, 8s.

EDINBURGH—Every Wednesday and Saturday at 10 morning. Fares: Chief cabin, 15s; fore, 12s; deck, 7s.

NEWCASTLE—Every Wednesday and Sunday at 9 morning. Saloon, 12s; fore, 8s.

YARMOUTH—Every Wednesday at 3 afternoon. Saloon, 8s; fore cabin, 5s.

From Custom House Quay.

HULL—Every Wednesday and Saturday, at 8 morning. Chief cabin, 8s; fore, 5s.

From London Bridge Wharf for:—

MARGATE and RAMSGATE.

Offices, 71 Lombard street, and 37 Regent's circus, Piccadilly.

WILLIMAN'S ISLAND PHOSPHATE COMPANY, LIMITED.

Incorporated under the Companies Acts of 1862 *and* 1867.

Capital, £250,000, in Shares of £10 each.

Payment—£1 per share on Application, £1 on Allotment, and the Balance by Calls not exceeding £2 per Share, with intervals of Two Months.

PROSPECTUS.

This Company has been formed for the purpose of acquiring the property and business of the Williman's Island Phosphate Company, incorporated under, and by virtue of, an Act of the General Assembly of the State of New York, passed on 15th April, 1857, entitled "An Act to authorise the formation of Corporations for the purpose of mining, importing, and exporting Guano and other fertilisers," and recorded 3rd and 7th December, 1869, and for extending the operations and more fully developing the large and valuable bed of Phosphates in this island, now so extensively used in this country and on the continent.

The existing Company, which was established with a capital of $1,000,000, is possessed of part of the tract known as Williman's Island, in Prince William's Parish, Beaufort County, South Carolina, U.S., and extending to about 1,600 acres. It is situated fifteen miles from the Atlantic Ocean, in lat. 32½, long. 81½, and is formed by the creeks or inlets from the sea, which characterise the whole eastern coast of this State. The island is covered with timber of various kinds; but its chief worth consists in a large and valuable bed of Phosphates underlying the soil from four to seven feet beneath the surface. The preliminary measurements before the acquisition by the existing Company disclosed fully 1,000,000 tons of these Phosphates, but during the operations of the American Company they have discovered that the bed is entire throughout the island, in which case the available quantity is calculated to be not less than 10,000,000 tons. The vendors undertake to satisfy this Company that there is a minimum quantity of 5,000,000 tons of phosphatic rock, of an average of 60 per cent. of Phosphate of Lime.

The Williman's Island Company also hand over to this Company a line of ships, named respectively the Ellen Austin, 1,813 tons; the Calhoun, 1,813 tons; the Webster, 1,717 tons; the Arkwright, 1,266 tons; and the Energy, 966 tons register, suitable for shipping the Phosphates to this country and the Continent, so that the Company will be independent of chartering vessels at fluctuating freight, and be able to insure regular delivery of large quantities of their produce.

The island is fully equipped with houses for 100 to 150 labourers, manager's house, shop, forges, lighters, and all the appliances requisite for easy and rapid shipment.

The cost of putting the phosphate free on board at the island does not exceed 10s per ton; the highest freight and insurance by the Company's ships (all allowance being made) is estimated at 25s per ton; so that the phosphate can be delivered on the quay in Europe at a cost not exceeding 35s per ton. The price hitherto realised has been on an average 1s per unit of phosphate of lime, and on an average of 60 per cent. only, this price would leave a net profit of 25s per ton. The experience of the existing Company justifies the confident belief that from 40,000 to 50,000 tons may easily be disposed of annually, and with extended facilities for excavation and transit, this quantity might be largely increased.

Taking forty thousand tons per annum, being the quantity the Company's Agents state could be readily disposed of, as a basis for the estimate of probable profit, with a margin of 25s per ton, as above, the net annual income may be estimated at £50,000, which would give a return of 20 per cent. on the capital of the Company. It may be expected that in the course of twelve months even a much larger quantity will be exported, with a corresponding increase in the amount of profit to this Company.

The value of the phosphate, in this island is well known, and has been proved by the shipments which have been made to this country and the continent, and which have been found, on analysis, to be extremely rich in phosphate of lime. The accompanying report, by Dr Voelcker, the eminent consulting chemist to the Royal Agricultural Society of England, is the result of an analysis of an average sample taken up by hand from the beach unwashed, but which, if washed and freed from the sand and clay, would no doubt produce upwards of 65 per cent. of phosphate of lime. Conditional arrangements have recently been made for the use of machinery, by which this process of washing can be carried satisfactorily into operation; so that not only will the carriage of a large quantity of worthless sand and clay be avoided, but phosphate of a much higher standard be delivered in this country.

In a cargo just received by the "Speed" the referee chemists appointed by the purchasers return the amount of phosphate of lime at over 67 per cent.

The timber on the island has been carefully examined, and is found admirably suited for staves and heads of barrels, and it is confidently expected that a highly lucrative arrangement can be made for supplying barrels to England (irrespective of the American demand) at a price which will favourably compete with this market. As the timber is cleared the land is rendered suitable for growing cotton.

The whole of this valuable property, consisting of the island and all buildings and machinery thereon, lighters, ships, contracts, and completed organisation, will be transferred to the proposed Limited Company for the sum of £235,000, leaving £15,000 of working capital, which is ample, as the business involves no long credits.

The cargoes afloat on the 15th of October, amounting to about 2,000 tons, are handed over to this Company at prime cost—namely, 6s per ton, f.o.b.,—and these cargoes have already been disposed of at highly remunerative prices at various ports in the United Kingdom.

The only contract entered into on behalf of the Company is dated the 31st October, 1871, and made between Joseph Louis Spofford and Caleb Strong Marshall, of the one part, and William Hartley, as trustee on behalf of the Company, of the other part. This contract may be seen at the Office of the Company's Solicitors.

WILLIMAN'S ISLAND GUANO, ANALYSIS.

A careful and detailed Analysis of the finely-ground sample (unwashed) taken from the bulk at the Stores yielded the following results:—

Moisture	1·91
*Organic matter and water of combination	1·66
**Phosphoric Acid	26·23
Magnesia	·24
Lime	39·78
Potash	·21
Soda	·63
Chloride of Sodium	·05
Sulphuric Acid	2·50
Oxide of Iron	1·85
Alumina and a little Fluorine	4·64
Insoluble Silicious matter and soluble Silica	15·31
***Carbonic Acid	2·40
	100·00
*Containing Nitrogen	·03
Equal to Ammonia	·11
**Equal to Tribasic Phosphate of Lime	57·26
***Equal to Carbonate of Lime	5·00

The presence of traces of nitrogenous organic matter in this material appears to indicate its organic origin.

Williman's Island guano resembles nearest in character Cambridgeshire coprolites, and in a finely ground state it is a good phosphatic material for the manufacture of ordinary superphosphate of lime. The amount of oxide of iron in the sample of Williman's Island analysed by me is but trifling, and the percentage of carbonate of lime it is smaller than in best Cambridge coprolites. Williman's Island guano for these reasons is decidedly superior to many phosphates which retain a good deal of oxide of iron and carbonate of lime, which interfere with the production of soluble phosphate of lime.—I have the honour to be, Gentlemen, yours obediently,

AUGUSTUS VOELCKER, F.R.S., Consulting Chemist to the R. Agricultural Society of England.

Applications for shares may be made on the accompanying form to the Bankers, Brokers, or at the Offices of the Company. In the event of no allotment being made, the deposit will be returned in full.

FORM OF APPLICATION FOR SHARES.

(To be left with the Bankers.)

To the Directors of Williman's Island Phosphate Company (Limited).

November ..., 1871.

Gentlemen,—Having paid to your credit with Messrs Glyn, Mills, Currie, and Co., £ ..., being a deposit of £1 per share on my application for ... shares in the above Company, I request you to allot me that number of shares, and I agree to accept such shares, or any portion thereof you may allot to me, subject to the Directors having power to enter my name in the books of the Company for the shares to be so allotted, and I agree to pay the further sums due thereon and interest thereon, and the calls as they become due.

On October 28 was Published, No. X., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for October gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains

A FINANCIAL RECORD OF THE MONTH;

New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to October 25.

Advertisements for the next Number, to be published on November 25, must be sent, to insure insertion, on or before November 23.

The December Number of the INVESTOR'S MONTHLY MANUAL will give, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the latest quotations for 1870 (so as to indicate the Exact Movement during the Twelve Months), a Complete Directory, the names of the Markets where each Security is chiefly dealt in, a Financial History of the Year 1871 (including a Tabulated Chronicle of Events), besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. A copious Index will be added for purposes of reference.

This Double Number will be published on Saturday, the 30th of December.

OFFICE—340 Strand.

THE REDUCTION IN THE BANK RATE OF DISCOUNT.

The policy of the Bank of England has been in the mainf successful, and that will be its justification in the eyes of most people either against the very numerous critics who say that they should have done less, or those who, like ourselves, think that it would have been safer and more in accordance with principle if they had done more. The Bank wished to fill its till, and the till is full—at least fairly full and in comparison to all reasonable wants. And success like this goes a long way in the world.

It is indeed boldly said that the reserve would have been just as great if the Bank had never gone to 5, or even, we believe, to 4, per cent; that the exchange depends on the market rate and not upon the charge of the Bank; that foreign capitalists send their money here upon a consideration of what they can themselves get for their money here, and not upon a consideration of what the Bank charges others. And no one can expect us to impugn this doctrine, for we have been preaching it for weeks past. It is thoroughly certain that it is the market rate of interest which attracts capital here and not the Bank rate, for the plain reason that foreign capitalists can get the market rate, and have not the slightest means of getting the Bank rate. But then what is the market rate? and how far is it it independent of the Bank rate? Up to the present time indisputably the rate to be obtained for money in the open market has not been independent entirely of the Bank rate. On the contrary, the joint stock banks have fixed the rate they give upon the basis of that rate. In the present case this has been very material. We are assured that, in matter of fact, very large sums were transmitted hither from abroad in order to obtain that rate when it rose to 4 per cent., because it was the highest rate then current in Europe for money at short notice. And such is the natural effect. It is also to be remembered that the effect of the Bank of England's discounting only at a very high rate is to throw a very large body of discounters into the open market, and so raise the market rate. If any large holder of a commodity declines to sell except at an extreme price, the effect, as a rule, is to raise the price which other holders of that commodity can obtain. They ask less than this extreme rate, but not so little as they would have asked if the large holder who keeps aloof had been anxious to sell, and had come into competition with them. All the foreign money which has come has been attracted by the state of the foreign exchanges, and those exchanges have been greatly influenced by the market rate of interest, which, though it did not rise to the Bank rate, would have been far lower if the Bank had taken no unusual step, and had competed in its usual manner for bills.

We question indeed if those who say that the Bank ought to conform to the market rate have quite realised the meaning of what they say. The accounts of the Bank of England of last Wednesday would justify, if we took them by themselves, a far less rate of interest than 4 per cent. Let us compare the accounts, when the rate was 2 per cent. or less:—

	September 13.		November 15.
	£		£
Public deposits	5,943,645	.....	5,629,468
Private deposits	21,129,518	.....	22,903,908
Seven-day bills	562,770	.....	508,571
	27,635,933	.....	29,041,887
Reserve	14,423,619	.....	14,125,918

The account now is not quite as favourable, but it is nearly as favourable. And if the Bank chose to pursue the policy inculcated on it and to follow the market, it would immediately lower its rate to 3½ per cent. The reduction to 4 per cent. will scarcely get it any additional business—4 per cent. is far above the market rate. But if the Bank reduced its rate to 3½, the market would at once go to 3. If all the money we have is to be employed as usual, the market rate would be nearly 2, or less than that, just as it was in September.

It is indeed said that the money which has come now is the foreign money which must have come. "We had engaged "to pay money for certain French capitalists," it is said, "and unquestionably those French capitalists would have "sent us the money." But just suppose they had not sent it. Were we to sit still with the general exchanges against us, and hope these particular people would send us this particular money? In matter of fact, the fact that 4 per cent. could be obtained for this money did bring it somewhat earlier. But the policy of the Bank of England ought to have no exclusive reference to any special and individual money. When they are likely to be asked for more money than usual, they ought to have a much fuller till than usual; and this is all they should look to. If by any chance the money had not come from France, and the Bank of England had been found weak, without having taken any step to strengthen its reserve, all those who are now blaming them for raising the rate would have been outrageous against them for *not* raising it.

Some persons fancy that there is something contrary to the laws of "supply and demand" in the attempt of the Bank to raise the market and influence the exchange. But the rules of "supply and demand" are really quite in accordance with the maxims of prudent people. Suppose a large holder of tallow was under a contract to deliver a large quantity of tallow a month hence, and he saw no prospect of getting more during the month, of course he would ask so much for his tallow that no one would give his price, and that everyone would go elsewhere. If the quantity he had engaged to sell exceeded the quantity he had in hand, he would try to buy in all quarters; he would try to supply himself to meet the demand. In substance this is what the Bank have been doing. They are under a large contract "to deliver money," and naturally therefore they try to get money. They have tried to keep what they had, and they have tried to get more, and their attempt has succeeded. There is no magic in the words "supply and "demand." The supply only refers to the quantity of a commodity in the market, and the wish of the holders to sell it; the "demand" to the number of purchasers in the market, and the intensity of the wish to buy it. If any cause indisposes any considerable holder to sell, that will raise the price; if any cause (as having himself large liabilities to meet) makes a large holder wish to sell, this will lower the price. There is in principle nothing exceptional in the action of the Bank; it only happens to be under larger future contracts "to "deliver" than other people, and so has to look further and more carefully forward.

So far from the Bank having done too little on this occasion, we retain the opinion, on which we have formerly said so much, that it has not done enough. No doubt it has filled its till on this occasion, and as it has turned out. But, then, at what a cost? It has taught the market rate to be much more independent of it than it ever was before. The joint stock banks and bill brokers not only in the rates they *charge*, but in the rates they *give*, are beginning to act independently of it. The Bank has succeeded, but it is by impairing its *capital*, by destroying to a great extent those customs and traditions of the market, which gave it an unusual influence, and enabled it, with additional ease, to regulate the exchanges. In another like case hereafter the joint stock banks will not, or may not, follow the Bank rate, and so the money which was now sent here to gain the joint stock bank rate on deposit another time may not come here. If that should happen, the Bank will only be able to fill its till by borrowing on securities, as we have proposed, and so bringing the market rate to a level with their own; and they will have to use that expedient in worse circumstances than they would have used it now, for the market will be more independent of them, and be less used to be guided by them.

MR ISAAC BUTT ON DUALISM.

The plan which Mr Butt propounds for the future government of the United Kingdom is much better described by the word "dualism" than either by Home Rule or Repeal. He is not asking merely for the old demand—the repeal of the Act of 1800—for that would leave to the British Parliament and the Crown an ultimate sovereignty over Ireland in the last resort, which he evidently rejects. The Queen could not under his system veto Irish Bills any more than English Bills, however severe might be the pressure from her British advisers. Nor is he asking for Home Rule merely, for he includes the control of taxation, and if federalism were conceded, the Imperial Legislature must still govern in all matters of foreign policy, and therefore all matters connected with the taxation needed to support that policy; in all military matters, and therefore all matters connected with the taxation necessary to support the army; in all loans, and therefore in all matters of the taxation necessary to pay the annual interest—leaving to the Irish Parliament scarcely any control over finance whatever. This much power is reserved to the central Government, even in America, and this much is conceded by all Scotch members, even when, as often happens, they are separately legislating for Scotland. Mr Butt clearly would not leave so much. He refuses to enter into details, but he specifically says that Scotch freedom will not content him, that the Irish want complete internal self-government; that they desire to be a nation; that on every point "connected with the internal affairs of "Ireland the Irish Parliament shall be supreme." This is dualism and nothing else; and Mr Butt clearly perceives it, for he tells the Scotch they need not have Home Rule unless they like it, and has never mooted the subject of a division of England herself—that is, he has avowedly abandoned the federalism he still talks about. His followers in the Press indeed, more clear-sighted than himself, use the word, and acknowledge that they desire for Ireland the position of Hungary within the Austrian Empire.

A more impracticable method either of reconciling or dividing two countries it would be difficult to imagine. It does not succeed even in Austria, where the sovereign has effective prerogatives, where the great external foe is common to both divisions, and where the two halves of the monarchy are so nearly equal that they must perforce pay some respect to each other's opinions; and in Ireland every Austrian difficulty would be aggravated tenfold. A weak little State of five millions, virulently Catholic because enraged by the discontent of its own Protestant minority, and governed by a free but Catholic Parliament, would be dragged along by a very powerful State of twenty-five millions, in the last resort violently Protestant, and governed by a free Parliament, in which no Catholic would by any chance have a seat. The little country and the big one, moreover, would be divided by temperament, by ideas as to the objects of life, by fundamental laws,—for Ireland would not retain the British land system,—and ultimately by civilisation. They would be united only by a nominal loyalty to a powerless monarch, not belonging to the creed of the minority, and divided by every circumstance which affects the imagination, and by the bitter hatred certain to grow up between two free Parliaments, compelled by their relation to the central power to criticise each other, and by circumstances to utter their criticisms in a language both alike comprehend. Where is the reason for believing that so anomalous a relation could endure? Is it in the loyalty of the two peoples? Ireland has no native royal family, respected by *all* her provinces; she is greatly affected by America, and within a week of her "independence" she would be clamouring for Republican institutions. Is it in the common history of the two nations? That is to Irish minds, at all events, a mere record of violent wrong. Is it in their common origin? The Irishman is distinctively Celt, the Englishman distinctively Saxon, and of all races speaking European tongues, Celt and Saxon are least capable of fully understanding each other. Or finally, is it the community of interests which has helped so much to efface not so much the hatred between England and Scotland, as the recollection that any hatred ever existed? That community, so far as it exists, is surely a reason for the existing union, and not for partial separation.

We do not believe the Union on such terms would survive any great shock a week, and while it lasted it would be a source of perpetual annoyance and probably misery to both countries. Ireland over-populated, governed by the universal

suffrage of ignorant persons, and imaginatively impatient of her best resource—the cultivation of grass for pasture—would irritate England beyond measure by a strictly protective system, designed to force on manufactures, and by severe laws intended to repress smuggling. Fervently Catholic she would alienate Great Britain by establishing Catholic ascendancy, and would be compelled to restrain her own Protestants, who would resist, would perpetually appeal to England for help, and would at last become a class suspect. Intensely interested in foreign politics she would elect for Federal representatives none but men devoted to her wishes on that subject—that is, men who would have but one object in politics—to thwart the English system of foreign policy, which differs radically from the one acceptable on the Irish side of the Channel. Nothing last year could have induced an Irish Parliament to carry out an enlistment Act as against France. The Imperial Ministry would be incessantly taunted with their failures in obtaining Irish commercial Acts on Free-trade principles, would be afraid to take any step in foreign politics lest it should provoke Ireland to declare formally her dissent, and would be in serious danger from suspicions that they had privately assented to the Queen's consent given to specially Catholic Acts of the Irish Parliament. The Sovereign would be censured every day by Englishmen for Irish concessions, and by Irishmen for English sympathies; and as for the War Office, we almost question if it could work at all, the Irish Parliament incessantly interfering to "protect" its own subjects. Government in Ireland would be more suspicious, jealous, and exacting than it is now, and Government in England would be far weaker, till at last the stronger country, weary of the connection, would either end it, or once more attempt a fusion by the sword.

Mr Butt says nothing of all that happened when Ireland was governed by an independent Parliament; but it is difficult to believe that he does not know he is talking nonsense. In the first place, that Parliament never was independent, for its Acts were not valid without the consent of the Crown, which was only given on English and not Irish advice. In the second place, the evils we have predicted all happened, and the "Federal" Union became so intolerable that the Ministry resolved to end it at any price, hesitated between bribery and force, and finally adopted the former. And in the third place, there never existed at any time an Irish Parliament at all. The Assembly of corrupt aristocrats which Mr Butt dignifies by that name, was elected by the English and Scotch settlers, by people, that is, who in every circumstance except geographical position were identical with those who elected the rival Parliament in Great Britain. If, with all these circumstances in its favour, dualism was unbearable, what has occurred to make it more tolerable now? If two Legislatures, both Protestant, both English, and both monarchical, detested the leash which bound them, why should two Legislatures, divided by creed, race, and political sympathies, live together in amity and concord? Home Rule means either nothing—that is, a comparatively worthless concession of certain rights of passing private bills, or it means dualism, which has been tried, and which has utterly failed.

THE NATIONAL LOSS BY DELAYING TO PURCHASE THE RAILWAYS.

An interesting and able article in the last number of the *Quarterly Review* on "Industrial Monopolies" has revived attention to the various losses we sustain by our confused practice and errors in dealing with "industrial monopolies." The State commits mistakes in its method of dealing with the monopolies it retains, such as the Post Office, but its great error is the neglect either to retain in its hands, and in the hands of local authorities, such monopolies as railways, tramways, gas and water supply, docks, and the like, or to exercise a sufficient supervision in the public interest over the private individuals or companies to whom the work has been left. The errors in dealing with railways are naturally the most important branch of his subject, and it is clearly shown how the public are without protection against the evils of inharmonious working, excessive fares, and scanty accommodation. The logical conclusion of the article is that the only cure for the evils must be the acquisition of the railways by the State, as the public can only be protected by the incessant supervision of a Government department, which might as well administer the business directly. We must refer our readers to the article itself as an excellent summary of the State's relations to industrial monopolies; but there is one point in connection with the purchase of the railways by the State on which perhaps the reviewer is hardly urgent enough. He assumes that the State acquisition of the railways, except in Ireland, is out of the question except at a very remote date, but we should be disposed to think that the business cannot be too soon taken in hand, if at all. One reason is that the increase of railways in value is so rapid that the task of the Government in purchasing will become every year more formidable. The reviewer very properly remarks that "if at any time it shall be determined that "the Government are to purchase, they must certainly throw "over existing Acts, and treat the matter as one of public "necessity, giving the companies the present market value of "their property, with a percentage for compulsory purchase." But the period which has elapsed since the Royal Commission reported has added immensely both to the market value and the expectation of increased profit which would have to be allowed for in a compulsory purchase, while the future additions on this head are likely to be still more remarkable. A very few figures will show what the State has lost by delay.

In purchasing the railways, the people whom the State would have to deal with would be the ordinary shareholders. The creditors on debentures and the preference shareholders could be guaranteed their existing rights by the State, the preference shareholders, if necessary, acquiring the right to a perpetual rent-charge instead of an annual dividend. Let us see then how the ordinary shares are valued now compared with the price a few years ago, when the question was being agitated. The discussion arose in 1865, but it was not till 1867 that the Commission reported, and 1867 is also a better date as the practice of paying dividends out of revenue had given the shares a fictitious value in the earlier year.

The following table shows how much the market value of the principal railways has increased between 1867 and now:—

Comparative Price of Principal Railways (Ordinary Stocks) in 1867 and 1871.

	Price in 1867.			Present Price.*	Increase of Present Price over Medium Price in 1867.
	Highest.	Lowest.	Medium.		
					per cent.
Caledonian	124	70	97	118	21½
Great Eastern	35⅝	25½	30⅜	47½	53
Great Northern	122⅜	104	113⅜	138	22½
Do A	135½	107	121½	163	35
Great Western	56⅞	38½	47 11/16	108½	126
Lancashire and Yorkshire	132⅜	118	125⅝	156	25
Brighton	91⅜	48	69 1/16	70	nil.
London and North-Western	125½	108⅛	116⅞	145	24
London and South-Western	89½	72	80½	108	33
Sheffield	56½	43	49¼	70	40
Midland	127	99	113	139	23
North British	40¼	27½	33⅞	60	76½
North-Eastern	109½	92	100½	175	73
South-Eastern	74⅜	60¾	67 7/16	96½	40

* In the course of the last day or two there has been another important rise in the stocks of the principal companies, which would make the difference between the present price and the price in 1867 still greater than what is here shown.

The results thus brought out are very striking. In one case, the Great Western, the increase of price over the *medium* price of 1867 is equal to 126 per cent.; in North-Eastern it is 73 per cent.; North British, 76½ per cent.; Great Eastern, 53 per cent.; and South-Eastern, 40 per cent. On the average, the increase is between 25 and 50 per cent., and as an inspection of the table will show, the percentage would have been much higher if we had taken the lowest price in 1867 for comparison, instead of the mean between the highest and the lowest. Stated shortly the conclusion is, that the State in 1867 might have bought up the railways at an advance of nearly 50 per cent. upon the ordinary shares, and would already have been recouped. When it is considered that the present prices are based upon the expectation of a current dividend of 5 per cent., and that the State could borrow at less than 4, even on the large scale here necessary, it will be evident that a compulsory purchase in 1867, although on the onerous terms suggested, would have been very profitable to the State.

These facts may be shown still more clearly in another way. From a table which we subjoin, it will be seen that the value of the ordinary stock of the railways named—

	£
At present prices is	163,735,000
At the medium price of 1867 would be	119,311,000
And the total increase of value is	44,424,000

Upon the value in 1867, as thus estimated, this is an increase of 37 per cent., and the mode of valuation, it should be stated,

necessarily shows a smaller real gain than what the State might have had. We assume that the ordinary stock in 1867 was as large as at present, but in fact it would be smaller, and the State would have gained meanwhile by borrowing the additional capital expended on its own terms. Still if the State had paid in 1867 to the ordinary shareholders of the above railways 44,424,000*l* more than the market value of their shares, which would have been an enormous bonus, it would have found the excess value to be already made good, altogether irrespective of any improvements which it must have introduced into the management. When the history of the last few years is looked into, it is impossible not to regret that the opportunity presented four years ago of acquiring the business of the railways on comparatively easy terms was not taken advantage of.

The disadvantage to the State in acting in future is very plain. The experience of the last few years has given railway shareholders a glimpse of the enormous value of their monopoly, and they will not part with it on easy terms. How much, say, is to be allowed the Great Western or North-Eastern shareholders for the compulsory purchase of a property which has doubled, or nearly doubled, its value in four years, and is now increasing annually at the rate of from 30 to 40 per cent. on the nominal par value? We should not be at all surprised if the shareholders stood out for treble or quadruple the present prices, and if it was not found expedient to grant them their demands. At any rate the longer the delay the more we shall have to pay, and we hope this point will not be forgotten by those who are anxious for the State to acquire the railways, but who assume, from the magnitude of the work and the state of public opinion, that their object is not to be attained except at a remote date. We doubt if it is now possible to attain it, but a few years' postponement will make the task a most formidable one.

COMPARATIVE CAPITAL VALUES of PRINCIPAL RAILWAYS (ORDINARY STOCKS) in 1867 and 1871.

	Present Ordinary Capital.	Value at Present Prices.	Estimated Value at Medium Price of 1869.	Increase of Value since 1867.
	£	£	£	£
Caledonian	4,400,000	5,192,000	4,268,000	924,000
Great Eastern	8,450,000	3,990,000	2,583,000	1,407,000
Great Northern	7,500,000	10,350,000	8,503,000	1,847,000
Great Western	11,500,000	12,478,000	5,513,000	6,965,000
Lancashire and Yorkshire	12,700,000	19,812,000	15,923,000	3,889,000
Brighton	6,800,000	4,760,000	4,760,000	...
North-Western	28,400,000	41,180,000	33,192,000	7,988,000
South-Western	7,800,000	8,424,000	6,299,000	2,125,000
Sheffield	5,500,000	3,850,000	2,736,000	1,114,000
Midland	11,300,000	15,707,000	12,769,000	2,938,000
North British	2,600,000	1,560,000	881,000	679,000
North-Eastern	16,600,000	29,050,000	16,725,000	12,325,000
South-Eastern	7,650,000	7,382,000	5,159,000	2,223,000
	131,150,000	163,735,000	119,311,000	44,424,000

Average increase of value since 1867 equal to 39 per cent.

MR SCOTT RUSSELL'S EXPLANATION.

MR GLADSTONE at Greenwich likened Mr Scott Russell to a preacher in some great church with audiences almost hidden from each other, who gives out his text first to the congregation on his right, saying—"My text is taken from so and so," and then turning to the congregation on his left, raises his voice again, and says—"You will find my text in so and so;"—only, remarked Mr Gladstone, in Mr Scott Russell's case, he seems to have given a text out of the Old Testament to the one part of his audience, and one out of the New Testament to the other. And clearly "the peers, baronets, and single "commoner" who heard of Mr Scott Russell's vague hope of improving the social condition of the working classes, if only those peers, baronets, and single commoner would give them a helping hand, heard nothing at all of the details of Mr Scott Russell's legislative intentions. And clearly, too, the council of skilled workmen who heard of the generous desire of the peers, baronets, and single commoner to help them, had no idea at all that, so far from having concurred generally in the drift of their seven demands, these distinguished persons had not accepted one of all the seven principles which were laid down as the bases of the legislative union. Mr Scott Russell had so successfully disguised from the one part of his audience the practical object which he had proposed to the other part of his audience, that directly they managed to meet face to face and obtain an explanation without his intervention, it was found that Mr Scott Russell had not brought them to agree upon any one point whatever by the six months' laborious effort of which he boasts so much. Well, now we have got Mr Scott Russell's own explanation addressed to *both* the parties for whom he has hitherto acted as a mysterious go-between, nor can we say that it explains in the least the curious discrepancies in the testimony which we had previously received. It is a sort of speech from the throne of his own, beginning—"My Lords, gentlemen, "and fellow-workmen," and dated from Westwood Lodge, Sydenham. Though this remarkable document does not explain the strange misunderstandings in which Mr Scott Russell had managed to involve the aristocratic and democratic elements of his audience, it does envelop the movement in a certain pomp of antiquarian royalty. "The New Social Move- "ment" connected more immediately with his name has, it seems, a historic root in the past, and that of no undignified kind. It originated, he assures us, in the counsels of the late Prince Consort, who, Mr Scott Russell ventures to assert, "had "he lived till now, would have been the leader of our social "movement." "If I must call anyone the founder of this "movement, I prefer to attribute it to the late Prince Consort, "who first informed me of what to me then was an astounding "fact—that the masters, foremen, and working men of certain "countries of the continent were much better educated, and "their interests much better cared for by their Govern- "ments than our own, and he furnished me with letters of "introduction, by which I was able to study all that wonder- "ful organisation for the culture and discipline of the people, "which, in the case of the Prussian nation, has since produced "such results. The great Exhibition of 1851, which took place "soon after, was nothing more than an attempt to raise the "standard of education and practical culture of the people, "and of that under Prince Albert I was one of the founders." So that Mr Scott Russell's attempt to combine peers and artisans for a great experiment in social legislation in 1871, is nothing more than a practical corollary from the premisses furnished twenty years ago by the first Industrial Exhibition. The late Prince Consort took an interest in working men, and thought that they were better provided for in some foreign countries than at home;—therefore, he would have formed a secret league between a committee of noblemen and baronets (including one commoner) and some skilled artisans, to carry a certain social charter of seven points, of which some of the articles are of very doubtful worth, and several others, which represent what is desirable in itself, do not represent what is attainable by legislative means. Can anything be clearer than that a social reformer, who thinks it worth while to go back twenty years to establish the not very important fact that Prince Albert was anxious about the condition of labour in England, and furnished Mr Scott Russell with letters of introduction to certain gentlemen abroad who helped him to understand the condition of labour in these foreign countries, must be decidedly at a loss to explain the misunderstandings into which he has led his recent colleagues in the late "Social Movements?" Examiners in mathematics constantly find ill-prepared students, instead of answering their questions, guilty of some such transparent *ruse* as this. They say —"Before we can answer this question it is first necessary to "prove"—something else which they do happen to have prepared, which accordingly they proceed to demonstrate; and it uniformly happens that the examinee who gives this answer is never fortunate enough to reach the point at which it becomes possible to answer the question really put. So it is with Mr Scott Russell's explanation. He was asked to explain how it was that the peers, baronets, and single commoner had understood him to pledge them to nothing whatever, indeed had explicitly informed him that they were not and could not be pledged to any specific measure whatever, while the skilled artisans had understood equally plainly that their more aristocratic colleagues had given their assent to the general drift of the seven social reforms. Mr Scott Russell does not reply to this question at all. He says—"It is first "necessary to show how the social movement originated," for which purpose he goes back twenty years, and conjures up the Royal form of the Prince Consort. But he never gets to the only question which the world has asked of him, and the only one in the answer to which there is any interest. We all know that Mr Scott Russell thought he could initiate an important movement, that he formulated, or got the working men to formulate—it now seems it was he himself who drew the formula—their demands, and that he worked hard, and for a time unsuccessfully, to get benevolent peers to assent to his proposals. The only mystery was how he had managed to persuade him-

self that at last he had succeeded in getting together a body of legislators who thought they could work with the artisans on a firm platform of social reform. These legislators tell us, and prove to us, that they had not accepted this platform at all—quite the reverse. The working men state that Mr Scott Russell had explicitly assured them that the illustrious unknown had accepted this platform. Mr Scott Russell's return from Vienna was looked to to explain the strange inconsistency. It has explained nothing of the sort. It has only told us that Mr Scott Russell—inspired by the memories of what was achieved and talked of in 1851, and alarmed by what happened in France in 1870—undertook to form an alliance between peers and workmen, and piqued himself on his own success, without having attained any; and the only part of the information which is new to us is the historic introduction as to the genesis of the idea in Mr Scott Russell's mind,—a curious but hardly instructive piece of philanthropic autobiography, considering that the only possible interest it would have had—that of the origin of a grotesque political alliance—it fails to have, inasmuch as the alliance has never been formed, no basis having ever been agreed upon. If we are to have careful autobiographic introductions, explaining the origin of all the barren schemes in the world, when is literature to end? Let us leave to the Germans, or some more diligent people, to write prolegomena of the inventions that did not invent anything. Our energy is too limited for such works of supererogation as these.

However, though Mr Scott Russell has only added an irrelevant chapter to the history of the late—social movement we can hardly say,—say rather social standstill, the whole abortive scheme will not be without its use if it teaches the working classes the radical worthlessness of these ostentatious secret diplomacies between persons who have hardly any political principles in common, and whose basis of agreement, if one could for a moment be found, must necessarily be artificial and liable to the most opposite interpretations. In this case it is obvious that Mr Scott Russell, after wasting what he tells us was the hard labour of six months, had accomplished just nothing. When the peers, baronets, and commoner came to understand what the workmen really expected of them, they were astonished and affronted at the imputation of having given their assent. When the workmen came to understand what it was and was not that their distinguished allies had agreed to, they were astounded at Mr Scott Russell's congratulations on so empty an achievment. Mr Scott Russell's only success was in his mystification. While the allies did not meet and converse they were satisfied with each other. The moment a word was exchanged, the illusion disappeared. Let them learn therefore for the future that diplomacy in such matters is a mistake. If they can get peers to advocate any of their reforms, as they got Lord Ashley (now Lord Shaftesbury) to advocate the Ten Hours' Bill, well and good; the alliance is open and above-board, and no party to it will mistake the obligation under which he stands. But let them beware for the future of mysterious mediators, whose strategy consists in keeping either party in the dark as to the difficulties felt by the other party. That can never come to any good, and least of all between negotiators in very different spheres of political experience and association. Between such as these there is likely to be misunderstanding enough, even if all things are open and above-board. With mystery and manipulation between, the only result can be what in this case it has been,—mutual disappointments, and the various uncomfortable feelings attaching to the dupes of a pompous preparation for a public fiasco.

LICENSING REFORM.

THE BEST FORM OF LICENSING AUTHORITY.

The Wine and Beerhouse Act, 1869, withdrew from the Excise the power they had exercised for a long period in the granting of Beer Licenses independently of the local magistrates, and as a matter of mere revenue. By this change the Magistrates became the permanent Licensing authority in their several divisions, subject to appeal to the Quarter Sessions. It is computed that during the two years the Act has been in force, about 9,000 beerhouses of questionable character have been suppressed, and the general tendency of the police reports strongly indicates improvement in the character and management of public and beer houses. As the magistrates are now the *sole* authority, they naturally exercise greater control over the trade. Moreover they have since 1869, as a rule, refused to license additional houses, on the recognised plea that the public are already supplied in excess with places for the sale of drink. Houses therefore already licensed have become possessed of a sort of patent, and are desirous, by proper conduct, to retain it.

After the failure of Mr Bruce's Bill last Session, the temperance members succeeded in passing the Intoxicating Liquors (License Suspension) Act, 1871, under which, until 1 Sept., 1872, the magistrates are restrained from granting any licenses in addition to those already in force, except under very special conditions,—the purpose of the Act being to keep the field clear of new interests prior to the introduction of the long-pending Government measure.

This is the present state of the law; and it is founded on two assumptions of fact, admitted on all hands to be indisputable, namely—first, that drunkenness among the working and poorer classes has become a vice so abominable and dangerous that it must be vigorously repressed; and second, that excessive drunkenness is in great measure a consequence of an excessive number of ale and beer houses. The report of the Convocation of Canterbury Committee on Intemperance—a remarkably distinct and business-like document—and other evidence from all sorts of quarters, have established beyond cavil that in places where ale and beer houses have been limited in reasonable proportions to the population, intemperance has been most markedly reduced or prevented.

There are five theories or proposals before the public regarding the best kind of Licensing Authority. These are—first, the Free-trade principle under which the whole business should be regarded as one of revenue, and beer and spirits treated like bread or potatoes for all purposes of public sale,—the law relying on the honesty and vigilance of the police to repress disorderly and riotous houses. Ten years ago this view of the case had many supporters; but the result of the trial of the Free-trade plan at Liverpool for a period of years has virtually driven *laisser faire* out of the field as concerns the sale of beer and spirits. The basis of the system—that is, the honesty and vigilance of the police—was found in experience to be quite unsound. The publicans were able, in a thousand ways, to circumvent or silence the very officers who were set to keep them in order. The second scheme aims at amending and fortifying the present Licensing power as vested in the Magistrates, by enacting that within some prescribed period the existing number of licensed houses shall be reduced to a fixed proportion of houses to population,—as, for instance, not more than one house to 500 population in boroughs;—an increased tax to be levied on the surviving houses to provide a fund to be applied in buying up and closing houses in excess of the standard;—various amendments of detail as regards hours of closing, Sunday opening, and the like. This scheme is energetically represented by the "National Union for the Suppression of "Intemperance" (Adam street, Strand), which has for its Chairman, Mr Bremner, an intelligent magistrate at Manchester. The third scheme is devoted to the removal of the magistrates as the Licensing Authority, and to replacing them by a Licensing Board, to be elected by the ratepayers of each locality; but the Board to be strictly bound not to grant licenses beyond a given proportion of houses to population. A variety of other details are also set forth. This scheme has a good deal in common with Sir Wilfrid Lawson's Permissive Bill; but we do not understand that it goes the length of that Bill in proposing that, by a certain majority, any locality may determine that within its limits there shall be no public sale whatever of intoxicating drink. This third plan is represented by the "National Association for Promoting Amendment in the Laws "relating to the Liquor Traffic," and has Sir R. Anstruther, Bart., M.P., as the Chairman of its Council. The fourth plan is that of the "Teetotallers," or total abstainers, acting for many years past through the powerful body known as the "United Kingdom Alliance." This party go the whole length of the prohibitory Maine Liquor Law, and only support the Permissive Measure of Sir Wilfrid Lawson as a step in their direction. Their scheme is Utopian and impossible, but it would be puerile and unjust not to acknowledge the vast and beneficent power they exercise over tens of thousands of working men's families; or to withhold from the energy, intelligence, and power of their best advocates—Mr Raper, for example—the admiration which is due to qualities of rare excellence. The fifth and last plan is to retain the Magistrates

as the Licensing authority, but to give them more power of supervision and control; and by abolishing appeals from their refusals of licenses, to encourage them to seek the systematic improvement of their several districts.

These are the different and rival schemes for dealing with this most urgent but most difficult subject. At the recent meeting of the Social Science Association, at Leeds, an entire day was devoted in the Fourth Department (Economy and Trade) to the discussion of the specific point of the best Licensing Authority, leaving to a second day the consideration of details. With the exception of the "Free-trade plan"—in favour of which no advocate appeared—all the four remaining schemes were well represented, and the discussion was rigidly confined to the practical side of the question, and was not permitted to wander into vapid generalities. No formal vote was taken, but the conclusion most commonly accepted was that the debate had been strongly in favour of the Fifth scheme—that is, the retention of the magistrates as the Licensing power, supported and controlled by some such measure as is proposed by the second plan, namely—that of the "National Union."

Except by the United Kingdom Alliance party, the Permissive and Prohibitory Schemes were not encouraged, more especially in the face of cogent evidence indicating that even in Maine itself, and in the very town of Neal Dow, the author and apostle of the Prohibitory Law, that law is systematically and flagrantly set at defiance. It is in truth in advance of the moral condition of the people, and hence is the direct occasion of an amount of lying and subterfuge of the most pernicious and cool example.

BUSINESS NOTES.

M. Thiers and the French Treaty.—The Paris correspondent of the *Daily Telegraph*, who has interviewed M. Thiers, communicates an interesting piece of information as to the French President's view of the Commercial Treaty. Out of nearly a hundred articles affected by the Treaty, it seems the French Government only wishes for a change in three, "and even these three may be some day re-"stored to their present condition." No change at all is asked for as regards iron, coal, mineral oils, beer, and numerous other goods; the only demands are for a "slightly in-"creased" tariff upon cotton, cotton goods, and twist. So far the account here given corresponds to the reference to the modifications asked for, which we made last week; but there are two additional statements made by M. Thiers which are worth noting. First, the alleged reason for asking the proposed changes is to put the articles referred to of English origin upon something like an equality with French goods of the same kind, "which," says M. Thiers, "being "greatly in want of money, we are obliged to tax more "heavily than before." This is a very curious statement, and we wish the correspondent had cross-examined M. Thiers on the point. The truth is, as we pointed out long ago, that if the French Government imposes taxes upon French goods, they are quite at liberty, under the Supplementary Convention of 1861, to impose equivalent duties on similar articles imported from England. The clause of the Convention runs:—

> It is equally agreed between the high contracting powers that, in the event of the modification or the suppression of the duties of excise now imposed upon French manufacturers, goods of British origin and manufacture shall, with regard to such duties of excise, be subjected to the same conditions as similar French goods. If, however, in consequence of the suppression of any of such duties, the Government should establish a supervision or control, or an administrative system over certain articles of French manufacture, the direct or indirect charges which may be borne by the French manufacturer shall be countervailed by an equivalent surtax imposed upon similar British articles. It is further understood, that if drawbacks are granted to other articles of French manufacture, the duties of customs which are imposed upon similar articles of British origin or manufacture shall be augmented by a surtax equal to the amount of the drawbacks.

Clearly under this clause the French Government may impose taxes on English imports to equal its own excise duties, and it cannot be necessary, therefore, to denounce the Treaty for the purpose contemplated by M. Thiers. Probably he meant that the heavy general taxation of France increased the cost of production of all articles of French manufacture, so that it was expedient to increase duties on imports; but this is only the old Protectionist heresy in another form. A distinct assertion that the Treaty interfered with the establishment of excise duties on French manufactures would have been a different matter. The second point in M. Thiers' statement was this—that "the "Empire had before the war fully intended to modify the "same articles of the Treaty which we propose to touch, and "to quite as great an extent." This is a very singular and curious statement; but if it be true, it should serve the very opposite purpose of that which M. Thiers intended. It proves better than anything else the persistence of Protectionist notions in France, and that the changes are asked for, not by reason of the war and its consequences, but purely and simply from a Protectionist motive, which would in any case have made itself felt. This is all the stronger a reason for not yielding to the demand, and for submitting instead to the denunciation of the Treaty. If we yield, it will be clear to all Europe that we have lost confidence in Free-trade principles, just at the very time when the conditions of trade are such that even M. Thiers can hardly see his way to break the Treaty which gave these principles increased currency on the continent.

The Repayment of the German Debt.—In the course of the Coinage Debate last week, the Prussian Minister of Finance, Herr Camphausen, made rather an interesting statement respecting the Treasury bills or bonds which are under notice to be repaid next January and February. It had been objected, he said, that the operations of repayment would be impeded by the new coinage, because some of the Treasury bills of the Confederation had been created in English money, and they might have to repay them in that money. To this the Minister replied, that *already* a large portion of these Treasury bills had been repaid. "I can inform "the previous speaker," he said, "that at this moment the "Treasury of the North German Confederation possesses "3,600,000*l.* of these Treasury bills. We have naturally "interpreted the authority which the Reichstag has "given us to issue notice of repayment, as an authori-"sation to buy them back at suitable prices, so that "the money may not lie idle in the Treasury, but appre-"ciably alleviate the burdens of the State (bravo!); "and it has not only contributed to alleviate the burdens of the "State, it has facilitated that 'equalisation process' which "the previous speaker so powerfully depicted—large sums "being thrown on the market to find new investments. That "is a reason why all values in Germany have kept going up, "and I anticipate that this rise in value will continue for "some time longer." This is obviously a very important statement of the Finance Minister, quite apart from the theory as to the effect of keeping money for the new German coinage, which it is intended to refute. We learn now for the first time that the German Government has been using its indemnity money to a material amount in repurchasing the bonds which are to be repaid next January and February. To what extent exactly this has been done we do not know, as the Minister only speaks of the bills expressed in sterling money, 7,500,000*l.*, whereas the whole amount noticed to be repaid is 15,000,000*l.* Of course to the extent the German Government may use the instalments about to fall due in a similar manner the less gold will have to be sent to Germany, and we are glad to see that the German Government professes to be sensitive to the saving of interest. The statement, however, also shows that the German Government has all the greater future power over the money market, for the more it has repaid the more on balance it has to draw out of the European money market. There is one point on which there can be little doubt. Now that the proceedings of the German Government in regard to receiving the indemnity and repaying the debt, are so important, they should be carefully made public. A Government causes great mischief by conducting such transactions in the dark, and in the end it is itself a loser by the uncertainty and confusion it creates in the markets where its financial operations are carried on.

Premiums on New Companies.—One of the most important points on which a would-be investor in new companies or undertakings has to be warned, is the fallacy of the quotations of premiums at which the shares or stocks are dealt in immediately on the issue of a prospectus. A company is hardly announced to the public before it is reported that the shares are already being dealt in at a premium on the Stock Exchange. Many foolish people, who would only be too ready to seize the golden baits held out to them without this induce-
